

## KEY INFORMATION MEMORANDUM

### Bandhan Long Duration Fund

An open ended long term debt scheme investing in instruments such that the Macaulay duration of the portfolio is greater than 7 years with Relatively High Interest Rate Risk and Relatively Low Credit Risk

(Scheme Code: BNDN/O/D/LON/24/02/0070)

(Offer of Units of Rs. 10/- each during the New Fund Offer (NFO) and continuous offer of Units at NAV based prices on an on-going basis)

**New Fund Offer Opens on: March 05, 2024**

**New Fund Offer Closes on: March 18, 2024**

<b>Potential Risk Class Matrix:</b>			
<b>Credit Risk of scheme →</b>	<b>Relatively Low (Class A)</b>	<b>Moderate (Class B)</b>	<b>Relatively High (Class C)</b>
<b>Interest Rate Risk of the scheme ↓</b>			
Relatively Low (Class I)			
Moderate (Class II)			
Relatively High (Class III)	<b>A-III</b>		
A Scheme with Relatively High interest rate risk and Relatively Low Credit Risk.			

This product is suitable for investors who are seeking\*:

- To create wealth over the long term
  - Investments in Debt & Money Market securities such that the Macaulay duration of the portfolio is greater than 7 years
- \*Investors should consult their financial advisers if they doubt whether the product suits them.

#### Scheme Risk-o-meter

Investors understand that their principal will be at Moderate Risk

#### Benchmark Risk-o-meter

Benchmark - NIFTY Long Duration Debt Index A-III

(The product labelling assigned during the New Fund Offer is based on internal assessment of the Scheme Characteristics or model portfolio and the same may vary post NFO when actual investments are made)

<b>Mutual Fund</b>	:	Bandhan Mutual Fund (formerly IDFC Mutual Fund)
<b>Asset Management Company</b>	:	Bandhan AMC Limited (formerly IDFC Asset Management Company Limited)
<b>Trustee Company</b>	:	Bandhan Mutual Fund Trustee Limited (formerly IDFC AMC Trustee Company Limited)
<b>Address</b>	:	6 <sup>th</sup> Floor, One World Centre, Tower 1, Jupiter Mills Compound, 841, Senapati Bapat Marg, Mumbai 400013

This Key Information Memorandum (KIM) sets forth the information which a prospective investor ought to know before investing. For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, penalties & pending litigations etc. investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the Investors Service Centres or distributors or from website [www.bandhanmutual.com](http://www.bandhanmutual.com).

The Scheme particulars have also been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with the Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

<b>Name of the Scheme</b>	Bandhan Long Duration Fund			
<b>Investment Objective</b>	The scheme seeks to invest in a diversified set of debt and money market securities, such that the Macaulay duration of the Portfolio is greater than 7 years, with the aim of generating optimal returns over long term. However, there can be no assurance or guarantee that the investment objective of the Scheme will be achieved.			
<b>Type of the Scheme</b>	An open ended long term debt scheme investing in instruments such that the Macaulay duration of the portfolio is greater than 7 years with Relatively High Interest Rate Risk and Relatively Low Credit Risk.			
<b>SEBI Category</b>	Long Duration Fund			
<b>Scheme Code</b>	BNDN/O/D/LON/24/02/0070			
<b>Asset Allocation Pattern of the scheme</b>	<b>Instruments</b>	<b>Indicative Allocation (% of total assets)</b>		<b>Risk Profile</b>
		<b>Minimum</b>	<b>Maximum</b>	
	Debt Securities (including G-Sec and securitized debt) and Money Market Instruments# such that the Macaulay duration of the portfolio is greater than 7 years	0%	100%	Low to Moderate
<p>Investment in Securitised Debt - up to 40% of total assets  Investment in Foreign securities - up to 35% of total assets or residual limit, whichever is lower  Investment in Securities lending – up to 20% of total assets with maximum single party exposure restricted to 5% of the total assets  Exposure in Derivatives – up to 100% of total assets for hedging purposes. Investment in Fixed Income Derivatives shall be up to 50% of net assets of the scheme for non-hedging purpose.</p> <p>Gross Exposure to Repo of Corporate Debt Securities – up to the extent permitted by the Regulations (currently up to 10% of total assets, subject to change in line with the regulations from time to time).</p> <p>#Money Market instruments includes commercial papers, commercial bills, treasury bills, Tri-party repo, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, and any other like instruments as specified by the Reserve Bank of India from time to time.</p> <p>The scheme does not intend to invest in exchange traded commodity derivatives (ETCD) and units issued by REITs &amp; InvITs.</p> <p>The Scheme will invest in foreign securitized debt and in Debt Instruments having Structured Obligations / Credit Enhancements as specified in SEBI circular SEBI/HO/IMD/DF2/ CIR/P/2019/104 dated October 01, 2019.</p> <p>As per Clause 12.24 of SEBI Master Circular , the cumulative gross exposure through Debt Securities and Money Market Instruments, derivative positions (including fixed income derivatives), repo transactions in corporate debt securities, credit default swaps, Foreign Securities, securitized debt including foreign securitized debt and other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time should not exceed 100% of the net assets of the scheme.</p> <p>Securities in which investment is made for the purpose of ensuring liquidity (debt and money market instruments) are those that fall within the definition of liquid assets which includes Cash, Government Securities, T-bills and Repo on Government Securities.</p> <p>The Scheme shall follow prudential norms regarding holding of liquid assets as per para 4.6 of the SEBI Master Circular.</p> <p>Pursuant to Clause 12.25.3 of SEBI Master Circular and SEBI Letter to AMFI dated November 03, 2021, Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. Cash Equivalent shall consist of the following securities having residual maturity of less than 91 days:</p> <ol style="list-style-type: none"> <li>Government Securities</li> <li>T-Bills and</li> <li>Repo on Government securities.</li> </ol>				

