(i) CREDIT EVALUATION POLICY FOR INVESTMENTS IN DEBT SECURITIES

Credit evaluation is a continuous process. It applies not only for issuers where investments are being evaluated for the first time but also for those where we already have credit exposures.

In a detailed credit evaluation process, the following aspects are covered.

- An in-depth review of the sector in which company operates. In this process, research team also measures the micro and macro risks associated with the sector and its possible impact on the overall business environment of the issuer. In addition, issuer's market position is evaluated vis-à-vis competition.
- 2. Issuer analysis involves both qualitative and quantitative aspects.
 - a. Qualitative analysis is related to quality of management, corporate governance, promoter background, parents support etc. Any synergy / cross dependence with any of the other promoter companies is also scrutinized.
 - Quantitative analysis is related with balance sheet management, profitability indicators, ratio analysis, capex programmes, growth plans, leverage and cash management policy etc.
- The due diligence process involves both primary and secondary sources for research.
 - a. Secondary sources of information like publicly available data including annual reports and other public filings, rating and other research reports, industry

research reports are studied in detail

- b. Primary research activities like direct interaction with the issuer at various levels, interaction with the rating agencies, the company's bankers, competitors in the industry and stock market participants (market intelligence), is given a very high weightage.
- 4. Both for plain vanilla transactions and especially for structured transactions, legal due diligence is an integral part of the overall risk evaluation policy. Depending on the scope and complexity of transactions both internal as well as external legal exercises are undertaken.

Based on the above analysis, the credit research team presents a case for investing/ avoiding investments for any new issuer/ structure. Post these discussions formal proposals are prepared for issuers/ structures where limits are being sought.

The approval for such limits is sought, based on certain criterion that is laid out as part of the investment policy. Depending on the rating, tenor, and proposed exposures, approvals are taken at the Head of Fixed Income/ Investment Committee / Board levels.

As mentioned earlier, credit evaluation is a continuous exercise. For all issuers/structures where we have current exposures regular evaluation is carried out on a periodic basis. The periodicity of such evaluation depends on the exposure, credit comfort on the said issuer / structure and the overall credit environment.

Apart from regular credit updates both internally and at the Investment Committee levels, the board is also appraised on a periodic basis, on all the credit exposures, their performance and the credit department's views on them going forward.

- (ii) LIST OF SECTORS WHERE RNAM / RMF WOULD NOT BE INVESTING
 The scheme will not invest in Gems and Jewellery and airline sector.
- (iii) TYPE OF INSTRUMENTS IN WHICH THE SCHEMES PROPOSE TO INVEST
 For the type of instruments in which the schemes propose to invest is
 detailed in point no. D (where will the scheme invest Point No. 1 to 13)

(iv) INTENDED PORTFOLIO ALLOCATION

As per SEBI Circular No IMD/ DF/12 /2011 dated August 1, 2011 on Indicative portfolio or yield in close ended debt oriented mutual fund, the intended allocation for Reliance Dual Advantage Fixed Tenure Fund XII - Plan A is as mentioned below. The floors and ceilings within a range of 5% of the intended allocation (in %) against each sub asset class/credit rating as mentioned below:

Credit Rating Instruments	A1+	AAA	AA	А	BBB	N.A
CDs						
CPs						
Government Securities/ State Development Loans (SDLs)						20%
						25%
NCDs / Bonds			60%			
			65%			
Securitised Debt						
*CBLO/Repo/Reverse Repos (including repo in corporate bonds)/ T-Bills/ Liquid Schemes						0% - 5%

N.A - Not applicable

*Some of the instruments may also be rated.

Equity investments would be in range of 15% - 20%.

Out of the total equity allocation, fund manager would invest major portion in direct equity & equity related instruments/ securities (including options premium).

Net long positions in Interest Rate Futures will be taken as exposure to Government securities/ AAA NCDs.

Considering the long duration tenure of the Scheme the portfolio mix shall be predominantly in NCDs.

