I. INTRODUCTION

A. RISK FACTORS:

1. Risk Factors:

(a) Standard Risk Factors:

- Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the Securities in which a Scheme invests fluctuates, the value of a Unit Holder's investment in the Scheme may go up or down.
- Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of a Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operations of a Scheme beyond the initial contribution of Rs. 1,00,000/- (Rupees One Lakh) made by it towards setting up the Mutual Fund.
- The present Scheme is not guaranteed or assured return scheme.
- Mutual funds, like Securities investments, are subject to market and other risks and there can be no guarantee against loss resulting from an investment in a Scheme nor can there be any assurance that a Scheme's objectives will be achieved.
- As with any investment in Securities, the NAV of the Units can go up or down depending on various factors and forces affecting capital markets.

(b) Risk factors of a fund of fund scheme

- The Scheme's performance will predominantly depend upon the performance of the corresponding Underlying Fund.
- Any change in the investment policy or the fundamental attributes of the Underlying Fund in which the Scheme invests may affect the performance of the Scheme.
- Investments in the Underlying Fund, which is an equity fund, will have all the risks associated with investments in equity and the offshore markets.
- The portfolio disclosure of the Scheme will be largely limited to the particulars of the relevant Underlying Fund and investments by the Scheme in money market instruments. Therefore, Unit Holders may not be able to obtain specific details of the Scheme in respect of the Underlying Fund's portfolio.
- In addition to the recurring expenses of the Scheme, the Unit Holders shall also bear the applicable expenses of the Underlying Fund. Therefore, the returns that the Unit Holder of the Scheme may receive shall be substantially impacted or may, at times, be lower than the returns that a Unit Holder, who is directly investing in the same Underlying Fund, could obtain.

(c) Risks associated with investing in overseas mutual fund units

- Within the investment objective of the Scheme, the Scheme will be investing in the overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, restrictions on repatriation of capital due to exchange controls and the political environment. Further the repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances. The Scheme's NAV may also be affected by a fluctuation in the general and specific level of interest rates

internationally, or the change in the credit profiles of the issuer.

- The liquidity of the Scheme will be affected if there is a non-Business Day of the Underlying Fund. Scheme shall have non-Business Days on all the days on which the Underlying Fund has non-Business Days.
- In case of unforeseen events like system breakdown, natural calamities etc. delaying the NAV of the Underlying Fund, the NAV of the Scheme may also be delayed and the AMC shall suitably intimate AMFI / SEBI in this regard.
- In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilisation of overseas financial assets and the prevalent tax laws of the respective jurisdictions for the execution of trades or otherwise.
- Subject to the other terms of the SID, all applicants applying for up to 50,000 (Fifty Thousand) Units shall be given their full allotment. However, keeping in mind the investment restrictions in foreign Securities currently applicable to mutual funds vide SEBI's Circulars SEBI/IMD/CIR No. 7/104753/07 dated 26 September 2007 and SEBI/IMD/CIR No. 2/1222577/08 dated 8 April 2008, if the overall limit for the Mutual Fund in overseas investments of up to USD 300 million has been reached, applicants will receive a pro-rata allotment as calculated by the AMC. In such an event, applicant's money relating to the unused portion of the investor's original allotment request may be refunded to investors, subject to SEBI Regulations and approvals.

The process for monitoring the USD 300 million limit for overseas investments shall be as follows:

- The cap of USD 300 million will be monitored and enforced at the Mutual Fund level and not at the Scheme level.
- Once 90% of the limit is reached, investors and empanelled distributors will be informed that further sales of Units will be suspended when the Mutual Fund's combined AUM in overseas schemes reaches the cap of USD 300 million. A notice will be issued to ISC offices and AMC branches and published on the website of the AMC (www.jpmorganmf.com).
- Any allotments upon, or subsequent to, the USD 300 million cap being breached will be performed on a pro-rata basis only and subject to the combined AUM level of overseas investments of the Mutual Fund being below this cap.

Examples

- i) Day T (opening AUM) - USD 270 million is the overseas AUM of the mutual fund, incoming cash flows on Day T - USD 30 million.
 - Allotment for the entire amount will occur.
- ii) Day T (opening AUM) - USD 270 million is the overseas AUM of the mutual fund, incoming cash flows on Day T - USD 60 million
 - Allotment only for USD 30 million on a pro rata basis will occur.
 - Therefore, on Day T, a notice will be sent to all ISC offices & AMC branches and published on the website of the AMC (www.jpmorganmf.com) stating that further sales are suspended with immediate effect, in the event an additional overseas fund quota from SEBI has not been obtained.
 - If the cap of USD 300 million is reached, refunds would be settled on a T+3 basis.
 - The above process will not have any impact on the redemption process.

2) Scheme Specific Risk Factors:

The performance of the Underlying Fund will be affected by a number of risk factors, including the following, which are also referred to by the Underlying Fund in its prospectus filed with the home regulatory authority:

Investing in Equities – Equity Securities and equity-related Securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made by an Underlying Fund may be restricted by trading volumes and settlement periods. This may impact the ability of the Unit Holders to redeem their Units. In view of this, the Trustee has the right, in its sole discretion to limit Redemptions (including suspending Redemption) under certain circumstances. Settlement periods may be extended significantly by unforeseen circumstances.

