II. INTRODUCTION

A. Risk Factors

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down. The value of investments may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures; the NAV is also exposed to Price/Interest-Rate Risk and Credit Risk and may be affected inter-alia, by government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- Kotak Nifty SDL Jul 2033 Index Fund is only the name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs.2,50,000 made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

Scheme Specific Risk Factors:

- The Scheme is a passively managed scheme. The Scheme shall endeavor to invest in the securities included in its Underlying Index regardless of their investment merit, subject to deviations permitted as per extant SEBI circulars as amended from time to time. The AMC does not attempt to individually select securities or to take defensive positions in declining markets.
- Portfolio Concentration Risk

To the extent that the Scheme may concentrate its investments in the securities of certain issuers sectors, the Scheme will therefore be subject to the risks associated with such concentration. In addition, the Scheme may be exposed to higher levels of volatility and risk than would generally be the case in a more diverse fund portfolio of debt securities. Such risks may impact the Scheme to the extent that it invests in particular issuers sectors even in cases where the investment objective is more generic.

- Investments in the Scheme may mature before target maturity and hence investors' returns could be lower.
- Inflows will be invested in securities that mature before the target maturity at then prevalent rates and hence overall performance could be different than at the time of portfolio construction.

Risks associated with Tracking Error / Tracking Difference:

Tracking error means the extent to which the NAV of the fund moves in a manner inconsistent with the movements of the benchmark index on any given day or over any given period of time due to any cause or reason whatsoever including but not limited to expenditure incurred by the scheme, IDCW payouts if any, whole cash not invested at all times as it may keep a portion of funds in cash to meet redemption etc.

However, the Fund will endeavor to limit the tracking difference over one-year period within 1.25% limits.

Tracking error / difference could be the result of a variety of factors including but not limited to:

- Delay in the purchase or sale of securities / Issuances within the benchmark due to
 - Illiquidity in the securities
 - Delay in realisation of sale proceeds
- The scheme may buy or sell the securities comprising the index at different points of time during the trading session at the then prevailing prices which may not correspond to its valuation prices.

- The potential for trades to fail, which may result in the Scheme not having acquired the securities at a price necessary to track the benchmark price.
- Index providers may either exclude or include new securities in their periodic review of the securities that constitute the underlying index. In such situations the scheme will endeavour to rebalance the portfolio in line with the index. But may not able to mirror the index immediately due the available investment/reinvestment opportunity.
- The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
- Disinvestments to meet redemptions, recurring expenses, payouts of IDCW etc.
- Execution of large buy / sell orders
- Delay in credit of securities
- Transaction cost and recurring expenses
- Delay in realisation of Unit holders' funds
- Maintenance of margins

Risks associated with Debt / Money Markets (i.e. Markets in which Interest bearing Securities or Discounted Instruments are traded)

a) Credit Risk:

Investments in Fixed Income Securities are subject to the risk - of an issuer's inability to meet interest and principal payments on its obligations and creditworthiness of the issuer.

b) Price-Risk or Interest-Rate Risk:

From the perspective of coupon rates, Debt securities can be classified in two categories, i.e., Fixed Income bearing Securities and Floating Rate Securities. In Fixed Income Bearing Securities, the Coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the Floating Rate Securities, on the other hand, the coupon rate changes - 'floats' - with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury Bill.

Fixed Income Securities (such as Government Securities, bonds, debentures and money market instruments) where a fixed return is offered, run price-risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, the payment-frequency of such coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in interest rates in the financial system. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof. However, debt securities in the scheme are intended to be held till maturity. For such securities held till maturity, there will not be any interest rate risk at the end of the tenure.

Floating rate securities issued by a government (coupon linked to treasury bill benchmark or a real return inflation linked bond) have the least sensitivity to interest rate movements, as compared to other securities. The Government of India has already issued a few such securities and the Investment Manager believes that such securities may become available in future as well. These securities can play an important role in minimizing interest rate risk on a portfolio.

c) Risk of Rating Migration:

The following table illustrates the impact of change of rating (credit worthiness) on the price of a hypothetical AA rated security with a maturity period of 3 years, a coupon of 10.00% p.a. and a market value of Rs. 100. If it is downgraded to A category, which commands a market yield of, say, 11.00% p.a., its market value would drop to Rs. 97.53 (i.e. 2.47%) If the security is up-graded to

AAA category which commands a market yield of, say, 9.00% p.a. its market value would increase to Rs102.51 (i.e. by 2.51%). The figures shown in the table are only indicative and are intended to demonstrate how the price of a security can be affected by change in credit rating.

