| . Scheme can invest in same instruments having higher credit rating than the credit rating indicated in the above table.  |
|---|
| . In case of non-availability of and taking into account the risk-reward analysis of CPs, NCDs (including securitized debt), the scheme may invest in CDs of highest ratings (A1+) (public sector banks as well as private sector banks), TBills, CBLO & Repos on Government Securities / Tbill. Such deviation may exist till suitable NCD/CP of desired credit quality are not available  |
| . At the time of building up the portfolio post NFO and towards the maturity of the scheme, there may be a higher allocation to cash/cash equivalents.  |
| . During the tenure of the scheme the above allocation may also vary due to following circumstances such as (i) coupon inflow; (ii) the instrument is called or bought back by the issuer (iii) in anticipation of any adverse credit event, etc. In case of such deviations, the Scheme may invest in Bank CDs having highest ratings (i.e. A1+ or equivalent) / CBLOs / Government Securities / T-Bills. Deviation, if any, due to such instances, may continue till maturity, if suitable NCDs / CPs of desired credit quality are not available.  |
| . In the event of any deviations from the floor and ceiling of credit ratings specified for any instrument, the scheme portfolio will be rebalanced within 30 days from the date of said deviation  |
| . There shall be no deviation between the intended allocation and actual allocation post the New Fund Offer period, except for the situation stated in (4), (5), (6) and (7) above.   |
| nvestments under the scheme would be made only in securities which mature on or before the date<br>of the maturity of the Scheme. The scheme has the flexibility to invest in the entire range of debt<br>instruments and would seek to minimise interest rate risk while avoiding credit risks. The issuer<br>election for credit exposure would be based on financial parameters such as Turnover, Net Worth,<br>earing, Interest Coverage Ratio and Profitability track record. Companies in the investment<br>niverse are initially screened on the basis of Management quality, Business and Industry analysis<br>Feedback from creditors/ Rating agencies. Companies which meet the initial screening norms<br>re then evaluated on the financial norms for consideration in the investment. The scheme would<br>hake investment in securities in the investment universe based on market spreads and liquidity,<br>o as to match the investment horizon with the scheme maturity. Investment in sovereign papers<br>rould be based on interest rate expectations arising out of macroeconomic analysis. This includes<br>nalysis of inflation data and trends in macro variables such as credit growth, liquidity, money<br>upply growth, fiscal numbers and the global interest environment.<br>eatures differentiating among different Series of the Scheme are as follows:<br><b>iquidity:</b> In normal market situation, short term papers have very high liquidity compared to long<br>erm papers. |
| <b>ield to Maturity:</b> In normal market conditions, the yield of the portfolio constructed with shorter<br>erm papers will be lower than longer term papers.<br><b>ield Curve:</b> Yield to maturity for certain term to maturities may be higher or lower depending  |
| pon the prevalent market conditions.  |
| <b>urchasing Power:</b> The relative activeness of the scheme will also change with the inflation xpectations for the term to maturity of that scheme.  |
| <b>redit Quality:</b> The credit quality of debt instruments vary under changing market conditions nd firm specific growth and stability factors. The scheme launched at different times may bear ifferent credit risk and hence generate unequal returns.  |
| nutual Fund Units involve investment risks including the possible loss of principal. Please read<br>ne SID carefully for details on risk factors before investment. Scheme specific risk factors are<br>ummarized below:  |
| . Risk associated with investing in securitised debt: Investment in securitised debt is subject to liquidity risk, limited recourse, Delinquency & Credit Risk, Risks due to possible prepayments, risk due to bankruptcy of the Originator or Seller etc.  |

