HIGHLIGHTS/SUMMARY OF THE SCHEME

Name of the Scheme	ICICI Prudential Nifty Low Vol 30 iWIN ETF
Type of the Scheme	An open-ended Index Exchange Traded Fund
Investment Objective	<p>The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index, subject to tracking errors.</p> <p>However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.</p>
Underlying Index	<p>The corpus of the Scheme will be invested in stocks constituting Nifty100 Low Volatility 30 Index. Thus, Nifty100 Low Volatility 30 Index will be the underlying Index of the Scheme.</p> <p>Nifty100 Low Volatility 30 Index aims to measure the performance of the low volatile securities in the large market capitalisation segment. The selection of securities and its weights in Nifty100 Low Volatility 30 are based on volatility. The least volatile stocks receive the highest weight in the index. In order to ensure replication of index, weight of stocks with liquidity below the minimum threshold is capped at 3%.</p>
Plans/ Options	<p>Currently, there are no plans/ options under the Scheme. However, the Trustees reserve the right to introduce/ alter/ extinguish any of the option under the Scheme at a later date. For any change in plans/ options offered under the Scheme, the AMC shall publish a notice-cum-addendum for the information of the investors.</p>
Loads	<p>Entry Load Not Applicable. In terms of circular no. SEBI/IMD/CIR No. 4/168230/09 dated June 30, 2009, SEBI has notified that, w.e.f. August 01, 2009 there will be no entry load charged to the schemes of the Mutual Fund and the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.</p> <p>Exit Load There will be no exit load for units sold through the secondary market on the stock exchanges where the Scheme will be listed. Currently, the Scheme is proposed to be listed on NSE and BSE Limited. Investors shall note that the brokerage on sales of the units of the scheme on the stock exchanges shall be borne by the investors.</p> <p>Redemption of units can be made directly with the mutual fund in creation unit size. Currently there is no exit load applicable for the said transactions.</p> <p>Investors, other than Authorised Participants, can sell units in less than Creation Unit Size of the Scheme directly to the Mutual Fund without any exit load in the following cases:</p> <ul style="list-style-type: none"> • if the traded price of the ETF units is at a discount of more than 3% to the NAV for continuous 30 days; • if discount of bid price to applicable NAV is more than 3% over a period of 7 consecutive trading days; • if no quotes are available on exchange(s) for 3 consecutive trading days; • when the total bid size on the exchange(s) is less than half creation unit size daily, averaged over a period of 7

		<p>consecutive trading days.</p> <p>Under these circumstances, investors, as specified above, can redeem units of the Scheme directly with the fund house without any exit load. The aforesaid criteria for the direct redemption with the fund house are also available at the website of the AMC at 'http://www.icicipruamc.com/Acceptance-of-Direct-Redemption-for-ETFs.aspx'. The mutual fund will track the aforesaid liquidity criteria and display it on its website viz., www.icicipruamc.com if the same is triggered, no exit load would be applicable in such cases.</p>
Minimum Amount	Application	<p>During NFO: Rs. 5,000 and in multiples of Re.1.</p> <p>On Stock Exchanges: Investors can buy/sell units of the Scheme in round lot of 1 unit and in multiples thereof.</p> <p>Directly with the Mutual Fund: Authorised Participant(s)/ Investor(s) can buy/sell units of the Scheme in Creation Unit Size viz. 30,000 and in multiples thereof.</p> <p>An investor can buy/ sell units on a continuous basis in the normal market segment of National Stock Exchange of India Limited (NSE)/ BSE Limited or any other stock exchange where the Scheme will be listed, during the trading hours like any other publicly traded stock at prices which are quoted on the stock exchanges. These prices may be close to the actual NAV of the Scheme. There is no minimum investment, although units are to be purchased in lots of 1 (one) unit.</p>
Liquidity		<p>Through Stock Exchanges: Currently, the Scheme is proposed to be listed on National Stock Exchange of India Limited (NSE) and BSE Limited. Buying or selling of units of the Scheme by investors can be done on all the Trading Days of the stock exchanges. The minimum number of units that can be bought or sold is 1 (one) unit.</p> <p>Directly with the Mutual Fund: Authorised Participant(s)/ Investor(s) can subscribe/redeem the units of the Scheme directly with the Mutual Fund only in creation unit size and in multiples thereof.</p> <p>The subscription & redemption of units would be based on the portfolio deposit & cash component as defined by the fund for that respective business day. The Fund may allow cash purchases/cash redemption of the units of the Scheme or by depositing basket of securities comprising the underlying index in Creation Unit Size by Authorised Participant(s)/ Investor(s).</p> <p>Purchase/redemption request shall be made by such investors to the Fund whereupon the Fund shall arrange to buy/sell the underlying portfolio of securities on behalf of the investor. In case of shares bought and sold by AMC on behalf of the investor, the profit/loss due to buy/sell of shares and transaction handling charges/costs would be borne by investor. Investors, other than Authorised Participants, can sell units in less than Creation Unit Size of the Scheme directly to the Mutual Fund without any exit load in the following cases:</p> <ul style="list-style-type: none"> • if the traded price of the ETF units is at a discount of more than 3% to the NAV for continuous 30 days; or

