The scheme does not intend to invest in securitised debt and overseas / foreign securities.														
The scheme may invest in repo/reverse repo in corporate bonds. The scheme shall not engage in short selling, credit default swaps and securities lending and borrowing. The scheme shall not invest in any unrated debt instruments and derivatives. The scheme will not advance any loans.														
Debt securities include, but are not limited to, Debt securities of the Government of India, State and Local Governments, Government Agencies, Statutory Bodies, Public Sector Undertakings, Public Sector Banks or Private Sector Banks or any other Banks, Financial Institutions, Development Financial Institutions, and Corporate Entities, collateralized debt securities or any other instruments as may be prevailing and permissible under the Regulations from time to time).														
The Debt Securities (including money market instruments) referred to above could be fixed rate or floating rate, listed, unlisted, privately placed, among others, as permitted by regulation. The Investment Manager will not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer which are rated not below investment grade by a SEBI registered credit rating agency (i.e., CRISIL, ICRA, CARE, FITCH, etc.) authorised to carry out such activity under the Act. Such investment limit may be extended to 12% of the NAV of the scheme with the prior approval of the Board of Trustees and the Board of directors of the asset management company. Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and collateralized borrowing and lending obligations.														
Pending deployment of funds of a Scheme in securities in terms of investment objectives of the Scheme a mutual fund can invest the funds of the Scheme in short term deposits of scheduled commercial banks in terms of SEBI circular dated April 16, 2007 and June 23, 2008.														
Further, the Scheme may, pending deployment of funds invest in units of money market/liquid schemes of Mirae Asset Mutual Fund and/or any other mutual fund. Such investments will be within the limits specified under SEBI (MF) Regulations. The AMC shall not charge any investment management fees with respect to such investment.														
Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive consideration only. In the event of deviations, portfolio rebalancing will be														

	<p>carried out within 30 calendar days. Where the portfolio is not rebalanced within 30 calendar Days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.</p> <p>The Scheme does not intend to participate in stock lending.</p>
<p><i>Investment Strategy</i></p>	<p>The Scheme will invest across debt securities and money market instruments.</p> <p>The investment strategy of this scheme aims to optimize risk adjusted returns through an active management of the portfolio. The Scheme is a medium to long-term investment option that provides the flexibility to respond to continuously changing market scenario by actively managing its portfolio in line with the evolving interest rate scenario. During periods when interest rates are expected to decline, the duration of the portfolio may be increased and during periods when interest rates are expected to harden, duration of the portfolio may be decreased. Similarly, when spreads on corporate bonds are expected to contract, proportion of corporate bonds in portfolio may be increased and vice-versa. The objective of this active management is to thereby improve on returns as compared to a less active portfolio. The interest rate risk/duration risk of the scheme may change substantially depending upon the outlook on interest rates and other factors like steepness of yield curve and bond spreads. Such outlook will be developed by assessment of various macro factors like economic growth, inflation, credit pick-up, liquidity and other such factors as considered relevant.</p> <p>Credit portfolio management will be primarily guided by external credit ratings assigned by any of the recognized credit rating agency. The credit quality of the portfolio will be continuously monitored using in-house research capabilities as well as inputs from external sources including independent credit rating agencies.</p> <p>The investment team will primarily use a top down approach for taking interest rate view, sector allocation along with a bottom up approach for security/instrument selection.</p> <p>The bottom up approach will assess the quality of security/instrument (including the financial health of the issuer) as well as the liquidity of the security.</p> <p>Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk etc. Whilst such risks cannot be eliminated, they may be minimized through diversification.</p> <p>Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objective of the Scheme and provisions of SEBI (MF) Regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying & measuring the risk through various Risk Measurement Tools like but not limited to calculating risk ratios, tracking error etc. The AMC has implemented Quantis as the Front Office and Settlement System (FOS). The system has incorporated all the investment restrictions as per SEBI guidelines and “soft” warning alerts at appropriate levels for preemptive monitoring. The system enables identifying & measuring the risk through various risk measurement tools like various risk ratios, average duration and analyzes the same so as to act in a preventive manner.</p>

	<p>The risk control measures for managing the debt portion of the scheme are:</p> <ol style="list-style-type: none"> 1. Monitoring risk adjusted returns performance of the fund with respect to its peers and its benchmark. 2. Tracking analysis of the fund on various risk parameters undertaken by independent fund research / rating agencies or analysts and take corrective measures if needed. 3. Interest rate risk is a function of the maturity profile or the tenure of the security in the portfolio. This is proactively monitored by managing average maturity in line with our view on the market. 4. Credit analysis plays an important role at the time of purchase of bond and then at the time of regular performance analysis. Our internal research anchors the credit analysis. Sources for credit analysis include Capital Line, CRISIL, ICRA updates etc. Debt ratios, financials, cash flows are analysed at regular intervals to take a call on the credit risk. 5. We have different maturity buckets for corporate bonds. By being in different maturity buckets, we avoid concentration of the portfolio in a maturity bucket. We define individual limits for G Sec, money market instruments, MIBOR linked debentures and corporate bonds exposure, for diversification reasons. <p>The Scheme does not propose to underwrite issuances of securities of other issuers. There will be no exposure to securitized debt securities in the portfolio.</p>
<i>Risk Profile of the Scheme</i>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors before investment.</p> <p>The Scheme is subjected to risk factors associated with risks associated with Debt & Money Market Instruments like price/interest rate risk, credit risk, liquidity risk, reinvestment risk, pre-payment risk, spread risk, concentration risk, etc., and Unlisted Securities.</p>
<i>Risk Control measures</i>	<p><u>Concentration Risk</u> The AMC will mitigate this risk by investing in sufficiently large number of issuers spread across the sectors so as to maintain optimum diversification and keep issuer/sector specific concentration risk relatively low.</p> <p><u>Liquidity Risk</u> The Schemes will invest in debt instruments and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Schemes will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.</p> <p><u>Risk of investing in unlisted securities</u> As per SEBI guidelines, not more than 10% of the portfolio can be invested in unlisted securities. Rigorous due diligence is undertaken before any investments are made by the portfolio in unlisted securities, if any.</p> <p><u>Risks Associated with Debt & Money Market Instruments</u> <u>Credit Risk</u> - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.</p>
<i>Plans and Options</i>	<p>The Scheme will have Regular Plan and Direct Plan** with a common portfolio and separate NAVs. Investors should indicate the Plan for which the subscription is made by indicating the choice in the application form.</p>

Each of the above Regular and Direct Plan under the scheme will have the following Options / Sub-options: (1) Growth Option and (2) Dividend Option. The Dividend Option shall have only Dividend Reinvestment and Payout option.
