OTHER DISCLOSURES FOR CLOSE ENDED DEBT ORIENTED SCHEMES

1. Credit Evaluation Policy :

Fund house follows a Credit Evaluation Process based on the objective assessment of the business risk, industry risk, financial risk, liquidity & funding risk and a subjective assessment of management quality, corporate governance, auditor comments, banker's feedback, risk management systems & processes. The Fund House also takes into account the external rating of the company by accredited rating agencies. It is an ongoing process that includes continuous monitoring and surveillance of companies to adjust for the latest developments within the sector & corporate actions within the group / company.

2. Sectors in which the Plan shall not invest

The Plans will not invest in the securities issued by the companies in the Aviation, Gems & Jewellery and Real Estate Sectors.

3. Type of instruments which the Plan propose to invest in

Please refer to "Section– Where will the Plan invest?" appearing in the Scheme Information Document

4. Floors and Ceilings within a range of 5% of the intended allocation (in %) each sub asset class / credit rating

Intended Portfolio allocation (for Debt and Money Market Instruments)::

Instruments	Credit Ratings					
	A1	AAA*	AA*	A	BBB	Not Applicable
CDs	-					
CPs	-					
NCDs	-	60% - 65%	35% - 40%			
Repo/CBLO/T-Bills	-					

* or equivalent to a short term rating

The Plan may temporarily invest in another scheme under the same AMC or any other AMC without charging any fees during the period of portfolio construction. The details with regards to the intended allocation for each asset class or credit rating within the range of 5% will be provided at the time of launch of the Plan

Note:

- Securities with rating A and AA shall include A+ and A- & AA+ and AA- respectively. Similarly Securities with ratings A1 shall include A1+ and A1-.
- All investments shall be made based on rating prevalent at the time of investment. Where any paper is having dual rating (rated differently by more than one rating agency) then for the purpose of meeting intended range, the most conservative publicly available rating would be considered.
- There will not be any deviation between the intended allocation and actual allocation except the following.
 - There can be positive variation in the range w.r.t. rating i.e., the Plan may invest in papers of higher rating in the same instrument than indicated.
 - At the time of building the portfolio post NFO and towards the maturity of the Plan, there may be a higher allocation to cash and cash equivalents.

	<p>iii. The above allocation may vary during the duration of the Plan. Some of these instances are (i) coupon inflow; (ii) the instrument is called or bought back by the issuer; (iii) in anticipation of any adverse credit, (iv) CPs/NCDs of desired credit quality are not available or the Fund Manager is of the view that the risk-reward analysis of such instruments are not in the best interest of the Unit holders. In case of such deviations, the Plan may invest in Bank CDs having highest ratings (i.e., A1+ or equivalent), CBLOs, T-Bills. Such deviations may exist till suitable CPs/NCDs of desired credit quality are not available.</p> <p>d) Change in Asset Allocation: Further in the event of any deviations below the minimum limits or beyond the maximum limits as specified in the above table and subject to the notes mentioned herein, the Fund Manager shall rebalance the portfolio within the period of 30 days. In case the same is not aligned to the above asset allocation pattern in the period specified, justification shall be provided to the Investment Committee of the AMC and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action.</p> <p>e) The Plan shall not invest in unrated debt instruments. For this purpose, unrated debt securities shall exclude instruments such as CBLO, Reverse Repo, Short Term Deposit and such similar instruments to which rating is not applicable.</p> <p>5. Reporting: After the closure of NFO, the AMC will report in the next meeting of AMC / Trustees, the publicized percentage allocation and the final portfolio.</p>
Risk Profile of the Scheme	<p>Mutual Fund investments are subject to market risks. Please read the SID carefully for details on risk factors before investment.</p> <p>Past performance of the Sponsors / AMC / Mutual Fund does not guarantee future performance of the scheme.</p> <p>UTI-Dual Advantage Fixed Term Fund Series III – III (1102 days) is only the name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects or returns. There may be instances where no dividend distribution could be made.</p> <p>Risk factors & Risk Mitigation measures specific to the Plan.</p> <p>a. The performance of the Plan may be affected by changes in Government policies, general levels of interest rates and risk associated with trading volumes, liquidity and settlement systems in equity and debt markets.</p> <p>b. Investments in debt instruments are subject to default risk and interest rate risk. Interest rate risk results from changes in demand and supply for money and other macroeconomic factors and creates price changes in the value of debt instruments. Consequently, the Net Asset Value of the Plan may be subject to fluctuation.</p> <p>c. Though it is the endeavor of fund manager to invest in debt securities maturing in line with the maturity of the respective Plan there could be instances of not finding debt instruments with appropriate maturity date and hence there may be reinvestment risk. Investments in debt instruments are subject to reinvestment risks as interest rates prevailing on interest or maturity due dates may differ from the original coupon of the bond, which might result in the proceeds being invested at a lower rate.</p> <p>d. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, even though it is intended to generate capital appreciation and maximize the returns by actively investing in equity/ equity related securities.</p> <p>e The value of the Plan's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual</p>

securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Plan may fluctuate and can go up or down.

- f. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the equity and equity related investments made by the Plan which could cause the Plan to miss certain investment opportunities. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The inability of the Plan to make intended securities purchases due to settlement problems could also cause the Plan to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Plan's portfolio due to the absence of a well developed and liquid secondary market for debt securities would result, at times, in potential losses to the Plan, in case of a subsequent decline in the value of securities held in the Plan's portfolio.
- g. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the regulatory limits, the AMC may choose to invest in unlisted securities that offer attractive yields. This may however increase the risk of the portfolio.
- h. The Plan may use various equity derivative products as permitted by the Regulations. Use of derivatives requires an understanding of not only the underlying instrument but also of the derivative itself. Other risks include the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Usage of derivatives will expose the Plan to certain risks inherent to such derivatives.
- i. The Plan intends to deploy funds in money market instruments to maintain liquidity. To the extent that some assets/funds are deployed in money market instruments, the Plan will be subject to credit risk as well as settlement risk, which might affect the liquidity of the Plan.
- j. Different types of securities in which the Plan would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the Plan's risk may increase or decrease depending upon its investment pattern. For e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA (SO) rated are comparatively less risky than bonds which are AA rated.
- k. Redemption will be done on the maturity date at the Net Asset Value on the date of maturity. As per SEBI guidelines, the AMC/MF shall not redeem the units of the Plan before the date of maturity.

Risk Mitigation Measures:

As the said Plan is a close ended Plan investing in a diversified portfolio with no redemption till maturity, the risk factors mentioned above will be minimal.

Interest Rate Risk / Reinvestment Risk: The Plan would manage the interest rate risk & reinvestment risk by adequately matching the duration of assets in line with the duration of Plan.

Credit Risk: The Plan would predominantly invest in highly rated securities where there is an internal credit comfort which would reduce the probability of credit risk.

Portfolio Quality Risk: A pre approved universe of stocks / issuers based on fundamental research is maintained to which helps to mitigate the risk of a poor portfolio quality.

Concentration Risk: The Plan would have modest presence of issuers with reasonable limits to diversify the portfolio which would mitigate the credit concentration risk as well as

	<p>sector /stock specific concentration risk.</p> <p>Liquidity Risk: Periodical review of the liquidity position of each scrip (Market capitalization, average volume in the market vis. a vis. Portfolio Holding) to minimize liquidity risk.</p> <p>Portfolio Risk: By monitoring the return deviation and adequately managing all the above risks namely interest rate risk, reinvestment risk & credit cum concentration risk the Plan would mitigate the overall portfolio risk. Diversification of portfolio will also help to minimize interest rate risk, liquidity risk, portfolio quality risk and overall risks associated with the portfolio.</p>

The G20 and OECD countries have together developed a Common Reporting Standard (CRS) on Automatic Exchange of Information (AEOI).

Please refer to Instructions given in the FATCA/CRS Form before filling in the particulars and for further details relating to FATCA/CRS, refer to AMFI India’s Circular No.135/BP/63/2015-16 dated 18th September 2015 and SEBI Circular No. CIR/MIRSD/3/2015 dated 10th September 2015.
