Investment Strategy

Investment Focus and strategy:

The Fund manager would endeavor to construct the portfolio within the guidelines set forth in the Scheme Information Document (prospectus) and by the Canara Robeco Risk Management Committee. The portfolio construction process will adhere to stringent credit quality and sector limitations. The Risk Management & Control Structure is at the core of the entire portfolio construction process with the Security & Liquidity Limits guiding the security selection.

Equity Investment Policy: The equity allocation will be managed like a diversified portfolio with high conviction stock ideas. Bottom-up stock picking methodology will be followed at the time of portfolio construction which forms the core of Business Management Valuation (BMV) investment process followed across our current equity funds.

Fixed Investment Policy: Most of the portfolio will be invested in zero coupon bonds which expire in line with the maturity of the schemes and are highly rated by the credit rating agencies and/or other highly rated debt and money market securities maturing on or before the maturity of the scheme. It will primarily follow a passive investment strategy, where the portfolio will be intended to largely buy and hold till maturity.

Investment in Debt Securities required for capital protection will only be made in such securities carrying the highest investment grade rating accorded by an approved credit rating agency. In times of uncertainty, the scheme has the flexibility to go up to 100% in fixed income (debt instruments) in order to limit downside.

Derivatives Investment Policy: The fund may take exposure to equity market via futures or options as it allows efficient participation in equity market movements. At the start date of the scheme the futures or options may be bought and may be held until their expiry date. The expiry date would fall within the maturity date of the scheme.

The Trustees shall continuously monitor the portfolio structure of the Scheme and report the same in the Half Yearly Trustee Reports to SEBI. The AMC shall also report the same in their bimonthly reports to SEBI.

Risk Profile of the scheme

Scheme Specific Risk

I. Risks associated with investments in Fixed Income Securities

Interest - Rate Risk: Fixed income securities such as government bonds, corporate bonds, and money market instruments and derivatives run price - risk or interest - rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.

Re - investment Risk: Investments in fixed income securities carry re - investment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

Basis Risk: The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Liquidity Risk: The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.

Credit Risk: This is the risk associated with the issuer of a debenture / bond or a money market instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Settlement Risk: Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

II. Risks associated with investments in equities and equity related instruments

- Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, currency exchange rates, changes in law / policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors.
- Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.
- Securities which are not quoted on the stock exchanges are inherently illiquid
 in nature and carry a larger liquidity risk in comparison with securities that are
 listed on the exchanges or offer other exit options to the investors, including put
 options. The AMC may choose to invest in unlisted securities that offer attractive
 yields within the regulatory limit. This may however increase the risk of the
 portfolio. Additionally, the liquidity and valuation of the Scheme investments
 due to its holdings of unlisted securities may be affected if they have to be sold
 prior to the target date of disinvestment.

III. Risks associated with investments in derivatives

As and when the Scheme trades in the derivatives market, there are risk factors that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "counter party") to comply with the terms of the derivatives contract.

Other risk in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Derivatives can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involve uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.

The risk associated with the use of derivatives is different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments

Trading in derivatives has the following risks:

- An exposure to derivatives in excess of the hedging requirements can lead to losses.
- b. An exposure to derivatives can also limit the profits from a genuine investment transaction.
- Efficiency of a derivative market depends on the development of a liquid and efficient market for underlying securities.

IV. Risks associated with Capital Protection and Ratings

The scheme offered is "oriented towards protection of capital" and "not guaranteed with returns". Further, the orientation towards protection of the capital originates from the portfolio structure of the scheme and not from any bank guarantee, insurance cover etc. The ability of the portfolio to meet capital protection on maturity to the investors can be impacted by interest rate movements in the market, credit defaults by bonds, expenses and reinvestment risk.

CARE's rating is not a recommendation to buy, sell or hold a fund or scheme. These ratings do not comment on the volatility of net asset value (NAV) of the scheme or the level of NAV compared to the face value during the tenure of the scheme any time before maturity. The ratings are based on current information furnished to CARE by the issuer or obtained by CARE from sources it considers reliable. CARE does not, however guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. CARE does not perform an audit in connection with any rating and may on occasion rely on unaudited information. The ratings may be changed, suspended, or withdrawn as a result of changes in or unavailability of such information, or based on other circumstances. Fund rated by CARE have paid a rating fee.

The portfolio of the Scheme would be reviewed on a quarterly basis rating agency, CARE, in the light of the objective of the Scheme.

V. Risks associated with Market Trading

- Although Units of the Scheme Information Document are to be listed on the Exchange(s), there can be no assurance that an active secondary market will develop or be maintained.
- Trading in Units of the scheme on the Exchange(s) may be halted because of
 market conditions or for reasons that in view of Exchange Authorities or SEBI,
 trading in Units of the scheme is not advisable. In addition, trading in Units of
 the Scheme is subject to trading halts caused by extraordinary market volatility
 and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance
 that the requirements of Exchange necessary to maintain the listing of Units of
 the scheme will continue to be met or will remain unchanged.
- Any changes in trading regulations by the Exchange(s) or SEBI may inter-alia result in wider premium/ discount to NAV.
- The Units of the scheme may trade above or below their NAV. The NAV of the scheme will fluctuate with changes in the market value of scheme holdings.
- The trading prices of Units of the scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the scheme.
- The Units will be issued in demat form through depositories. The records of the
 depository are final with respect to the number of Units available to the credit
 of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund on
 the maturity date / final redemption date will depend upon the confirmations
 to be received from depository(ies) on which the Mutual Fund has no control.
- As the Units allotted under the Scheme will be listed on the Exchange(s), the Mutual Fund shall not provide for redemption / repurchase of Units prior to maturity / final redemption date of the scheme

VI. Risk factors associated with processing of transaction through Stock Exchange Mechanism

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognized stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing / settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s).

