Portfolio Rebalancing:
Subject to SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021 and circulars issued thereunder, the asset allocation pattern indicated above may change for a short term period on defensive considerations, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be rebalanced within 7 calendar days from the date of deviation.

Pursuant to SEBI circular no. SEBI/HO/IMD/IMD-II DOF3/P/CIR/2022/39 dated May 23, 2022 and circulars issued thereunder, in case of change in constituents of the index due to periodic review, the portfolio of the scheme will be rebalanced within 7 calendar days.

Investment Strategy	<p>To achieve the investment objective, the scheme will follow passive investment strategy with investments in stocks in the same proportion as in Nifty Smallcap 50 Index. The investment strategy would revolve around reducing the tracking error to the least possible through rebalancing of the portfolio, taking into account the change in weights of stocks in the index as well as the incremental collections/redemptions from the Scheme.</p> <p>A small portion of the net assets will be held as cash or will be invested in debt and money market instruments permitted by SEBI/RBI including TREPS or in alternative investment for the TREPS as may be provided by the RBI, to meet the liquidity requirements under the Scheme.</p>
----------------------------	---

Index Scheme being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager decisions.

Risk Control Measures:

Risk mitigation measures for portfolio volatility and portfolio concentration:

Index Fund being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager decisions. The Risk Mitigation strategy revolves around minimizing the Tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Underlying Index as well as the incremental collections into / redemptions from the Scheme.

Risk mitigation measures for managing liquidity:

As per data from NSE more than half of market liquidity remains in the index. Therefore, the scheme does not envisage liquidity issues. The scheme may take exposure to equity derivatives of the index itself or its constituent stocks, when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period.

Type of Risks	Measures/ Strategies to control risks
Equity Markets/ Equity Oriented Instruments	<ul style="list-style-type: none"> Market Risk and Volatility: Market risk is a risk is inherent to an equity scheme. Being a passively managed scheme, it will invest in the securities included in its Underlying Index. Concentration/ Sector Risk: Index Fund being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager decisions. The Risk Mitigation strategy revolves around minimizing the Tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Underlying Index as well as the incremental collections into / redemptions from the Scheme. Liquidity Risks: As such the liquidity of stocks that the scheme invests into could be relatively low. The fund will endeavor to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks.
Debt and Money Market instruments	<ul style="list-style-type: none"> Credit Risk: Management analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken. Price-Risk or Interest-Rate Risk: The Scheme may primarily invest the debt portion of the portfolio in money market instruments, units of Liquid and Overnight schemes thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities. Risk of Rating Migration: The Scheme may primarily invest the debt portion of the portfolio in short-term money market instruments, units of Liquid and Overnight schemes thereby mitigating the risk of rating migration generally associated with long-term securities Basis Risk: The debt allocation of scheme is primarily cash management strategy and such strategy returns are expected to reflect the very short term interest rate hence investment is done in short term debt and money market instruments. Spread Risk: The Scheme may primarily invest the debt portion of the portfolio in short-term money market instruments, units of Liquid and Overnight schemes thereby mitigating the risk of spread expansion which is generally associated with long-term securities Reinvestment Risk: The debt allocation of scheme is primarily cash management strategy and such strategy returns are expected to reflect the very short term interest rate hence investment is done in short term debt and money market instruments. Reinvestment risks will be limited to the extent of debt instruments, which will be a very small portion of the overall portfolio value. Liquidity Risk: The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. The Scheme may, however, endeavor to minimize liquidity risk by primarily investing the debt portion of the portfolio in relatively liquid short-term money market instruments, units of Liquid and Overnight schemes.
Derivatives	The Scheme may take an exposure to equity derivatives of constituents or index derivatives of the underlying index for short duration when securities of the index are unavailable, insufficient or for rebalancing at the time of change in index or in case of corporate actions, as permitted. All derivatives trade will be done only on the exchange with guaranteed settlement. Exposure with respect to derivatives shall be in line with regulatory limits and the limits specified in the SID.
Securities Lending	The SLB shall be operated through Clearing Corporation/Clearing House of stock exchanges having nation-wide terminals who are registered as Approved Intermediaries (AIs). The risk is adequately covered as Securities Lending & Borrowing (SLB) is an Exchange traded product. Exchange offers an anonymous trading platform and gives the players the advantage of settlement guarantee without the worries of counter party default. However, the Fund may not be able to sell such lent securities during contract period or have to recall the securities which may be at higher than the premium at which the security is lent.
Segregated Portfolio	In such an eventuality it will be AMC's endeavor to realise the segregated holding in the best interest of the investor at the earliest.
Tracking errors	Over a short period, the Scheme may carry the risk of variance between portfolio composition and Benchmark. The objective of the Scheme is to closely track the performance of the Underlying Index over the same period, subject to tracking error. The Scheme would endeavor to maintain a low tracking error by actively aligning the portfolio in line with the Index.
Government securities and Triparty repo on Government securities or treasury bills:	As a member of securities segment and Triparty repo segment, maintenance of sufficient margin is a mandatory requirement. CCIL monitors these on a real time basis and requests the participants to provide sufficient margin to enable the trades etc. Also there are stringent conditions / requirements before registering any participants by CCIL in these segments. Since settlement is guaranteed the loss on this account could be minimal though there could be an opportunity loss.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

