INVESTMENT STRATEGY:

The Scheme endeavor to protect capital by investing a portion of the portfolio in highest rated debt securities & money market instruments and also to provide capital appreciation by investing the balance in equity and equity related securities. The allocation to equity

and equity related securities would depend on interest rates prevailing at the time of deployment of funds in debt securities and the time horizon of the Scheme. It would typically be equal to the interest amount that can be earned from the debt securities for the tenure of the investment.

- The Scheme will follow a passive investment strategy for the fixed income component of the Scheme. The Scheme will invest in fixed income securities with a view to hold them till the maturity. To that effect the Scheme will follow a buy and hold strategy to investment in fixed income instruments.
- Exposure to the securities rated by CARE at all times shall not exceed 20% of the Assets under Management (AUM) of the Scheme. The restriction shall continue to apply even in cases where the security is rated by CARE and any other Agency. However, this limit will not apply to securities issued by a Public Sector Undertaking (PSU). Any change due to change in the market conditions resulting in an increase in exposure beyond the specified limit of 20%, the exposure will be brought down within a period of 30 days.
- The yield on debt securities at the time of purchase shall not be more than 100 bps to the benchmark yield as stipulated under respective CRISIL & ICRA Bond Matrix as applicable to AAA instruments.
- The fixed income component of the Scheme shall be invested in government securities or debt securities issued by corporate rated at AAA or equivalent rating.
- The Scheme is 'oriented towards protection of capital' and not with 'guaranteed returns'. Further, the orientation towards protection of capital originates from the portfolio structure of the Scheme and not from any bank guarantee, insurance cover, etc.
- The Scheme shall endeavour to ensure capital protection by investing in debt allocation not below the CARE indicative allocation at the time of launch. Capital protection will be provided solely through the fixed income part of the portfolio and the same shall be invested in securities that mature to capital value at the end of the Scheme.
- The debt component of the portfolio will always have the highest investment rate grading (AAA rating or equivalent from a rating agency).
- Whenever asset allocation is altered for defensive considerations, the AMC shall endeavour to ensure that the capital remains protected on maturity and also that the rating of the Scheme is not adversely affected.
- Fund manager may alter the asset allocation during subsequent deployment of funds provided such deployment is generated out of appreciation in value of existing investments. While making such asset allocations, fund manager would endeavor that capital remains protected on maturity and ensure rating of the Scheme is not adversely impacted.

Credit Evaluation Policy for investment in debt securities:

The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks so the Investment process is firmly research oriented. It comprises of qualitative as well as quantitative measures. Qualitative factors like management track record, group companies, resource-raising ability, extent of availability of banking lines, internal control systems, etc are evaluated in addition to the business model and industry within which the issuer operates as regards industry/model-specific risks working capital requirements, cash generation, seasonality, regulatory environment, competition, bargaining power, etc. Quantitative factors like debt to equity ratio, Profit and loss statement analysis, balance sheet analysis.

Macroeconomic call is taken on interest rate direction by careful analysis of various influencing factors like Inflation, Money supply, Private sector borrowing, Government borrowing, Currency market movement, Central Bank policy, Local fiscal and monetary policy, Global interest rate scenario and Market sentiment. Interest rate direction call is supplemented by technical analysis of market and short term influencing factors like trader position, auction/issuance of securities, release of economic numbers, offshore market position, etc. Interest Rate direction call and anticipation of yield curve movement forms the basis of portfolio positioning in duration and spread terms. Credit research is done on a regular basis for corporate having high investment grade rating. Credit research includes internal analysis of rating rationale, and financial statements (annual reports and quarterly earnings statements) of the issuer, for the last 1-3 years evaluating amongst other metrics, relevant ratios of profitability, capital adequacy, gearing, turnover and other inputs from external agencies. On an ongoing basis, the credit analyst keeps track of credit profile of the issuer, possible credit risks reflected in change in outlook of rating agencies, external developments affecting the issuer etc. Internal credit call is a pre-requisite for all investments since the investment universe is primarily high-grade credit instruments. Credit research is also used to minimize credit migration risk and for generating relative value trade ideas. Stable to higher rating on maturity vis-à-vis issuance is the guiding factor for investment decisions from credit point of view.

