I. INTRODUCTION

A. RISK FACTORS

1. Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuate, the value of your investment in the scheme may go up or down.
- The NAV of the Scheme's units may be affected by change in the general market conditions, factors and forces affecting capital markets in particular, level of interest rates, various market related factors and trading volumes.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- SBI Tax Advantage Fund – Series III is only the name of the Scheme and does not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs. 5 Lakhs made by it towards setting up the Fund.
- SBI Tax Advantage Fund – Series III is not a guaranteed or assured return scheme

2. Scheme Specific Risk Factors

- a. The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the scheme is wound up for the reasons and in the manner provided under the Scheme Information Document & Statement of Additional Information.
- b. Redemption by the unit holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund their directors or their employees shall not be liable for any tax consequences that may arise.
- c. The tax benefits described in the SAI & SID are as available under the present taxation laws and are available subject to relevant condition. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors and Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unit holder is advised to consult his/her/its own professional tax advisor.
- d. Investment in ELSS is subject to lock-in period of three years. During this period investors will not be able to redeem their units. To this extent the liquidity for the investor is restricted and this may restrict exit at opportune moments.
- e. SBI Tax Advantage Fund – Series III would be investing in Equities, cumulative preference shares and fully convertible debentures and bonds of companies and money market instruments (such as term/notice money market, repos, reverse repos and any alternative to the call money market as may be directed by the RBI). The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the Trustees have the right in their sole discretion to limit redemptions (including suspending redemptions) under certain circumstances.
- f. The Mutual Fund is not assuring any dividend nor is it assuring that it will make any dividend distributions. All dividend distributions are subject to the availability of distributable surplus and would depend on the performance of the scheme.
- g. Investments under the scheme may also be subject to the following risks:
 - I. Equity & equity related risk:

Equity and equity related risk: Equity instruments carry both company specific and market risks and hence no assurance of returns can be made for these investments.

II. Debt & money market securities investments under the scheme may also be subject to the following risks:

- (a) Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.
- (b) Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
- (c) Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
- (d) Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.

h. Risks associated with Investing in Foreign Securities

The Scheme will not invest in foreign securities.

i. Risks associated with Investing in Derivatives

The Scheme will not invest in derivatives.

j. Risks associated with Investing in Securitized Debt

The Scheme will not invest in Securitized Debt.

k. Risk associated with Stock lending: Scheme shall not engage in stock lending.

B. RISK CONTROL:

Investments in equity and equity related securities and debt securities carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For risk control, the following may be noted:

Liquidity risks:

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.

Interest Rate Risk:

Changes in interest rates affect the prices of bonds as well as equities. If interest rates rise the prices of bonds fall and vice versa. Equity might be negatively affected as well in a rising interest rate environment. A well-diversified portfolio may help to mitigate this risk.

Political/Government Policy Risk:

Changes in government policy and political decision can change the investment environment. They can create a favorable environment for investment or vice versa.

Volatility risks:

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification across companies and sectors.

C. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. These conditions will be complied with immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfillment with the condition of minimum 20 investors, the Scheme shall be wound up in accordance with Regulation 39 (2) (c) of SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25% holding by a single investor on the date of allotment, the application to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within five business days of the date of closure of the New Fund Offer.

SBI Tax Advantage Fund – Series III is a diversified equity fund. The fund will invest into equity stock of companies listed in India. The fund investment strategy is split into three parts;

1. Asset Allocation:

The fund will invest a portion of its assets into large caps, midcaps and small caps. The proportion of the exposure to each capitalisation will depend on the following factors:

- Liquidity of stocks under each capitalisation range (e.g. Large caps are more liquid than midcaps and midcaps are more liquid than small caps)
- Trading volumes
- Market scenario -It is observed in the past that, in falling markets, large caps fall lesser (in % terms) than midcaps & small caps. It is also observed that, in rising markets, midcaps outperform (in % terms) large caps.