While some of the above-mentioned instruments may be rated, some others such as CBLO, Repo, etc, are not rated. Hence we have combined all these instruments under one category in the intended asset allocation and mentioned that the rating is not applicable to these instruments along with a foot note explaining that some instruments within the group may also be rated.

In addition to the above fixed income allocation, the scheme would also have investments in equity & equity related instruments/ securities (including options premium & Equity Mutual Fund Units) in the range of 5% - 30% in line with the details mentioned as a part of the Asset Allocation Pattern of the said document.

It may be noted that detailing of credit rating/instruments shall be made similar to the current format as indicated above.

There shall be no variations between intended portfolio allocation as may be issued at the time of launch and final portfolio except on account of the following:

 The scheme shall endeavour to invest in instruments having credit rating as indicated above or higher.

As per SEBI circular CIR/MIRSD/4/2011 dated June 15, 2011, Modifier "+"(plus) or "-"(minus) can be used with the rating symbols as they reflect the comparative standing withinthe category. For eg: in case AA has been

mentioned, it will include AA- as well as AA+. In case an instrument has more than one publicly available rating, the more conservative rating will be considered for the purpose of investment. If an instrument is rated A1+ it will be equivalent to AAA for the above matrix.

For external factors such as revision in credit rating of instruments, valuation of security, etc. It may be noted that

- All the investment rating etc will be considered at the time of making the investments only i.e at the time of deployment (for the purpose of comparison).
- Post deployment in case of subsequent rating action in any securities which leads to negative deviation from the intended asset allocation, the fund manager shall rebalance the portfolio within time period of 30 days to align it with the intended portfolio allocation provided such rebalancing does not adversely impact the interest of the investors.
- 2. In case desired maturity or credit quality of the assets mentioned in the intended asset allocations are not available or also on the basis of the risk reward analysis, the scheme may invest in Bank CDs of highest rating (A1+ or equivalents)/ CBLOs/ Reverse Repos (excluding repo in corporate bonds) / T-Bills. Such deviation may continue till suitable instruments of desired credit quality are not available.
- 3. Further, the above allocation may vary during the tenure of the scheme. Some of these instances are: (i) Coupon inflow / principal inflow / unexpected cash flow during the tenure of the plan; (ii) the instrument is called or bought back by the issuer (iii) in anticipation of any adverse credit event (iv) Non availability of any instrument and on risk reward analysis. In case of such deviations, the scheme may invest in Bank CDs (A1+ or equivalents)/ CBLOs/ Reverse Repos (excluding repo in corporate bonds)/ T-Bills/ Liquid schemes. Such deviation may continue till maturity, if suitable instruments of desired credit quality are not available. Incase where cash is generated in the above instances and is deployed in short term deposits, such deployment will only be for temporary parking in line with SEBI regulations.
- 4. In case of individual securities maturity prior to the maturity date of the scheme/ plan and at the time of construction of the portfolio, investments may be made in cash and cash equivalents such as CBLO, Repo (excluding repo in corporate bonds), T-Bills, Liquid Schemes, CDs and short term bank Deposits
- 5. In case where investments in any Unrated Instruments is indicated and if they are not available, the scheme may invest in Bank CDs (A1+ or equivalents)/ CBLOs/ Reverse Repos (excluding repo in corporate bonds)/ T-Bills/ Liquid schemes/ AAA rated instruments. The scheme shall not invest more than 10% of its NAV in unrated debt instruments issued by a single issuer and the total investment in unrated instruments shall not exceed 25% of the NAV of the scheme.
- 6. RNAM will ensure that total exposure of the scheme in a particular sector (excluding investments in Bank CDs, short term deposits of scheduled commercial banks, CBLO, G-Secs, SDLs, T-Bills and AAA rated securities issued by Public Financial Institutions and Public Sector Banks and such other instruments if any,as may be specified by SEBI from time to time) shall not exceed 25% or such other percentage of the net assets of the scheme. An additional exposure to financial services sector (over and above the limit of 25%) not exceeding 15% of the net assets of the scheme shall be allowed by way of increase in exposure to Housing Finance Companies (HFCs) rated AA and above and registered with National Housing Bank (NHB). However, such total investment/ exposure in HFCs shall not exceed 25% of the net assets of the scheme or such other percentage of the net assets of the scheme, as prescribed by SEBI from time to time.