RISK PROFILE OF THE SCHEME:

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme Specific Risk Factors summarised below.

Scheme Specific Risk Factors and Risk Management Strategies:

- a) The Scheme offered is "oriented towards protection of capital" and "not with guaranteed returns". The orientation towards protection of the capital originates from the portfolio structure of the Scheme and not from any bank guarantee, insurance cover etc.
- b) The ability of the portfolio to meet capital protection on maturity to the investors can be impacted in certain circumstances by changes in government policies, interest rate movements in the market, credit defaults by bonds, expenses, reinvestment risk and risk associated with trading volumes, liquidity and settlement systems in equity and debt markets. Accordingly, investors may lose part or all of their investment (including original amount invested) in the Scheme. No guarantee or assurance, express or implied, is given that investors will receive the capital protected value at maturity or any other returns.
- c) The rating provided by CARE, only assesses the degree of certainty for achieving the objective of the Scheme i.e. capital protection and does not denote any opinion on the stability of the NAV of the Scheme. The rating should, however, not be construed as an indication of expected returns, prospective performance of the mutual fund scheme, NAV or of volatility in its returns. The rating would be reviewed on a quarterly basis by CARE.

- d) CARE reserves the right to suspend, withdraw or revise the ratings assigned to the portfolio structure of this scheme at any time, on the basis of any new information or unavailability of information or any other circumstances, which the Rating Agency believe may have impact on the above rating.
- e) The rating, as aforesaid, however, should not be treated as a recommendation to buy, sell or hold the units issued by ICICI Prudential Mutual Fund under the Scheme. The rating is restricted to the portfolio structure of this Scheme only. CARE do not assume any responsibility on its part, for any liability that may arise consequent to the non compliance of any guidelines or directives issued by SEBI or any other mutual fund regulatory body.
- f) The rating is based on current information furnished to the Rating Agency by the issuer or obtained by the rating Agency from sources it considers reliable. The rating Agency do not, however, guarantee the accuracy, adequacy or completeness of any information and are not responsible for any errors or omissions or for the results obtained from the use of such information.
- g) The Asset Management Company shall not repurchase units of the Scheme before end of the maturity period. However, the Scheme may be listed on one or more Stock Exchange(s) in India at the discretion of the Trustees.
- h) Investors in the Scheme are not being offered any guaranteed / assured returns.
- i) The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the Scheme is wound up for the reasons and in the manner provided under the Scheme Information Document.
- j) Redemption by the Unit Holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund their directors or their employees shall not be liable for any tax consequences that may arise.

Risks associated with investing in Equities and Derivatives:

Investors may note that AMC/Fund Manager's investment decisions may not be always profitable. The Scheme proposes to invest in equity and equity related securities. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Scheme's portfolio due to the absence of a well developed and liquid secondary market for debt securities would result, at times, in potential losses to the Scheme, in case of a subsequent decline in the value of securities held in the Scheme's portfolio.

The Scheme is also vulnerable to movements in the prices of securities invested by the Scheme, which again could have a material bearing on the overall returns from the Scheme. These stocks, at times, may be relatively less liquid as compared to growth stocks. The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.

The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.

Investment decisions made by the AMC may not always be profitable, as actual market movements may be at variance with anticipated trends.

The performance of the Scheme will be affected in case of unforeseen circumstances like political crisis, natural calamities, and changes in currency exchange rates or interest rates. Fund manager tries to generate returns based on certain past statistical trend. The performance of the Scheme may get affected if there is a change in the said trend. There can be no assurance that such historical trends will continue.