The measures mention above is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

Portfolio Turnover:

Portfolio Turnover is defined as the aggregate of purchases and sales as a percentage of the corpus during the specified period of time.

Portfolio Turnover is a term used to measure the volume of trading that occurs in a Scheme's portfolio during a given time period. Kotak Nifty Smallcap 50 Index Fund is a passively managed open-ended index scheme. It is therefore expected that there would be a number of subscriptions

	<p>and redemptions on a daily basis. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in Nifty Smallcap 50 Index.</p> <p>Portfolio Turnover Ratio: Not Applicable (Since the scheme is a new fund to be launched, the said ratio is Not Applicable)</p>
Where will the scheme(s) invest?	<ol style="list-style-type: none"> The net assets of the Scheme will be invested in stocks constituting the Nifty Smallcap 50 Index and / or its exchange traded derivatives. This would be done by investing in all the stocks comprising the Nifty Smallcap 50 Index in approximately the same weightage that they represent in the Nifty Smallcap 50 Index and / or investing in derivatives including futures contracts and options contracts on the Index. A small portion of the net assets will be invested in money market instruments permitted by SEBI / RBI including (CPs, CDs, Tbills, Mibor linked instruments with daily Put/ Call options & overnight Interest rate Reset Linked Instruments) as may be provided by the RBI, to meet the liquidity requirements of the Scheme. The Scheme may take derivatives or index derivatives position subject to the guidelines issued by SEBI from time to time and in line with the overall investment objective of the Scheme. Equity and equity related securities including convertible bonds and debentures and warrants carrying the right to obtain equity shares. Securities created and issued by the Central and State Governments and/or repos/reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills). Securities Lending as permitted by SEBI from time to time.
Product Differentiation	<p>Kotak Nifty Smallcap 50 Index Fund is the only Index Fund offered by Kotak Mahindra Mutual Fund which is replicating/ tracking Nifty Smallcap 50 Index.</p>
Risk Profile of the Scheme	<p>Standard Risk Factors:</p> <ul style="list-style-type: none"> Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal. As the price/ value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down. The value of investments may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures; the NAV is also exposed to Price/Interest-Rate Risk and Credit Risk and may be affected inter-alia, by government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee. Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee future performance of the scheme. Kotak Nifty Smallcap 50 Index Fund is only the name of the scheme, and does not in any manner indicate either the quality of the scheme or its future prospects and returns. The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs. 2,50,000 made by it towards setting up the Fund. The present scheme is not a guaranteed or assured return scheme. Investments are subject to market risks and there is no assurance or guarantee that the investment objectives of the Scheme will be achieved; Changes in government policy, changes in tax benefits applicable to mutual funds may impact the returns to Investors in the scheme. <p>Scheme Specific Risk Factors:</p> <p>Tracking errors are inherent in any index fund and such errors may cause the schemes to generate returns which are not in line with the performance of the Nifty Smallcap 50 Index or one or more securities covered by / included in the Nifty Smallcap 50 Index and may arise from a variety of factors. Delayed realisations, cash for redemptions can result into tracking error, including transactions costs of investments etc.</p> <p>The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV trading price, yield, total return and/or its ability to meet its objectives.</p> <ol style="list-style-type: none"> The NAV of the units is closely related to the value of stocks that form a part of the benchmark index. The value of this will react to stock market movements and may result in changes in the NAV of units under the scheme. There could also be movements in the scheme's NAV due to changes in interest rates, macro-economic and political developments and over longer periods during market downturns; Tracking error may have an impact on the performance of the scheme. However, KMMMF will endeavour to keep the tracking error as low as possible. The Scheme is a passively managed scheme and provides exposure to the benchmark and tracking its performance and yield. The Schemes performance may be affected by a general price decline in the stock markets. The Scheme invests in the stocks comprising the index regardless of their investment merit. The Mutual Fund does not attempt to take defensive positions in declining markets. As the scheme proposes to invest not less than 95% of the net assets in securities comprising of Nifty Smallcap 50 Index, any deletion of stocks from or addition to in Nifty Smallcap 50 Index may require sudden and immediate liquidation or acquisition of such stocks at the prevailing market prices irrespective of whether valuation of stocks is attractive enough. This may not always be in the interest of unitholders. The performance of the Nifty Smallcap 50 Index will have a direct bearing on the performance of the scheme. Hence any composition change by virtue of weightage or stocks selection will have an impact on the scheme. Capital Gains Impact: Investors who trade in Kotak Nifty Smallcap 50 Index Fund may be subject to Long Term Capital Gains or Short Term Capital Gains. Investors are requested to consult their tax / legal consultants before investing in the scheme. The scheme will attract provisions of take over regulations, if KMMMF invests in more than 10% of the paid up capital of a company and therefore may result into tracking errors and / or may not be able to accept further subscription in the Scheme. The Index reflects the prices of securities at a point in time, which is the price at close of business day on the stock exchange. The Scheme, however, may at times trade these securities at different points in time during the trading session and therefore the prices at which the Plan trade may not be identical to the closing price of each scrip on that day on the BSE / NSE. In addition, the Scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from BSE/ NSE closing prices.

