#### **Credit Evaluation Policy**

The credit evaluation policy of the AMC entails evaluation of credit fundamentals of each investment opportunity. Some of the factors that are evaluated inter-alia may include outlook on the sector, parentage, quality of management, and overall financial strength of the credit. The AMC utilises ratings of recognised rating agencies as an input in the credit evaluation process. Investments in bonds and debenture are usually in instruments that have been assigned high investment grade ratings by a recognized rating agency.

In line with SEBI Circular No. MFD/CIR/9/120/ 2000 dated November 24, 2000, the AMC may constitute committee(s) to approve proposals for investments in unrated instruments. The AMC Board and the Trustee shall approve the detailed parameters for such investments. The details of such investments would be communicated by the AMC to the Trustee in their periodical reports. It would also be clearly mentioned in the reports, how the parameters have been complied with. However, in case any security does not fall under the parameters, the prior approval of Board of AMC and Trustee shall be sought.

#### 3. Investment Strategy

The primary objective of the Plan(s) under the Scheme is to generate income through investments in Debt / Money Market Instruments and Government Securities maturing on or before the maturity date of the respective Plan(s). The Scheme has the flexibility to invest in the entire range of debt instruments and would seek to minimise interest rate risk while avoiding credit risks.

The Scheme may also seek investment opportunity in the Foreign Debt Securities, in accordance with guidelines stipulated in this regard by SEBI and RBI from time to time.

The Scheme would make investment in securities in the investment universe based on market spreads and liquidity, so as to match the investment horizon with the scheme maturity. The investments would be based on interest rate expectations arising out of macroeconomic analysis. This includes analysis of inflation data and trends in macro variables such as credit growth, liquidity, money supply growth, fiscal numbers and the global interest environment.

Though every endeavor will be made to achieve the objectives of the Scheme, the AMC/Sponsors/ Trustee do not guarantee that the investment objectives of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.

#### 4. Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors before investment. Scheme specific Risk Factors include but are not limited to the following:

#### Risk factors associated with investing in Fixed Income Securities

- The Net Asset Value (NAV) of the respective Plan(s) under the Scheme, to the extent invested in Debt and Money Market instruments, will be affected by changes in the general level of interest rates. The NAV of the respective Plan(s) is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Money market instruments, while fairly liquid, lack a well developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- Investments in money market instruments involve credit risk commensurate with short term rating of the issuers.
- Investment in Debt instruments are subject to varying degree of credit risk or default risk (i.e. the risk of an issuer's inability to meet interest and principal payments on its obligations) or any other issues, which may have their credit ratings downgraded. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic and/ or political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security values. This may increase the risk of the portfolio. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.
- Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.
- As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates and are subject to issuer default risk. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending

on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically.

- Prepayment Risk: Certain fixed income securities give an issuer
  the right to call back its securities before their maturity date, in
  periods of declining interest rates. The possibility of such prepayment
  may force the Scheme to reinvest the proceeds of such investments
  in securities offering lower yields, resulting in lower interest income
  for the fund.
- Reinvestment Risk: This risk refers to the interest rate levels at
  which cash flows received from the securities in the Scheme are
  reinvested. The additional income from reinvestment is the "interest
  on interest" component. The risk is that the rate at which interim
  cash flows can be reinvested may be lower than that originally
  assumed.
- Settlement Risk: Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.

#### Risk factors associated with investing in Foreign Debt Securities

#### · Currency Risk

Moving from Indian Rupee (INR) to any other currency entails currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee.

#### · Interest Rate Risk

The pace and movement of interest rate cycles of various countries, though loosely co-related, can differ significantly. Hence by investing in securities of countries other than India, the Scheme stand exposed to their interest rate cycles.

#### · Credit Risk

Investment in Foreign Debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer. This is substantially reduced since the SEBI (MF) Regulations stipulate investments only in debt instruments with rating not below investment grade by accredited/registered credit rating agency.

 To manage risks associated with foreign currency and interest rate exposure, the Mutual Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/ RBI from time to time.

#### Country Risk

The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilisation of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.

 To manage risks associated with foreign currency and interest rate exposure, the Mutual Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/ RBI from time to time.

#### Risk factors associated with investing in Derivatives

• The AMC, on behalf of the respective Plan(s) may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unit holders' interest. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
- Credit Risk: The credit risk in derivative transaction is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a derivative transaction.
- Illiquidity risk: This is the risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market

#### Risk factors associated with investing in Securitised Debt

The Risks involved in Securitised Papers described below are the principal ones and does not represent that the statement of risks set out hereunder is exhaustive.

#### Limited Liquidity & Price Risk

There is no assurance that a deep secondary market will develop for the Certificates. This could limit the ability of the investor to resell them.

#### · Limited Recourse, Delinquency and Credit Risk

The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the Certificate Holders against the Investors' Representative. Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Investor Payouts to the Certificate Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of a Obligor to repay his obligation, the Servicer may repossess and sell the Asset. However many factors may affect, delay or prevent the repossession of such Asset or the length of time required to realise the sale proceeds on such sales. In addition, the price at which such Asset may be sold may be lower than the amount due from that Obligor.

