C) DETAILS FOR COMPLIANCE WITH ANTIMONEY LAUNDERING REGULATIONS OF SEBI

Prevention of Money Laundering Act, the SEBI Circulars on Anti Money Laundering and the Client Identification implementation procedures prescribed by AMFI interalia require the AMC to verify the records of identity and address(es) of investors. To ensure adherence to these requirements, investors are required to approach Points of Service (POS) (list of POS available on amfiindia.com) appointed by any of the KYC Registration Agency and submit documents for completion of appropriate KYC checks. The details for KYC compliance can also be downloaded from AMFI website, www.amfiindia.com or website of the mutual fund, www.bandhanmutual.com. - form has been rejected, as the case may be. The statement of account will be triggered on the STP installment date similar to a normal switch transaction.
- 11. Change in target or source scheme will not be permitted. Any such request will be construed as de-registration from the existing facility and re-registration for the new facility in the new source / target scheme, as applicable. The tracking will commence post successful registration by CAMS (Registrar and Transfer Agent).

12. Fixed STP Plan:

- Offers unit holders the Fixed Systematic Transfer Plan facility at daily, weekly Day wise (Transfer on every Monday), weekly - Datewise (Transfer date will be 7th, 14th, 21st, 28th of the month), fortnightly (Transfer date will be 1st, 16th of the month) and monthly (Any date except 29th, 30th, 31st of the month) intervals.

13. Capital Appreciation STP Plan:

- I. The source scheme should have Growth option.
- II. The date on which the request is given by the investor is entered in the system as commencement date. The capital appreciation will be calculated from the commencement date and the investor's opted start date.
- III. Frequency: Monthly, Quarterly, Half yearly, Annual. The capital appreciation will be determined on the next business day if the 30th, 90th, 180th or 366th day turns out to be a non-business day for the switch-out scheme.
- IV. Monthly Option Any day STP except for 29th, 30th & 31st; Quarterly Option Any day STP except for 29th, 30th, 31st of the first month of each quarter which may start from any month; Half yearly Option Any day STP except for 29th, 30th & 31st of the first month of each 6 month period, Annual Any day STP except for 29th, 30th & 31st of the first month of a 12 month period.
- V. If the commencement date is 15th December 2016 and if the investor provides the start date 1st January 2017, then capital appreciation for first trigger will be calculated between the commencement date (15th December 2016) and the investor's opted start date (1st January 2017)
 - a. For Monthly frequency the subsequent trigger date is 1st February 2017
 - b. For Quarterly Frequency the subsequent trigger date is 1st April 2017
 - c. For Half- yearly Frequency the subsequent trigger date is 1st July 2017
 - d. For Year yearly Frequency the subsequent trigger date is 1st January 2018

- VIII. There will be no upper limit on the Capital Appreciation Switch out amount.
- IX. The investor will have to mention the start and end date. The investor may choose to mention the start date and the number of installments. In case the start date is mentioned but end date is not mentioned and number of installments is not mentioned, the application will be registered for the minimum number of installments. In case the end date is mentioned but start date is not mentioned, the application will be registered after the expiry of 10 days from submission of the application from the default date i.e. 10th of every month / quarter / half year / annual provided the minimum number installments are met.
- 14. The switch will be triggered only if the required minimum capital appreciation clause is achieved. If this is not the case as on the trigger date the switch for that respective month/quarter/half year/year will be skipped. There is no limitation on number of skips.
- 15. If any trigger is skipped for a particular frequency due to the appreciation amount being less than the minimum amount, the subsequent tracking of the capital appreciation will continue with the amount as on the last executed STP.
- 16. The calculation of capital appreciation will be done at a transaction level in the respective scheme and folio. For example: If the investor has opted for this facility (monthly frequency) and CAMS (Registrar and Transfer Agent) has registered the STP in their system on 1st January 2017. All subsequent lump sum purchases (including switch-ins) in the source scheme will be tracked from the date of purchase for a period till the next Cap STP date. If at an individual transaction level there has been a minimum appreciation of INR 500, then such a transaction will qualify for switch and accordingly the capital appreciation amount would be calculated and switched to the target scheme. For all qualifying transactions, the switch amount into the target scheme will be a single collective amount after adding transaction level appreciation for all qualifying transactions.

Investment Strategy

 $Subject \ to \ the \ Asset \ Allocation \ pattern, the investment strategy \ of the \ Scheme \ shall \ be \ as \ under:$

The scheme is an open-ended thematic scheme and endeavors to provide long-term capital appreciation through investment primarily in companies which are embracing innovation theme and employ innovation in products, distinguished processes, and/or business models. The fund will primarily invest in businesses that aim to have a relatively higher market share in a new industry with significant growth potential and have a focus on higher research and development.

The fund will be actively managed and will have the flexibility to invest across market caps and sectors with a focus on high-quality companies that are early trend adopters. The fund manager will predominantly follow a bottom-up approach to seek but not be limited to companies that exhibit strong innovative characteristics.

The innovation framework that the scheme uses focuses on three key aspects i.e., Leading Innovators, Rising Innovators, and Emerging Innovators (LRE).

