Investment Strategy	<p>The net assets of the Scheme are invested primarily into equity and equity related instruments including equity derivatives. The Scheme invests rest of the assets into debt and money market instruments for liquidity and regular income. The expected returns from this Scheme can be attributed to the following return drivers:</p> <ul style="list-style-type: none"> Cash and Futures equity arbitrage: The scheme endeavours to achieve its primary objective of generating income by exploitation of arbitrage opportunities in equities market. Majority of equity exposure to stocks shall be offset by simultaneously taking equivalent exposure in derivatives. The scheme may invest into equity stocks in the cash market and take short position in futures market equivalent to the extent of

	<p>equity assets that covers the exposure and only avail arbitrage between spot & futures market. Thus, the entire position may be used to lock risk free returns.</p> <ul style="list-style-type: none"> • Net long equity: The Scheme may take limited long only exposures to equity stocks in order to generate market related returns. The secondary objective of the Scheme to generate long-term capital appreciation is endeavoured to be achieved by investing a portion of the Scheme's assets in equity. The Scheme shall invest into a well-diversified portfolio of equity and equity related securities across market capitalisation and sectors to participate in the all-round growth of the Indian economy. • Debt and Money Market Instruments: The Scheme may invest upto 35% of the net assets of the Scheme into debt and money market instruments. This portion of the scheme assets is discretionary to provide liquidity into the scheme, management of derivative margins and accrual of regular income.
<p>Risk Profile of the Scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <ol style="list-style-type: none"> a. SBI Equity Savings Fund will be investing in Equity and equity related securities including derivatives, debt, money market instruments. The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the Trustees have the right in their sole discretion to limit redemptions (including suspending redemptions) under certain circumstances. b. Equity and Equity related instruments are volatile in nature and are subject to price fluctuations on daily basis. c. Risk associated with derivatives: Since investments would be made in equity based derivatives such as options & futures, the risks associated with such derivatives would be applicabled. Investment in Debt and money market instruments is subject to credit risk, interest rate risk, reinvestment risk etc. e. Investment in securitised debt is subject to liquidity risk, Delinquency & Credit Risk, Risks due to possible prepayments, risk due to bankruptcy of the Originator or Seller etc. f. Risks associated with unrated instruments: Investments in unrated instruments are subject to the risk associated with investments in any other fixed income securities such as credit risk, interest rate risk etc. However, investments in unrated instruments are considered to be subject to greater risk of loss of principal and interest than rated instruments g. Risk factors associated with repo transactions in corporate debt securities:Corporate Bond Repo transactions are currently done on OTC basis and settled on non guaranteed basis. Credit risks could arise if the counterparty does not return the security as contracted on due date. The liquidation of underlying bonds in case of counterparty default would depend on the liquidity of the bond and market conditions at that time. This risk is largely mitigated, as the choice of counterparties is largely restricted and also haircuts are applicable on the underlying bonds depending on credit ratings. Also operational risks are lower as such trades are settled on a DVP basis. <p>In the event of the scheme being unable to pay back the money to the counterparty as contracted in case of transactions as a borrower, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Mutual Fund. Thus, the scheme may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.</p>

Risk Control	<p>Investments in Equity and equity related instruments including derivatives, debt, money market instruments carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.</p> <p>In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.</p> <p>Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigates.</p>
Plans /Options	<p>The scheme would have two plans viz Direct Plan & Regular Plan. Both plans provide two options for investment - Growth Option and Dividend Option. Under dividend option monthly & quarterly frequencies are available. Under both frequencies of Dividend option, facility for reinvestment, payout & transfer of dividend is available.</p> <p>In case investor has mentioned the Distributor code (ARN code) and not specified either Regular Plan or Direct Plan in the application form, the default plan shall be considered as "Regular Plan". In case neither distributor's code nor "Direct" is indicated in the application form, the same will be treated as "Direct Plan" application. In other cases, the default plan shall be considered as "Direct Plan". Between "Growth" or "Dividend" option, the default will be treated as "Growth". Between monthly & quarterly frequencies of dividend option, Monthly will be the default frequency.
