SECTION IV. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- As the price/value/interest rates of the securities in which the Schemes invest fluctuates, the value of your investment in the Schemes may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Schemes.
- The names of the Schemes do not in any manner indicate either the quality of the Schemes or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Schemes beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Mutual Fund.
- The present Schemes are not guaranteed or assured return Schemes.

Additional Risk Factors for Foreign Investors:

1. Political Risk

Investments in mutual fund Units in India may be materially adversely impacted by Indian politics and changes in the political scenario in India either at the central, state or local level. Actions of the central government or respective state governments in the future could have a significant effect on the Indian economy, which could affect companies, general business and market conditions, prices and yields of securities in which the Schemes invest.

The occurrence of selective unrest or external tensions could adversely affect the political and economic stability of India and consequently have an impact on the securities in which the Schemes invest. Delays or changes in the development of conducive policy frameworks could also have an impact on the securities in which the Schemes invest.

2. Economic Risk

A slowdown in economic growth or macro-economic imbalances such as the increase in central and state level fiscal deficits may adversely affect investments in the country. The underlying growth in the economy is expected to have a direct impact on the volume of new investments in the country.

3. Foreign Currency Risk

The Schemes are denominated in Indian Rupees (INR) which is different from the home currency for Foreign Investors in the mutual fund Units. The INR value of investments when translated into home currency by Foreign Investors could be lower because of the currency movements. The AMC does not manage currency risk for foreign investors and it is the sole responsibility of the Foreign Investors to manage or reduce currency risk on their own. The Sponsor/Fund/Trustees/AMC are not liable for any loss to Foreign Investors arising from such changes in exchange rates.

4. Convertibility and Transferability Risk

In the event capital and exchange controls are imposed by the government authorities, it would prevent Foreign Investors' ability to convert INR into home currency and/or transfer funds outside India. The convertibility and transferability of INR proceeds into home currency is the responsibility of the Foreign Investors.

Scheme Specific Risk Factors

- **Liquidity Risk on account of unquoted and unlisted securities:** Some securities, which are not quoted on the stock exchanges, may be illiquid in nature and may carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the Regulatory limits, the AMC may choose to invest in unlisted securities that offer returns commensurate with risks. Liquidity risk may also arise due to high impact costs for liquidation of securities held in the portfolio. However, in closed ended schemes, liquidity risk on account of underlying securities' market liquidity is mitigated as intermediate liquidity is not required. Liquidity access is done through contractual maturity of the security, which is in line with the term of the schemes.
- **Credit Risk and Market Risk:** Money market and debt securities are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations (credit risk). The Investment Manager will endeavor to create a portfolio with high credit quality in the required investment horizon. These securities may also be subject to price volatility due to factors such as changes in interest rates, general level of market

liquidity and market perception of the creditworthiness of the issuer, among others (market risk). The Investment Manager will endeavor to manage credit risk for rated and unrated debt securities through in-house credit analysis. Unrated debt securities may be perceived to carry a higher credit risk since they are not rated by an independent rating agency. An independent ROA team within the AMC is responsible for managing the credit risk through in-house credit analysis.

- **Reinvestment Risk:** Investments made by the Schemes are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the securities in the Schemes are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- **Term Structure of Interest Rates (TSIR) Risk:** The NAV of the Schemes' Units, to the extent that the Scheme is invested in fixed income securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.
- **Rating Migration Risk:** Fixed income securities are exposed to rating migration risk, which could impact the price on account of change in the credit rating. For example: One notch downgrade of a AAA rated issuer to AA+ will have an adverse impact on the price of the security and vice-versa for an upgrade of a AA+ issuer.
- **Concentration Risk:** Concentration risk arises due to concentrated investment in single security or single issuer.
- **Event Risk:** Price risk due to company or sector specific event.
- Investments in the Schemes made in foreign currency by a Unit Holder are subject to the risk of fluctuation in the value of Indian Rupee.
- The underlying benchmark of a floating rate security might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the security.