Rating	Yield (% p.a.)	Market Value (Rs.)
AA	10.00	100.00
If upgraded to AAA	9.00	102.51
If downgraded to A	11.00	97.53

d) Basis Risk:

During the life of floating rate security or a swap the underlying benchmark index may become less active and may not capture the actual movement in the interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio. Where swaps are used to hedge an underlying fixed income security, basis risk could arise when the fixed income yield curve moves differently from that of the swap benchmark curve.

e) Spread Risk:

In a floating rate security, the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions the spreads may move adversely or favourably leading to fluctuation in NAV.

f) Reinvestment Risk:

Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

g) Liquidity Risk:

The corporate debt market is relatively illiquid vis-a- vis the government securities market. There could therefore be difficulties in exiting from corporate bonds in times of uncertainties. Liquidity in a scheme therefore may suffer. Even though the Government Securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described in the Statement of Additional Information (SAI).

Risk associated with investment in Government securities and Triparty repo on Government securities or treasury bills:

- The mutual fund is a member of securities segment and Triparty repo on Government securities or treasury bills trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Triparty repo on Government securities or treasury bills trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counter party risks considerably for transactions in the said segments.
- The members are required to contribute towards margin obligation (Initial / Mark to Market etc.) as per bye-laws of CCIL as also an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in discharging their obligation. As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members as determined by CCIL.

- Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).
- CCIL maintains two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty repo on Government securities or treasury bills trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Risk associated with Securities Lending

In the case of securities lending the additional risk is that there can be temporary illiquidity of the securities that are lent out and the Fund may not be able to sell such lent-out securities, resulting in an opportunity loss. In case of a default by counterparty, the loss to the Fund can be equivalent to the securities lent.

Risks associated with segregated portfolio

- Investor holding units of segregated portfolio may not able to liquidate their holding till the time realisable value is recovered.
- Security comprising of segregated portfolio may realise lower value or may realise zero value.
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

B. Requirement of Minimum Investors in the Scheme

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme do not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Overview of Debt Market and Money Markets.

The Indian Debt Market has grown in size substantially over the years. The Reserve Bank of India has been taking steps to make the Indian Debt Market efficient and vibrant. Broadly, the debt market is divided in two parts viz. the Money Market and the Debt market. Money market instruments have a tenor of less than one year while debt market instruments have a tenor of more than one year. Money market instruments are typically commercial paper, certificates of deposit, treasury bills, trade bills, repos, interbank call deposit receipts etc. Debt market comprises typically of securities issued by Governments (Central and State), Banks, Financial Institutions, and Companies in the private and public sector, Corporations, Statutory Bodies etc.

The debt securities are mainly traded over the telephone directly or through brokers. The National Stock Exchange of India has a separate trading platform called the Wholesale Debt Market segment where trades put through member brokers are reported.

RBI has introduced the Negotiated Dealing System (NDS) platform for screen-based trading in Government Securities including treasury bills. Most of the market participants are now operating through NDS.

Promoted by major banks and financial institutions, The Clearing Corporation of India Ltd. (CCIL) was incorporated on April 30, 2001. The CCIL guarantees the settlement of all trades executed through NDS. The clearing and settlement risks viz., Counter party Credit Risk and Operational Risk are mitigated by CCIL thereby facilitating a smooth settlement process.

The following table gives approximate yields prevailing as on January 06, 2023 on some of the money and debt market instruments. These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing.

Instrument	Yield Range (% per annum)
Inter-bank Call Money	5.99-6.00
91 Day Treasury Bill	6.30-6.35
364 Day Treasury Bill	6.88-6.93
P1+ Commercial Paper 90 Days	6.95-7.00
3-Year Government of India Security	7.15-7.20
5-Year Government of India Security	7.25-7.30
10-Year Government of India Security	7.35-7.40

Generally, for instruments issued by a non-Government entity, the yield is higher than the yield on a Government Security with corresponding maturity. The difference, known as credit spread, depends on the credit rating of the entity. Investors must note that the yields shown above are the yields prevailing on January 06, 2023, and they are likely to change consequent to changes in economic conditions and RBI policy.