In case of abnormal circumstances it will be difficult to complete the square off transaction due to liquidity being poor in stock futures/spot market. However fund will aim at taking exposure only into liquid stocks where there will be minimal risk to square off the transaction.

In case of abnormal circumstances it will be difficult to complete the square off transaction due to liquidity being poor in stock futures/spot market. However fund will aim at taking exposure only into liquid stocks where there will be minimal risk to square off the transaction.

- As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives that Investors should understand. Derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into and the ability to assess the risk. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivatives products are leveraged instruments and provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify to execute such strategies.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
- The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:
 - Lack of opportunity available in the market.
 - The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Risks associated with Investing in Securitised Debt

The Scheme shall not invest in securitised debt.

Risks associated with Short Selling and Securities Lending

The Scheme will not do 'Short Selling' and 'Securities Lending' activity.

Risks attached with investments in ADRs/GDRs/ overseas securities:

The investment in ADRs/GDRs/overseas securities offer new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the scheme. Since the Scheme would invest only partially in ADRs/GDRs/overseas securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme. To manage risks associated with foreign currency and interest rate exposure, the Fund may use derivatives for portfolio rebalancing and/or hedging, and in accordance with conditions as may be stipulated by SEBI/RBI from time to time.

To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of the other restrictions on investment.

Offshore investments will be made subject to any/all approvals, conditions thereof as may be stipulated by SEBI/RBI and provided such investments do not result in expenses to the Fund in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing. The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs, and overseas regulatory costs.

Investors are requested to note that the costs associated with overseas investments like advisory fees (other than those expenses permissible under regulation 52 of SEBI Regulations) would not be borne by the scheme.

Risk management strategies: The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in debt and other securities and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risk & Description	Risk mitigants /management strategy
Risks associated with Debt investment	
Market Risk: As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.	The scheme will undertake the active portfolio management as per the investment objective to reduce the market risk. In a rising interest rates scenario the scheme will increase its investment in money market securities whereas if the interest rates are expected to fall the allocation to debt securities with longer maturity will be increased thereby mitigating risk to that extent.
Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM).	The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Scheme will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.
Credit Risk: Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).	Management analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower.
Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.	Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.

Risk & Description	Risk mitigants /management strategy
Derivatives Risk: As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives since derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.	Interest Rate Swaps will be done with approved counter parties under pre-approved ISDA agreements. Mark to Market of swaps, netting off of cash flow and default provision clauses will be provided as per international best practice on a reciprocal basis. Interest rate swaps and other derivative instruments will be used as per local (RBI and SEBI) regulatory guidelines.
Risks associated with Equity / Equity related investment	
Market Risk: The scheme is vulnerable to movements in the prices of securities invested by the scheme, which could have a material bearing on the overall returns from the scheme.	Market risk is a risk which is inherent to an equity scheme. The Scheme may use derivatives to limit this risk.
Liquidity Risk: The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.	As such the liquidity of stocks that the fund invests into could be relatively low. The fund will try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time and not affected by illiquidity of the underlying stocks.
Derivatives Risk: As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives since derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds.	Derivatives will be used for the purpose of hedging/ portfolio balancing purposes or to improve performance and manage risk efficiently. Derivatives will be used in the form of Index Options, Index Futures, Stock Options and Stock Futures and other instruments as may be permitted by SEBI. All derivatives trade will be done only on the exchange with guaranteed settlement. No OTC contracts will be entered into.
Risks associated with investment in ADR/ GDR/ overseas securities	
Currency Risk: The Scheme will invest in foreign securities as permitted by the concerned regulatory authorities in India. Since the assets will be invested in securities denominated in foreign currency (US\$), the INR equivalent of the net assets, distributions and income may be adversely affected by changes / fluctuations in the value of the foreign currencies relative to the INR.	The Scheme is subject to applicable regulations, shall have the option to enter into forward contracts for the purposes of hedging against the foreign exchange fluctuations. The Schemes may employ various measures (as permitted by SEBI/ RBI) including but not restricted to currency hedging (such as currency options and forward currency exchange contracts, currency futures, written call options and purchased put options on currencies and currency swaps), to manage foreign exchange movements arising out of investment in foreign securities. All currency derivatives trade, if any will be done only through the stock exchange platform.