	<ul style="list-style-type: none"> • if discount of bid price to applicable NAV is more than 3% over a period of 7 consecutive trading days; or • if no quotes are available on exchange for 3 consecutive trading days; or • when the total bid size on the exchange(s) is less than half of creation unit size daily, averaged over a period of 7 consecutive trading days. <p>Under these circumstances, investors, as specified above, can redeem units of the Scheme directly with the fund house without any exit load. In case of redemptions by NRIs, requisite TDS will be deducted from the respective redemption proceeds.</p> <p>The aforesaid criteria for the direct redemption with the fund house are also available at the website of the AMC at 'http://www.icicipruamc.com/Acceptance-of-Direct-Redemption-for-ETFs.aspx'. The mutual fund will track the aforesaid liquidity criteria and display it on its website viz., www.icicipruamc.com if the same is triggered, no exit load would be applicable in such cases.</p>
Tracking Error	<p>The performance of the Scheme may not be commensurate with the performance of the underlying index on any given day or over any given period. Such variations are commonly referred to as the tracking error. Tracking errors may result from a variety of factors including but not limited to:</p> <ul style="list-style-type: none"> • Expenditure incurred by the Scheme. • Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and realization of sale proceeds and the registration of any securities transferred and any delays in receiving cash and scrip dividends and resulting delays in reinvesting them. • Securities trading may halt temporarily due to circuit filters. • The underlying index reflects the prices of securities at close of business hours. However, the Fund may buy or sell the securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the exchange. • Index service provider undertakes the periodical review of the scrips that comprise the underlying index and may either drop or include new securities. In such an event, the Fund will endeavour to reallocate its portfolio but the available investment/ disinvestment opportunities may not permit precise mirroring of the Index immediately. • The potential for trades to fail which may result in the Scheme not having acquired shares at a price necessary to track the index. • The holding of a cash position (0-5% of the Net Assets to meet the redemptions and other liquidity requirements) and accrued income prior to distribution and accrued expenses. • Disinvestments to meet redemptions, recurring expenses, dividend payouts etc. <p>Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However, this may vary due to the reasons mentioned above or any other reasons that may arise and particularly when the markets are very volatile.</p>
Special Products	Not Available.
Benchmark	The performance of the Scheme would be benchmarked

	<p>against Nifty 100 Low Volatility 30 Index.</p> <p>The corpus of the Scheme will be invested predominantly in stocks constituting Nifty 100 Low Volatility 30 Index and subject to tracking errors, the Scheme would endeavour to attain returns comparable to the underlying Index. This would be done by investing in almost all the stocks comprising Nifty 100 Low Volatility 30 Index in approximately in the same weightage that they represent in Nifty 100 Low Volatility 30 Index. In view of the same, performance of the Scheme will be benchmarked with Nifty 100 Low Volatility 30 Index.</p>
Transparency/NAV Disclosure	<p>The AMC will calculate and disclose the first NAV within 5 business days from the date of allotment. Subsequently, the NAV will be calculated and disclosed by 9.00 p.m. on every business day. NAV shall be published at least in two daily newspapers having circulation all over India. In addition, the AMC shall disclose the full portfolio of the Scheme at least on a half-yearly basis on the website of AMC and AMFI. The AMC shall also disclose portfolio of the Scheme on the AMC website i.e. www.icicipruamc.com along with ISIN, on a monthly basis as on last day of each month, on or before tenth day of the succeeding month. Since the Scheme is a new scheme, Top 10 Holdings and sector wise holdings are not available.</p> <p>AMC shall update the NAVs on the website of Association of Mutual Funds in India – AMFI (www.amfiindia.com) and AMC website (www.icicipruamc.com) by 9.00 p.m. on every business day. In case of any delay, the reasons for such delay would be explained to AMFI and SEBI by the next day. If NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs.</p> <p>In addition to above, the indicative NAV will be updated on AMCs website during market hours, once in 2 hours.</p>
Repatriation	<p>Repatriation benefits would be available to NRIs/PIOs/FIIs, subject to applicable Regulations notified by Reserve Bank of India from time to time. Repatriation of these benefits will be subject to applicable deductions in respect of levies and taxes as may be applicable in present or in future.</p>
Eligibility for Trusts	<p>Religious and Charitable Trusts are eligible to invest in certain securities, under the provisions of Section 11(5) of the Income Tax Act, 1961 read with Rule 17C of the Income-tax Rules, 1962 subject to the provisions of the respective constitutions under which they are established.</p>

INTRODUCTION TO EXCHANGE TRADED FUNDS (ETF)

ETFs are innovative products that provide exposure to its underlying asset. ETFs generally track an index, a basket of securities, commodities or debt securities. As name suggest ETFs are traded on the exchange like a single stock.

ETFs are an innovation to traditional mutual funds as ETFs provide Investors a fund that closely tracks the performance of underlying asset (equities, debt or commodities) with the ability to buy/sell units on an intra-day basis.

Unlike listed close ended funds, which trade at substantial premiums or more frequently at discounts to NAV, ETFs are structured in a manner which allows to create new Units and

Redeem outstanding Units directly with the fund, thereby ensuring that ETFs trade close to their actual NAVs.

ETFs are usually passively managed funds wherein subscription /redemption of units work on the concept of exchange with underlying securities. In other words, Investors/institutions can purchase Units by depositing the underlying asset or equivalent cash amount with the Fund/AMC and can redeem by receiving the underlying asset or equivalent amount of cash in exchange of Units. Units can also be bought and sold directly on the exchange just like a normal tradable listed securities.

ETFs have all the benefits of indexing such as diversification, low cost and transparency. As ETFs are listed on the exchange, costs of distribution are much lower and the reach is wider. These savings in cost are passed on to the Investors in the form of lower costs. Furthermore, exchange traded mechanism helps reduce minimal collection, disbursement and other processing charges.

The structure of ETFs is such that it protects long-term Investors from inflows and outflows of short-term Investor. This is because the Fund does not bear extra transaction cost when buying/selling due to frequent subscriptions and redemptions.

Tracking Error of ETFs is likely to be low as compared to a normal index fund. Due to the creation/redemption of units through the in-kind mechanism the fund can keep lesser funds in cash. Also, time lag between buying/selling units and the underlying shares is much lower.

ETFs are highly flexible and can be used as a tool for gaining instant exposure to the underlying asset, equitising cash or for arbitraging between the cash and futures market.