Investment in debt instruments having structured obligations / credit enhancements as per clause 12.3 of SEBI Master Circular. The investment of the Scheme in the following instruments shall not exceed 10% of the debt portfolio of the Scheme and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the Scheme:

- Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade; and
- Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade.

The scheme intends to invest maximum of USD 35 million in foreign securities, units / shares of Overseas Index Funds and / or ETFs (of this USD 10 million will be towards in foreign securities, units / shares of Overseas Index Funds and USD 25 million towards Overseas ETFs). In accordance with SEBI Master circular point 12.19.1.3.b, it is clarified that the aforesaid limit applicable for a period of six months from the date of closure of NFO will be soft limit.

For all ongoing schemes that invest or are allowed to invest in Overseas securities / Overseas ETFs, an investment headroom of 20% of the average AUM in Overseas securities / Overseas ETFs of the previous three calendar months would be available to the Mutual Fund for that month to invest in Overseas securities / Overseas ETFs subject to maximum limits specified in Paragraph 12.19.1 of SEBI master Circular. This disclosure on overseas investment would be soft limits for the purpose of reporting only by Mutual Funds on monthly basis in the prescribed format.

The Scheme shall invest in foreign securities/ overseas Mutual Funds as may be permissible and described in clause 12.19 of SEBI Master Circular as may be amended from time to time, within the overall applicable limits. The Scheme can make overseas investments subject to a maximum of US \$ 1 billion per Mutual Fund, within the overall industry limit of US \$ 7 billion or such limits as may be prescribed by SEBI from time to time. The Scheme therefore may or may not be able to utilise the limit of USD 1 billion due to the USD 7 billion limit being exhausted by other Mutual Funds. Further, the scheme can make investments in overseas Exchange Traded Fund (ETF(s)) subject to a maximum of US \$ 300 million per Mutual Fund, within the overall industry limit of US \$ 1 billion.

In line with clause 12.18.1.1 of the Master Circular, the scheme may participate in the corporate bond repo transactions. The gross exposure of the scheme to repo transactions in corporate debt securities shall not be more than 10% of the net assets of the concerned scheme.

The scheme will invest in Credit Default Swaps (CDS) in accordance with guidelines issued by SEBI from time to time. Exposure to a single counterparty in CDS transactions shall not exceed 10% of the net assets of the scheme.

Mutual Funds invest in certain debt instruments with special features viz. subordination to equity (absorbs losses before equity capital) and /or convertible to equity upon trigger of a pre-specified event for loss absorption. Additional Tier I bonds and Tier 2 bonds issued under Basel III framework are some instruments which may have above referred special features. The debt instruments having such special features, which otherwise are Non-Convertible Debentures, may be treated as debt instruments until converted to equity.

Subject to SEBI (MF) Regulations and in accordance with Securities Lending Scheme, 1997, Clause 12.11 of SEBI Master Circular, as amended from time to time, the Fund can engage in securities lending and borrowing. Securities lending means lending a security to another person or entity for a fixed period of time, at a negotiated compensation. The security lent will be returned by the borrower on expiry of the stipulated period. The Scheme will lend securities subject to a maximum of –

- 20%, in aggregate, of the net assets of the Scheme and
- 5% of the net assets of the Scheme in the case of a single intermediary.