#### · Risks due to possible prepayments and Charge Offs

In the event of prepayments, investors may be exposed to changes in tenor and yield. Also, any Charge Offs would result in the reduction in the tenor of the Pass Through Certificates (PTCs).

#### · Bankruptcy of the Swap Bank

If the Swap Bank, becomes subject to bankruptcy proceedings then an Investor could experience losses or delays in the payments due under the Interest Rate Swap Agreement.

#### Risk of Co-mingling

With respect to the Certificates, the Servicer will deposit all payments received from the Obligors into the Collection Account. However, there could be a time gap between collection by a Servicer and depositing the same into the Collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the Loan Agreements may not be segregated from other funds of originator. If originator in its capacity as Servicer fails to remit such funds due to Investors, the Investors may be exposed to a potential loss.

#### Risk factors associated with Securities Lending

As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

### Risk factors associated with processing of transaction through Stock Exchange Mechanism

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognised stock

exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing/settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s).

#### Risk Factors associated with Market Trading

- Although Units of the respective Plan(s) as mentioned in this Scheme Information Document are to be listed on the Exchange(s), there can be no assurance that an active secondary market will develop or be maintained.
- Trading in Units of the respective Plan(s) on the Exchange(s) may be halted because of market conditions or for reasons that in view of Exchange Authorities or SEBI, trading in Units of the respective Plan(s) is not advisable. In addition, trading in Units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Units of the respective Plan(s) will continue to be met or will remain unchanged.
- Any changes in trading regulations by the Stock Exchange(s) or SEBI may inter-alia result in wider premium/ discount to NAV.
- The Units of the respective Plan(s) may trade above or below their NAV. The NAV of the respective Plan(s) will fluctuate with changes in the market value of Plan's holdings. The trading prices of Units of the respective Plan(s) will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the respective Plan(s).
- The Units will be issued in demat form through depositories. The
  records of the depository are final with respect to the number of
  Units available to the credit of Unit holder. Settlement of trades,
  repurchase of Units by the Mutual Fund on the maturity date / final
  redemption date will depend upon the confirmations to be received
  from depository(ies) on which the Mutual Fund has no control.
- As the Units allotted under respective Plan(s) of the Scheme will be listed on the Exchange(s), the Mutual Fund shall not provide for redemption / repurchase of Units prior to maturity / final redemption date of the respective Plan(s).

#### 5. Risk Mitigation Factors

- Exposure to debt instruments, other than Sovereign exposures, would be diversified, comprising a number of issuers across various sectors. This shall aid in managing concentration risk and sector-specific risks.
- The investors cannot redeem/ Switch units under the Scheme directly with the Mutual Fund until the final redemption/ maturity date. Redemptions in the Scheme would also take place only at the maturity date. An interest rate scenario analysis would be performed on an on-going basis, considering the impact of the developments on the macro-economic front and the demand and supply of funds. Further to maintain the liquidity risk, the Scheme would keep the maturity of its assets on or before the maturity/ final redemption date of the scheme.
- A credit evaluation of each debt exposure would be undertaken.
   This would also consider the credit ratings given to the instrument by recognised rating agencies. Investments in debt / money market instruments would normally be undertaken in instruments that have been assigned high investment grade ratings by any of the recognised rating agencies. Unrated investments, if any, would require specific approval from a committee constituted for the purpose.

#### 9. E-MAIL COMMUNICATION

If the investor has provided an email address, the same will be registered in our records for **Docs** and will be treated as your consent to receive, Allotment confirmations, Consolidated Account Statement/Account Statement, annual report/abridged summary and any statutory / other information as permitted via electronic mode /email. These documents shall be sent physically in

case the Unit holder opts/request for the same

Should the Unit holder experience any difficulty in accessing the electronically delivered documents, the Unit holder shall promptly intimate the Mutual Fund about the same to enable the Mutual Fund to make the delivery through alternate means. It is deemed that the Unit holder is aware of all security risks including possible third party interception of the documents and contents of the documents becoming known to third parties.

The AMC/Trustee reserve the right to send any communication in physical mode.

# 10A. SWITCH UPON MATURITY INTO HDFC LIQUID FUND

- Unit holder may note that an additional facility of switch upon maturity is provided by the Scheme/Plan, whereby Unit holder can switch the entire proceeds (other than dividend) upon maturity to HDFC Liquid Fund (switch-in scheme) by filling in relevant portion of the application form during NFO. In this case, on maturity as instructed by the Unit holder, the entire proceeds (other than dividend) will be invested in switch-in scheme at the applicable NAV. Unit holders are requested to carefully read the Scheme Information Document of switch-in scheme before exercising this facility.
- Unitholders who wish to cancel this facility availed during the NFO of the Plan may submit a request for cancellation at any of the ISCs of the Fund atleast 5 working days prior to the date of maturity of the said Plan.
- This facility shall not be applicable for Units held in demat mode.

