- (ii) The order of risk-reward in instrument categories could be considered as Certificate of Deposits (CD) being of lower risk compared to Commercial Papers (CPs)/ Non - Convertible Debentures (NCDs). The Investment Manager may deploy funds in CDs (with highest rating category i.e. A1+) and/or Collateralized Borrowing and Lending Obligation (CBLO) and/or Reverse Repurchase (RREPO), in case the above instruments/securities, are not available or the Investment Manager is of the view that the risk-reward is not in favor of the Unit holders. More than 6months	30 days

Where the portfolio is not rebalanced within the period as mentioned in the above table, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme. Such changes in the investment pattern will be for a short term and for defensive considerations and the intention being at all times to seek to protect the interests of the Unit Holders and may be caused due to reason such as non - availability of the appropriate assets as mentioned in the above asset allocation matrix or due to perceived weakness in the credit worthiness of the issuer of the assets which are held in the portfolio during the tenor of

	<p>the Scheme.</p> <p><b>Credit Evaluation Policy</b></p> <p>Credit Analysis at DSPBRIM is an independent function performed by the Risk &amp; Quantitative Analysis (RQA) team. The RQA team sets up and monitors lending limits for each debt issuer. Issuer risk limits cover the quantum of exposure, maximum tenor and in some instances the type of instruments that can be purchased by the Investment Manager. An individual scheme's access to the issuer limit is dependent on its investment objectives, regulatory restrictions and assets under management. Risk limits for issuers are assigned and reviewed regularly at an internal Credit Committee meeting.</p> <p><b>Credit evaluation process:</b> The credit evaluation process includes a thorough analysis of the operating and financial strength of the issuer as well as management and industry risk evaluation. Typically, an interaction with the company management is also sought prior to setting up of issuer limits.</p> <p>For structured obligations, in addition to the above, the evaluation also covers originator analysis, collateral analysis, structure analysis and embedded risk analysis.</p> <p>Each credit proposal is discussed by an internal Credit Committee and a limit is assigned, if the issuer/structure is suitable.</p> <p><b>Sectors in which the Schemes shall not invest</b></p> <p>The Schemes shall not invest in debt issued by furniture, floriculture, Glass and Ferro &amp; Silica Manganese Companies.</p> <p>The Schemes shall not invest in securitized debt, fixed income derivatives instruments, in foreign debt securities and repos in corporate debt securities.</p>	
<b>Investment Strategy</b>	<p>The Investment Manager will invest only in those debt securities that are rated investment grade by a domestic credit rating agency authorised to carry out such activity, such as CRISIL, ICRA, CARE etc. Where investment in unrated debt securities is sought to be made, specific approval of the Board of Directors of the AMC and Trustee shall be obtained prior to the investment. In-house research by the Investment Manager will emphasize on credit analysis, in order to determine credit risk. The Scheme will invest only in such securities which mature on or before the scheduled maturity date.</p>	
<b>Risk Profile</b>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Scheme specific risk factors are summarized below:  Market Risk (ii) Rating Migration Risk (iii) Liquidity Risk (iv) Credit Risk (v) Re-investment Risk (vi) Interest Rate Risk (vii) Concentration Risks (viii) Risk associated with Listing of Units and Risk associated with close ended schemes.</p>	
<b>Risk Management Strategies</b>	<b>Risk</b>	<b>Risk mitigants / management strategy</b>
	<u>Interest rate risk</u> Fall in the value of the portfolio due to upward movement of interest rates	Although this risk exists in a fixed income portfolio, the closed ended nature of the Scheme mitigates the risk as portfolio construction at the time of inception leads to creation of a portfolio with securities whose maturity date is in line with the maturity date of the Scheme.
	<u>Credit risk</u> Issuer's inability to meet interest and principal payments on its debt obligations	Credit risk management is an independent function performed by the Risk Management team. The team establishes and continuously monitors credit limits for each issuer based on inputs from issuer financial statements, rating agencies etc. Issuer Risk Limits are imposed on a single issuer as well as an industrial

		group, for all the schemes. Issuer risk limits cover the quantum of exposure, maximum tenor and in some instances the type of instruments that can be purchased. Risk limits for issuers are assigned after discussion at an internal Credit Committee meeting. The endeavour is to construct a portfolio with high credit quality. The Fund Manager is generally guided by, but not restrained by, the ratings announced by various rating agencies on the assets in the portfolio. In case of both rated and unrated debt securities, the independent credit appraisal process carried out by the RQA team is the same. For investment in unrated debt securities, prior approval of the Board of Trustees and the Board of asset management company is mandatory.																																				
	<u>Rating Migration Risk</u>	As the endeavour is to invest in high grade/quality securities, the probability of rating downgrade is low. The due diligence performed by the Risk and Quantitative Analysis (RQA) team before assigning credit limits should mitigate company-specific issues. The RQA team also monitors these limits after they have been assigned, on an ongoing basis																																				
	<u>Liquidity risk</u> High impact costs for liquidation of securities held in the portfolio	In a closed ended product, liquidity risk on account of underlying securities' market liquidity does not exist as intermediate liquidity is not required. Liquidity access is done through contractual maturity of the security, which is in line with the term of the closed ended Scheme.																																				
	<u>Concentration risk</u> Concentrated investment in single security or single issuer	We follow SEBI prescribed norms on maximum concentration to single issuers.																																				
	<u>Event risk</u> Price risk due to company or sector specific event	The endeavour is to invest in securities of issuers, which have high balance sheet strength in the investment horizon to eliminate single company risk.