The inability of an Underlying Fund to make intended Securities purchases, due to settlement problems, could cause the Underlying Fund to miss certain investment opportunities. Similarly, the inability to sell Securities held in an Underlying Fund’s portfolio could result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of Securities held in the Underlying Fund’s portfolio. The liquidity and valuation of an Underlying Fund’s investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to the target date for divestment. All investments involve risks and there can be no guarantee against loss resulting from an investment in any share of the Underlying Fund, nor can there be any assurance that the Underlying Fund’s investment objective will be attained in respect of its overall performance. In certain circumstances the right of the investors of the Underlying Fund may be suspended.

Risk & Description specific to Equities	Risk Mitigants / Management Strategy
<p>Quality risk Risk of investing in unsustainable / weak companies</p>	<p>The stock selection process is an important part of the idea generation stage, as it provides the greater part of added value to the investments. Underpinning the stock selection process is the rigorous research conducted by dedicated country specialists. The approach to stock selection is largely country specific, which means that these investment professionals have the responsibility to design and refine their stock selection process to cope with the dynamic local factors and market conditions.</p> <p>Quality analysis based investment approach:</p> <ul style="list-style-type: none"> (i) Management (ii) Capital structure (iii) Sustainability of competitive advantage (iv) Return on equity (v) Industry attractiveness <p>In general, there are three primary sources of investment return which the investment professionals normally focus on and they form the basic premise of the stock selection process:</p> <ul style="list-style-type: none"> (i) Growth – companies that exhibit sustainable earnings growth in excess of the market through an economic cycle. (ii) Valuations – quantitative analysis in evaluating the value and profitability of the company. (iii) Dividend yield – an additional source of return, over and above capital appreciation.
<p>Price Risk Risk of overpaying for a company</p>	<p>During company visits, qualitative assessments of the relative growth prospects of the companies concerned are made and strategies are decided to create shareholder value. Industries in which companies operate are analysed along with the competitive landscape as well as the management strategy to enhance competitive advantage and returns. As part of the process, meetings are organised not only with companies that fall within the core stock coverage, but also with their competitors, distributors, suppliers and other stakeholders in order to obtain a complete picture of the industry / company and other investment opportunities. In the process, a clear understanding of the business is arrived at, enabling the identification of future long-term winners at an early stage.</p>
<p>Concentration Risk</p>	<p>Portfolio construction is the responsibility of the investment managers assigned to an Underlying Fund. There are three objectives to the portfolio construction process:</p> <ul style="list-style-type: none"> (i) to capture and preserve value from all the best ideas by country specialists; (ii) to ensure no single decision will derail performance; and (iii) to deliver in line with the Underlying Fund’s risk / return profiles. <p>Portfolios are constructed using a disciplined and tailored approach, and there is a high degree of commonality across accounts with similar objectives and profiles. During the process, the investment managers assign a target percentage weight based upon variations, positive or negative, from the predetermined fund benchmark weight. These variations are known as active money positions and can be easily accessed on the internal front office system which contains information on both the Underlying Fund and its respective benchmark index. Investment managers may also incorporate their own views on individual stocks and exercise discretion to align with the above guidelines with the objective that is likely to be achieved by inclusion of the stock in a fund portfolio. The investment manager will also reconcile any other anomalies between the stock rankings and portfolio requirements with the overall objective of adding value to the Underlying Fund’s portfolio.</p> <p>A dedicated team oversees investment managers to ensure compliance with the Underlying Fund’s internal requirements. The buy / sell decisions generated at the portfolio construction stage of the process are automatically checked against fund guidelines, and electronically forwarded to the trading team for execution.</p>

<p>Liquidity Risk High impact costs</p>	<p>Dealing in volatile, often illiquid markets imposes a cost on an active investment manager. The responsibility for minimizing the performance drag lies with the Central Dealing team whose focus is to minimize market impact and transaction costs. The competitive advantages in achieving this objective are:</p> <ul style="list-style-type: none"> (i) A specialist experienced team; (ii) State of the art systems and on-going investment in trading technology; (iii) Analysis of historical transactions and associated impact costs used to determine trading strategies; (iv) Low commission rates paid to brokers, reducing direct costs per trade; and (v) Significant overall commission payout ensuring premium service from investment banks and brokerage firms. <p>The dealing team's success can be measured by comparing each execution to the Volume Weighted Average Price ("VWAP") and on-line through the independent Best Execution Comparison Service ("BECS") which compares transaction costs with those of the competition. Effectiveness of the dealing team is measured on an ongoing basis.</p>
<p>Volatility Price volatility due to company or portfolio specific factors</p>	<p>As explained above, the volatility arising out of portfolio specific factors are being mitigated using a combination of various methods.</p>
<p>Event Risk Price volatility due to company or portfolio specific events</p>	

Risks associated with Emerging and Less Developed Markets

In emerging and less developed markets, in which the Underlying Fund will invest, the legal, judicial and regulatory infrastructure is still developing but there is much legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that an investment is suitable as part of their portfolio. Investments in emerging and less developed markets should be made only by sophisticated investors or professionals who have independent knowledge of the relevant markets, are able to consider and weigh the various risks presented by such investments, and have the financial resources necessary to bear the substantial risk of loss of investment in such investments.