Unitholders are requested to note that the units can also be switched-out to any Scheme/ Plan of the Fund available for subscription on the date of Maturity/ Final Redemption date at the redemption price of the respective Plan(s).

10B.MODE OF PAYMENT OF REDEMPTION (MATURITY) / DIVIDEND PROCEEDS-VIA DIRECT CREDIT / NEFT / ECS

The Units of the Plan cannot be redeemed by the investors directly with the Fund until the Maturity / Final Redemption date. Units of the Plan will be automatically redeemed on the Maturity / Final Redemption date.

 Real Time Gross Settlement (RTGS)/National Electronic Funds Transfer (NEFT)

The AMC provides the facility of 'Real Time Gross Settlement (RTGS)' and 'National Electronic Funds Transfer (NEFT)' offered by Reserve Bank of India (RBI), which aims to provide

credit of redemption and dividend payouts (if any) directly into the bank account of the Unit holder maintained with the banks (participating in the RTGS/ NEFT System).

NEFT is electronic fund transfer modes that operate on a deferred net settlement (DNS) basis which settles transactions in batches. Contrary to this, in RTGS, transactions are processed continuously throughout the RTGS business hours. The minimum amount to be remitted through RTGS is Rs. 2 lakhs. There is no upper ceiling for RTGS transactions. No minimum or maximum stipulation has been fixed for NEFT transactions.

Unit holders can check the list of banks participating in the RTGS / NEFT System from the RBI website i.e. www.rbi.org.in or contact any of our Investor Service Centres. However, in the event of the name of Unit holder's bank not appearing in the 'List of Banks participating in RTGS/ NEFT updated on RBI website www.rbi.org.in, from time to time, the instructions of the Unit holder for remittance of redemption/dividend (if any) proceeds via RTGS / NEFT System will be discontinued by Fund/ AMC without prior notice to the Unit holder and the payouts of redemption/ dividend (if any) proceeds shall be effected by sending the Unit holder(s) a cheque / demand draft.

For more details on RTGS / NEFT or for frequently asked questions (FAQs) on RTGS / NEFT, Unit holders are advised to visit the RBI website www.rbi.org.in/Fund website www.hdfcfund.com

#### Direct Credit

The AMC has entered into arrangements with eleven banks to facilitate direct credit of redemption (maturity) and dividend proceeds (if any) into the bank account of the respective Unit holders maintained with any of these banks. These banks are: Axis Bank Ltd., Citibank N.A., Deutsche Bank AG, HDFC Bank Limited, The Hongkong and Shanghai Banking Corporation, ICICI Bank Limited, IDBI Bank Limited, Kotak Mahindra Bank Ltd., Royal Bank of Scotland N.V., Standard Chartered Bank and YES Bank Limited. The list of banks is subject to change from time to time.

#### • Electronic Clearing Service (ECS)

Investors who have opted for the ECS facility of RBI for dividend payment will receive a direct credit of the due amount in the mandated bank account whenever the payment is made through ECS. A separate advice regarding credit of amount(s) via ECS

will be sent to the Unit holder. It should be noted that while the Fund will make all efforts, there is no commitment that this facility will be made available to all desirous investors.

Applicants in cities not covered under ECS facility will receive dividend payments, if any by cheques or demand drafts and the same will be mailed to the Unit holders. Please note that the ECS Facility is available only in respect of dividend payments and not in the case of Redemption of Units.

Therefore, in the absence of a specific request from the Unit holder exercising their choice of the mode of payment offered by the Fund from time to time, the payment of redemption / dividend proceeds shall be effected via the RTGS / NEFT mechanism only.

Where this payment mode is not feasible / available, the payment of such proceeds will be made by DC / DD as may be feasible.

Unitholders are advised to opt for the NEFT / RTGS, as it helps in avoiding loss of dividend/ redemption warrant in transit or fraudulent encashment. Please update your IFSC and MICR Code in order to get payouts via electronic mode in to your bank account.

The AMC / Fund shall not be held liable for any losses/ claims, etc. arising on account of processing the direct credit or credit via RTGS/NEFT / ECS of redemption / dividend proceeds on the basis of Bank Account details as provided by the Unit holder in the Application Form.

However, if the Unit holders are not keen on availing of any of the said facilities and prefer receiving demand drafts, Unit holders may indicate their intention in the Application Form in the space provided specifically. The AMC/Fund would then ensure that the payouts are effected by sending the Unit holders a demand draft. In case of unforeseen circumstances, the AMC/Fund reserves the right to issue a demand draft.

Any charges levied by the investor's bank for receiving payment through electronic mode will be borne by the investor. The Mutual Fund / AMC will not accept any request for refund of such bank charges.

#### Mode of Payment for Unit holders holding Units in Demat form

Investors will receive their maturity / dividend proceeds directly into their bank accounts linked to the demat accounts. Please ensure to furnish the Bank Account details under **Section 8**.