E. What is the investment strategy?

Kotak Nifty SDL Jul 2033 Index Fund maturity is a passively managed index fund which will employ an investment approach designed to track the performance of Nifty SDL Jul 2033 Index. The Scheme will follow buy and hold investment strategy in state government securities will be held till maturity unless sold for meeting redemptions/rebalancing. The Scheme shall endeavor to replicate the index. In case the Scheme is not able to replicate the index the Fund Manager invest subject to provisions laid down under SEBI circular dated May 23, 2022 as amended from time to time. During normal circumstances, the Scheme's exposure to money market instruments will be in line with the asset allocation table. However, in case of maturity of instruments in the Scheme portfolio, the reinvestment will be in line with the index methodology.

Risk mitigation:

Based on the availability of issuances, it is expected that the Portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error/ Difference. That said, broad risk parameters of the portfolio of the Scheme such as credit rating, weighted average YTM, weighted average maturity, asset allocation etc. are expected to be similar to the Underlying Index.

The Scheme may also invest a portion of its portfolio in Debt & Money Market securities maturing on or before the maturity date of the Scheme, Repo in government securities and TREPS to manage liquidity requirement.

This allocation will be monitored periodically and it shall be ensured that investments are made in accordance with the Scheme objective and within the regulatory and internal investment restrictions prescribed from time to time. Since disciplined investing requires risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The Scheme

has a detailed process to identify, measure, monitor and manage various portfolio risks. The objective is to understand these risk and mitigate them wherever possible.

Risk & Description specific to the	Risk mitigants / Management Strategy
Scheme	
Market/Volatility Risk Risk arising due to price fluctuations and volatility, having material impact on the overall returns of the Scheme.	The Scheme, being a Target Maturity Date Index structure, is expected to follow a Buy and Hold investment strategy in a passive manner. Based on that, we expect to mitigate intermittent price volatility in the underlying assets. Investors who remain invested until the maturity of the Scheme are expected to mitigate market / volatility risk to large extent.
Credit risk Risk associated with repayment of investment	The Scheme seeks to track SDLs which are considered as relatively safe
Liquidity risk Risk arising due to inefficient Asset Liability Management, resulting in high impact costs	The Scheme that seeks to track SDLs which has higher level of secondary market liquidity.
Interest rate risk Price volatility due to movement in interest rates	The Scheme, being a Target Maturity Date Index structure, is expected to follow a Buy and Hold investment strategy in a passive manner. All investments will be in line with the maturity date of the Scheme and the underlying Index. This should help mitigate the interest rate risk.

Few of the key risk identified are:

Portfolio Turnover

The scheme being an open ended scheme, it is expected that there would be frequent subscriptions and redemptions. Hence, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. If trading is done frequently, there may be an increase in transaction cost such as brokerage paid etc. The fund manager will endeavor to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. The Scheme has no specific target relating to portfolio turnover.

Portfolio Turnover Ratio: Since the scheme is a new fund to be launched, the said ratio is Not Applicable during NFO.

Creation of segregated portfolio

In accordance with SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2018/160, dated December 28, 2018, and SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2019/127 dated November 07, 2019, provisions have been included for creation of segregated portfolio and enabling fund manager to invest in various instruments / securities available in the securities market in the interest of investors.

Explanations:

- 1. The term 'segregated portfolio' shall mean a portfolio, comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme.
- 2. The term 'main portfolio' shall mean the scheme portfolio excluding the segregated portfolio.
- 3. The term 'total portfolio' shall mean the scheme portfolio including the securities affected by the credit event.

<u>Note 1</u>: As per SEBI circular dated December 28, 2018, credit event is considered for creation of segregated portfolio, however for the purpose of SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2019/127 dated November 07, 2019, 'actual default' by the issuer of such instruments shall be considered for creation of segregated portfolio.

Note 2: Portfolio referred herewith will include interest accrued as well.

Terms and conditions in respect of Creation of segregated portfolio in the scheme:

AMC may create segregated portfolio in the scheme and it shall be subject to guidelines specified by SEBI from time to time including the following:

- 1. Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:
- a. Downgrade of a debt or money market instrument to 'below investment grade', or
- b. Subsequent downgrades of the said instruments from 'below investment grade', or
- c. Similar such downgrades of a loan rating.
 - 2. In case of difference in rating by multiple CRAs, AMC shall consider the most conservative rating. Creation of segregated portfolio shall be based on issuer level credit events as per above point no. 1 and shall be implemented at the ISIN level.