Further, to clarify please note that all the above mentioned provisions and investments made in line with the above mentioned circumstances/variations are independent of this scenario (25% sector limit and exceptions on the same as detailed in point No. 6).

Please note the above sectoral limit is not applicable for equity and equity related securities.

7. The range as indicated in the intended portfolio allocation depending on the risk return profile of the portfolio and subject to the availability of the securities, the fund manager may increase the allocation for AAA rated securities, while ensuring range of other securities is proportionately adjusted.

It may be noted that the intended portfolio allocation will be determined at the time of launch of individual scheme whereas the final portfolio for the purpose of determining deviations, if any, will be considered after 30 days from the allotment of the scheme. Basis the same, RNAM will report in the next meeting of Board of Directors of Reliance Nippon Life Asset Management Limited (RNAM) (formerly Reliance Capital Asset Management Limited) and Reliance Capital Trustee Co Limited the publicized percentage allocation and final portfolio.

Barring the instances/scenario as mentioned above, in case of any deviation between the intended portfolio allocation and actual portfolio allocation at the time of deployment, the Fund Manger shall review and rebalance the portfolio within 30 days failing which such deviations would be recorded in the minutes of the Investment committee meeting to be placed before the Board of Director and Trustees.

For unlisted/ non traded securities, where sector classification does not exist, RNAM will have the discretion to decide the classification as per their best judgment.

Pursuant to the SEBI Circular No. SEBI/IMD/CIR No. 1/91171/07 dated April 16, 2007, where the cash in the scheme is parked in short term deposits of Scheduled Commercial Banks pending deployment, the scheme shall abide by the following guidelines:

- Such short-term deposits shall be held in the name of the Scheme
- The scheme shall not park more than 15% of the net assets in short term deposit(s) of all the scheduled commercial banks put together. However, such limit may be raised to 20% with prior approval of the Trustee.

- The scheme shall not park more than 10% of the net assets in short term deposit(s), with any one scheduled commercial bank including its subsidiaries.
- The scheme shall not park funds in short term deposit of a bank, which has invested in the Scheme.

RNAM will not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.

The aforesaid limits shall not be applicable to term deposits placed as margins for trading in cash and derivatives market.

WHAT ARE THE INVESTMENT STRATEGIES?

The fund management team will endeavor to maintain a consistent performance in the scheme by maintaining a balance between safety, liquidity and profitability aspects of various investments. The fund manager will try to achieve an optimal risk return balance for management of the fixed income portfolios.

The investments in debt instruments carry various risks like interest rate risk, liquidity risk, default risk, purchasing power risk etc. While they cannot be done away with, they can be minimized by diversification and effective use of hedging techniques.

The fund management team will take an active view of the interest rate movement by keeping a close watch on various parameters of the Indian economy, as well as developments in global markets.

Investment views / decisions will be taken on the basis of the following parameters:

- 1. Prevailing interest rate scenario
- 2. Quality of the security / instrument (including the financial health of the issuer)
- 3. Maturity profile of the instrument
- 4. Liquidity of the security
- 5. Growth prospects of the company / industry
- 6. Any other factors in the opinion of the fund management team

The equity portion of the scheme will invest in diversified portfolio of Equities & Equity Related Instruments (including options premium & Equity Mutual Fund Units) across market capitalisation. The fund manager may invest into equity & equity related instruments predominantly through long call options & Equity Mutual Fund Units

The funds will follow a bottom-up approach to stock-picking and choose companies across sectors. The Schemes will primarily focus on companies that have demonstrated characteristics such as market leadership, strong financials and quality management, and have the potential to create wealth for their shareholders by delivering steady performance through the ups and downs of the market. The Fund also expects to achieve the market linked appreciation (upside) by investing in premium of exchange traded options.