Risk Factor associated with Listing of Units

- Trading in the Units of the Schemes on the Exchange may be halted because of market conditions or for reasons in view of the Exchange Authorities or SEBI, rendering trading in the Units of the Schemes inadvisable. In addition, trading of the Units of the Schemes is subject to trading halts caused by extraordinary market volatility and pursuant to the Stock Exchange's/market regulator's 'circuit filter' rules. There can be no assurance that the requirements of the concerned Stock Exchange necessary to maintain the listing of the units of the Schemes will remain unchanged.
- Unit holders may find it difficult or uneconomical to liquidate their investments at any particular time. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. As a result, a Unit holder must be prepared to hold the units until the maturity of the Schemes.
- Although the Units of the Schemes will be listed on the Stock Exchange, there can be no assurance that an active secondary market will develop or be maintained.
- The Units of the Schemes may trade at a significant discount or premium on the Stock Exchange. The NAV of the Schemes will fluctuate in accordance with market supply and demand for the units of the Schemes as well as be affected by changes in NAV.
- **Regulatory Risk:** Any changes in trading regulations by the Stock Exchange or SEBI among other things may also result in a wider premium/ discount to the NAV of the Schemes. Although the Units are proposed to be listed on the Stock Exchange, the AMC and the Trustees will not be liable for any loss suffered by investors due to delay in listing of units of the Schemes on the Stock Exchange or due to connectivity problems with the depositories due to the occurrence of any event beyond their control.
- In case of investments by NRIs during NFO, at the time of redemption of units, TDS will be deducted at the applicable rate. However, in respect of those Unit Holders who have acquired the Units on the Stock Exchange, the Unit Holders would need to provide a certificate from a Chartered Accountant certifying the details of acquisition of Units to the Fund within two days before the maturity of the Scheme, so as to enable the Fund to deduct TDS at the applicable rates. In the event of such details not being provided, the Fund would deduct TDS on the redemption proceeds at the highest rate of TDS applicable.
- The Trustee reserves the right to list the Units of the Schemes on any other recognized Stock Exchange in India, as may be deemed fit, in which case the investors may face risks related to an undeveloped market, delay in settlements etc.
- There may be acts/omissions on the part of the Stock Exchange resulting in the cancellation of Unit Holder's orders or the execution of orders on erroneous terms.

Risk Factor associated with Close-ended Schemes

Investing in close-ended Schemes is more appropriate for seasoned investors. A close-ended Scheme endeavors to achieve the desired returns only at the scheduled maturity of the Scheme. Investors who wish to exit/redeem before the scheduled maturity date may do so through the stock exchange mode, if they have opted to hold Units

in a demat form, by mentioning their demat details on the NFO application form. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. Hence, Unit Holders who sell their Units in a Scheme prior to maturity may not get the desired returns.

B. RISK MANAGEMENT STRATEGIES

DSP BlackRock Investment Managers Private Limited (DSPBRIM) is committed to a strong control and compliance environment and ensuring that the management structure is appropriate to the scale of the business. DSPBRIM's fiduciary business is managed according to the rules and regulations stipulated for Asset Management Companies by the Securities & Exchange Board of India (SEBI) and also incorporates DSPBRIM's internal policies.

The AMC has systems and processes to monitor all the investment restrictions specified by SEBI and in this document on a regular basis.

(i) Interest Rate Risk: Fall in the value of the portfolio due to upward movement of interest rates - Although this risk exists in a fixed income portfolio, the closed ended nature of the Scheme mitigates the risk as portfolio construction at the time of inception leads to creation of a portfolio with securities whose maturity date is in line with the maturity date of the Scheme.

(ii) Credit Risk: Issuer's inability to meet interest and principal payments on its debt obligations - Credit risk management is an independent function performed by the RQA team. The team establishes and continuously monitors credit limits for each issuer based on inputs from issuer financial statements, rating agencies etc. Issuer Risk Limits are imposed on a single issuer as well as an industrial group, for all the schemes. Issuer risk limits cover the quantum of exposure, maximum tenor and in some instances the type of instruments that can be purchased. Risk limits for issuers are assigned after discussion at an internal Credit Committee meeting. The endeavour is to construct a portfolio with high credit quality. The Fund Manager is generally guided by, but not restrained by, the ratings announced by various rating agencies on the assets in the portfolio. In case of both rated and unrated debt securities, the independent credit appraisal process carried out by the RQA team is the same. For investment in unrated debt securities, prior approval of the Board of Trustees and the Board of asset management company is mandatory.

(iii) Rating Migration Risk: As the endeavour is to invest in high grade/quality securities, the probability of rating downgrade is low. The due diligence performed by the Risk and Quantitative Analysis (RQA) team before assigning credit limits should mitigate company-specific issues. The RQA team also monitors these limits after they have been assigned, on an ongoing basis

(iv) Liquidity Risk: High impact costs for liquidation of securities held in the portfolio - In a closed ended product, liquidity risk on account of underlying securities' market liquidity is mitigated as intermediate liquidity is not required. Liquidity access is done through contractual maturity of the security, which is in line with the term of the closed ended Scheme.