Features of ETFs

1. ETFs can be easily bought / sold like any other stock on the exchange through terminals spread across the country.
2. ETFs can be bought/ sold anytime during market hours at prices that are expected to be close to actual NAV of the schemes. Thus, investor invests at real-time prices as opposed to end of day prices.
3. No separate form filling for buying / selling of units is required. It is just a phone call to investors' broker or a click on the net.
4. ETFs have ability to put limit orders.
5. Minimum investment for an ETF is one unit.
6. ETFs facilitate protection to long-term investors from the inflows and outflows of short-term investors.
7. ETFs are flexible as it can be used as a tool for gaining instant exposure to the respective underlying asset, equitising cash,or for arbitraging between the cash and futures market.
8. ETFs help in increasing liquidity of underlying cash market.
9. ETFs aid to low cost arbitrage between futures and cash market.
10. An investor can get a consolidated view of his investments without adding too many different account statements as the Units issued would be in demat form.

I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund Units involve investment risks such as trading volumes, settlement risks, liquidity risks, default risks, including the possible loss of principal.
- Mutual Funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
- As with any securities investment, the NAV of the Units issued under the Scheme can go up or down depending on the factors and forces affecting the capital markets.
- Past performance of the Sponsors, AMC/Fund does not indicate the future performance of the Schemes of the Fund.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the contribution of an amount of Rs 22.2 lakhs collectively made by them towards setting up the Fund and such other accretions and additions to the corpus set up by the Sponsors.
- ICICI Prudential Nifty Low Vol 30 iWIN ETF is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- ICICI Prudential Nifty Low Vol 30 iWIN ETF is an Exchange Traded Fund (ETF). There can be no assurance that an active secondary market will develop or be maintained.
- The NAV of the Scheme may be affected by changes in the general level of interest rates and trading volumes.
- The NAV of the Scheme may be affected by settlement periods and transfer procedures.
- In the event of receipt of inordinately large number of redemption requests or of a restructuring of the Scheme's portfolios, there may be delays in the redemption of Units.
- The Liquidity of the Scheme's investments is inherently restricted by trading volumes.
- Investors in the Scheme are not being offered any guaranteed returns.
- Mutual funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Scheme's investments include, but are not limited to, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc.
- The past performance of the mutual funds managed by the Sponsors and their affiliates/associates is not indicative of the future performance of the Scheme.
- Investment decisions made by the AMC may not always be profitable.
- From time to time and subject to the Regulations, the Sponsors, the Mutual Funds and investment companies managed by them, their affiliates, their associate companies, subsidiaries of the Sponsors, and the AMC may invest either directly or indirectly in any or all the Schemes. The funds managed by these affiliates, associates, the Sponsors, subsidiaries of the Sponsors and /or the AMC may acquire a substantial portion of the Scheme's Units and collectively constitute a major investor in the Scheme. Accordingly, redemption of Units held by such funds, affiliates/associates and Sponsors might have an adverse impact on the Units of the Scheme because the timing of such redemption may impact the ability of other Unit holders to redeem their Units.
- Further, as per the Regulation, in case the AMC invests in any of the Schemes managed by it, it shall not be entitled to charge any fees on such investments.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down
- The present Scheme are not guaranteed or assured return schemes.

Scheme Specific Risk Factors:

Investing in Equities

Investors may note that AMC/Fund Manager's investment decisions may not be always profitable. Although it is intended to generate capital appreciation and maximize the returns by investing in equity securities and utilising debt and money market instruments as a defensive investment strategy. In view of the same, there can be no assurance that the investment objective of the Scheme will be realised.

While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. The NAV of the Scheme can go up and down because of various factors that affect the capital markets in general.

The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Governments, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, total return and/or its ability to meet its objectives.

Market Risk

The Scheme's NAV will react to the stock market movements. The Investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices and market movements, and over longer periods during market downturns.

Market Trading Risks

- **Absence of Prior Active Market:** Although units of the Scheme are to be listed on the Exchanges, there can be no assurance that an active secondary market will develop or be maintained.
- **Lack of Market Liquidity:** Trading in units of the respective Scheme on the Exchange may be halted because of market conditions or for reasons that in the view of the Market Authorities or SEBI, trading in units of the Scheme are not advisable. In addition, trading in units of the Scheme are subject to trading halts caused by extraordinary market volatility and pursuant to NSE/BSE and SEBI "circuit filter" rules. There can be no assurance that the requirements of the Market necessary to maintain the listing of units of the Scheme will continue to be met or will remain unchanged.
- **Units of the Scheme may trade at Prices Other than NAV:** Units of the Scheme may trade above or below its NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of units of the Scheme will fluctuate in accordance with changes in their NAVs as well as market supply and demand of units of the Scheme. However, given that units can be created and redeemed only in Creation Units directly with the Fund, it is expected that large discounts or premiums to the NAVs of the Scheme will not sustain due to arbitrage possibility available.

- **Regulatory Risk:** Any changes in trading regulations by the Stock Exchange/s or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV. Although, the units are listed on NSE and BSE, the AMC and the Trustees will not be liable for delay in listing of Units of the Scheme on the stock exchanges / or due to connectivity problems with the depositories due to the occurrence of any event beyond their control.
- **Settlement Risk:** In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Scheme portfolio may result, at times, in potential losses to the Scheme, and there can be a subsequent decline in the value of the securities held in the Scheme's portfolio.
- **Right to Limit Redemptions:** The Trustee, in the general interest of the Unit holders of the Scheme offered in this Document and keeping in view the unforeseen circumstances / unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day.

Redemption Risk

Investors should note that even though the Scheme is an open ended Scheme, subscription/redemptions directly with the Fund would be limited to such investors who have the ability to subscribe/redeem the units of the Scheme in the creation unit size. Generally, this lot size is larger as compared to normal funds. However, investors wishing to subscribe/redeem units in other than specific lot size can do so by buying/selling the same on the Stock Exchange. Investors can also approach the Fund directly for redemption in other than Creation Unit Size on occurrence of various events as listed in this document.

Passive Investments

The Scheme is not an actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its Underlying Index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

Tracking Error Risk

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, the AMC will endeavour that the tracking error of the Scheme does not exceed 2% per annum. However, this may vary due to various reasons mentioned below or any other reasons that may arise and particularly when the markets are very volatile.