The Fund Manager may adopt different strategies considering the market scenario, and opportunities.

Risk Mitigation Factors /Risk Control: The Fund Management proposes to use analytic risk management tools like VAR / convexity/ modified duration for effective portfolio management

RISK PROFILE OF THE SCHEME:

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

i) Schemes investing in Bonds:

Interest Rate Risk: As with all debt securities, changes in interest rates will affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise.

Liquidity or Marketability Risk: This refers to the ease at which a security can be sold at or near its true value.

Credit Risk: Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e. will be unable to make timely principal and interest payments on the security).

Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested.

(ii) Risks associated with investing in Equities

Equity and Equity related instruments on account of its volatile nature are subject to price fluctuations on daily basis. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.

The inability of the Scheme to make intended securities purchases and the the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme. Trading olumes, settlement periods and transfer procedures may restrict the liquidity of the investments. The AMC may invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

Investments in equity and equity related securities involve high degree of risks and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

(iii) Risks associated with Investing in Derivatives

Derivatives require the maintenance of adequate controls to monitor the
transactions entered into, the ability to assess the risk that a derivative adds to
the portfolio and the ability to forecast price or interest rate movements correctly.
There is a possibility that a loss may be sustained by the portfolio as a result of
the failure of another party (usually referred to as the "counterparty") to comply
with the terms of the derivatives contract. Other risks in using derivatives include

the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

(iv) Risk Associated with Securitised Debt

As with any other debt instrument, the following risk factors have to be taken into consideration while investing in PTCs:

a. Credit Risk

Since most of the PTCs are drawn from a cherry picked pool of underlying assets, the risk of delay / default due to poor credit quality is low. Further more most of the PTCs enjoy additional cashflow coverage in terms of subordination by another lower class of PTCs or in terms of excess cash collateralization.

b. Liquidity Risk

Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

c. Price Risk / Interest Rate Risk

The price risk of these instruments shall be in line with the maturity / duration of such instruments. Domestic Securitised debt can have different underlying assets and these assets have different risk characteristics. These may be as given in the following example:

Security 1 - Backed by receivables of personal loans originated by XYZ Bank Specific Risk Factors: Loss due to default and/or payment delay on Receivables, Premature Termination of Facility Agreements, Limited loss cover, Delinquency and Credit Risk.

Limited Liquidity and Price Risk, Originator/Collection Agent Risk, Bankruptcy of the Originator, Co-mingling of funds

Security 2 - Senior Series Pass Through Certificates backed by commercial vehicles and two-wheeler loan and loan receivables from ABC Bank Limited

(v) Risk factors associated with repo transactions in corporate bonds -

- The market for the aforesaid product is over the counter (OTC) and illiquid. Hence, repo obligations cannot be easily sold to other parties. If a counterparty fails, the scheme would have to take recourse to the collateral provided. If a counterparty fails to repay and the value of the collateral falls beyond the haircut, then the Scheme would be exposed to a loss of interest or principal
- Further, if the Scheme needs to take recourse to the debt securities provided
 as collateral, and the issuer of the debt securities makes a default, the scheme
 may lose the whole, or substantial portion of the amount. This risk is somewhat
 mitigated by the fact that only bonds which have credit rating of AA and above
 can be accepted as collateral for repo transactions.

(vi) Other Scheme Specific Risk factors

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, settlement periods and transfer procedures. In the event of an inordinately large number of redemption requests, or of a re-structuring of the Scheme's investment portfolio, these periods may become significant. Please read the Sections of this Scheme Information Document entitled "Special Considerations" and "Right to Limit Redemptions" thereunder.

(vii) Risks associated with Listing of Units

Listing of the units of the fund does not necessarily guarantee their liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained. Consequently, the Fund may quote below its face value / NAV.

There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.

The liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment.