IMPORTANT INFORMATION INSTRUCTIONS FOR ASBA MUTUAL FUND INVESTORS

Background: In its continuing endeavour to make the existing public issue process more efficient SEBI introduced a supplementary process of applying in public issues, viz: the "Applications Supported by Blocked Amount (ASBA)" process. Accordingly, Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009, as amended have been amended for ASBA process. The salient features of circular no. SEBI/CFD/DIL/ASBA/1/2009/30/12 dated December 30, 2009 available on SEBI website for "Additional mode of payment through Applications Supported by Blocked Amount (hereinafter referred to as "ASBA") are mentioned below for understanding the ASBA process:

1. Meaning of ASBA: ASBA is an application for subscribing to a New Fund Offer (NFO), containing an authorisation to block the application money in a bank account.

2. Self Certified Syndicate Bank (SCSB): SCSB is a banker to an issue registered with the SEBI which offers the facility of applying through the ASBA process. The list of SCSBs will be displayed by SEBI on its website at www.sebi.gov.in from time to time. ASBAs can be accepted only by SCSBs, whose names appear in the list of SCSBs displayed on SEBI's website. As on April 15, 2010, 27 Banks have been recognised as SCSBs. Investors maintaining their accounts in any of these Banks may approach one of the designated branches of these SCSBs for availing this facility. Further it may be noted that from time to time new banks register themselves as SCSBs who become eligible to provide these services and also the existing SCSBs designate additional branches that also provide this facility. An updated list of all the registered SCSBs, their controlling branches, contact details and details of their contact persons, a list of their designated branches which are providing such services is available on the website of SEBI at the address <http://www.sebi.gov.in>. Further these details are also available on the websites of the Stock Exchanges at <http://www.bseindia.com> and <http://www.nseindia.com>. Alternatively, investors may also contact the AMC, R&TA for information about the SCSBs or the ASBA process. These SCSBs are deemed to have entered into an agreement with the Issuer and shall be required to offer the ASBA facility to all its account holders for all issues to which ASBA process is applicable. A SCSB shall identify its Designated Branches (DBs) at which an ASBA bidder shall submit ASBA and shall also identify the Controlling Branch (CB), which shall act as a coordinating branch for the Registrar to the Issue, Stock Exchanges and Merchant Bankers. The SCSB, its DBs and CB shall continue to act as such, for all issues to which ASBA process is applicable. The SCSB may identify new DBs for the purpose of ASBA process and intimate details of the same to SEBI, after which SEBI will add the DB to the list of SCSBs maintained by it. The SCSB shall communicate the following details to Stock Exchanges for making it available on their respective websites.
