Investment Strategy of the Scheme	<p>Fixed Income: The scheme will follow a passive investment strategy for the fixed income portion. The fund manager will allocate the assets of the scheme between various fixed income securities (which mature on or before the maturity of the Scheme). The investment team of the AMC will carry out rigorous in depth credit evaluation of the money market and debt instruments proposed to be invested in. The credit evaluation will essentially be a bottom up approach and include a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer and the short term / long term financial health of the issuer.</p> <p>Equity: The equity portion of the scheme will invest in a diversified portfolio of Equities & Equity Related Instruments (including options premium) across market capitalisation. For the equity portion, to the extent the fund invests in equity shares, the focus would be to build a diversified portfolio of strong growth companies, reflecting our most attractive investment ideas, at all points of time. The portfolios will be built utilizing a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include companies having a robust business models and enjoying sustainable competitive advantages as compared to their competitors. The Fund will have the flexibility to invest across the market capitalisation spectrum. To the extent the fund invests in equity derivatives, it would endeavour to provide exposure to equities through derivatives, i.e exchange traded options and futures. The strategy shall endeavour to provide the portfolio with participation in the underlying equity index. For further details on the derivative strategy, refer to the paragraph on "Derivatives Strategy".</p>		

The Fund by utilising a holistic risk management strategy will endeavor to manage risks associated with investing in equity markets. The Fund has identified the following risks and designed risk management strategies, which are embedded in the investment process to manage these risks

- ii) Price Risk - Risk of overpaying for a company
- iii) Liquidity Risk - High Impact cost of entry and exit
- iv) Volatility Risk - Volatility in price due to company or portfolio specific factors
- v) Event Risk - Price risk due to a company / sector specific or market event

The credit evaluation will essentially be a bottom up approach and include a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer and the short term / long term financial health of the issuer.

List of sectors the fund would not be investing

Floors and ceilings within a range of 5% of the intended allocation (in %) against each sub asset class/ rating

As per the regulations, the scheme is allowed to invest in Fixed Income Instruments within a range of 5% of the intended allocation (floor and cap) against each sub asset class/credit rating.

Instruments	Credit Rating					
	AAA	A1 +	AA	A	BBB	Not Applicable
Certificate of Deposits (CD)	-	-	-	-	-	-
Commercial Papers (CP)	-	-	-	-	-	-
Non Convertible Debentures/ Bonds @	45 - 50%	-	35 - 40%	-	-	-
Securitized Debt	-	-	-	-	-	-
CBLO/- G-Secs & T-Bills/ Repos/ Derivatives	-	-	-	-	-	0 - 5%

@ Includes CDs issued by All India Financial Institutions recognized by RBI, such as NABARD, SIDBI, Exim Bank, NHB for tenors in excess of one year.

In case of non-availability of instruments or adverse risk-reward position, which may prevent the Fund Manager from investing in such instruments as per the intended allocation range against each credit rating. In such cases, the fund as an alternate would invest in CDs of highest credit ratings (A1 + or equivalent) /G-Secs/ TBills / CBLOs.

The fund may have higher allocation towards cash or cash equivalents immediately post NFO closure or towards the maturity of the Scheme.

Subsequent to the initial portfolio construction, during the tenure of the Plan, the above allocation may vary due to instances like (i) Inflows on account of coupons or any corporate actions; (ii) the instrument is called or bought back by the issuer; (iii) in anticipation of any adverse credit event. In such cases, the fund as an alternate would invest in CDs of highest credit ratings (A1 + or equivalent) /G Secs/ TBills / CBLOs) over the residual maturity of the scheme or till such time as suitable instruments of desired credit quality is/ are not available. The Fund may have positive variation in investments towards higher credit rating.

Subject to intended allocation range as specified above, the Fund may have positive variation in investments towards higher credit rating in same asset class.

All investments will be made on the basis of the rating prevailing at the time of Investment. In the event of any deviation from the floor and ceiling of above intended allocation range, the fund manager will carry out rebalancing within 30 calendar days.

There shall be no deviation between the intended allocation and actual allocation (other than as explained above) post the New Fund Offer period. The estimated time to invest the NFO proceeds as per the intended allocation is 30 calendar days. If, due to market action, the value of fixed income instruments appreciate/ depreciate resulting in deviation in the intended allocation mentioned above, the fund manager may or may not rebalance the portfolio and may run with the ongoing exposure.

The rating symbols as specified in the above intended allocation range would include modifiers like + (plus) / - (minus) (which reflects the comparative standing within the Category) to each rating symbol viz AA would include AA + or AA-.

If dual ratings are prevailing for any particular instrument in which investment is being made, the Fund would consider the most conservative public available rating for the said instrument, for the purpose of intended allocation range viz if for a particular investment CRISIL has rated it as AAA, but ICRA has rated it as AA then the fund would consider it as AA rated instrument.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

The scheme carries risks associated with investing in equities, fixed income instruments and derivatives.

Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk and default risk. Also, the value of the Scheme investments may be affected by currency exchange rates, changes in law/ policies of the government, taxation laws and political, economic or other developments.

Investments in debt and money market instruments are subject to interest rate risk, re-investment risk, basis risk, credit risk, spread risk, prepayment risk, etc. Equity and equity related instruments are volatile by nature.

Listing of the units of the fund does not necessarily guarantee their liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained. Consequently, the Fund may quote below its face value / NAV.

The Scheme may invest in derivative products in accordance with and to the extent permitted under the Regulations and by RBI. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.

Please refer to the SID for further details.

Risk Management

The investment team of the AMC will carry out rigorous in depth credit evaluation of the money market and debt instruments (other than GSecs) proposed to be invested in. The credit evaluation will essentially be a bottom up approach.

With respect to the equity component, the Scheme would invest in a diversified portfolio of equity and equity related securities which would help alleviate the sector/ market capitalization related concentration risk.

The AMC has experienced investment professionals to help limit investment universe to carefully selected high quality businesses.

The Scheme may invest in derivative products in accordance with and to the extent permitted under the Regulations and by RBI. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.

The AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. These would be periodically evaluated. The scheme will also use derivatives and other hedging instruments, as may be permitted by SEBI and RBI, from time to time, to protect the value of the portfolio. The risk control process involves identifying & measuring risks through various risk measurement tools.