(IX) Risk associated with a close ended scheme

The tenor of the scheme shall be 1218 days from the date of allotment. The investor invests in such schemes with an expectation of generating wealth over the tenor of the scheme. The fund manager also invests funds as per the stated strategy keeping the above tenor in mind. While this allows the fund manager to take relatively long term investment calls without worrying about redemptions mid-way, in such schemes, the unit holder cannot exit the scheme before the maturity of the scheme, irrespective of changes in market conditions and alternative investment opportunities. Secondly, the stated strategy of the scheme may not be realized, within the tenor of the scheme. Other risk factors pertaining to the close ended schemes have been added under relevant sections

(ix) Risk associated with Securities Lending (only to the extent of investment in equity segment)

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. In case the Scheme undertakes stock lending under the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

Prevention of Money Laundering and Know Your Client (KYC)

In order to reduce hardship and help investors dealing with SEBI intermediaries, SEBI issued three circulars - MIRSD/SE/Cir-21/2011 dated October 05, 2011, MIRSD/Cir-23/2011 dated December 02, 2011 and MIRSD/Cir-26/2011 dated December 23, 2011 informing SEBI registered infermediaries as mentioned therein to follow, with effect from January 01, 2012, a uniform KYC compliance procedure for all the investors dealing with them on or after that date. SEBI also issued KYC Registration Agency ("KRA") Regulations 2011 and the guidelines in pursuance of the said Regulations and for In-Person Verification ("IPV").

All investors (individual and non- individual) are required for KYC compliance. However, applications should note that minors cannot apply for KYC compliance and any investment in the name of minors should be through a Guardian, who should be KYC compliant for the purpose of investing with a Mutual Fund. Also applicants/ unit holders intending, to apply for units currently holding units and operating their Mutual Fund folios through a Power of Attorney (PoA) must ensure that the issue of PoA and the holder of the PoA must mention their KYC compliance status at the time of investment. PoA holders are not permitted to apply for KYC compliance on behalf of the issuer of the PoA, Separate procedures are prescribed for change in name, address, and other KYC related details, should the applicant desire to change such information, POS will extend the services of effecting such changes. In line with the SEBI circular No. MIRSD/Cir-5/2012 dated April 13, 2012 and various other guidelines issued by SEBI on the procedural matters for KYC Compliances, the Investors are requested to note the following additional provisions shall be applicable for "KYC Compliances" with effect from December 1, 2012:

- In case of an existing investor of RMF and who is already KYC Compliant under the erstwhile centralized KYC with CVL (CVLMF) then there will be no effect on subsequent Purchase/Additional Purchase (or ongoing SIPs/STPs,etc) in the existing folios/accounts which are KYC compliant. Existing Folio holder can also open a new folio with Reliance Mutual Fund with the erstwhile centralized KYC
- In case of an existing investor of Reliance Mutual Fund and who is not KYC Compliant as per our records, the investor will have to submit the standard KYC Application forms available in the website www.cvlkra.com along with supporting documents at any of the SEBI registered intermediaries at the time of purchase / additional purchase / new registration of SIP/STP etc. In Person Verification (IPV) will be mandatory at the time of KYC Submission. This uniform KYC submission would a onetime submission of documentation.
- Investors who have complied with KYC process before December 31, 2011 (KYC status with CVL-KRA as "MF VERIFIED BY CVLMF") and not invested in the schemes of Reliance Mutual Fund i.e not opened a folio earlier, and wishes to invest on or after December 01, 2012, such investors will be required to submit 'missing/not available' KYC information and complete the IPV requirements.

Updation of 'missing / not available' KYC information along with IPV is currently a one-time requirment and needs to be completed with any one of the mutual funds i.e. need not be done with all the mutual funds where investors have existing investments. Once the same is done then the KYC status at CVL-KRA will change to 'Verified by CVL KRA' after due verification. In such a scenario, where the KYC status changes to 'Verified by CVL KRA', investors need not submit the 'missing/not available' KYC information to mutual funds again.

Individual Investors are required to submit 'KYC Details Change Form' issued by CVL-KRA available on their website www.cvlkra.com. In case of Non Individual investors, complied with KYC process before December 31, 2011, KYC needs to be done afresh due to significant and major changes in KYC requirements.