If permitted by SEBI Regulations, the Scheme may engage in short selling of securities in accordance with the guidelines / regulations issued by SEBI. Short sale of securities means selling of securities

	<p>without owning them. Engaging in short sale of securities is subject to risks related to fluctuations in market price, and settlement/ liquidity risks.</p> <p><b>Investment by Scheme in the in units of Corporate Debt Market Development Fund:</b> In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM. For further details please read the SID.</p> <p><b>Change in Investment Pattern</b></p> <p><b>Rebalancing due to Short Term Defensive Consideration</b></p> <p>Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for short term and defensive considerations as per Clause 1.14.1.2 of SEBI Master circular dated May 19, 2023, and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.</p> <p><b>Rebalancing due to Passive Breaches</b></p> <p>Pursuant to clause 2.9 of SEBI Master circular dated May 19, 2023, as may be amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Scheme within 30 Business Days. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in Clause 2.9 of SEBI Master circular dated May 19, 2023. specified in clause 2.9 of SEBI Master circular.</p>
<p><b>Investment Strategy</b></p>	<p>The Scheme will invest in a diversified set of debt and money market securities with the aim of generating optimal returns over long term. The portfolio created will be such that the Macaulay duration of the portfolio is greater than 7 years. The duration would be managed dynamically using debt and money market instruments, depending on the fund manager’s view. Since the scheme will have to maintain the Macaulay duration of the portfolio greater than 7 years, it will have a relatively high volatility profile.</p> <p>The aim of the Investment Manager will be to allocate the assets of the Scheme amongst various fixed income instruments (debt / money market) across maturities and ratings with the objective of optimizing returns, while retaining the Macaulay duration of the portfolio greater than 7 years. The actual percentage of investment in various fixed income instruments from time to time will be decided on the basis of the prevailing macro-economic environment (including interest rates and inflation), market conditions, general liquidity, and fund manager views and will be in line with the asset allocation pattern of the scheme.</p> <p>The predominant investment of the scheme will be in debt (including G-Secs) &amp; money market instruments. The Scheme may use derivative instruments like Interest Rate Swaps, Interest Rate Futures, or other derivative instruments for the purpose of hedging, portfolio balancing and other purposes, as permitted under the Regulations. The scheme may also invest in securitized debt. The scheme may look to invest overseas for the purpose of diversification in terms of markets and currency.</p>
<p><b>Risk Profile of the Scheme &amp; Risk Mitigation Factors</b></p>	<p>Risk Associated with Investing in Debt / Money Market Instruments –</p> <p>1. Price-Risk or Interest-rate Risk: Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of</p>

interest rates.

2. Re-investment Risk: Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

3. Basis Risk (Interest - rate movement): During the life of a floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.

4. Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions, the spreads may move adversely or favorably leading to fluctuation in the NAV.

5. Liquidity Risk: Due to the evolving nature of the floating rate market, there may be an increased risk of liquidity risk in the portfolio from time to time.

6. Other Risk: In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate debt instruments.

7. Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government Securities, there is no credit risk to that extent. Different types of securities in which the scheme would invest as given in the scheme information document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

8. Short-selling of Securities: Purchasing a security entails the risk of the security price going down. Short selling of securities (i.e. sale of securities without owning them) entails the risk of the security price going up there by decreasing the profitability of the short position. Short selling is subject to risks related to fluctuations in market price, and settlement/liquidity risks. If required by the Regulations, short selling may entail margin money to be deposited with the clearing house and daily mark to market of the prices and margins. This may impact fund pricing and may induce liquidity risks if the fund is not able to provide adequate margins to the clearing house. Failure to meet margin requirements may result in penalties being imposed by the exchanges and clearing house.

9. Securities Lending: Engaging in securities lending is subject to risks related to fluctuations in collateral value and settlement/liquidity and counter party risks. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

Risk associated with investing in foreign securities

It is AMC's belief that the investment in ADRs/GDRs/overseas securities offer new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the schemes. Since the Schemes would invest only partially in ADRs/GDRs/overseas securities, there may not be

readily available and widely accepted benchmarks to measure performance of the Schemes.

To the extent the assets of the scheme(s) are invested in overseas financial assets, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market. Further, the repatriation of capital to India may also be hampered by changes in regulations or political circumstances as well as the application to it of other restrictions on investment. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilization of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.

The Scheme(s) may also invest in ADRs / GDRs / Other Foreign Securities as permitted by Reserve Bank of India and Securities and Exchange Board of India from time to time. To the extent that some part of the assets of the Scheme(s) may be invested in securities denominated in foreign currencies, Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment as applicable.

As the investment may be made in stocks of different countries, the portfolio shall be exposed to the political, economic and social risks with respect to each country. However, the portfolio manager shall ensure that his exposure to each country is limited so that the portfolio is not exposed to one country. Investments in various economies will also diversify and reduce this risk.