3. Creation of segregated portfolio shall be optional and at the discretion of Kotak Mahindra Asset Management Company Ltd ('AMC'). It should be created only if the Scheme Information Document (SID) of the scheme has provisions for segregated portfolio with adequate disclosures.

Further, in accordance with SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2019/127 dated November 07, 2019, Creation of segregated portfolio in mutual fund schemes has been permitted in respect of unrated debt or money market instruments by mutual fund schemes of an issuer that does not have any outstanding rated debt or money market instruments, subject to the following terms:

- a. Segregated portfolio of such unrated debt or money market instruments may be created only in case of actual default of either the interest or principal amount. As per SEBI circular dated December 28, 2018, credit event is considered for creation of segregated portfolio, however for the purpose of SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2019/127 dated November 07, 2019, 'actual default' by the issuer of such instruments shall be considered for creation of segregated portfolio.
- b. AMCs shall inform AMFI immediately about the actual default by the issuer. Upon being informed about the default, AMFI shall immediately inform the same to all AMCs. Pursuant to dissemination of information by AMFI about actual default by the issuer, AMCs may segregate the portfolio of debt or money market instruments of the said issuer in terms of SEBI circular dated December 28, 2018.
- c. All other terms and conditions as stated in SEBI circular dated December 28, 2018 shall remain the same.

Process for creation of segregated portfolio:

On the date of the Credit Event the Investment Committee of AMC shall first approve the creation of segregated portfolio and their decision will be recommended to the Board of AMC and the Trustee company for approval.

ii. immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. Kotak Mahindra Mutual Fund should also disclose that the segregation shall be subject to Trustees approval. Additionally, the said press release shall be prominently disclosed on the website of the AMC.

iii. ensure that till the time the trustees approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.

- b. Once trustees approval is received by the AMC:
 - i. Segregated portfolio shall be effective from the day of credit event

 - iii. An e-mail or SMS should be sent to all unit holders of the concerned scheme.

However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.

c. If the trustees do not approve the proposal to segregate portfolio, AMC shall issue a press release immediately informing investors of the same.

Valuation and processing of subscriptions and redemptions:

The valuation of the instruments/portfolio shall be done based on the Board approved valuation policy for securities which are rated below investment grade.

All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing circular on applicability of NAV as under:

i. Upon trustees' approval to create a segregated portfolio -

- Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
- Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.

ii. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of 'Total portfolio'.

- 3. The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.

Systematic Transfer Plan (STP)

This facility enables the Unitholders to switch an amount from their existing investments in a Scheme/Plan/Option to another Scheme/Plan/Option of the Fund, which is available for investment at that time, at periodic intervals through a one-time request. The switch can be made Daily, weekly, monthly or quarterly.

Under this facility the switch by the Unitholders should be within the same account/ folio number. Investors can select date as any date from 1 st to 30 th of a given month/ quarter. In case the chosen date is not available /non-business day, the STP will be processed on the immediate next Business Day. The amount so switched shall be reinvested in the other scheme / plan and accordingly, to be effective, the systematic transfer must comply with the redemption rules of transferor scheme and the issue rules of transferee scheme (e.g. exit / entry load etc)
STP registration needs to be submitted to the Registrar/ AMC 7 days prior to the date of commencement of STP. In case the STP commencement date is less than 7 days from the date of submission of registration form and the date opted for, then the same would be registered for the next cycle. The AMC reserves the right to process the STP registration request received for a period lesser than 7 days in the interest of unit holders.
Example: for Monthly STP if the STP date opted is 7th of every month from 7th January and submitted on 3rd January then the registration of this STP will be from 7th February onwards.
This facility offers two options to the Unitholders:
Fixed Option: Under this option, the Unitholder can switch fixed amount of not less than Rs. 1000/- from his Unit account. In this option the switch will commence from the Start Date mentioned by the Unitholder in the application form for the facility. The Units in the Scheme/Plan/Option from which the switch - out is sought will be redeemed at the Applicable NAV of the Scheme/Plan/Option on the respective dates on which such switches are sought and the new Units in the Scheme/Plan/Option to which the switch - in is sought will be created at the Applicable NAV of such Scheme/Plan/Option on the respective dates. If the net asset value of the units outstanding on the transfer date is insufficient to process the withdrawal request, then the entire outstanding units will be processed. And if the available balance falls below Rs 1000 after processing of the last STP installment, then the entire amount will be processed along the last STP installment.
Appreciation Option: Under this option, the Unitholder can seek switch of an amount equal to the periodic appreciation on the investment. Under this option the Unit holder switches only proportionate number of Units, which when multiplied by the applicable NAV is, in amount terms equal to the appreciation in the investment over the last month/quarter.
For both Fixed and appreciation option the provision of minimum redemption and minimum investment amount will not be applicable for transfer / switch transactions made under this facility for both switch out and switch in schemes.
The investor has to mention a "Start Date". The first switch will happen after one month/quarter from the start date. In case the investor purchases additional Units, the amount to be switched would be equal to the appreciation generated on such Units. In the absence of any appreciation as mentioned above, the switch under this option will not be made. The Units in the Scheme/Plan/Option from which the switch - out is sought will be redeemed at the Applicable NAV of the Scheme/Plan/Option on the respective dates on which such switches are sought and the new Units in the Scheme/Plan/Option to which the switch - in is sought