Countries with emerging and less developed markets include, but are not limited to (1) countries that have an emerging stock market in a developing economy as defined by the International Finance Corporation, (2) countries that have low or middle income economies according to the World Bank, and (3) countries listed in World Bank publication as developing. The list of emerging and less developed markets is subject to continuous change; broadly they include any country or region other than the United States of America, Canada, Japan, Australia, New Zealand and Western Europe. The following statements are intended to illustrate the risks which in varying degrees are present when investing in emerging and less developed markets. Investors should note that the following statements do not offer advice on suitability of investments.

Political and Economic Risks

- Economic and / or political instability could lead to legal, fiscal and regulatory changes or the reversal of legal / fiscal / regulatory / market reforms. Assets could be compulsorily re-acquired without adequate compensation.
- Administrative risks may result in the imposition of restrictions on the free movement of capital.
- A country's external debt position could lead to sudden imposition of taxes or exchange controls.
- High interest and inflation rates can mean that businesses have difficulty in obtaining working capital.

- Local management may be inexperienced in operating companies in free market conditions.
- A country may be heavily dependent on its commodity and natural resource exports and is therefore vulnerable to weaknesses in world prices for these products.

Legal Environment

- The interpretation and application of decrees and legislative acts can be often contradictory and uncertain particularly in respect of matters relating to taxation.
- Legislation could be imposed retrospectively or may be issued in the form of internal regulations not generally available to the public.
- Judicial independence and political neutrality cannot be guaranteed.
- State bodies and judges may not adhere to the requirements of the law and the relevant contract. There is no certainty that Unit Holders will be compensated in full or at all for any damage incurred.
- Recourse through the legal system may be lengthy and protracted.
- In certain circumstances, the Underlying Fund or certain share classes of the Underlying Fund may be liquidated or merged which are detailed in the prospectus of the Underlying Fund. In such cases, the costs and expenses of any such liquidation or merger may be borne by the Underlying Fund or share class of the Underlying Fund up to the limit specified in the prospectus of the Underlying Fund. Any unamortized costs resulting from the closure may be charged as an expense in full against the assets of the Underlying Fund. In such a case, the amount distributed to the shareholders of the Underlying Fund (including the Scheme) may be less than their original investment.
- In certain circumstances as specified in the prospectus of the Underlying Fund, the right of the investors of the Underlying Fund (including the Scheme) to redeem their shares may be suspended.
- The Underlying Fund is governed by European Union legislation, specifically EC Directive 2001 / 107 and 108, and is a Luxembourg domiciled Undertaking for Collective Investments in Transferable Securities. The regulatory protections provided by their local regulatory authorities may differ or may not apply.

- The Underlying Fund is a growth investment style equity Underlying Fund designed to give exposure to growth companies in the US. Because growth stocks tend to outperform at different times to value stocks, investors should be prepared for periods of underperformance.

Accounting Practices

- The accounting, auditing and financial reporting system may not accord with international standards.
- Even when reports have been brought into line with international standards, they may not always contain correct information.
- Obligations on companies to publish financial information may also be limited.

Shareholder Risk

- Existing legislation may not yet be adequately developed to protect the rights of minority shareholders.
- There is generally no concept of any fiduciary duty to shareholders on the part of management.
- Liability for violation of what shareholder rights of the Underlying Fund there are, may be limited.

Market and Settlement Risks

- The securities markets in some countries lack the liquidity, efficiency and regulatory and supervisory controls of more developed markets.
- Lack of liquidity may adversely affect the ease of disposal of assets. The absence of reliable pricing information in a particular security held by the Underlying Fund may make it difficult to assess reliably the market value of assets.
- The share register of the Underlying Fund may not be properly maintained and the ownership or interest may not be (or remain) fully protected.
- Registration of securities may be subject to delay and during the period of delay it may be difficult to prove beneficial ownership of the securities.
- The provision for custody of assets may be less developed than in other more mature markets and thus provides an additional level of risk for the Underlying Funds.
- Settlement procedures may be less developed and still be in physical as well as in dematerialised form.

Price Movement and Performance

- Factors affecting the value of securities in some markets cannot easily be determined.
- Investment in securities in some markets carries a high degree of risk and the value of such investments may decline or be reduced to zero.

Currency Risk

- The assets in which the Underlying Fund is invested and the income from the assets may be quoted in currencies which are different from the Underlying Fund's base currency. The performance of the Underlying Fund may therefore be affected by movements in the exchange rate between the currencies in which the assets are held and the Underlying Fund's base currency and hence there can be the prospect of additional loss or gain for the Unit Holder than what may be normally derived from the assets in which the Underlying Fund invests. The performance of the Underlying Fund may also be affected by changes in exchange control regulations.
- Conversion into foreign currency or transfer from some markets of proceeds received from the sale of securities cannot be guaranteed.

- Exchange rate fluctuations may also occur between the trade date for a transaction and the date on which the currency is acquired to meet settlement obligations.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.