Factors such as the fees and expenses of the Scheme, Corporate Actions, Cash balance, changes to the Underlying Index and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying Index of the Scheme. The Scheme's returns may therefore deviate from those of their Underlying Index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the index and the NAV of the Scheme. Tracking Error may arise due to the following reasons: -

- Expenditure incurred by the Scheme
- Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and realization of sale proceeds and the registration of any securities transferred and any delays in receiving cash and scrip dividends and resulting delays in reinvesting them.
- Securities trading may halt temporarily due to circuit filters.

- The underlying index reflects the prices of securities at close of business hours. However, the Fund may buy or sell the securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the exchange.
- Index Service provider undertakes the periodical review of the scrips that comprise the underlying index and may either drop or include new securities. In such an event, the Fund will endeavour to reallocate its portfolio but the available investment/ disinvestment opportunities may not permit precise mirroring of the Index immediately.
- The potential for trades to fail which may result in the Scheme not having acquired shares at a price necessary to track the index.
- The holding of a cash position (0-5% of the Net Assets to meet the redemptions and other liquidity requirements) and accrued income prior to distribution and accrued expenses.
- Disinvestments to meet redemptions, recurring expenses, dividend payouts etc.

Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However, this may vary due to the reasons mentioned above or any other reasons that may arise and particularly when the markets are very volatile.

Risk associated with investing in companies forming part of Nifty 100 Low Volatility 30 Index:

The index tracks the performance of 30 stocks with the lowest volatility in last one year selected from stocks in Nifty 100. The Nifty 100 index represents the large market capitalisation segment of market. Volatility is computed as the standard deviation of the security's daily price return over a period of one year. The scheme by mandate restricts its investments to securities of the underlying index which represents the Nifty 100 Low Volatility 30 Index having 30 constituents and will therefore be subject to the risks associated with such concentration. In addition, the scheme will be subject to certain risks associated with investment in low volatility stocks and low volatility fund management strategies.

Risk associated with Investing in money market instruments

- **Interest Rate risk:** This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
- **Credit risk:** This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest.
- **Liquidity risk:** The liquidity of a security may change depending on market conditions leading to changes in the liquidity premium linked to the price of the security. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio

Risks associated with investing in securitized debt:

The Scheme will not invest in securitized debt.

Risks associated with investing in ADR/ GDR/ Foreign securities:

The Scheme will not invest in ADR/GDR/Foreign securities.

Risks associated with Short Selling and Securities Lending:

The Scheme will not do Securities Lending and Short Selling activity

Risks associated with investing in Derivatives:

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund

manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

• **Risk management strategies**

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in equity markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in equity and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risk and Description	Risk mitigants / management strategy
Risks associated with Equity investment	
<p>Market Risk The Scheme is vulnerable to movements in the prices of securities invested by the Scheme, which could have a material bearing on the overall returns from the Scheme. The value of the underlying Scheme investments, may be affected generally by factors affecting securities markets, such as price and volume, volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets.</p>	Market risk is inherent to an equity scheme. Being a passively managed scheme, it will invest in the securities included in its Underlying Index.
<p>Liquidity risk The liquidity of the Scheme’s investments is inherently restricted by trading volumes in the securities in which they invests.</p>	As such the liquidity of stocks that the scheme invests into could be relatively low. The fund will try to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks.
<p>Derivatives Risk As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives since derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds.</p>	Derivatives will be used for the purpose of portfolio rebalancing purposes. Derivatives will be used in the form of Index Options, Index Futures and other instruments as may be permitted by SEBI. All derivatives trade will be done only on the exchange with guaranteed settlement. No OTC contracts will be entered into.

Risk and Description	Risk mitigants / management strategy
Risks associated with Equity investment	
Tracking Error risk (Volatility/ Concentration risk): The performance of the Scheme may not be commensurate with the performance of the underlying Index viz. Nifty100 Low Volatility 30 Index on any given day or over any given period.	Tracking Error risk (Volatility/ Concentration risk): Over a short to medium period, the Scheme may carry the risk of variance between portfolio composition and Benchmark. The objectives of the Scheme are to closely track the performance of the Underlying Index over the same period, subject to tracking error. The Scheme would endeavor to maintain a low tracking error by actively aligning the portfolio in line with the Index.

Risks associated with Debt investment	
Market Risk/ Interest Rate Risk As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.	The Scheme may invest only in money market instruments having a residual maturity upto 91 days thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities.
Liquidity or Marketability Risk This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM).	The Scheme may invest only in government securities and money market instruments. The liquidity risk for government securities, money market instruments is generally low.
Credit Risk Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).	Management analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower.

F. HOW IS THE SCHEME IS DIFFERENT FROM OTHER SCHEMES

In the category of ETFs, ICICI Prudential Mutual Fund (the Mutual Fund) offers six (6) schemes, out of which five (5) schemes are Index ETFs and one is Gold Exchange Traded Fund (a commodity ETF). Index ETFs tracks specific Index of the exchange. In the nature of open ended Index ETFs, the Fund offers the below schemes which track different Index as given below:

Name of Index ETF	Index which is tracked
ICICI Prudential Nifty iWIN ETF	Nifty 50 Index
ICICI Prudential Nifty 100 iWIN ETF	Nifty 100 Index
ICICI Prudential Sensex iWIN ETF	S&P BSE Sensex Index
ICICI Prudential NV20 iWIN ETF	Nifty50 Value 20 Index
ICICI Prudential Midcap Select iWIN ETF	S&P BSE Midcap Select Index

The current proposed scheme is also an Index ETF. However, this scheme will track Nifty 100 Low Volatility 30 Index. This scheme seeks to replicate the Nifty 100 Low Volatility 30 Index, by buying the same stocks in the same proportion as they are in the index, hence the fund managers do not take any sector or stock exposure that is different from what is seen on the chosen index. Nifty100 Low Volatility 30 Index aims to measure the performance of the low volatile securities in the large market capitalisation segment. The selection of securities and its weights in Nifty100 Low Volatility 30 are based on volatility. The least volatile stocks receive the highest weight in the index. In order to ensure replication of index, weight of stocks with liquidity below the minimum threshold is capped at 3%.