(v) Concentration Risk: Concentrated investment in a single security or a single issuer - we follow SEBI prescribed norms on maximum concentration to single issuers.

(vi) Event Risk: Price risk due to company or sector specific event - The endeavour is to invest in securities of issuers, which have high balance sheet strength in the investment horizon to eliminate single company risk.

C. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEMES

Each Series of Scheme under the Scheme(s) shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of such Scheme(s). These conditions will be complied with immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfillment with the condition of minimum 20 investors, Scheme(s) concerned shall be wound up in accordance with Regulation 39 (2) (c) of the SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25% holding by a single investor on the date of allotment, the application to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within 5 business days from the closure of the NFO period.

D. SPECIAL CONSIDERATIONS

- Neither the SID and SAI, nor the Units have been registered in any jurisdiction. The distribution of this SID in certain jurisdictions may be restricted or subject to registration requirements and, accordingly, persons who come into possession of this SID and the SAI in such jurisdictions are required to inform themselves about, and to observe, any such restrictions. No person receiving a copy of this SID or any accompanying

application form in such jurisdiction may treat this SID or such application form as constituting an invitation to them to subscribe for Units, nor should they in any event use any such application form, unless in the relevant jurisdiction such an invitation could lawfully be made to them and such application form could lawfully be used without compliance of any registration or other legal requirements.

- Investment decisions made by the Investment Manager may not always be profitable.
- The AMC offers non-binding investment advisory services to BlackRock India Equities Fund (Mauritius) Limited and BlackRock Asset Management North Asia Limited for investment in Indian securities in terms of approval granted by SEBI. Credit Evaluation Policy

Credit Analysis at DSPBRIM is an independent function performed by the RQA team. The RQA team sets up and monitors lending limits for each debt issuer. Issuer risk limits cover the quantum of exposure, maximum tenor and in some instances the type of instruments that can be purchased by the Investment Manager. An individual scheme's access to the issuer limit is dependent on its investment objectives, regulatory restrictions and assets under management. Risk limits for issuers are assigned and reviewed regularly at an internal Credit Committee meeting.

Credit evaluation process: The credit evaluation process includes a thorough analysis of the operating and financial strength of the issuer as well as management and industry risk evaluation. Typically, an interaction with the company management is also sought prior to setting up of issuer limits.

For structured obligations, in addition to the above, the evaluation also covers originator analysis, collateral analysis, structure analysis and embedded risk analysis.

Each credit proposal is discussed by an internal Credit Committee and a limit is assigned, if the issuer/structure is suitable.

Sectors in which the Schemes shall not invest

The Schemes shall not invest in debt issued by furniture, floriculture, Glass and Ferro & Silica Manganese Companies.

The Schemes shall not invest in securitized debt, fixed income derivatives instruments, foreign debt securities and repos in corporate debt securities.

Overview of Debt Market in India

The Indian bond market comprises mainly of Government securities; bonds issued by Public Sector Undertakings (PSU), Development Financial Institutions (DFI) and Infrastructure-related agencies; debentures and money market instruments issued by corporate sectors and banks. The Government of India routinely issues Government securities and Treasury bills for liquidity and fiscal management. While the Government issues Treasury bills for 91 days, 182 days and 364 days in a discounted form, coupon-bearing Government securities are issued for maturity ranging from 1 year to as high as 30 years. Both Treasury bills and coupon-bearing securities are auctioned by the RBI on behalf of the Government of India. The Indian bond market has also witnessed increased issuance of bonds from Government-sponsored institutions, DFIs, and infrastructure-related agencies since 1995. These bonds are rated by credit rating agencies like CRISIL, ICRA, CARE and India Ratings. They are widely held by market participants because of their liquidity and reduced risk perception due to the government stake in some of them.

The Indian corporate sector has also been frequently raising capital through issuance of non-convertible debentures and commercial papers. Most of the money is raised through the "Private placement" route. These debentures are mostly rated by rating agencies. While some of them trade very actively, most of them are not very liquid. Because of this, they normally trade at a marginally higher yield than bonds issued by PSU and other government-sponsored agencies.

As the schemes are close ended scheme with fixed maturity dates, they will not use fixed income derivatives.

Overview of Money Market in India

Money market assets comprise Treasury Bills, Cash Management Bills, Call Money, Collateralized Borrowing and Lending Obligations (CBLO), Repo, Clearcorp Repo Order Matching System (CROMS), fixed deposits, Commercial Papers, Certificate of Deposits, BRDS and any other assets approved by the Reserve Bank of India from time to time. Money market assets are liquid and actively traded segment of fixed income markets.