**Currency Risk:** The scheme(s) may invest in securities denominated in a broad range of currencies and may maintain cash in such currencies. As a consequence, fluctuations in the value of such currencies against the currency denomination of the relevant scheme will have a corresponding impact on the value of the portfolio. Furthermore, investors should be aware that movements in the rate of exchange between the currency of denomination of a fund and their home currency will affect the value of their shareholding when measured in their home currency.

In respect of the corpus of the Scheme(s) that is invested in overseas mutual fund schemes, investors shall bear the proportionate recurring expenses of such underlying scheme(s), in addition to the recurring expenses of the Scheme(s). Therefore, the returns attributable to such investments by the Scheme(s) may be impacted or may, at times, be lower than the returns that the investors could obtain by directly investing in the said underlying scheme(s).

To manage risks associated with foreign currency and interest rate exposure, the Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/RBI from time to time. Offshore investments will be made subject to any/all approvals, conditions thereof as may be stipulated by SEBI/RBI and provided such investments do not result in expenses to the Fund in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing. The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs, and overseas regulatory costs.

**Risks associated with Investing in Derivatives:**

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. As and when the Scheme trade in the derivatives market there are risk factors and issues concerning the use of derivatives

that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counter party”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Also, the market for derivative instruments is nascent in India. The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.

The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:

- Lack of opportunity available in the market.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Risk associated with Interest Rate Future (IRFs):

An Interest Rate Futures is an agreement to buy or sell a debt instruments at a specified future date at a price that is fixed today. Interest Rate Futures are Exchange Traded and are cash settled. Hedging using Interest Rate Futures can be perfect or imperfect. Perfect hedging means hedging the underlying using IRF contract of same underlying.

Market risk: Derivatives carry the risk of adverse changes in the market price.

Liquidity risk – This occurs where the derivatives cannot be sold (unwound) at prices that reflect the underlying assets, rates and indices.

Model Risk - The risk of mispricing or improper valuation of derivatives.

Basis Risk – This risk arises when the instrument used as a hedge does not match the movement in the instrument/ underlying asset being hedged. The risks may be interrelated also; for e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.

Risk associated with imperfect hedge using IRF:

In case the IRF used for hedging the interest rate risk has different underlying security than the existing position being hedged, it would result in imperfect hedging.

- (i) Basis Risk: Basis risk is the risk that arises when the instrument used as a hedge does not match the movement in the instrument/ underlying asset being hedged. This could result into potential gains or losses from the strategy, thus adding risk to the position.
- (ii) Price Risk: The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- (iii) Risk of mismatch between the instruments: The risk arises if there is a mismatch between the prices movements in derivative instrument used to hedge, compared to the price movement of the underlying assets being hedged. For example, when IRF which has government security as underlying is used to hedge a portfolio that contains corporate debt securities.
- (iv) Correlation weakening and consequent risk of regulatory breach: SEBI Regulation mandates minimum correlation criterion of 0.9 (calculated on a 90-day basis) between the portfolio being hedged and the derivative instrument used for hedging. In cases where the correlation falls below 0.9, a

rebalancing period of 5 working days has been permitted. In ability to satisfy this requirement to restore the correlation level to the stipulated level, within the stipulated period, due to difficulties in rebalancing would lead to a lapse of the exemption in gross exposure computation. The entire derivative exposure would then need to be included in gross exposure, which may result in gross exposure in excess of 100% of net asset value.

#### Risk Associated with investing in Securitized Debt/ Structured Obligation

The Scheme may invest in domestic securitized debt such as asset backed securities (ABS) or mortgage backed securities (MBS). Asset Backed Securities (ABS) are securitized debts where the underlying assets are receivables arising from various loans including automobile loans, personal loans, loans against consumer durables, etc. Mortgage backed securities (MBS) are securitized debts where the underlying assets are receivables arising from loans backed by mortgage of residential / commercial properties. ABS/MBS instruments reflect the undivided interest in the underlying pool of assets and do not represent the obligation of the issuer of ABS/MBS or the originator of the underlying receivables. The ABS/MBS holders have a limited recourse to the extent of credit enhancement provided. If the delinquencies and credit losses in the underlying pool exceed the credit enhancement provided, ABS/MBS holders will suffer credit losses. ABS/MBS are also normally exposed to a higher level of reinvestment risk as compared to the normal corporate or sovereign debt.