C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

Under normal circumstances, the asset allocation under the Scheme will be as follows:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Maximum	Minimum	High/Medium/Low
Securities of companies constituting the Underlying Index (Nifty 100 Low Volatility 30 Index)	100	95	Medium to High
Debt and Money Market Instruments with maturity of upto 91 days only.	5	0	Low to Medium

The notional exposure of the Scheme in Derivative instruments shall be restricted to 05% of the net assets of the Scheme.

The Scheme may take exposure to equity derivatives of underlying index or constituents of the underlying index for short duration when securities of the underlying index are not readily available in needed quantities within the required time frame, or in case of corporate actions or for rebalancing at the time of change in underlying index.

Investment in derivatives shall be made in accordance with the SEBI Circular No. Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010 and such other guidelines on derivatives as issued by SEBI from time to time.

The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.

The margin money requirement for the purpose of derivative exposure may be held in the form of term deposits.

For the time duration of change in the index constituents, the Scheme may have to invest in Derivatives to maintain the respective weightages for the companies, constituting the index. Other than for purposes of portfolio rebalancing, the Scheme will not invest in Derivatives. These investments would be for a short period of time.

In case of any deviation from the above asset allocation, the portfolio shall be rebalanced within 7 Days to ensure adherence to the above norms. In the event of involuntary corporate action, the fund shall dispose the security not forming part of the Underlying index within 7 business days from the date of allotment/ listing.

The Scheme does not intend to undertake/ invest/ engage in:

- Repos in corporate debt securities

- Short selling of securities
- Securities lending
- Unrated instruments (except CBLOs/ Government Securities/ T- Bills / Repo and Reverse Repo in Government Securities).
- Foreign securities/ADR/GDR
- Securitised debts

Change in Investment Pattern

As an index linked scheme, the policy is passive management. However, investment pattern is indicative and may change for short duration. In the event the Underlying Index is dissolved or is withdrawn by Index Service Provider or is not published due to any reason whatsoever, the Trustees reserve the right to modify the Scheme so as to track a different and suitable index or to suspend tracking the Underlying Index and appropriate intimation will be sent to the Unitholders of the Scheme. In such a case, the investment pattern will be modified suitably to match the composition of the securities that are included in the new index to be tracked and the Scheme will be subject to tracking errors during the intervening period.

Provided that any change in the Underlying Index shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the Regulations, as detailed later in this document.

Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors.

Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the Regulations, as detailed later in this document.

D. WHERE WILL THE SCHEME INVEST?

The Scheme invests in the securities included in the Underlying Index regardless of their investment merit.

Subject to the Regulations and the disclosures as made under the Section "How the Scheme will allocate its Assets", the corpus of the Scheme can be invested in any (but not exclusive) of the following securities/ instruments:

- 1) Equity and equity related securities forming part of Underlying Index, including warrants carrying the right to obtain equity shares.
- 2) Securities created and issued by the Central and State Governments and/or repos/reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- 3) Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- 4) Debt securities issued by domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee
- 5) Corporate debt securities (of both public and private sector undertakings)
- 6) Securities issued by banks (both public and private sector) as permitted by SEBI from time to time and development financial institutions
- 7) Money market instruments permitted by SEBI, having maturities of up to 91 days, or in alternative investment for the call money market.

- 8) The non-convertible part of convertible securities
- 9) Derivative instruments like Stock / Index Futures, Stock / Index Options and such other derivative instruments permitted by SEBI.

Subject to the Regulations, the securities mentioned above could be listed, privately placed, secured, unsecured, rated or unrated and of varying maturity. The securities may be acquired through Public Offerings, secondary market operations, private placement, rights offers or negotiated deals.

E. WHAT ARE THE INVESTMENT STRATEGIES?

The corpus of the Scheme will be invested predominantly in stocks constituting the underlying index in the same proportion as in the Index and endeavor to track the benchmark index. A very small portion (0-5% of the Net Assets) of the fund may be kept liquid to meet the liquidity and expense requirements.

The performance of the Scheme may not be commensurate with the performance of the underlying index on any given day or over any given period. Such variations are commonly referred to as the tracking error. The fund intends to maintain a low tracking error by closely aligning the portfolio in line with the index. The stocks comprising the underlying index are periodically reviewed by Index Service provider. A particular stock may be dropped or new securities may be included as a constituent of the index. In such an event, the Fund will endeavor to reallocate its portfolio but the available investment/ disinvestment opportunities may not permit precise mirroring of the underlying index immediately. Similarly, in the event of a constituent stock being demerged / merged / delisted from the exchange or due to a major corporate action in a constituent stock, the fund may have to reallocate the portfolio and seek to minimize the variation from the index.

Equities and equity related instruments:

The Scheme would invest in stocks comprising the underlying index and endeavor to track the benchmark index.

Fixed Income Securities:

The Scheme may also invest in debt and money market instruments, in compliance with Regulations to meet liquidity requirements. The scheme may also invest in liquid schemes of ICICI Prudential Mutual Fund. Money Market Instruments include commercial papers, commercial bills, treasury bills, and Government securities having an unexpired maturity upto one year, call or notice money, certificate of deposit, usance bills, CBLOs and any other like instruments as specified by the Reserve Bank of India from time to time.

Investment in Derivatives:

The Scheme may take an exposure to equity derivatives of constituents of the underlying Basket when securities of the Basket are unavailable, insufficient or for rebalancing at the time of change in Basket or in case of corporate actions, for a short period of time. The Scheme may use derivative instruments such as stock futures and options contracts, warrants, convertible securities, swap agreements or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objective of the Scheme.

Implementation of Policies

The Scheme, in general, will hold all of the securities that comprise the Underlying Index in the same proportion as the index. Expectation is that, over time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low.

The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. There can be no

assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.