will be allotted at the Applicable NAV of such Scheme/Plan/Option on the respective dates.

Systematic Withdrawal Plan:

This facility enables the Unitholders to withdraw (subject to deduction of tax at source, if any) sums from their investments in Scheme at periodic intervals through a one-time request. The withdrawals can be made either Monthly (on 1st, 7th, 14th, 21st or 25th of every month) or Quarterly (on 1st, 7th, 14th, 21st or 25th, as the case may be. In case any of these days fall on non-business day the transaction will be effected on the next business day of the scheme. SWP registration needs to be submitted to the Registrar/ AMC 7 days prior to the date of commencement of SWP. In case the SWP commencement date is less than 7 days from the date of submission of registration form and the date opted for, then the same would be registered for the next cycle. The AMC reserves the right to process the SWP registration request received for a period lesser than 7 days in the interest of unit holders.

Example: for Monthly SWP if the SWP date opted is 7th of every month from 7th January and submitted on 3rd January then the registration of this SWP will be from 7th February onwards.

This facility is available in two options to the Unitholders:

Fixed Option: Under this option, the Unitholder can seek redemption of a fixed amount of not less than Rs. 1000 from his Unit account. In this option the withdrawals will commence from the Start Date (being one of the dates indicated above) mentioned by the Unitholder in the Application Form for the facility. The Units will be redeemed at the Applicable NAV of the respective dates on which such withdrawals are sought. If the net asset value of the units outstanding on the withdrawal date is insufficient to process the withdrawal request, then the entire outstanding units will be processed. And if the available balance falls below Rs. 1000 after processing of the last SWP installment then the entire amount will be processed along the last SWP installment.

Appreciation Option: Under this option, the Unitholder can seek redemption of an amount equal to a periodic appreciation on the investment. The Unitholder redeems only such number of Units, which when multiplied by the Applicable NAV is, in amount terms equal to the appreciation in his investment over the last month / quarter. The investor would need to indicate in his systematic withdrawal request, the commencement / start date from which the appreciation in investment value should be computed. The withdrawal will commence after one month/quarter (as requested by the investor) from the commencement / start date mentioned by the Unitholder in the Application Form and can, at the investor's discretion be on 1st, 7th, 14th, 21st or 25th of the month / quarter. The Units will be redeemed at the Applicable NAV of the respective dates on which such withdrawals are sought. In case the investor purchases additional Units, the withdrawal amount would include the appreciation generated on such Units as well. In the absence of any appreciation, the redemption under this option will not be made.

For both fixed and appreciation option the provision of minimum redemption amount will not be applicable for redemption made under this facility.

Transfer of Income Distribution cum capital withdrawal (IDCW) Plan:

Transfer of IDCW Plan is a facility whereby the unit holders under the IDCW Options (other than Daily Reinvestment Sub-option) of the open ended Schemes of KMMF can opt to transfer their IDCW to any other Investment option (other than Daily Reinvestment Sub-option) under any other open ended schemes of KMMF. Transfer of IDCW Plan facility will be available to unit holder(s) holding units in non-demat form under the IDCW Option of the Transferor Schemes. Under the Transfer of IDCW Plan facility investors cannot transfer their IDCW into certain category of transferee schemes viz, close ended Schemes, Exchange Traded Funds (ETFs), and Kotak Tax Saver Scheme.