Taxation

- Investors should note in particular that the proceeds from the sale of securities in some markets or the receipt of any dividends and other income may be or may become subject to tax, levies, duties or other fees or charges imposed by the authorities in that market, including taxation levied by withholding at source. Tax law and practice in certain countries into which the Underlying Fund invests or may invest in the future (in particular Russia, China and other emerging markets) is not clearly established. It is therefore possible that the current interpretation of the law or understanding of practice might change, or that the law might be changed with retrospective effect. As a result, the Underlying Fund (and therefore the Scheme) could become subject to additional taxation in such countries that is not anticipated either at the date of this SID or when investments are made, valued or disposed of.

Investors should be aware that there is a Brazilian Presidential Decree in force, as amended from time to time, detailing the current IOF tax rate (Tax on Financial Operations), that applies to foreign exchange inflows and outflows. The application of the IOF tax will reduce the net asset value per share of the Underlying Fund.

- Prospective investors should note that there may be additional taxes, charges or levies applied in respect of the Scheme's investment in the Underlying Fund depending on the location of the assets of the Underlying Fund and the jurisdiction in which the Underlying Fund is located, registered or operated. Investors should also note that the Underlying Fund's investment managers and the Scheme's ability to provide tax information and audited accounts in respect of the Underlying Fund to Unit Holders of the Scheme is dependent on the relevant tax and other information being provided to the Underlying Fund in timely fashion. Accordingly, delays may occur in respect of delivery of such information to the Scheme's Unit Holders.

Execution and Counterparty Risk

In some markets there may be no secure method of delivery against payment which would minimise the exposure to counterparty risk. It may be necessary to make payment on a purchase or delivery on a sale before receipt of the securities or, as the case may be, sale proceeds.

Nomineeship

The legislative framework in some markets is only beginning to develop the concept of legal / formal ownership and of beneficial ownership or interest in securities. Consequently the courts in such markets may consider that any nominee or custodian as registered holder of securities would have full ownership thereof and that a beneficial owner may have no rights whatsoever in respect thereof.

Investment in China

Under the prevailing regulations in the Peoples' Republic of China (PRC), foreign investors can invest in China A Shares through institutions that have obtained a Qualified Foreign Institutional Investor (QFII) status in the PRC. Accordingly, the Underlying Fund shall invest in such shares only upon obtaining the QFII license. The current QFII regulations impose strict restrictions (including rules on investment restrictions, minimum investment holding period and repatriation of principle and profits) on China A Share investment.

In extreme circumstances, the Underlying Fund may incur losses due to limited investment capabilities, or may not be able to fully implement or pursue its investment objectives or strategy, due to QFII investment restrictions, illiquidity of the China A Shares market, and / or delay or disruption in execution of trades or in settlement of trades.

Investments by the Underlying Fund in China A Shares and other permissible securities denominated in CNY will be made through the QFII in CNY. The Underlying Fund and its share classes will be exposed to any fluctuation in the exchange rate between the reference currency of the Underlying Fund and CNY in respect of such investments.

Investment in offshore renminbi

The government of the PRC introduced the offshore renminbi / Chinese offshore Yuan (CNH) in July 2010 to encourage trade and investment with entities outside the PRC. Under the prevailing regulations in the PRC, the value of CNH and Chinese Yuan Renminbi (CNY) may be different and therefore is subject to fluctuations. The CNH denominated bond market is a developing market introduced in 2010 that is subject to regulatory restrictions imposed by the government of the PRC. These restrictions are subject to change. In extreme circumstances, the Underlying Fund may incur losses due to limited investment capabilities, or may not be able to fully implement or pursue its investment objectives or strategy.

Investment in Russia

The relative infancy of the Russian governmental and regulatory framework may expose investors to various political and economic risks. The Russian Securities Market from time to time may also suffer from a lack of market efficiency and liquidity which may cause higher price volatility and market disruptions.

The Underlying Fund may invest in securities listed on the Russian Trading System Stock Exchange and on the Moscow Interbank Currency Exchange in Russia, which are classified as Regulated Markets. Until such time that they become Regulated Markets, the Underlying Fund will limit any direct investment in securities traded on the non- Regulated Markets of the Commonwealth of Independent States (together with any other securities not traded on a Regulated Market) to 10% of its net assets.

Investments in Russia are currently subject to certain heightened risks with regard to the ownership and custody of securities, and counterparty exposure. In addition, Russian securities have an increased custodial risk associated with them as such securities are, in accordance with market practice, held in custody with Russian institutions which may not have adequate insurance coverage to cover loss due to theft, destruction or default.

Hedging Risk

- The investment manager of an Underlying Fund is permitted, but not obliged, to use hedging techniques to attempt to offset market and currency risks. There is no guarantee that hedging techniques will achieve the desired result.

Risks Associated with Derivatives

- The Underlying Fund may use derivatives in connection with its investment strategies. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the investment manager of the Underlying Fund to identify such opportunities. Identification and execution of the strategies to be pursued by the investment manager of the Underlying Fund involve uncertainty and decision of the investment manager of the Underlying Fund may not always be profitable. No assurance can be given that the investment

manager of the Underlying Fund will be able to identify or execute such strategies.

- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in Securities and other traditional investments. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in the losses that significantly exceed the Underlying Fund's original investment. Certain derivatives may give rise to a form of leverage. Due to the low margin deposits normally required in trading financial derivative instruments, an extremely high degree of leverage is typical for trading in financial derivative instruments. As a result, the Underlying Fund may be more volatile than if the Underlying Fund had not been leveraged because the leverage tends to exaggerate the effect of any increase or decrease in the value of the Underlying Fund's portfolio. A relatively small price movement in a derivative contract may result in substantial losses to the investor.
- Derivatives are also subject to the risk that changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index. The use of derivatives for hedging or risk management purposes or to increase income or gain may not be successful, resulting in losses to the Underlying Fund and the cost of such strategies may reduce the Underlying Fund's returns and increase the Underlying Fund's potential for loss.
- The Underlying Fund may use derivatives to hedge market and currency risk, and for the purposes of efficient portfolio management. The use of derivatives may expose the Underlying Fund to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions are geared.
- The Underlying Fund may take short positions on a security through the use of financial derivative instruments in the expectation that their value will fall in the open market. The possible loss from taking a short position on a security differs from the loss that could be incurred from a cash investment in the security; the former may be unlimited as there is no restriction on the price to which a security may rise, whereas the latter cannot exceed the total amount of the cash investment. The short selling of investments may also be subject to changes in regulations, which could impose restrictions that could adversely impact returns to investors.
- The price at which credit default swaps trades may differ from the price of the credit default swaps' referenced security. In adverse market conditions, the basis (difference between the spread bonds and the spread of credit default swaps) can be significantly more volatile than the credit default swaps' referenced securities.

Particular Risks of Exchange Traded Derivative Transactions

The securities exchange on which the shares of the Underlying Fund may be listed may have the right to suspend or limit trading in all securities which it lists. Such a suspension would expose the Underlying Fund to losses and delays in its ability to redeem shares of the Underlying Fund.

Stock Market Fluctuations

- Investors may note that the value of their investment may fall as well as rise and they may get back less than they originally invested. The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.

Investment in Single Market

- The single markets in which the Underlying Fund invests may be subject to particular political and economic risks and as a result, the Underlying Fund may be more volatile than more broadly diversified funds.
- The Underlying Fund may have greater volatility compared to broader market indices as a result of the Underlying Fund's focus on growth securities.

US Tax Withholding under the Foreign Account Tax Compliance Act ("FATCA")

The Foreign Account Tax Compliance Act (FATCA) is a portion of the 2010 Hiring Incentives to Restore Employment (HIRE) Act that requires individuals to report their financial accounts held overseas and foreign financial institutions to report about their American clients.

Under the FATCA provisions of the US Hiring Incentives to Restore Employment ("HIRE") Act, where the fund invests directly or indirectly in US assets, payments to the Underlying Fund of US-source income after December 31, 2013, gross proceeds of sales of US property by the Underlying Fund after December 31, 2014 and certain other payments received by the Underlying Fund after December 31, 2016 will be subject to 30% US withholding tax unless the Underlying Fund complies with FATCA. FATCA compliance can be achieved by entering into an agreement with the US Secretary of the Treasury under which the Underlying Fund agrees to certain US tax reporting and withholding requirements as regards holdings of and payments to certain investors in the Underlying Fund or, if the Underlying Fund is eligible, by becoming a deemed compliant fund. However, the form of the agreement has not been provided by the US Government, the US regulations which set out the detailed rules have not been finalised and there may be agreements reached between certain governments and the United States that could impact upon compliance with FATCA. Any amounts of US tax withheld may not be refundable by the Internal Revenue Service ("IRS"). Potential investors should consult their advisors regarding the application of the withholding rules and the information that may be required to be provided and disclosed to the Underlying Fund's Paying Agent and in certain circumstances to the IRS as will be set out in the final FATCA regulations. The application of the withholding rules and the information that may be required to be reported and disclosed are uncertain and subject to change.

Dividends

- The Underlying Fund may distribute not only investment income, but also realised and unrealized capital gains or capital. Where capital is distributed, this will result in a corresponding reduction in the value of shares of the Underlying Fund, and a reduction in the potential for long-term capital growth.

Warrants

- The Underlying Fund may invest in warrants, the values of these warrants are likely to fluctuate more than the prices of the underlying securities because of the greater volatility of warrant prices.

Futures and Options

- The Underlying Fund may use options and futures on securities, indices and interest rates for the purpose of efficient portfolio management. Transactions in futures and options carry a high degree of risk. A relatively small market movement will have a proportionately larger impact which may work for or against the investor. The placing of certain orders which are intended to limit losses to certain amounts may not be effective because market conditions may make it impossible to execute such orders.

Listing

- In case the shares of a Underlying Fund are listed, the exchanges on which those shares are listed will have no responsibility for the contents of any prospectus issued by the Underlying Fund or will make no representations as to its accuracy or completeness and expressly disclaim any liability whatsoever for any kind of loss arising from or in reliance upon any part of any such prospectus.