(2) If payment is made by RTGS, NEFT, ECS, bank transfer, etc., a copy of the instruction to the bank stating the account number debited must accompany the purchase application. The account number mentioned on the transfer instruction should be from pay in account available in the records, or from the account of the first named unit holder.

Investors are requested to note that AMC reserves right to have additional checks of verification for any mode of payment received. AMC reserves the right to reject the transaction in case the payment is received in an account not belonging to the first unit holder of the mutual fund.

In case of investors with multiple accounts, in order to ensure smooth processing of investor transactions, it is advisable to register all such accounts, as the investments/subscriptions received from the said multiple accounts shall be treated as 1st party payments.

Refer Third Party Payment Declaration form available in www.icicipruamc.com or ICICI Prudential Mutual Fund branch offices.

XV. PLEDGE/LIEN : In case investor creates pledge / lien on their units in favour of any financial institution or lender, the details of the same shall be provided to ICICI Prudential AMC or CAMS within two days of creations of such pledge/lien. The redemption proceeds/dividend payment will be on hold till proper details are made available.

XVI. TRIGGER ON MATURITY OF THE SCHEME:

1. Trigger facility will switch all the units in the target scheme within the respective Folio Number of the investor.

2. Any of the open ended schemes of ICICI Prudential Mutual Fund can be a target scheme.

3. For Trigger facility to happen the minimum purchase/redemption criteria should be met else the trigger will not be effected.

4. Trigger facility on each scheme will require a separate/independent Trigger request form to be filled. If an investor holds similar schemes in two folios, they will have to register separately for it mentioning the folio number.

5. Target scheme where units will be switched, if option/sub-options are not selected, it will be switched to the default option (available under the Target Schemes).

6. Switch will be implemented on the day the Trigger condition is satisfied. The Trigger is a one time operation and will cease once it is exercised.

7. Once switch is done exercising Trigger option, the same will not be reversed whatsoever and it will be final and binding.

8. If Trigger facility is not activated and/or implemented due to reasons which are beyond the control of ICICI Prudential AMC Ltd. (the AMC), the AMC will not be responsible. Trigger facility is only a facility extended by the AMC for the convenience of the unit holders and does not form part of any scheme/fund objectives.

9. AMC reserves the right to amend/terminate this facility at any time, keeping in view business/operational exigencies and the same shall be in the best interest of the investors.

10. The investor is being provided a facility to give the switch request from the close ended funds, much in advance of the maturity of the fund. At a future date changes can arise in the target scheme which can prevent the AMC from processing the switch request. In such cases the switch request would be considered NULL & VOID and the investor would have to re-submit the Trigger request. Few examples of such changes are

- Change in fundamental attribute of the target Scheme.
- Merger of the target scheme into any other scheme.
- Any change in the target scheme specifications which restricts the AMC from accepting the switch request. For example : Maximum and Minimum amount size.
- When Target Scheme has stopped accepting fresh subscriptions in the Scheme.

11. In case folio consolidation is requested by the investor, the existing Trigger request would be considered Null & Void.

12. The investor would be allowed to re-register a fresh Trigger request as per existing process.

13. In case of change of broker or change of investment status as "direct" after closing of New Fund Offer, the new broker code would be updated for existing investments and for existing Trigger request.

14. Conversion of physical unit to demat mode will nullify any existing / future Trigger request and the request cannot be re-submitted.

15. Trigger facility will be effected only when the terms and conditions of the said facility is fulfilled.

16. In case of Trigger facility, the switch into the open ended scheme will be subject to applicable cut off timings provisions.
