EDELWEISS FIXED MATURITY PLAN – SERIES 42

(A 36 month Close ended Income Scheme)

Investment Objective

The primary investment objective of the Scheme is to generate income through investment in Debt / Money Market Instruments and Government Securities maturing on or before the Maturity Date of the Scheme.

However, there is no assurance that the investment objective of the Scheme will be realized and the Scheme does not assure or guarantee any returns.

Asset Allocation Pattern Of The Scheme

Under normal circumstances, the anticipated asset allocation of the Scheme would be as follows:

Instruments	Risk Profile	Indicative Allocation (% of net assets				
		Minimum	Maximum			
Debt Instruments and Government Securities	Low to Medium	80	100			
Money Market Instruments	Low	0	20			

Note: The Scheme will invest only in such securities which mature on or before the Maturity Date of the Scheme.

The Scheme will not invest in credit default swap, securitized debt and foreign securities.

Exposure in derivatives will be limited up to 50% of corpus of the Scheme.

Total gross exposure in debt, money market securities and derivatives shall not exceed 100% of the net assets of the Scheme.

In addition to the instruments stated in the table above, the Scheme may enter into Collateralised Borrowing & Lending Obligations (CBLO) or repo/reverse repo or in an alternative investment as may be provided by SEBI/RBI from time to time. However, the Scheme shall not participate in repos of corporate debt securities.

The Scheme may, if the Trustees permit, engage in short selling of securities in accordance with the framework relating to short selling and securities lending and borrowing specified by SEBI. The Scheme shall not deploy more than 20% of its net assets in stock lending and not more than 5% of the net assets of the Scheme will be deployed in Stock lending to any single counterparty.

Pending deployment of the funds in securities in terms of investment objective of the Scheme, the AMC may park the funds of the Scheme in short term deposits of the Scheduled Commercial Banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as may be amended from time to time.

INTENDED PORTFOLIO ALLOCATION

The intended Portfolio for the Schemes will be as under. The exact allocation percentage to net assets would be determined at the time of launch of each scheme. The Scheme shall invest in various securities/instruments as mentioned below with the ratings mentioned against the type

of instruments. As per the Regulations, the Scheme is allowed to invest within a range of 5% of the intended allocation (floor and cap) against each sub asset class/credit rating.

		Indicative allocation (as	% to Net Assets	5)							
Asset Class/ Instruments	Credit Rating assigned by an accredited SEBI registered credit rating agency										
moti amento	A1+	AAA equivalent	Sovereign	Not Applicable							
CDs	0-5%	-	-	-							
CPs	0-5%	-	-	-							
NCDs	-	40-45%	-	-							
G-Sec / SDL	-	-	55-60%								
Cash and Cash equivalent / Units of Liquid Fund	-	-	-	0-5%							

Note:

- a. Securities with Rating AA will include AA+, AA and AA-. Similarly, AAA equivalent rating shall also include A1+ which are the highest rating provided for the instruments in short term category i.e. instruments having maturity of equal to or less than one year. Also, securities with Rating A will include A+, A and A-. In case an instrument has more than one publicly available rating, the more conservative rating will be considered for the purpose of investment.
- b. Positive variation: The Scheme may deviate from the indicated asset allocation in favour of higher credit rated instruments within the same asset class.
- c. In case of non-availability of CPs/NCDs the Scheme may invest in the highest rated CDs and CBLOs/T-Bills. Such deviation may exist till suitable NCD/CP of desired credit quality is not available.
- d. At the time of building up the portfolio post NFO Period and also towards the maturity of the Scheme, there may be higher allocation to cash and cash equivalent instruments.
- e. In the event of any deviation from the floor and ceiling of credit ratings specified for any instrument, the Fund Manager shall review and rebalance the portfolio within 30 days from the date of said deviation. In case the rebalancing is not done within the specified period, justification for the same shall be provided to the Investment Committee and the reason for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.