3) Risks Associated with investing in Money Market Instruments:

- Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's inability to meet the interest and principal payments.
- Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of creditworthiness of the issuer of such instruments.
- The NAV of the Units, to the extent that the corpus of the Scheme is invested in money market instruments, will be affected by the changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline.

4) Other risks associated with the Underlying Fund

- Because the Underlying Fund is aggressively managed, volatility may be high as the Underlying Fund may take larger position sizes, may have high turnover of holdings and at times may have a significant exposure to certain areas of the market.
- The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.
- Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements. Emerging market securities may also be subject to higher volatility and lower liquidity than non emerging market securities.
- The investment objective of the Underlying Fund may state that the Underlying Fund may invest on a limited basis in areas which are not naturally associated with the name of the Underlying Fund. These other markets and / or assets may act with more or less volatility than the core investments and performance will, in part, be dependent on these investments. All investments involve risks and there can be no guarantee against loss resulting from an investment in any share of the Underlying Fund, nor can there be any assurance that a Underlying Fund's investment objectives will be attained in respect of its overall performance. In certain circumstances the right of the investors of the Underlying Fund may be suspended.

For additional risk factors of the Underlying Fund, investors are requested to refer to the offering document or the website (www.jpmorganassetmanagement.lu) of the Underlying Fund.

In view of the above and as per investment objective, investment in the Scheme should be regarded as long term in nature. The Scheme is, therefore, only suitable for investors who can afford the risks involved.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 (twenty) investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such requirement is not satisfied during the NFO of the Scheme, the Mutual Fund will endeavor to ensure that within a period of 3 (three) months from the start of the NFO, or by the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case a Scheme does not have a minimum of 20 (twenty) investors in the stipulated period, the provisions of Regulation 39(2) (c) of the SEBI Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the Units would be redeemed at Applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI.

If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of 1 (one) month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 (fifteen) days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 (fifteen) days would lead to automatic Redemption by the Mutual Fund at the Applicable NAV on the 15th day of the notice period without any Exit Load. The Mutual Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS

- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of an amount of Rs 1,00,000/- (Rupees One Lakh only) made by it towards setting up the Mutual Fund or such other accretions and additions to the initial corpus set up by the Sponsor. The associates of the Sponsor are not responsible or liable for any loss or shortfall resulting from the operation of the Scheme.
- Neither this SID nor the Units have been filed / registered in any jurisdiction other than India. The distribution of this SID in certain jurisdictions may be restricted or totally prohibited and accordingly, persons who come into possession of this SID are required to inform themselves about, and to comply with, any such restrictions.
- Before making an application for Units, prospective investors should review / study this SID and the SAI carefully and in their entirety and should not construe the contents thereof or regard the summaries contained therein as advice relating to legal, taxation, or financial / investment matters. Investors should consult their own professional advisor(s) as to the legal, tax or financial implications or other consequences resulting from the following:
 - Subscription, gifting, acquisition, holding, disposal (by way of sale, switch or Redemption or conversion into money) of Units; and
 - the treatment of income (if any), capitalisation, capital gains, any distribution and other tax consequences relevant to their Subscription, acquisition, holding, capitalisation, disposal (by way of sale, transfer, switch, Redemption or conversion into money) of Units within their jurisdiction or under the laws of any jurisdiction to which they may be subject.

- None of the Mutual Fund, the Scheme, the Sponsor or the AMC has authorized any person to give any information or make any representation, either oral or written, that is not consistent with this SID in connection with the issue of Units. Prospective investors are advised not to rely on any information or representation not incorporated in this SID, unless it has been authorized by the Mutual Fund, the AMC or the Sponsor. Any Purchase or Redemption made by any person on the basis of statements or representations which are not contained or which are inconsistent with the information contained in this SID shall be solely at the risk of the investor.
- From time to time, and as may be permitted by SEBI, mutual funds or other schemes managed by the affiliates / associates of the Sponsor may invest either directly or indirectly in the Scheme. The mutual funds or other schemes managed by these affiliates / associates may acquire a substantial portion of the Units and collectively constitute a major investment in the Scheme. Accordingly, Redemption of Units held by such affiliates / associates may have an adverse impact on the value of the Units because of the timing of any such Redemption and may affect the ability of other Unit Holders to redeem their respective Units.
- As the liquidity of the Scheme's investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for Redemption of Units may be significant in the event of an inordinately large number of Redemption requests or of a restructuring of the Scheme's portfolio. In view of this, the Trustee has the right, in its sole discretion, to limit Redemptions under certain circumstances *(Please also refer to Section III B - Right to limit Redemption)*.
- Mutual funds invest in Securities which may not always be profitable and there can be no guarantee against loss resulting from investing in the Scheme.
- The tax benefits described in this SID are as available under the prevailing taxation laws. The information given is included only for general purpose and is based on the advice received by the AMC regarding the laws and practice currently in force in India. Investors / Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Unit Holder is advised to consult their own professional tax advisor.
- The Scheme's value may be impacted by fluctuations in interest rates, prevailing political, economic and social environments, changes in government policies and other factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes, etc.
- Redemptions due to a change in the fundamental attribute of the Scheme or due to any other reason may entail tax consequences. Such taxes, if any, shall be borne by the investor and none of the Mutual Fund, the Scheme or the AMC shall be liable for any tax consequences that may arise.

