INVESTMENT OBJECTIVE:

The investment objective of the scheme is to provide investment returns closely corresponding to the total returns of the securities as represented by the Nifty 8 -13 yr G-Sec Index before expenses, subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme will be achieved

ASSET ALLOCATION PATTERN OF THE SCHEME?

Under normal circumstances, the indicative asset allocation would be:

Instruments	Indicative asset allocation (% of total assets)		Risk Profile
	Minimum	Maximum	
Securities constituting Nifty 8 -13 yr G-Sec Index	95%	100%	Low to Medium
Money Market instruments (with maturity not exceeding 91 days)*	0%	5%	Low to Medium

* Money Market Instruments include commercial papers, commercial bills, treasury bills, and Government securities having an unexpired maturity upto one year, call or notice money, certificate of deposit, CBLOs and any other like instruments as specified by the Reserve Bank of India from time to time.

The scheme will not participate in repo in corporate debt. The Scheme, in general, will hold all the securities that comprise the underlying Index in the same proportion as the index. Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error will not exceed by 2% p.a. However, in case of some events like revision of constituents of index, delay in purchase/sell of securities, corporate actions pertaining to the index, etc, the tracking error may exceed the above limits. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.

The scheme will neither make any investment in ADR/ GDR/ Foreign Securities/ Securitized Debt nor will it engage in short selling and securities lending. Further, it shall not take any exposure in derivative instruments.

Since the scheme is an exchange traded fund, at no point of time the scheme will deviate from the index. However, in the interest of investors, the AMC reserves the right to change the above asset allocation pattern due to extreme market conditions or corporate action activity undertaken in the underlying securities. In case of such above mentioned deviations, the AMC shall rebalance/realign the portfolio within a period of 30 days.

INVESTMENT STRATEGY

R*Shares Long Term Gilt ETF is a passively managed exchange traded fund which will employ an investment approach designed to track the performance of Nifty 8 -13 yr G-Sec Index. The Scheme seeks to achieve this goal by investing in securities constituting the Nifty 8 -13 yr G-Sec Index in same proportion as in the Index. The Scheme will invest at least 95% of its total assets in the securities comprising the Underlying Index. The Scheme may also invest in money market instruments to meet the liquidity and expense requirements.

The fund is ideal for those investors who would like to participate in Indian Bond Market by passively investing in a Government Securities as approximately represented by Nifty 8 -13 yr G-Sec Index.

Tracking Error

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Index and the NAV of the Scheme. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Underlying Index in the same proportion of weights as the securities have in the Underlying Index. However, deviations from the stated index replication may occur due to reason that the Scheme has to incur expenses, corporate actions pertaining to the Index including changes to the constituents, regulatory policies, ability of the Fund Manager to closely replicate the Underlying Index, etc. The Scheme’s returns may therefore deviate from those of its Underlying Index. Tracking Error may arise due to the following reasons:

- Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and realization of sale proceeds and / or the registration of any securities transferred and / or any delays in receiving cash dividends and resulting delays in reinvesting them.
- The Nifty 8 -13 yr G-Sec Index reflects the prices of securities at close of business hours. However, the Fund may buy or sell the securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the NSE.
- The constituent securities of the underlying index may be revised periodically by either excluding or including new securities. In such an event, the Fund will endeavor to reallocate its portfolio but the available investment/ disinvestment opportunities may not permit precise mirroring of the underlying index in a short period of time.
- The potential for trades to fail, which may result the scheme not having acquired shares at a price necessary to track the index.
- The holding of a cash position and accrued income prior to distribution and accrued expenses.

- Disinvestments to meet redemptions, recurring expenses, etc.
- Fees and expenses of the scheme

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error will not exceed by 2% p.a. However, in case of the above mentioned events, including but not limited to the tracking error may exceed the above limits.

There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index

HOW THE SCHEME IS DIFFERENT FROM THE EXISTING OPEN ENDED EXCHANGE TRADED FUNDS OF THE MUTUAL FUND

R*Shares Banking ETF

Asset Allocation Pattern: Securities covered by the Nifty Bank Index - 90-100%; Money Market instruments including CBLO - 0-10% **Primary Investment Pattern:** The investment objective of R* Shares Banking ETF is to provide returns that, before expenses, closely correspond to the total returns of the securities as represented by the Nifty Bank Index. However, the performance of Scheme may differ from that of the underlying index due to tracking error. There can be no assurance or guarantee that the investment objective of scheme will be achieved. **Investment Strategy:** The AMC uses a "passive" or indexing approach to try and achieve Scheme's investment objective. Unlike other Fund, the Scheme does not try to "beat" the markets they track and do not seek temporary defensive positions when markets decline or appear overvalued. The AMC does not make any judgments about the investment merit of a particular stock or a particular industry segment nor will it attempt to apply any economic, financial or market analysis. Indexing eliminates active management risks in regard to over / underperformance vis-à-vis a benchmark. **Differentiation:** R* Shares Banking ETF endeavors to track and generate returns similar to its benchmark Nifty Bank Index by investing in its index constituents and money market instruments. The fund follows a passive strategy of management with endeavor to generate similar returns to its benchmark. **Month-end AUM (Rs. Crore) as on May 31, 2016:** 330.51, **No. of Folios as on May 31, 2016:** 2155

However, the performance of the scheme may differ from that of the domestic prices of Gold due to expenses and or other related factors. However there can be no assurance that the investment objective of the scheme will be achieved. **Investment Strategy:** The fund manager would use a 'passive' approach to try and achieve the investment objective of the scheme. The fund manager shall not try to "beat" the Gold Market, but aims to replicate the returns, which commensurate the returns generated, by Gold during that period. It will however endeavor to seek temporary defensive positions when markets decline or appear over valued to the extent of its investment in Money Market or other debt securities. **Differentiation:** R* Shares Gold ETF endeavors to track and provide similar returns to its benchmark- the domestic prices of gold through investment in physical gold and money market instruments. The fund follows a passive investment strategy and endeavors to generate returns similar to its benchmark. The fund is benchmarked to physical price of gold. **Month-end AUM (Rs. Risk Mitigation Factors for all the above mentioned Schemes - Applicable for all the above mentioned Schemes. Robust measures implemented to mitigate Risk include, adoption of internal policies on investments and valuations, rigorous procedures for monitoring investment restrictions and effective implementation of various norms prescribed by SEBI from time to time.

RISK MITIGATION FACTOR / RISK CONTROL

For the Scheme, risks would be the impact cost on securities, the delayed communication of weightage changes by the index service providers and the delayed calculation of net change in assets of the Scheme, amongst others.

It is proposed to manage the risks by placing limit orders for basket trades and other trades, proactive follow-up with the service providers for daily change in weights in index as well as monitor daily inflows and outflows to and from the Fund closely.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.

RISK PROFILE OF THE SCHEME: Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Scheme specific Risk: Trading volumes and settlement periods may restrict liquidity in debt investments. Investment in Debt is subject to price, credit, and interest rate risk. The NAV of the Scheme may be affected, inter alia, by changes in the market conditions, interest rates, trading volumes, settlement periods and transfer procedures

Tracking Error Risk: Factors such as the fees and expenses of the Scheme, cash balance, changes to the Underlying assets and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying assets of the scheme. The Scheme's returns may therefore deviate from those of its Underlying assets. Tracking Error of ETFs is likely to be low as compared to a normal index fund. Due to the Creation / Redemption of units through the in kind mechanism the fund can keep lesser funds in cash. Also, time lag between buying / selling units and the underlying shares is much lower. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error will not exceed by 2% p.a.