Risk Profile Of The Scheme

The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc. Some of the risks are listed below:

- 1. Risks Associated with Fixed Income and Money Market Instruments:
- * Interest rate risk: Price of a fixed income instrument falls when the interest rates move up and vice- versa, which will affect the NAV accordingly.
- * Spread risk: Investments in corporate bonds are exposed to the risk of widening of the spread between corporate bonds and gilts. Prices of corporate bonds tend to fall if this

- spread widens which will affect the NAV of the Scheme accordingly.
- * Credit risk or default risk: Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest &/or principal payment obligations.
- * Liquidity: The Risk of non execution of sale/purchase order due to low volumes is liquidity
- * Reinvestment risk: Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security.
- * Performance Risk: Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
- * Market risk: Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities.

2. Risks associated with investment in Derivatives:

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Trading in derivatives has the following risks:

- a. An exposure to derivatives in excess of the hedging requirements can lead to losses.
- b. An exposure to derivatives can also limit the profits from a genuine investment transaction.
- c. Efficiency of a derivatives market depends on the development of a liquid and efficient market for the underlying securities.
- d. Derivatives carry the risk of adverse changes in the market price.
- e. Illiquidity Risk i.e. risk that a derivative trade cannot be executed or reversed quickly enough at a fair price, due to lack of liquidity in the market.

The Fund may use derivative instruments as permitted under the Regulations and guidelines. Usage of derivatives will expose the Scheme to liquidity risk, open position risk, and opportunities risk etc. Such risks include the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Debt derivatives instruments like interest rate swaps, forward rate agreements or other derivative instruments also involve certain risks. For details, please refer SAI.

3. Risks Associated with Stock Lending & Short Selling:

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong

downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can be temporary illiquidity of the securities that are lent out and the scheme will not be able to sell such lent out securities until they are returned. There is also a possibility of opportunity loss.

For details please refer SAI.

4. Risks Associated with Trading of Units on Stock Exchange(s):

- Although Units of the respective Plan(s) as mentioned in this Scheme Information Document are to be listed on the Exchange, there can be no assurance that an active secondary market will develop or be maintained.
- The Units of the respective Plan(s) may trade above or below their NAV. The NAV of the respective Plan(s) will fluctuate with changes in the market value of Scheme's holdings. The trading prices of Units of the respective Plan(s) will fluctuate in accordance with changes in their NAV as well as demand and supply of the Units of the respective Plan(s) in the market.
- Trading in Units of the respective Plan(s) on the exchange may be halted because of market conditions or for reasons that in view of exchange authorities or SEBI, trading in Units of the respective Plan(s) is not advisable. In addition, trading in Units of the respective Plan(s) is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Units of the respective Plan(s) will continue to be met or will remain unchanged.
- The Units will be issued in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund on the Maturity Date / Final Redemption Date will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.
- As the Units allotted under respective Plan(s) will be listed on the Exchange, the Mutual Fund shall not provide for redemption / repurchase of Units prior to Maturity Date of the respective Plan(s).

5. Risk associated with Close Ended Scheme

In a close ended scheme, redemption / repurchase shall not be allowed prior to maturity of the Scheme. Redemption will be allowed only on maturity of the scheme. The Scheme will mature at the end of the tenure of the Scheme. For liquidity purpose units of the Scheme are to be listed on Stock Exchange. Investors who wish to trade on the exchange and Investors wishing to exit / redeem before the scheduled maturity may do so through stock exchange mode where the Scheme will be listed. For the units listed on the exchange it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units and investor may not get the desired return. Also there may not be sufficient liquidity on the stock exchange for the investors to exit from the stock exchange mode.

The Scheme offers a choice of two plans:

Each Plan to the Scheme offers Growth and Dividend Option. Under the Growth Option, no

Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and or circulars/guidelines issued by SEBI/AMFI in this regard.

The impact of FATCA is relevant not only at the point of on-boarding of the investors but also throughout the life cycle of the investor account / folio with the Fund. Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.

Investors are advised to consult their tax advisors to understand the FATCA requirements and its implications in relation to their investment.