2. Top down approach:

The top down approach helps identifying sectors where the portfolio should take exposure. The portion of exposure to each sector (vis-a-vis benchmark) depends on the following parameters:

- Macroeconomic view
- Policy changes
- Global trends
- Relative valuation of each sectors vis-a-vis other sector
- Risk premium (Risk-reward ratio)

3. Bottom-up approach:

The bottom-up approach helps identifying stocks where the portfolio should take exposure. The portion of exposure to each stock (vis-a-vis benchmark and within the sector) depends on the following parameters:

- Relative valuation of each stock vis-a-vis other stock within the sector or broader market
- Management quality
- Business fundamentals
- Risks associated with business
- Ratios (PE, PB etc)

Since SBI Tax Advantage Fund – Series III, is long term equity strategy, the portfolio would be constructed using combination of all the above segments (Asset allocation, top-down approach and bottom-up approach).

G. PORTFOLIO TURNOVER

The Portfolio Turnover is defined as the lower of the value of purchases or sales as a percentage of the average corpus of the Scheme during a specified period of time. The Asset Management Company does not have a policy statement on portfolio turnover. Generally, the Asset Management Company's portfolio management style is conducive to a low portfolio turnover rate. However, given the nature of the Scheme which follows a monthly cycle or rollover / positions the portfolio turnover is expected to be high. Further, there are trading opportunities that present themselves from time to time. These trading opportunities may be due to trading opportunities in equities, changes in interest rate policy by the Reserve Bank of India, shifts in the yield curve, credit rating changes or any other factors where in the opinion of the fund manager there is an opportunity to enhance the total return of the portfolio. It will be the endeavour of the fund manager to keep portfolio turnover rates as low as possible.

L. SCHEME PERFORMANCE

SBI Tax Advantage Fund – Series III is the new scheme and hence does not have any performance track record.

M. DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Institutional Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) , Treasury Bills (issued by RBI) and the CBLO (collateralized lending and borrowing facility).

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and CBLO are guaranteed and done by a central counterparty, the Clearing Corporation of India (CCIL). Corporate bonds and money market deals involving CD's and CP's are traded and settled on an OTC basis.

The likely yields of various instruments currently and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments as on December 16, 2013:

Instruments	Indicative yield range
Overnight rates	8.25%-8.75%
90 day Commercial Paper	8.75%-9.10%
91-day T-bill	8.55%-8.65%
1 year G-Sec.	8.75%-9.00%

Instruments	Indicative yield range
5 year G – Sec	8.75%-8.90%
10 year G-Sec.	8.87%-9.22%
1 year AAA Bond	9.60%-9.80%
5 year AAA Bond	9.70%-9.80%

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments which are fairly liquid are not listed in exchanges due to its short tenor. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments.

N. INVESTMENT OF AMC IN THE SCHEME

The AMC may invest in the scheme, such amount, as they deem appropriate. But the AMC shall not be entitled to charge any management fees on this investment in the scheme. Investments by the AMC will be in accordance with Regulation 24(3) of the SEBI (MF) Regulations, 1996 which states that:

A case was subsequently filed in the Sessions Court at Mumbai in 2006 against some ex-employees of the Company. SBI Funds Management Private Limited ("SBIFMPL"), SBI Mutual Fund Trustee Company Pvt. Ltd. and SBI Mutual Fund are not parties to this case. The internal investigations conducted by the Chairman, Board of Trustees, SBI Mutual Fund, however, had ruled out any questionable intentions of SBI Mutual Fund in the matter. Further, a show cause notice dated January 29, 2010 ("2010 SCN") was received from SEBI in the matter and SBI Mutual Fund has replied to the show cause notice countering the allegations made by SEBI. SBI Mutual Fund had also made an application to SEBI to settle the matter through the consent process, i.e. on a no-fault basis, without accepting or denying guilt. The said consent proposal has not been accepted by SEBI vide its letter dated March 22, 2013. A fresh Show Cause Notice dated May 28, 2013 ("2013 SCN") has been issued enclosing a copy of an enquiry report conducted again by a Designated Authority, recommending a prohibition on SBI Mutual Fund from launching any new mutual fund schemes for a period of 12 months. In terms of the opportunity made available in the 2013 SCN to avail the consent process, SBI Mutual Fund had filed a consent application which was returned by SEBI stating that the consent application by SBIFMPL shall not be reconsidered by SEBI. SBIFMPL is now in the process of preparing a reply to the 2013 SCN in consultation with its legal counsels.