Investment Process

The Scheme will track the Underlying Index and is a passively managed scheme. The investment Decisions will be determined as per the Underlying Index. In case of any change in the index due to corporate actions or change in the constituents of the Underlying Index (as communicated by the Index Service Provider), relevant investment decisions will be determined considering the composition of the Underlying Index.

The Investment decision of the Fund will be carried out by the designated Fund Manager.

Portfolio Turnover

Portfolio turnover is defined as the lower of purchases and sales divided by the average assets under management of the respective Scheme during a specified period of time.

Generally, portfolio turnover of the Scheme will be confined to rebalancing of portfolio on account of change in the composition and corporate actions of the Underlying Index.

Nifty100 Low Volatility 30 Index

Nifty100 Low Volatility 30 Index aims to measure the performance of the low volatile securities in the large market capitalisation segment. The selection of securities and its weights in Nifty100 Low Volatility 30 are based on volatility. The least volatile stocks receive the highest weight in the index. In order to ensure replication of index, weight of stocks with liquidity below the minimum threshold is capped at 3%.

Tracking Error

The performance of the Scheme may not be commensurate with the performance of the underlying index on any given day or over any given period. Such variations are commonly referred to as the tracking error. Tracking errors may result from a variety of factors including but not limited to:

- Expenditure incurred by the Scheme
- Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and realization of sale proceeds and the registration of any securities transferred and any delays in receiving cash and scrip dividends and resulting delays in reinvesting them.
- Securities trading may halt temporarily due to circuit filters.
- The underlying index reflects the prices of securities at close of business hours. However, the Fund may buy or sell the securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the exchange.
- Index Service provider undertakes the periodical review of the scrips that comprise the underlying index and may either drop or include new securities. In such an event, the Fund will endeavour to reallocate its portfolio but the available investment/ disinvestment opportunities may not permit precise mirroring of the Index immediately.
- The potential for trades to fail which may result in the Scheme not having acquired shares at a price necessary to track the index.
- The holding of a cash position (0-5% of the Net Assets to meet the redemptions and other liquidity requirements) and accrued income prior to distribution and accrued expenses.
- Disinvestments to meet redemptions, recurring expenses, dividend payouts etc.

Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However, this may vary due to the reasons mentioned above or any other reasons that may arise and particularly when the markets are very volatile.

Issue of Units

1. Each unit of the Scheme will be approximately equal to 1/100th of the Underlying Index closing on the date of allotment. The units being offered will be issued at a premium approximately equal to the difference between face value and allotment price.
2. As the Scheme will be listed on NSE/BSE, subsequent buying or selling by investors can be made from the secondary market on NSE/BSE. The minimum number of units that can be bought or sold is 1 (one) unit.
3. Authorised Participant(s)/ Investor(s) can directly buy / sell in blocks from the Fund in 'Creation Unit' Size.

Creation of Units:

'Creation Unit' is a fixed number of Units of the Scheme, which is exchanged for a predefined basket of shares underlying the index called the "Portfolio Deposit" and a "Cash Component".

The facility of creating / redeeming units in Creation Unit size is available to the Authorised Participant and Investors.

The number of units, that investors can create / redeem in exchange of the Portfolio Deposit and Cash Component, is 30,000 Units and in multiples thereof. The Portfolio Deposit and Cash Component are defined as follows:-

- a. **Portfolio Deposit:** This is a pre-defined basket of securities that represent the Underlying Index and will be defined and announced by the Fund on allotment date and on all Business Days thereafter. Portfolio Deposit can change from time to time.
- b. **Cash Component for subscription/ redemption in Creation Unit:** The Cash Component represents the difference between the applicable net asset value of a Creation Unit and the market value of the Portfolio Deposit. This difference may include accrued dividends, accrued annual charges including management fees and residual cash in the Scheme. In addition the Cash Component may include transaction cost as charged by the Custodian/Depository Participant, equalization of dividend, effect of rounding-off of number of shares in Portfolio Deposit and other incidental expenses for Creating Units. The Cash Component will vary from time to time and will be computed and announced by the AMC on its website every Business Day.

Example of Creation and Redemption of Units of ICICI Prudential Nifty Low Vol 30 iWIN ETF (LOWV30IWIN)

The Creation Unit is made up of 2 components i.e. the Portfolio Deposit and the Cash Component. The Portfolio Deposit will be determined by the Fund as per the weightages of each security in the Underlying Index. The value of this portfolio deposit will change due to change in prices during the day. The number of shares of each security that constitute the portfolio deposit will remain constant unless there is any corporate action in the Underlying Index/ change in the constituents of the Underlying Index.

Example of Creation of Units as on June 08, 2017:

Closing Price of Index (As on June 08, 2017)	7,420.83
NAV as on June 08, 2017	74.21
Basket Size	30,000
Basket Value	22,26,300
Actual investment value	21,83,535
Cash component	42,765.25

(figures are for illustrative purposes only)

Wipro Ltd.	545.90	4.24%	172	93,894.80
Total				21,83,534.75

In addition, Investors shall also pay charges payable to depositories / exchanges for creation / redemption of units as part of Cash Component.

The above is just an example to illustrate the calculation of Cash Component. Cash Component will vary depending upon the actual charges incurred like Custodial Charges and other incidental charges for creating units.

As on June 08, 2017, the Scheme complies with the portfolio concentration norms, the details pertaining to same are as given below:

1. The free float market cap of index under consideration should be at least 15 % of free float market cap of Nifty or Sensex –Free float market cap of all the Nifty 100 Low Volatility 30 index constituents is around ~ 65 % of Nifty 50 Index as on June 08, 2017
2. The index basket should have a minimum of 10 stocks as its constituents – 30 stocks
3. The constituents of index which individually has less than 5 % weight in index should cumulatively have atleast 15% of total weight of index - All stocks are below 5%
4. No single security in the index should have more than 25% weight in index. – None.

Procedure followed for Investment decisions

- a) The Fund Manager of the Scheme is responsible for making buy/sell decisions in respect of the securities in the respective scheme portfolios. However, it may be noted that this Scheme is an index ETF wherein subscription/ redemption of units work on the concept of exchange with underlying securities.