Leading Innovators: Companies that are consistently researching and disrupting with new ideas, technologies, and strategies, setting new standards, and defining the business landscape are "Leading Innovators". These companies tend to gain market share from the traditional players and have the ability to anticipate and meet evolving market needs establishing them as the forefront drivers of innovation. These companies have the trait of being the pioneers in identifying new trends and adjusting their offerings to quickly take advantage of those trends.

Rising Innovators: A "Rising Innovator" characterizes a company poised for growth and success in the innovation arena. These are positioned just below the status of a "Leading Innovator," and this segment signifies notable potential. These companies are making strides by introducing fresh ideas, cutting-edge technologies, or inventive approaches within their industry. As they actively progress and garner recognition for their innovative pursuits, they are becoming increasingly prominent players in the dynamic landscape of their respective markets.

Emerging Innovators: "Emerging Innovators" are innovation aspiring companies and may be in the early stages of transforming their business models, incorporating new technologies, or fostering a culture of creativity to position themselves for future growth and success in the stock market.

For example a company following innovation theme may be a financial services company which started as a brick-and-mortar enterprise and rapidly changed to a digital platform, to augment its scale with constant innovation and investment in technology. Further, it kept adding investment products to its basket to have a larger wallet share.

While creating the universe and selecting the stocks the fund manager will focus on the fundamentals of the business, the robustness of the business model and potential for growth, the quality of management, governance standards, the financial strength of the company, market leadership, etc.

The sectors/space/theme in which such companies may operate may include but may not be limited to:

Sector
Financial Services
Information Technology
Oil, Gas & Consumable Fuels
Fast Moving Consumer Goods
Automobile and Auto Components
Healthcare
Capital Goods
Consumer Durables
Metals & Mining
Power
Construction
Consumer Services
Chemicals
Construction Materials
Telecommunication
Services
Realty
Textiles
Media, Entertainment & Publication

The fund will have the flexibility to invest in a broad range of companies with an objective to maximize the returns, at the same time trying to minimize the risk by reasonable diversification.

Though every endeavor will be made to achieve the objective of the Scheme, the AMC / Sponsors / Trustee does not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.

Risk Profile of the Scheme & Risk Mitigation Factors

Scheme Specific Risk Factor

Risks associated with Capital Markets or Equity Markets

- Investing in a sectoral/thematic fund is based on the premise that the fund will seek to invest in companies belonging to a specific sector./theme. To this extent investment universe of the fund will be restricted as compared to the broader diversified market.
- Also, as with all equity investing, there is the risk that companies in that specific sector will not achieve its expected earnings results, or that an unexpected change in the market or within the company may occur, both of which may adversely affect investment results. Thus investing in a sector specific fund could involve potentially greater volatility and risk.
- Excessive competition from domestic as well as international players will have a significant bearing on the sector.
- The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume
 volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any
 other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual
 securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may
 fluctuate and can go up or down.
- Equity instruments by nature are volatile and prone to price fluctuations on a daily basis due to both micro and macro factors. Trading
 volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of financial
 markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability
 of the Scheme(s) to make intended securities' purchases due to settlement problems could cause the Scheme(s) to miss certain
 investment opportunities.

- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the
 overall trading volume on the stock exchanges. Money market securities, while fairly liquid, lack a well-developed secondary market,
 which may restrict the selling ability of the Scheme(s) and may lead to the Scheme(s) incurring losses till the security is finally sold.
- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Scheme(s) can go up and down because of various factors that affect the capital markets in general.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in
 comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the
 Regulatory limits, the AMC may choose to invest in unlisted securities that offer attractive yields. This may however increase the risk of
 the portfolio.

Risk Associated with Investing in Debt / Money Market Instruments:

- The NAV of the Scheme is likely to be affected by changes in the prevailing rates of interest.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated/unrated securities offering higher yields. This
 may increase the risk of the portfolio.
- Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly
 by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could
 cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Scheme's
 portfolio due to the absence of a well developed and liquid secondary market for debt securities would result, at times, in potential
 losses to the Scheme, in case of a subsequent decline in the value of securities held in the Scheme's portfolio.
- Different types of securities in which the scheme would invest (bonds / money market instruments etc.) as given in the Scheme Information Document carry different levels and types of risks. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. Corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
- As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to
 changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero
 coupon securities that offer attractive yields. This may increase the risk of the portfolio. Zero coupon or deep discount bonds are debt
 obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities
 begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on
 the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing
 interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are
 generally more volatile than the market prices of securities that pay interest periodically.
- Apart from normal credit risk, zero coupon bonds carry an additional risk, unlike bonds that pay interest throughout the period to
 maturity, zero coupon instruments/deferred interest bonds typically would not realise any cash until maturity. If the issuer defaults,
 the Scheme may not obtain any return on its investment.
- Price-Risk or Interest-Rate Risk: Fixed income securities such as bonds, debentures and money market instruments run price-risk or
 interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such
 prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease
 in the level of interest rates.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down.
- Basis Risk (Interest rate movement): During the life of a floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.
- **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions, the spreads may move adversely or favourably leading to fluctuation in the NAV.
- Liquidity Risk: Due to the evolving nature of the floating rate market, there may be an increased risk of liquidity risk in the portfolio from time to time.
- Other Risk: In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate
 debt instruments.
