Investment Strategy

The scheme will have a tenure of 3.5 years and the corpus of the Scheme will be primarily invested in equity and equity related securities of the companies in the small and midcap segment that have a potential to appreciate in the long run. The endeavor of the Investment Manager will be to pick stocks which could become potential leaders in their respective fields in the future. The Fund will select stocks from within the investment universe based on its internal analysis based on the following criteria:

- Visionary & Trustworthy management with established track record
- Significant Business presence in the area of their operations.
- Prospects for future growth and scalability
- Financial discipline and returns as measured by ratios like Return on Investment (ROI) and Return on Equity (ROE)
- Valuations in relations to broad market and expected growth in earnings

Small & Mid-cap stocks are generally varied, uncorrelated to broader markets & not sector specific. Select bottom-up picks in the Small & Mid cap space offer significant opportunity for rerating. Besides this, short-term opportunities would also be seized, provided they are supported by underlying valuations. As part of the investment strategy, scheme will book profits at opportune moments to take advantage of the volatility in the market. The Scheme may also invest a small portion of its corpus in fixed income securities including money market instruments to manage its liquidity requirements.

From time to time, the Scheme may consider leveraging any specific current or historical market trends or correlations in determining its investment strategy.

Portfolio turnover policy

The scheme has no explicit constraints either to maintain or limit the portfolio turnover. Portfolio turnover will depend upon the circumstances prevalent at any time and would also depend on the extent of volatility in the market and inflows/outflows in the scheme. The Fund Manager will however endeavor to maintain a low portfolio turnover rate.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Memorandum (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

- Small & Mid cap stocks may be more volatile & less liquid than large cap companies. Investors therefore should assume that illiquidity risks are higher in this Scheme than in a normally diversified equity fund. Thus, relative to larger, more liquid stocks, investing in small & mid cap stocks, involves potentially greater volatility and risk.

Further, investments in the Scheme are subject to various risk factors including but not limited to risks associated with: investment in Equity and Equity related instruments, investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk etc., investments in Derivatives (The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments). Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. The above are some of the common risks associated with investments in various securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis. Further, the Fund/AMC is not guaranteeing or assuring any returns. Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e. before making a decision to invest/redeem Units.

The Scheme shall also be subject to risks associated with listing of units and risks inherent to the close ended nature of the scheme. **Investors in the Scheme are not being offered any guaranteed returns. Please refer to SID for detailed scheme specific risk factors.**

Risk Control

Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. The AMC may also implement certain internal control procedures / risk & exposure limits etc., which may be varied from time to time

The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous in-depth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.
