Type of Scheme	A 10 Year Close-Ended Equity Linked Saving Scheme																	
Investment Objective	<p>The investment objective of the scheme is to generate capital appreciation over a period of ten years by investing predominantly in equity and equity-related instruments of companies along with income tax benefit.</p> <p>However, there can be no assurance that the investment objective of the Scheme will be realized.</p>

Investment Strategy	<p>The funds collected under the scheme shall be invested in equities, cumulative convertible preference shares and fully convertible debentures and bonds of companies. Investment may also be made in partly convertible issues of debentures and bonds including those issued on rights basis subject to the condition that, as far as possible, the non-convertible portion of the debentures so acquired or subscribed, shall be disinvested within a period of twelve months.</p> <p>SBI Long Term Advantage Fund Series - V will be a diversified equity fund. The fund will invest into equity stock of companies listed in India. The fund investment strategy is split into three parts;</p> <p>1. Asset Allocation:</p> <p>The fund will invest a portion of its assets into large caps, midcaps and small caps. The proportion of the exposure to each capitalisation will depend on the following factors:</p> <ul style="list-style-type: none"> Liquidity of stocks under each capitalisation range (e.g. Large caps are more liquid than midcaps and midcaps are more liquid than small caps) Trading volumes Market scenario - It is observed in the past that, in falling markets, large caps fall lesser (in % terms) than midcaps & small caps. It is also observed that, in rising markets, midcaps outperform (in % terms) large caps. <p>2. Top down approach:</p> <p>The top down approach helps identifying sectors where the portfolio should take exposure. The portion of exposure to each sector (vis-a-vis benchmark) depends on the following parameters:</p> <ul style="list-style-type: none"> Macroeconomic view Policy changes Global trends Relative valuation of each sectors vis-a-vis other sector Risk premium (Risk-reward ratio) 																	

	<p>3. Bottom-up approach:</p> <p>The bottom-up approach helps identifying stocks where the portfolio should take exposure. The portion of exposure to each stock (vis-a-vis benchmark and within the sector) depends on the following parameters:</p> <ul style="list-style-type: none"> • Relative valuation of each stock vis-a-vis other stock within the sector or broader market • Management quality • Business fundamentals • Risks associated with business • Ratios (PE, PB etc) <p>SBI Long Term Advantage Fund Series - V is long term equity strategy, the portfolio would be constructed using combination of all the above segments (Asset allocation, top-down approach and bottom-up approach)</p>
<p>Risk Profile of the Scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <ol style="list-style-type: none"> a) Investment in ELSS is subject to lock-in period of three years. During this period investors will not be able to redeem their units. To this extent the liquidity for the investor is restricted and this may restrict exit at opportune moments. b) SBI Long Term Advantage Fund - Series V would be investing in Equities, cumulative convertible preference shares, fully convertible debentures, bonds of companies, and money market instruments (such as term/notice money market, reverse repos and any alternative to the call money market as may be directed by the RBI). The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests after completion of the lock-in period, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the Trustees have the right in their sole discretion to limit redemptions (including suspending redemptions) under certain circumstances. c) Equity and equity related risk: Equity instruments carry both company specific and market risks and hence no assurance of returns can be made for these investments. d) Money market securities investments under the scheme may also be subject to the following risks: <ol style="list-style-type: none"> i. Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other money market instruments are rated according to the issuer's ability to meet the obligations. ii. Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.

	<p>iii. Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.</p> <p>iv. Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.</p> <p>e) Risk associated with close ended equity scheme: A close ended equity Scheme comes to the end at the scheduled maturity of the Scheme. On the scheduled maturity date, all units are redeemed at the NAV on the maturity date. This redemption is done by liquidating the investments irrespective of their levels. Therefore, there is risk associated with close ended schemes where fund manager might have to liquidate the investments at unfavourable levels.</p>
Risk Control	<p>Investments in Equity and equity related instruments and money market instruments carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification.</p> <p>To mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.</p> <p>Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board Level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants</p> <p>For risk control, the following may be noted:</p> <p>Liquidity risks:</p> <p>The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.</p> <p>Interest Rate Risk:</p> <p>Changes in interest rates affect the prices of bonds as well as equities. If interest rates rise the prices of bonds fall and vice versa. Equity might be negatively affected as well in a rising interest rate environment. A well-diversified portfolio may help to mitigate this risk.</p> <p>Credit Risks:</p> <p>Credit risk shall be mitigated by investing in rated papers of the companies having the sound background, strong fundamentals, and quality of management and financial strength of the Company.</p> <p>Volatility Risks:</p> <p>There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification.</p> <p>Political / Government Policy Risk:</p> <p>Changes in government policy and political decision can change the investment environment. They can create a favourable environment for investment or vice versa.</p>

Plans /Options	<p>The scheme would have two plans viz Direct Plan & Regular Plan.</p> <p>Direct Plan:</p> <p>Direct Plan is only for investors who purchase /subscribe Units in a Scheme directly with the Mutual Fund and is not available for investors who route their investments through a Distributor.