- b) The AMC has an Internal Investment Committee comprising of the Chief Executive Officer/Managing Director, Chief Investment Officer - Equity & Fixed Income, Chief Investment Officer – Fixed Income, all Portfolio Managers and all analysts who meet at periodic intervals. The Investment Committee, at its meetings, reviews the performance of the schemes and general market outlook and formulates broad investment strategy. The Managing Director attends the meeting at his discretion.
- a) The CIO who chairs the Investment Committee Meetings guides the deliberations at Investment Committee. He, on an ongoing basis, reviews the portfolios of the schemes and gives directions to the respective Fund Manager, where considered necessary. It is the ultimate responsibility of the CIO to ensure that the investments are made as per the internal/Regulatory guidelines, Scheme investment objectives and in the best interest of the unitholders of the respective schemes.
- b) The Managing Director makes a presentation to the Board of AMC at each of its meetings indicating the performance of the schemes.
- c) Performance of ICICI Prudential Nifty Low Vol 30 iWIN ETF (LOWV30IWIN) will be benchmarked against Nifty100 Low Volatility 30 Index. The performance of the Scheme is reviewed by the Board with the benchmark as also the performance of the schemes of the competitions. The Trustee reserves right to change the benchmark for performance of the Scheme by suitable notification to the investors to this effect.
- d) The Managing Director brings to the notice of the Board specific factors, if any, which are impacting the performance of any individual scheme. The Board on consideration of all relevant factors may, if necessary, give directions to AMC. Similarly, the performance of the Scheme is submitted to the Trustees. The Managing Director explains to the Trustees the details on Scheme's performance vis-à-vis the benchmark returns.
- e) The AMC has been recording investment decisions since the receipt of instructions from SEBI, in terms of SEBI's circular no. MFD/CIR/6/73/2000 dated July 27, 2000.
- f) The Chief Executive Officer of the AMC shall ensure that the mutual fund complies with all the provisions of SEBI (Mutual Fund) Regulations, 1996, as amended from time to time, including all guidelines, circulars issued in relation thereto from time to time and that the investments made by the fund managers are in the interest of the unit holders and shall also be responsible for the overall risk management function of the mutual fund.
- g) The Fund managers shall ensure that the funds of the Scheme are invested to achieve the investment objectives of the scheme and in the interest of the unit holders.

Exposure to Derivatives

The Scheme intends to use derivatives for purposes that may be permitted by SEBI Mutual Fund Regulations from time to time. Derivatives instruments may take the form of Futures, Options, Swaps or any other instrument, as may be permitted from time to time. SEBI has vide its Circular DNPD/Cir-29/2005 dated September 14, 2005 and DNPD/Cir-29/2005 dated January 20, 2006 and CIR/IMD/DF/11/2010 dated August 18, 2010 specified the guidelines pertaining to trading by Mutual Fund in Exchange trades derivatives. All Derivative positions taken in the portfolio would be guided by the following principles:

- i. Position limit for the Fund in index options contracts
 - a. The Fund position limit in all index options contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest of the market in index options, whichever is higher per Stock Exchange.
 - b. This limit would be applicable on open positions in all options contracts on a particular underlying index.
- ii. Position limit for the Fund in index futures contracts:

- a. The Fund position limit in all index futures contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest of the market in index futures, whichever is higher, per Stock Exchange.
 - b. This limit would be applicable on open positions in all futures contracts on a particular underlying index.
- iii. Position limit for the Fund for stock based derivative contracts
The Fund position limit in a derivative contract on a particular underlying stock, i.e. stock option contracts and stock futures contracts, :-
- a. The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL).
 - b. The MWPL and client level position limits however would remain the same as prescribed
- iv. Position limit for the Scheme
The position limits for the Scheme and disclosure requirements are as follows –
- a. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a Fund shall not exceed the higher of:
 - 1% of the free float market capitalisation (in terms of number of shares).
 - Or**
 - 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts).
 - b. This position limit shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
 - c. For index based contracts, the Fund shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.”

The Scheme will comply with provisions specified in Circular dated August 18, 2010 related to overall exposure limits applicable for derivative transactions as stated below:

- 1) The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the Scheme.
- 2) Mutual Funds shall not write options or purchase instruments with embedded written options.
- 3) The total exposure related to option premium paid must not exceed 20% of the net assets of the Scheme.
- 4) Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.

The following section describes equity derivatives transactions long with their benefits:

1. Basic Structure of a Stock & Index Future

The Stock Index futures are instruments designed to give exposure to the equity markets indices. The Stock Exchange, Mumbai (BSE) and The National Stock Exchange (NSE) provide futures in select stocks and indices with maturities of 1, 2 and 3 months. The pricing of a stock/index future is the function of the underlying stock/index and short term interest rates.

Example using hypothetical figures:

1 month Nifty 50 Index Future

Say, Fund buys 1,000 futures contracts; each contract value is 50 times futures index price

Purchase Date: March 14, 2017

Spot Index: 7542.00

Future Price: 7583.85

Say, Date of Expiry: April 28, 2017

Say, Margin: 20%

Assuming the exchange imposes total margin of 20%, the Investment Manager will be required to provide total margin of approx. Rs. 7.58 Cr (i.e. $20\% * 7583.85 * 1000 * 50$) through eligible securities and cash.

Date of Expiry

Assuming on the date of expiry, i.e. April 28, 2017, Nifty 50 Index closes at 7750, the net impact will be a profit of Rs. 83,07,500 for the fund i.e. $(7750 - 7583.85) * 1000 * 50$

Futures price = Closing spot price = 7750

Profits for the Fund = $(7750 - 7583.85) * 1000 * 50 = \text{Rs. } 83,07,500$

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity. The net impact for the Fund will be in terms of the difference of the closing price of the index and cost price. Thus, it is clear from the example that the profit or loss for the Fund will be the difference of the closing price (which can be higher or lower than the purchase price) and the purchase price. The risks associated with index futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures.