- Treasury bills and cash management bills are issued by the Government of India through regular weekly auctions. They are mostly subscribed by banks, state governments and other entities. As on 4 December 2015, total outstanding treasury bills are Rs. 4,78,010 crore*.
- Certificate of Deposits are issued by scheduled banks for their short-term funding needs. They are normally available for up to 364 days tenor. Certificate of deposits issued by public sector banks are normally rated A1+ (highest short-term rating) by various rating agencies. As on 13 November 2015, outstanding Certificate of Deposits are Rs. 1,81,420 crore*. Certificate of deposits currently trade at a spread of around 50 basis points** over comparable treasury bills as on 11 December 2015, for a one year tenor.
- Commercial Papers are issued by corporate entities for their short-term cash requirements. Commercial Papers are normally rated A1+ (highest short-term rating) or A1 by various rating agencies. As on 30 November 2015, total outstanding Commercial Papers are Rs. 3,27,380 crore*. Commercial papers trade at around 100 basis points** over comparable treasury bills as on 11 December 2015, for a one year tenor.
- Call Money, Repo, CBLO and CROMS are mainly used by the borrowers to borrow a large sum of money on an over-night basis. While Call Money is an unsecured mode of borrowing, CBLO, Repo and CROMS are secured borrowing backed by collaterals approved by the Clearing Corporation of India.

Details of settlement, if any, arrived at with the aforesaid authorities during the last three years:

- On October 3, 2012, BlackRock reached an agreement with the U.S. Department of Labor (“DOL”) to reimburse clients \$2,661,513 in connection with certain trades the DOL alleged violated Title I of the Employee Retirement Income Security Act (“ERISA”). BlackRock paid to the DOL a penalty of \$266,151.30.
- On January 14, 2013, BlackRock and Switzerland’s Federal Department of Finance (“DFD”) reached an agreement in principal to resolve a matter concerning BlackRock’s inadvertent late filing of reports relating to BlackRock’s ownership of equity securities of Swiss companies. Without admitting any liability, BlackRock paid a fine of CHF 500,000 (US\$536,000), in exchange for the DFD terminating the inquiry into the matter. BlackRock and the DFD are in the process of negotiating the terms of the settlement.
- On July 12, 2013, BlackRock was notified by the Italian Financial Service Authority (“CONSOB”) that CONSOB intends to fine BlackRock in connection with a late threshold report from September 2012 in Italian issuer, Prysmian S.P.A. BlackRock paid a fine of €10,000 to CONSOB to settle the matter.

On January 8, 2014, BlackRock entered into a settlement with the NYAG. The agreement does not impose any fine or other penalty on BlackRock. The agreement does, however, find that BlackRock violated New York’s state securities law. BlackRock does not admit or deny the allegations, and has also paid to the AG \$400,000 against cost of investigation.

- On 29th December 2012, the Italian securities regulator Consob imposed a fine of 150,000 Euro (\$204,600) on the BlackRock for incorrect disclosure of a reduction in stake in Italian Bank UniCredit. The fine has been paid by Blackrock.

The penalty has since been paid.

- In March 2015, the German Federal Financial Supervisory Authority, Bundesanstalt für Finanzdienstleistungsaufsicht (BaFin) imposed a penalty of EUR 3.25 million against BlackRock Investment Management (UK) Limited for certain late disclosure or thresholds disclosure breaches. This penalty was paid by BlackRock, Inc.
 - In April 2015, BlackRock came to a settlement with the U.S. Securities and Exchange Commission ("SEC") in connection with a 2014 "Wells Notice" received from the SEC staff, which recommended that the SEC file an action against BlackRock for inadequate disclosure and policies and procedures to address a potential conflict, in violation of the Investment Advisers Act ("IAA") and the Investment Company Act ("ICA"). As part of the settlement, BlackRock, without admitting or denying any wrongdoing, paid a fine of \$12 million, and agreed to appoint an independent compliance consultant to review BlackRock's outside activities policy and monitoring procedures. The proposed settlement was approved by the SEC on April 16, 2015, and publicly announced by the SEC on April 20, 2015.
 - On December 12, 2014, the Swedish securities regulator ("Swedish FSA") requested information from BlackRock regarding a late threshold report filed by BlackRock in October 2014. The report, which concerned BlackRock's holding of Assa Abloy AB, was required to be filed in June 2014. BlackRock responded to the request in January 2015. On May 5, 2015, the Swedish FSA imposed a penalty of 1,000,000 Swedish krona (or approximately \$120,000).
