Investment Objective	<p>To invest in companies which are constituents of NIFTY 50 Equal Weight Index (underlying Index) in the same proportion as in the index and endeavour to generate returns that are commensurate (before fees and expenses) with the performance of the underlying Index.</p> <p>There is no assurance that the investment objective of the Scheme will be realized.</p>														
Asset Allocation Pattern	<p>Under normal circumstances, it is anticipated that the asset allocation of the Scheme shall be as follows:</p> <table border="1" data-bbox="448 383 1476 640"> <thead> <tr> <th rowspan="2">Instruments</th> <th colspan="2">Indicative allocations (% of total assets)</th> <th rowspan="2">Risk Profile</th> </tr> <tr> <th>Minimum</th> <th>Maximum</th> </tr> </thead> <tbody> <tr> <td>Equity and equity related securities covered by Nifty 50 Equal Weight Index</td> <td>95%</td> <td>100%</td> <td>Medium to High</td> </tr> <tr> <td>Debt and Money Market Securities</td> <td>0%</td> <td>5%</td> <td>Low to Medium</td> </tr> </tbody> </table> <p>The Scheme shall not invest in ADR/GDR/overseas securities. The Scheme will not invest in foreign securities. The Scheme will not invest in Securitized Debt. The Scheme will not participate in repo of money market and corporate debt securities.</p> <p>*Money Market Instruments will include CBLO, Commercial Paper, Certificates of Deposit, Treasury Bills, Bills Rediscounting, Repos, short term bank deposits, short-term Government securities and any other such short-term instruments as may be allowed under the regulations prevailing from time to time.</p> <p>The Scheme retains the flexibility to invest across all the securities in money market instruments as permitted by SEBI / RBI from time to time, including Income schemes of mutual funds.</p> <p>The net assets of the scheme will be invested predominantly in stocks constituting the Nifty 50 Equal Weight Index. This would be done by investing in all the stocks comprising the Nifty 50 Equal Weight Index in approximately the same weightage that they represent in the Index. A small portion of the net assets will be invested in CBLO / money market instruments permitted by SEBI / RBI.</p> <p>Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period. Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. It can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the underlying index and will be easy to settle compared to physical portfolio of shares representing the underlying index. In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. The Scheme will not maintain any leveraged or trading positions. Exposure to such derivatives will be restricted to 20% of net assets of the scheme.</p> <p>Subject to SEBI (MF) Regulations and the applicable guidelines issued by SEBI, the Mutual Fund may engage in stock lending. The AMC shall comply with all reporting requirements and the Trustee shall carry out periodic review as required by SEBI guidelines. Stock lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation. The securities lent will be returned by the borrower on expiry of the stipulated period.</p>	Instruments	Indicative allocations (% of total assets)		Risk Profile	Minimum	Maximum	Equity and equity related securities covered by Nifty 50 Equal Weight Index	95%	100%	Medium to High	Debt and Money Market Securities	0%	5%	Low to Medium

Asset Allocation Pattern

In the event of involuntary corporate action, the Scheme shall endeavor to dispose the security not forming part of the Underlying index within 7 business days from the date of listing, subject to availability of adequate liquidity for the security.

In the event NIFTY 50 Equal Weight index is dissolved or is withdrawn by IISL or is not published due to any reason whatsoever, the Trustee reserves the right to modify the Scheme so as to track a different and suitable index or to suspend tracking the respective index and appropriate intimation will be sent to the unitholders of the respective Scheme. In such a case, the investment pattern will be modified suitably to match the composition of the securities that are included in the new index to be tracked and the Scheme will be subject to tracking errors during the intervening period.

Portfolio rebalancing:

The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 30 days from the date of occurrence of deviation. Where the portfolio is not rebalanced within 30 Days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Schemes. Any alteration in the investment pattern will be for a short term on defensive considerations; the intention being at all times to protect the interests of the Unit Holders.

It may be noted that no prior intimation/indication will be given to investors when the composition/asset allocation pattern under the Scheme undergoes changes within the permitted band as indicated above.

CHANGE IN INVESTMENT PATTERN

The Scheme, in general, will hold all the securities that comprise the underlying Index in the same proportion as the index.

Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error is not expected to exceed by 2% p.a. However, in case of events like, dividend issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Basket, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. Since the scheme is an open ended index linked equity scheme, it will endeavor that at no point of time the scheme will deviate from the index. In the event of the asset allocation falling outside the limits specified in the asset allocation table, the Fund Manager will rebalance the same within 7 days.

In the interest of investors, the AMC reserves the right to change the above asset allocation pattern due to corporate action activity undertaken in the underlying securities.

Investment Strategy

Strategy for Equity Securities

The Scheme will be managed passively with investments in stocks in the same proportion as in NIFTY 50 Equal Weight Index. The investment strategy would revolve around minimizing the tracking error through periodic rebalancing of the portfolio, taking into account the change in weights of stocks in the indices as well as the incremental collections / redemptions in the Scheme. A small portion of the net assets will be held as cash or will be invested in debt and money market instruments permitted by SEBI/RBI including collateralised Borrowing & Lending Obligations (CBLO) or in alternative investment for the collateralised Borrowing & Lending Obligations (CBLO) as may be provided by the RBI, to meet the liquidity requirements under the Scheme.

- **Strategies for trading in equity derivatives**

The Mutual Fund may use the following strategies while trading in derivatives for the purpose of efficient portfolio management:

- a. **Reverse Arbitrage:**

This strategy will be adopted if the cash price of a stock (say "XYZ") is reasonably greater than single stock futures of XYZ, and then the Investment Manager may sell cash position in XYZ and buy single stock futures of XYZ. In this case the Investment Manager will still be having a long-term view on the stock XYZ but is able to minimize the cost of holding of XYZ.

- b. **Arbitrage:**

This strategy will be adopted if the single stock future of XYZ is reasonably greater than the cash price of XYZ, then the Investment Manager will buy the shares of XYZ in the cash market and sell equivalent numbers of single stock futures of XYZ. In this case the Investment Manager may not have an investment view of the stock XYZ but would like to enhance the portfolio value.

- c. **Portfolio Hedging:**

This strategy will be adopted:

- (i) If in an already invested portfolio of a Scheme, the Investment Manager is expecting a market correction, the Investment Manager may sell Index Futures to insulate the portfolio from the market related risks.
 - (ii) If there are significant inflows to the Scheme and the market expectations are bullish, the Investment Manager may buy Index Futures to continue participation in the equity markets. This strategy is used to reduce the time to achieve the desired invested levels.

Strategy for Fixed Income Securities

The Investment Manager will invest only in those debt securities that are rated investment grade by a domestic credit rating agency such as CRISIL, ICRA, CARE etc. or in unrated debt securities which the Investment Manager believes to be of equivalent quality. In the case of unrated debt securities, the approval of the Board of Directors of the AMC and Trustee shall be obtained prior to investment.

Risk	Risk mitigants / management strategy
Liquidity Risk	The stocks in the NIFTY 50 Equal Weight index are selected by applying liquidity as one of the criterion and hence the portfolio of DSP BlackRock Nifty Equal Weight Index is expected to be highly liquid. The index is rebalanced based on certain criteria after which certain illiquid stocks are replaced by more liquid stocks. The fund manager makes the changes to the portfolio accordingly.
Credit Risk	Credit Risk associated with fixed income securities will be managed by making investments in securities issued by borrowers, which have a good credit profile. The credit research process includes a detailed in-house analysis and due diligence. Limits are assigned for each of the issuer (other than government of India); these limits are for the amount as well as maximum permissible tenor for each issuer. The credit process ensures that issuer level review is done at inception as well as periodically by taking into consideration the balance sheet and operating strength of the issuer.
Term Structure of Interest Rates (TSIR) Risk	The Investment Manager will endeavor to actively manage the duration based on the ensuing market conditions. As the fixed income investments of the Scheme are generally short duration in nature, the risk can be expected to be small.
Rating Migration Risk	The endeavour is to invest in high grade/quality securities. The due diligence performed by the fixed income team before assigning credit limits and the periodic credit review and monitoring should address company-specific issues.
Re-investment Risk	Re-investment Risk is prevalent for fixed income securities, but as the fixed income investments of the Scheme are generally short duration in nature, the impact can be expected to be small.
Risk associated with Stock Lending	At present, there is no significant activity in the Securities Borrowing and Lending market. The Mutual Fund has so far not participated in Securities Lending market. However, we understand the risks associated with the securities lending business and the AMC will have appropriate controls (including limits) before initiating any such transactions.