| Risk Control | <ul> <li>b. Risk associated with Close Ended Scheme: <ul> <li>In a close ended scheme, redemption / repurchase shall not be allowed prior to maturity of the Scheme. Redemption will be allowed only on maturity of the Scheme. Scheme will mature at the end of the close ended period. For liquidity purpose units of the scheme are to be listed on Stock Exchange. Investors who wish to trade on the exchange and Investors wishing to exit / redeem before the scheduled maturity may do so through stock exchange mode where the scheme will be listed. For the units listed on the exchange it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units and investor may not get the desired return. Also there may not be sufficient liquidity on the stock exchange for the investors to exit from the stock exchange mode.</li> </ul> </li> <li>c. Risk factors associated with repo transactions in corporate debt securities: <ul> <li>Corporate Bond Repo transactions are currently done on OTC basis and settled on non guaranteed basis. Credit risks could arise if the counterparty does not return the security as contracted on due date. The liquidation of underlying bonds in case of counterparty default would depend on the liquidity of the bond and market conditions at that time. This risk is largely mitigated, as the choice of counterparties is largely restricted and also haircuts are applicable on the underlying bonds depending on credit ratings. Also operational risks are lower as such trades are settled on a DVP basis. In the even of the scheme being unable to pay back the money to the counterparty as contracted in case of transactions as a borrower, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Mutual Fund. Thus, the scheme may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.d. Debt &amp; money market securities investment risk.</li> <li>d. Debt</li></ul></li></ul> |
|--------------|--|
|              | securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default<br>risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated<br>by diversification. In order to mitigate the various risks, the portfolio of the Scheme will be<br>constructed in accordance with the investment restriction specified under the Regulations which<br>would help in mitigating certain risks relating to investments in securities market. Further,<br>the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk<br>Management division is an independent division within the organization. Internal limits are defined<br>and judiciously monitored. Risk indicators on various parameters are computed and are monitored<br>on a regular basis. There is a Board level Committee, the Risk Management Committee of the<br>Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.<br>For risk control, the following may be noted:  |
|              | Liquidity risks:<br>The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.  |
|              | Interest Rate Risk:<br>Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds<br>fall and vice versa. A well-diversified portfolio may help to mitigate this risk. Additionally, the<br>Scheme will invest in securities maturing on or before the maturity of the Scheme. Hence, while<br>the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more<br>stable. To that extent the interest rate risk will be mitigated at the maturity of the scheme.   |
|              | <b>Volatility risks:</b><br>There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification. Further, the Scheme will invest in a basket of debt and money market securities maturing on or before maturity of the Scheme with a view to hold them till the maturity of the Scheme. To that extent the Volatility risk will be mitigated in the scheme.  |

### 33. - APPOINTMENT OF MF UTILITIES INDIA PRIVATE LIMITED

SBI Funds Management Private Limited ("the AMC") has entered into an Agreement with MF Utilities India Private Limited ("MFUI"), a "Category II - Registrar to an Issue" under SEBI (Registrars to an Issue and Share Transfer Agents) Regulations, 1993, for usage of MF Utility ("MFU") - a shared services initiative of various Asset Management Companies, which acts as a transaction aggregation portal for transacting in multiple Schemes of various Mutual Funds with a single form and a single payment instrument.

Accordingly, during the new fund offer, investor can submit request for purchase of units of the Scheme through MFU online (as and when this facility is available) or through authorized Points of Service published on MFUI website.

Investors should note that transactions on the MFUI portal shall be subject to the eligibility of the investors, any terms & conditions as stipulated by MFUI / Mutual Fund / the AMC from time to time and any law for the time being in force.

MFUI will allot a Common Account Number ("CAN"), a single reference number for all investments in the Mutual Fund industry, for transacting in multiple Schemes of various Mutual Funds through MFU and to map existing folios, if any. Investors can create a CAN by submitting the CAN Registration Form (CRF) and necessary documents at the MFUI POS. The AMC and / or its Registrar and Transfer Agent (RTA) shall provide necessary details to MFUI as may be needed for providing the required services to investors / distributors through MFU. Investors are requested to visit the website of MFUI (www.mfuindia.com) to download the relevant forms.