Different types of Securitized Debts in which the scheme would invest carry different levels and types of risks. Accordingly, the scheme's risk may increase or decrease depending upon its investments in Securitized Debts. e.g. AAA securitized bonds will have low Credit Risk than a AA securitized bond. Credit Risk on Securitized Bonds may also depend upon the Originator, if the Bonds are issued with Recourse to Originator. A Bond with Recourse will have a lower Credit Risk than a Bond without Recourse. Underlying Assets in Securitized Debt may be the Receivables from Auto Finance, Credit Cards, Home Loans or any such receipts. Credit risk relating to these types of receivables depends upon various factors including macro-economic factors of these industries and economies. To be more specific, factors like nature and adequacy of property mortgaged against these borrowings, loan agreement, mortgage deed in case of Home Loan, adequacy of documentation in case of Auto Finance and Home Loan, capacity of borrower to meet its obligation on borrowings in case of Credit Cards and intentions of the borrower influence the risks relating to the assets (borrowings) underlying the Securitized Debts. Holders of Securitized Assets may have Low Credit Risk with Diversified Retail Base on Underlying Assets, especially when Securitized Assets are created by High Credit Rated Tranches. Risk profiles of Planned Amortisation Class Tranches (PAC), Principal Only Class Tranches (PO) and Interest Only Class Tranches (IO) will also differ, depending upon the interest rate movement and Speed of Pre-payments. A change in market interest rates/prepayments may not change the absolute amount of receivables for the investors, but affects the reinvestment of the periodic cashflows that the investor receives in the securitized paper.

Presently, secondary market for securitized papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the investor to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure. Securitized transactions are normally backed by pool of receivables and credit enhancement as stipulated by the rating agency, which differ from issue to issue. The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and there is no obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the Certificate Holders against the Investors' Representative. Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Investor Payouts may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of an Obligor to repay his obligation, the Seller may repossess and sell the underlying Asset. However many factors may affect, delay or prevent the repossession of such Asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such Asset may be sold may be lower than the amount due from that Obligor.

At present in Indian market, following types of loans are securitized:

- Auto Loans (cars / commercial vehicles /two wheelers)
- Residential Mortgages or Housing Loans
- Consumer Durable Loans
- Personal Loans
- Corporates Loans

The main risks pertaining to each of the asset classes above are described below:

#### Auto Loans (cars / commercial vehicles /two wheelers)

The underlying assets (cars etc) are susceptible to depreciation in value whereas the loans are given at high loan to value ratios. Thus, after a few months, the value of asset becomes lower than the loan outstanding. The borrowers, therefore, may sometimes tend to default on loans and allow the vehicle to be repossessed. These loans are also subject to model risk. ie if a particular automobile model does not become popular, loans given for financing that model have a much higher likelihood of turning bad. In such cases, loss on sale of repossession vehicles is higher than usual. Commercial vehicle loans are susceptible to the cyclicity in the economy. In a downturn in economy, freight rates drop leading to higher defaults in commercial vehicle loans. Further, the second hand prices of these vehicles also decline in such economic environment.

#### Housing Loans

Housing loans in India have shown very low default rates historically. However, in recent years, loans have been given at high loan to value ratios and to a much younger borrower classes. The loans have not yet gone through the full economic cycle and have not yet seen a period of declining property prices. Thus the performance of these housing loans is yet to be tested and it need not conform to the historical experience of low default rates.

#### Consumer Durable Loans

The underlying security for such loans is easily transferable without the bank's knowledge and hence repossession is difficult. The underlying security for such loans is also susceptible to quick depreciation in value. This gives the borrowers a high incentive to default.

#### Personal Loans

These are unsecured loans. In case of a default, the bank has no security to fall back on. The lender has no control over how the borrower has used the borrowed money. Further, all the above categories of loans have the following common risks: All the above loans are retail, relatively small value loans. There is a possibility that the borrower takes different loans using the same income proof and thus the income is not sufficient to meet the debt service obligations of all these loans. In India, there is insufficiency of ready comprehensive and complete database regarding past credit record of borrowers. Thus, loans may be given to borrowers with poor credit record. In retail loans, the risks due to frauds are high.

#### Corporate Loans

These are loans given to single or multiple corporates. The receivables from a pool of loans to corporate are assigned to a trust that issues Pass through certificates in turn. The credit risk in such PTCs is on the underlying pool of loans to corporates. The credit risk of the underlying loans to the corporates would in turn depend of economic cycles.

#### Risk associated with investing in Debt instruments having Credit Enhancements

The Scheme may invest in debt instruments having credit enhancements. Credit Enhancement (CE) is a way of improving the credit quality of the said debt instruments by way of some form of explicit credit support from the parent/ group company of the issuer / a third party. The support may be in the form of

corporate guarantee, letter of comfort, shortfall undertaking, pledge of shares, standby letter of credit from a commercial bank (majorly in case of Commercial Papers), etc. A common form of credit enhancement is an unconditional & irrevocable guarantee from a higher rated entity covering the issuer's debt obligations. Such instruments carry a suffix 'CE' in their credit rating (e.g. AAA(CE)).