Investors are advised to refer to the terms and conditions of the offer before investing in the Scheme, and to retain this SID and the SAI for future reference.

Long Term drivers of JPMorgan Funds - Emerging Markets Opportunities Fund

JPMorgan Funds - Emerging Markets Opportunities Fund is a style driven fund, which aims to identify attractively-valued countries and stocks, while avoiding value traps.

The fund employs an integrated approach, using a disciplined screening process combined with fundamental analysis and portfolio manager oversight.

JPMorgan Funds - Emerging Markets Opportunities Fund is managed using top-down and bottom-up screens, as well as fundamental analysis. Suitability of the Scheme

The Underlying Fund is an equity fund investing in emerging markets and so investors need to be comfortable with the additional political and economic risks associated with emerging market investments. The Scheme may, therefore, be suitable for experienced investors who already have a globally diversified portfolio and now want to expand into riskier assets in order to potentially boost returns. As emerging stock markets are very volatile, investors should also have a 5 (five) year investment horizon.

Portfolio turnover will exclude:

Please note that the investment restrictions applicable to the Scheme's participation in overseas investments will be as prescribed or varied by SEBI or by the Trustee (subject to SEBI requirements) from time to time. The SEBI Regulations pertaining to investment in ADRs/GDRs / foreign Securities and overseas ETFs by mutual funds have now been decided as follows:

The aggregate ceiling for overseas investments is USD 7 billion as per the SEBI Circular SEBI/IMD/CIR No. 2/122577/08 dated 8 April 2008. Within the overall limit of USD 7 billion, mutual funds can make overseas investments subject to a maximum of USD 300 million per mutual fund. In accordance with SEBI circular no. SEBI/IMD/CIR No.7/104753/07 dated 26 September 2007, permissible overseas investments are:

- ADR / GDRs issued by Indian or foreign companies.
- Equity of overseas companies listed on recognized stock

exchanges overseas.

- Initial and follow on public offerings for listing at recognized stock exchanges overseas.
- Foreign debt Securities in the countries with fully convertible currencies, short term as well as long term debt instruments with rating not below investment grade by accredited / registered credit rating agencies.
- Money market instruments rated not below investment grade.
- Repurchase agreements in the form of investment, where the counterparty is rated not below investment grade; repurchase agreements should not, however, involve any borrowing of funds by mutual funds.

Limits for investment in overseas ETFs: The overall ceiling for investment in overseas ETFs that invest in Securities is USD 1 billion subject to a maximum of USD 50 million per mutual fund. Since the Scheme is a fund of funds scheme, in accordance with SEBI regulations, the restriction on the investments in mutual fund units up to 5% of net assets of the Scheme and which prohibits charging of fees shall not be applicable to investments in mutual funds in foreign countries. However, the management fees and other expenses charged by a mutual fund in foreign countries along with the management fee and recurring expenses charged to the Scheme shall not exceed the total limits on expenses as prescribed under Regulation 52(6) of the SEBI Regulations. Where the Scheme is investing only a part of the net assets in the foreign mutual fund(s), the same principle shall be applicable for that part of investment. The overseas securities markets offer new investment and portfolio diversification opportunities by enabling investments in the overseas markets. However, such investments also entail additional risks. Such investment opportunities may be pursued by the Scheme provided they are considered appropriate in terms of the overall investment objectives of the Scheme. The Scheme may then, if necessary, seek applicable permission from SEBI and RBI to invest abroad in accordance with the investment objective of the Scheme and in accordance with any guidelines issued by SEBI / RBI from time to time.

iv) Guidelines governing investments in GoI Securities

As per the SEBI Regulations and investment restriction guidelines issued by SEBI, the AMC will follow a policy wherein each decision of purchase / sale of GoI Securities shall be recorded. A weekly report relating to the portfolio of the Scheme will be reviewed by the Investment Committee of the AMC.

Investment and security selection of all kinds of debt instruments including GoI Securities, state government securities, and government guaranteed debt is delegated to the AMC to ensure conformity with the specified minimum credit rating standards for the purpose of managing credit risk and portfolio credit risk. All investments in GoI Securities shall be done in accordance with guidelines issued by SEBI / RBI.

In addition to the investment restrictions prescribed by SEBI Regulations, the AMC / the Trustee may also prescribe certain internal risk mitigating parameters / procedures from time to time to limit exposure of the Scheme in certain Securities, in order to overcome volatile market conditions.

The Trustee / the AMC may amend the above stated investment restrictions from time to time, as also the provisions of the Trust Deed, to the extent required to be incorporated as per the SEBI Regulations, so as to enable the Scheme to make all investments permitted by the SEBI Regulations, in order to seek to achieve its investment objective.

The AMC / Trustee may need to obtain from the investor verification of identity or such other details relating to a subscription for Units as may be required under any applicable Law, which may result in a delay in processing the application.