VII. Risk associated with investment in Money Market Instruments

Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's inability to meet interest and principal payments.

- Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, the general level of market liquidity and market perception of creditworthiness of the issuer of such instruments.
- The NAV of the Units, to the extent that the corpus of the Scheme is invested in money market instruments, will be affected by changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline.

VIII. Risk factors associated with Close Ended Schemes:

A close ended Scheme endeavors to achieve the desired returns only at the scheduled maturity of the Scheme. Investors who wish to exit/redeem before the scheduled maturity date may do so through the stock exchange mode, if they have opted to hold Units in a demat form, by mentioning their demat details on the NFO application form. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. Hence, Unit Holders who sell their Units in a Scheme prior to maturity may not get the desired returns.

Although the securities in the portfolio will have high market liquidity, there is a possibility that market liquidity could get impacted on account of company/sector/ general market related events and there could be a price impact at maturity while liquidating the portfolio.

Plans and Options

Scheme offers two plans Regular and Direct. Under each plan there are two options

• Regular plan: Growth, Dividend (Payout) • Direct plan: Growth, Dividend (Payout)

In case of valid applications received without indicating any choice of option the default option will be Growth Option and processed accordingly.

20. Real Time Gross Settlement (RTGS) & National Electronic Funds Transfer (NEFT)

The AMC provides the facility of 'Real Time Gross Settlement (RTGS)' & 'National Electronic Funds Transfer (NEFT)' offered by Reserve Bank of India(RBI), which aims to provide credit of redemption and dividend payouts (if any) directly into the bank account of the Unit holder maintained with the banks (participating in the RTGS/NEFT System). Unit holders can check the list of banks participating in the RTGS/NEFT System from the RBI website i.e. www.rbi.org. in or contact any of our Investor Service Centres.

However, in the event of the name of Unit holder's bank not appearing in the 'List of Banks participating in RTGS/NEFT' updated on RBI website www.rbi.org.in, from time to time, the instructions of the Unit holder for remittance of redemption/ dividend (if any) proceeds via RTGS/NEFT System will be discontinued by Canara Robeco Mutual Fund / Canara Robeco Asset Management Company Limited without prior notice to the Unit holder and the payouts of redemption / dividend (if any) proceeds shall be effected by sending the Unit holder(s) a cheque / demand draft

For more details on NEFT or for frequently asked questions (FAQs) on RTGS/NEFT, Unit holders are advised to visit the RBI website www.rbi.org.in

Electronic Clearing Service (ECS)*

Investors who have opted for the ECS facility of RBI for dividend payment will receive a direct credit of the amount due to them in their mandated account whenever the payment is made through ECS. A separate advice regarding credit of amount(s) via ECS will be sent to the unit holder. It should be noted that while the Mutual Fund will make all efforts, there is no commitment that this facility will be made available to all desirous investors.

Applicants in cities not covered under ECS facility will receive dividend payments, if any by cheques or demand drafts and the same will be mailed to the Unitholders. Please note that the ECS Facility is available only in respect of dividend payments and not in the case of Redemption of Units. Therefore, the Investors will receive their redemption / dividend proceeds (if any) directly into their bank accounts in the following order:

- (i) In case the bank account of an investor is covered under RTGS/ NEFT system offered by the RBI then the payment of redemption / dividend proceeds (if any) shall be effected via RTGS/NEFT mechanism only.
- (ii) The facility for payment of dividend proceeds, if any via ECS* shall be effected only in case the bank account of an investor is not covered under the RTGS/ NEFT system.
- * available only in respect of dividend payments

Each of the above facilities aims to provide direct credit of the redemption proceeds and dividend payouts (if any) into the bank account of the Unit holder and eliminates the time lag between despatch of the cheque, its receipt by the Unit holders and the need to personally bank the instrument and await subsequent credit to the Unit holders account. Further, the potential risk of loss of instruments in transit through courier / post is also eliminated. Each of the said facility as a mode of payment, is faster, safer and reliable. In case the bank account as communicated by the Unit holder is with any of the banks participating in the RTGS/NEFT System offered by RBI, the AMC shall automatically extend this facility to the Unit holders provided unitholders have furnished all requisite information to the AMC to receive such credits.

Canara Robeco Asset Management Company Limited / Canara Robeco Mutual Fund shall not be held liable for any losses / claims, etc. arising on account of processing the credit via RTGS/ NEFT/ECS of redemption / dividend proceeds on the basis of Bank Account details as provided by the unit holder in the Application Form.

Canara Robeco Asset Management Company Limited / Canara Robeco Mutual Fund shall not be liable for delayed receipt /non receipt of redemption /dividend amount for reason of incomplete /inaccurate information provided by the unit holders