Debt instruments having credit enhancements are subject to the following risks, which in turn may impact the credit profile of the given debt instrument:

- The credit strength of the support provider may deteriorate or the value of the underlying asset / collateral may reduce. A common example would be a sharp reduction in the price of underlying equity shares provided as collateral or a possibility of the guarantor going insolvent, thus impacting the Fund's ability to recover the issuer's debt obligations.
- Any weakness or possible delay in the enforceability of the underlying support or invocation of the underlying asset/collateral owing to regulatory constraints.

Investment by the Scheme in debt instruments, having credit enhancements backed by equity shares directly or indirectly, shall have a minimum cover of 4 times considering the market value of such shares. Further, the AMC will ensure that the investment in debt instruments having credit enhancements are sufficiently covered to address the market volatility and reduce the inefficiencies of invoking of the pledge or cover, whenever required, without impacting the interest of the investors. In case of fall in the value of the cover below the specified limit, the AMC will initiate necessary steps to ensure protection of the interest of the investors.

Risk associated with investing in Repo of Corporate Bond Securities:

To the extent the scheme invests in Repo of Corporate Bond Securities, the scheme will be subject to following risks –

- Settlement Risk: Corporate Bond Repo will be settled between two counterparties in the OTC segment unlike in the case of TREPS transactions where CCIL stands as central counterparty on all transactions (no settlement risk).
- Quality of collateral: The Mutual Fund will be exposed to credit risk on the underlying collateral – downward migration of rating. The Mutual Fund will impose adequate haircut on the collateral to cushion against any diminution in the value of the collateral. Collateral will require to be rated AAA or equivalent.
- Liquidity of collateral: In the event of default by the counterparty, the Mutual Fund would have recourse to recover its investments by selling the collateral in the market. If the underlying collateral is illiquid, then the Mutual Fund may incur an impact cost at the time of sale (lower price realization).

Risks associated with segregated portfolio:

1. Liquidity risk – A segregated portfolio is created when a credit event / default occurs at an issuer level in the scheme. This may reduce the liquidity of the security issued by the said issuer, as demand for this security may reduce. This is also further accentuated by the lack of secondary market liquidity for corporate papers in India. As per SEBI norms, the scheme is to be closed for redemption and subscriptions until the segregated portfolio is created, running the risk of investors being unable to redeem their investments. However, it may be noted that, the proposed segregated portfolio is required to be formed within one day from the occurrence of the credit event.

Investors may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall list the units of the segregated portfolio on a recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the

NAV of such Units. There is no assurance that an active secondary market will develop for units of segregated portfolio listed on the stock exchange. This could limit the ability of the investors to resell them.

2. Valuation risk - The valuation of the securities in the segregated portfolio is required to be carried out in line with the applicable SEBI guidelines. However, it may be difficult to ascertain the fair value of the securities due to absence of an active secondary market and difficulty to price in qualitative factors.

Risk Factors associated with investments in Credit Default Swaps:

Credit Default Swaps is a form of Credit derivative where the buyer of the swap makes payments to the swap's seller until the maturity of a contract. In return, the seller agrees that in the event the debt issuer defaults or experiences another credit event, the seller will pay the buyer the security's value as well as all interest payments that would have been paid between that time and the security's maturity date. The Scheme may participate in credit Default Swaps (CDS) as a buyer (protection buyer) to hedge/offset credit risk related to fixed income instruments. It is important to note that the credit risk is not completely eliminated but has been shifted to the CDS seller. The risk is that the CDS seller defaults at the same time the credit event occurs. In case the debt issuer does not default or no credit event occurs till maturity of CDS contract, the buyer will end up losing the money through the payments on the CDS.

Risk factors associated with instruments having special features:

Mutual Funds can invest in certain debt instruments with special features viz. subordination to equity (absorbs losses before equity capital) and /or convertible to equity upon trigger of a prespecified event for loss absorption. The debt instruments with special features, which otherwise are considered as Non-Convertible Debentures, may be treated as debt instruments until converted to equity. The instruments are subject to features that grants issuer a discretion in terms of writing down the principal/coupon, to skip coupon payments, to make an early recall etc. Thus, debt instruments with special features are subject to "Coupon discretion", "Loss Absorbency", "Write down on Point of Non-viability trigger (PONV) event" and other events as more particularly described as per the term sheet of the underlying instruments. The instrument is also subject to Liquidity Risk pertaining to how saleable a security is in the market. The particular security may not have a market at the time of sale due to uncertain/insufficient liquidity in the secondary market, then the scheme may have to bear an impact depending on its exposure to that particular security.

**Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):**  
CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfill liquidity obligations under stress situation.