Should any investor become a US Person after the allotment of the Units to the investor, the Units held by him may be mandatorily redeemed. Redemption

PAYMENT OF PROCEEDS

1. Resident Investors

Redemption proceeds will be paid by cheques, marked "A/c Payee only" and drawn in the name of the sole holder/first-named holder (as determined by the records of the Registrar and Transfer Agent).

The Mutual Fund will endeavor to dispatch the Redemption proceeds within 7 (seven) Business Days from the acceptance of the Redemption request, but not beyond 10 (ten) Business Days from the date of acceptance of the Redemption request. If the payment is not made within the period stipulated in the SEBI Regulations, the Unit Holder shall be paid interest at 15% p.a. for the delayed period and the interest shall be borne by the AMC.

The bank name and bank account number, as specified in the Registrar and Transfer Agent's records, will be mentioned in the cheque. The cheque will be payable at all the cities having ISCs. If the Unit Holder resides in any other city, he will be paid by a demand draft payable at the city of his residence and the demand draft charges shall be borne by the AMC. The proceeds may be paid by way of direct credit/NEFT/RTGS/any other manner through which the investor's bank account specified in the Registrar and Transfer Agent's records may be credited with the Redemption proceeds.

The AMC provides direct credit facility with 10 banks currently. Please refer to *section "Instructions & Notes"* in the CAF for further details.

Note: The Trustee, at its discretion at a later date, may choose to alter or add other modes of payment.

The Redemption proceeds will be sent by courier or (if the addressee city is not serviced by the courier) by registered post. The dispatch for the purpose of delivery through the courier/postal department, as the case may be, shall be treated as delivery to the investor. The AMC/Registrar and Transfer Agent are not responsible for any delayed delivery or non-delivery or any consequences thereof, if the dispatch has been made correctly as stated in this paragraph.

2. Non-Resident Indian Investors

For NRIs, Redemption proceeds will be remitted depending upon the source of investment as follows:

(a) Repatriation Basis

When Units have been purchased through remittance in foreign exchange from abroad or by cheque/draft issued from proceeds of the Unit Holder's FCNR account or from funds held in the Unit Holder's NRE Rupee account kept in India, the proceeds can be remitted to the Unit Holder in foreign currency (any exchange rate fluctuation will be borne by the Unit Holder). The proceeds can also be sent to his Indian address for crediting to his NRE account / FCNR account / NRO account, if desired by the Unit Holder.

(b) Non-Repatriation Basis

When Units have been purchased from funds held in the Unit Holder's NRO account, the proceeds will be sent to the Unit Holder's Indian address for crediting to the Unit Holder's NRO account.

For FIIs, the designated branch of the authorised dealer may allow remittance of net sale / redemption proceeds (after payment of taxes) or credit the amount to the FCNR account or NRE Rupee account of the FII maintained in accordance with the approval granted to it by the RBI.

The AMC / Trustee / Mutual Fund will not be liable for any delays or for any loss on account of any exchange fluctuations, while converting the Rupee amount in foreign exchange in the case of transactions with NRIs / FIIs.

The AMC / Trustee / Mutual Fund may make other arrangements for effecting payment of Redemption proceeds in future.

The Unit Holder has the option to request for Redemption either in amount in Rupees or in number of Units.

Units purchased by cheque may not be redeemed until after realisation of the cheque. In case the investor mentions the number of Units as well as the amount, then the amount will be considered for processing the Redemption request. In case the investor mentions the number of Units or the amount in words and figures, then the value in words will be taken for processing the Redemption request.

If the redemption request amount exceeds the balance lying to the credit of the Unit Holder's said account, then the Scheme shall redeem the entire amount lying to the credit of the Unit Holder's account in the Scheme.

If an investor has purchased Units on more than 1 (one) Business Day, the Units purchased prior in time (i.e. those Units which have been held for the longest period of time), will be redeemed first and / or are deemed to have been redeemed first, i.e. on a first in first out basis except when the Unit Holder specifically requests Redemption of Units purchased on specific date(s). If multiple Purchases are made on the same day, the Purchase appearing earliest in the account statement will be redeemed first.

The minimum amount in Rupees for Redemption shall be ₹ 1,000/- (One Thousand Rupees only), or 100 (one hundred) Units or account balance, whichever is less.

The Mutual Fund will endeavour to dispatch the Redemption proceeds to the Unit Holders normally within 3 (three) Business Days from the date of acceptance of the Redemption request; however investors should be aware that regulatory timelines currently specify 10 (ten) Business Days.

Delay in payment of Redemption Proceeds

The AMC shall be liable to pay interest to the Unit Holders at such rate as may be specified by SEBI for the period of such delay (presently at 15% per annum). Interest shall be payable if there is a delay in payment of Redemption proceeds beyond the regulatory timelines stipulated by SEBI.

Bank Account Details

As per the directives issued by SEBI, it is mandatory for applicants to mention their bank account numbers in their applications for Purchase or Redemption of Units. If the Unit Holder fails to provide the bank mandate, the request for Redemption would be considered as not valid and the Mutual Fund retains the right to withhold the Redemption request or the Redemption proceeds until a proper bank mandate is furnished by the Unit Holder and the provision with respect of penal interest in such cases will not be applicable/entertained.