Investors are requested to read details disclosure on investment of the schemes in the CDMDF as listed in sub-section "C. Asset Allocation and sub-section D. Where will the Scheme Invest" in Section "Section II- Information about the scheme" of SID

**Plans and Options**

The Scheme offers **Regular Plan & Direct Plan**. Both the Plans will have separate NAV. Both the Plans under the Scheme offer **Income Distribution cum Capital Withdrawal Option (IDCW)^ & Growth Option**.

^the amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale

price that represents realized gains.

IDCW Option under both the Plans further offers Payout of IDCW option, Reinvestment of IDCW option & Sweep/Transfer of IDCW plan.

Please note that where the Unitholder has opted for **Payout of IDCW Option** and in case the amount of IDCW payable to the Unitholder is Rs.100/- or less under a Folio in case of cheque payouts, the same will be compulsorily reinvested in the Scheme.

**Default option:** The investors must clearly indicate the Option/facility (Growth or IDCW option / Reinvestment of IDCW option or Payout of IDCW option or transfer of IDCW option) in the relevant space provided for in the Application Form. In case the investor does not select any Option, the default shall be considered as **Growth Option**. Within IDCW option if the investor does not select any facility, then default facility shall be **Reinvestment of IDCW option**.

Investors subscribing under Direct Plan of a Scheme will have to indicate "Direct Plan" in the application form e.g. "Bandhan Long Duration Fund - Direct Plan". Investors should also indicate "Direct" in the ARN column of the application form.

**Treatment of applications under "Direct" / "Regular" Plans:**

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct Plan
2	Not mentioned	Direct	Direct Plan
3	Not mentioned	Regular	Direct Plan
4	Mentioned	Direct	Direct Plan
5	Direct	Not Mentioned	Direct Plan
6	Direct	Regular	Direct Plan
7	Mentioned	Regular	Regular Plan
8	Mentioned	Not Mentioned	Regular Plan

AMC shall ensure that before accepting any business from any MFD, such a MFD is duly empaneled with the AMC. Transactions received, if any, from / under the ARN of a non-empaneled MFD may be processed under Direct Plan, with prompt intimation to the non-empaneled MFD, and the investor.

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load.

Both the Plans will have a common portfolio. The face value of the Units will be Rs.10/- per unit.

For details on taxation of IDCW, please refer to the section on 'Tax Benefits of Investing in the Mutual Fund' in the Statement of Additional Information.

The Investors should note that NAVs of the IDCW Options and the Growth Option will be different after the declaration of IDCW under the scheme.

**Transparency & NAV disclosure**

The first NAV shall be calculated and disclosed within 5 business days of allotment.

NAV will be determined for every Business Day except in special circumstances. NAV will be calculated upto four decimal places. NAV of the Scheme shall be made available on the website of AMFI ([www.amfiindia.com](http://www.amfiindia.com)) and the Mutual Fund ([www.bandhanmutual.com](http://www.bandhanmutual.com)) by 11.00 p.m. on all business days. The NAV shall also be available on the Toll Free Number -1800-300-66688/1-800-2666688 and on the website of the Registrar and Transfer Agent CAMS ([www.camsonline.com](http://www.camsonline.com)).

In case the NAV is not uploaded by 11.00 p.m it shall be explained in writing to AMFI for non adherence of time limit for uploading NAV on AMFI's website. If the NAVs are not available before the commencement of business hours on the following day due to any reason, the Mutual Fund shall issue a press release giving reasons and explaining when the Mutual Fund would be able to publish the NAV.

	<p>The Mutual Fund/AMC shall e-mail to all unitholders (if an e-mail address is provided) the complete scheme portfolio as at the end of each month and each half year (i.e., 31st March and 30th September) within ten days of end of the month/half year. These shall also be displayed on the website of the Mutual Fund and that of AMFI in a user-friendly and downloadable spreadsheet format. Investors may also place a specific request to the Mutual Fund for sending the half yearly portfolio through email. The Mutual Fund shall publish an advertisement disclosing uploading of such half yearly scheme portfolios on its website, in one English and one Hindi daily newspaper having nationwide circulation. The Mutual Funds shall provide a physical copy of the scheme portfolio, without charging any cost, on specific request received from a unitholder.</p> <p>The Mutual Fund shall within one month of the close of each half year i.e., 31st March and 30th September, upload the soft copy of its unaudited financial results containing the details specified in Regulation 59 on its website and shall publish an advertisement disclosing uploading of such financial results on its website, in one English newspaper having nationwide circulation and in one regional newspaper circulating in the region where the head office of the Mutual Fund is situated.</p>
<b>Minimum Application Amount</b>	<p><b>During New Fund Offer:</b> Rs.1,000/- and in multiples of Re. 1/- thereafter</p> <p><b>During Ongoing Offer:</b> <b>Subscription:</b> Fresh Purchase (including switch-in) - Rs.1,000/- and in multiples of Re. 1/- thereafter Additional Purchase (including switch-in) - Rs.1,000/- and any amount thereafter <b>SIP:</b> Rs.100/- and in multiples of Rs.1 thereafter <b>STP</b> (being Target Scheme): Rs. 500/- and any amount thereafter (for Fixed amount option) / Rs.500/- and any amount thereafter (for capital appreciation option) <b>SWP:</b> Rs. 200/- and any amount thereafter</p>
<b>Redemption/ Repurchase facility</b>	Rs. 500/- or the account balance of the investor, whichever is less.
<b>Benchmark Index</b>	NIFTY Long Duration Debt Index A-III
<b>Income Distribution cum Capital Withdrawal (IDCW) Policy</b>	Under IDCW Option, IDCW will be declared subject to availability of distributable surplus and at discretion of AMC / Trustee. The undistributed portion of the income will remain in the Option and be reflected in the NAV, on an ongoing basis. The Trustee's decision with regard to availability and adequacy, rate, timing and frequency of distribution of IDCW shall be final.
<b>Name of the Fund Manager</b>	<b>Debt Portion:</b> Mr. Gautam Kaul <b>Overseas portion:</b> Mr. Sreejith Balasubramanian will be managing Debt portion of overseas investment of the scheme.
<b>Name of the Trustee Company</b>	Bandhan Mutual Fund Trustee Limited
<b>Performance of the scheme</b>	This scheme is a new scheme and does not have any performance track record
<b>Expenses of the Scheme</b>	Entry Load: Nil Exit Load: - NIL
<b>Waiver of Load for Direct Applications</b>	Pursuant to SEBI circular no. SEBI/IMD/CIR No.4/ 168230/ 09 dated June 30, 2009, there is no entry load for Mutual Fund schemes. Hence, the procedure for waiver of load for Direct Applications is no longer applicable.
<b>Tax treatment for the Investors</b>	Investor will be advised to refer to the details in the Statement of Additional Information and also independently refer to his tax advisor.

<b>(Unitholder)</b>							
<b>Daily Net Asset Value (NAV) Publication</b>	<p>The first NAV shall be calculated and disclosed within 5 business days of allotment. NAV will be determined for every Business Day except in special circumstances. NAV will be calculated upto four decimal places. Please note that the Bandhan Branch offices at • **Gorakhpur • Udaipur • Belgaum • Vizag • Meerut • Thiruvananthapuram** will not be an Official Point of Acceptance of transactions. Accordingly, no transaction applications / investor service requests shall be accepted at these branch offices and the same will continue to be accepted at Investor Service Centre (ISC) of Computer Age Management Services Ltd. (CAMS), the Registrar of Bandhan Mutual Fund.

### **Point of Service locations (“POS”) of MF Utilities India Private Limited (“MFUI”)**

All the authorised MFUI POS designated by MFUI from time to time shall be the Official Points of Acceptance of Transactions. In addition to the same, investors can also submit the transactions electronically on the online transaction portal of MFUI ([www.mfuonline.com](http://www.mfuonline.com)). To know more about MFUI and the list of authorised MFUI POS, please visit the MFUI website ([www.mfuindia.com](http://www.mfuindia.com)).

Website / Electronic modes - Bandhan AMC shall accept transactions through its website ([www.Bandhanmutual.com](http://www.Bandhanmutual.com)). Transactions shall also be accepted through other electronic means including through secured internet sites operated by CAMS with specified channel partners (i.e. distributors) with whom AMC has entered into specific arrangements. The servers of Bandhan AMC and CAMS, where such transactions shall be sent shall be the official point of acceptance for all such online / electronic transaction facilities offered by the AMC.

NSE MFSS / BSE STAR / ICEX - Eligible Brokers/Clearing Members/Depository Participants / Distributors will be considered as the Official Point of Acceptance for the transactions through NSE MFSS, BSE STAR and ICEX platforms.

### **MFCentral as Official Point of Acceptance:**

For enhancing investors' experience in Mutual Fund transactions / service requests, the Qualified RTAs (QRTA's), Kfin Technologies Private Limited (Kfintech) and Computer Age Management Services Limited (CAMS) have jointly developed MFCentral - A digital platform for Mutual Fund investors.

MFCentral is created with an intent to be a one stop portal / mobile app for all Mutual fund investments and service-related needs that significantly reduces the need for submission of physical documents by enabling various digital / phygital services to Mutual fund investors across fund houses subject to applicable Terms & Conditions of the Platform. MFCentral may be accessed using <https://mfcentral.com/>

Any registered user of MFCentral, requiring submission of physical document as per the requirements of MFCentral, may do so at any of the designated Investor Service centres or collection centres of Kfintech or CAMS.