2. Basic Structure of an Equity Option

An option gives a buyer the right but does not cast the obligation to buy or sell the underlying. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts an obligation for which he receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

In India, National Stock Exchange (NSE) became the first exchange to launch trading in options on individual securities. Trading in options on individual securities commenced from July 2, 2001.

Example using hypothetical figures on Index Options:

Market type: N

Instrument Type: OPTIDX

Underlying: Nifty

Purchase date: Mar 14, 2017

Expiry date: Apr 28, 2017

Option Type: Put Option (Purchased)

Strike Price: Rs. 7,200.00

Spot Price: Rs. 7542.00

Premium: Rs. 59.90

Lot Size: 50

No. of Contracts: 100

Say, the Fund purchases on Mar 14, 2017, 1 month Put Options on Nifty on the NSE i.e. put options on 5000 shares (100 contracts of 50 shares each) of Nifty.

Date of Exercise

As these are European style options, they can be exercised only on the exercise date i.e. Apr 28, 2017. If the share price of Nifty falls to Rs. 7,000 on expiry day, the net impact will be as follows:

Premium expense = $\text{Rs. } 59.90 * 100 * 50 = \text{Rs. } 2,99,500$

Option Exercised at = Rs. 7,000

Profits for the Fund = $(7,200.00 - 7,000.00) * 100 * 50 = \text{Rs. } 10,00,000$

Net Profit = $\text{Rs. } 10,00,000 - \text{Rs. } 2,99,500 = \text{Rs. } 7,00,500$

In the above example, the Investment Manager hedged the market risk on 5000 shares of Nifty Index by purchasing Put Options.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity. Certain factors like margins have been ignored. The purchase of Put Options does not increase the market risk in the fund as the risk is already in the fund's portfolio on account of the underlying asset position. The premium paid for the option is treated as an expense. Additional risks could be on account of illiquidity and potential mis-pricing of the options.

Various Derivatives Strategies:

If and where Derivative strategies are used under the scheme the Fund Manager will employ a combination of the following strategies:

- 1. Index Arbitrage:** As the Nifty 50 derives its value from fifty underlying stocks, the underlying stocks can be used to create a synthetic index matching the Nifty Index levels. Also, theoretically, the fair value of a stock/ index futures is equal to the spot price plus the cost of carry i.e. the interest rate prevailing for an equivalent credit risk, in this case is the Clearing Corporation of the NSE.
Theoretically, therefore, the pricing of Nifty Index futures should be equal to the pricing of the synthetic index created by futures on the underlying stocks. However, due to market imperfections, the index futures may not exactly correspond to the synthetic index futures. The fund manager shall aim to capture such arbitrage opportunities by taking long positions in the Nifty Index futures and short positions in the synthetic index. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of-capital.

Objective of the Strategy

The objective of the strategy is to lock-in the arbitrage gains.

Risks Associated with this Strategy

- Lack of opportunity available in the market
 - The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices:
 - **Execution Risk:** The prices which are seen on the screen need not be the same at which execution will take place.
- 2. Cash Futures Arbitrage:** (Only one way as funds are not allowed to short in the cash market).
The Plans under the scheme would look for market opportunities between the spot and the futures market. The cash futures arbitrage strategy can be employed when the price of the futures exceeds the price of the underlying stock.
The Plans will first buy the stocks in cash market and then sell in the futures market to lock the spread known as arbitrage return.
Buying the stock in cash market and selling the futures results into a hedge where the Plans have locked in a spread and is not affected by the price movement of cash market and futures market.
The arbitrage position can be continued till expiry of the future contracts. The future contracts are settled based on the last half an hour's weighted average trade of the cash market. Thus there is a convergence between the cash market and the futures market on expiry. This convergence helps the Plans under the Scheme to generate the arbitrage return locked in earlier. However, the position could even be closed earlier in case the price differential is realized before expiry or better opportunities are available in other stocks The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of-capital.

Objective of the Strategy

The objective of the strategy is to lock-in the arbitrage gains.

Risk Associated with this Strategy

- Lack of opportunity available in the market.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- **Execution Risk:** The prices which are seen on the screen need not be the same at which execution will take place

3. Other Derivative Strategies: As allowed under the SEBI guidelines on derivatives, the fund manager will employ various other stock and index derivative strategies by buying or selling stock/index futures and/or options.

Objective of the Strategy

The objective of the strategy is to earn low volatility consistent returns.

Risk Associated with this Strategy

- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices
- **Execution Risk:** The prices which are seen on the screen need not be the same at which execution will take place.

i) Interest Rate Swaps and Forward rate Agreements

Benefits

Bond markets in India are not very liquid. Investors run the risk of illiquidity in such markets. Investing for short-term periods for liquidity purposes has its own risks. Investors can benefit if the Fund remains in call market for the liquidity and at the same time take advantage of fixed rate by entering into a swap. It adds certainty to the returns without sacrificing liquidity.

Illustration

The following are illustrations how derivatives work:

Basic Structure of an Interest Rate Swap

In the above illustration,

Basic Details : Fixed to floating swap
Notional Amount : Rs. 5 Crores
Benchmark : NSE MIBOR
Deal Tenor : 3 months (say 91 days)

Documentation : International Securities Dealers Association (ISDA).
Let us assume the fixed rate decided was 10%.

At the end of three months, the following exchange will take place:

Counter party 1 pays : compounded call rate for three months, say 9.90%

Counter party 2 pays fixed rate: 10%

In practice, however, the difference of the two amounts is settled. Counter party 2 will pay:

Rs 5 Crores *0.10%* 91/365 = Rs. 12,465.75

Thus the trade off for the Fund will be the difference in call rate and the fixed rate payment and this can vary with the call rates in the market. Please note that the above example is given for illustration purposes only and the actual returns may vary depending on the terms of swap and market conditions.

Interest rate futures (IRF):

IRF means a standardized interest rate derivative contract traded on a recognized stock exchange to buy or sell a notional security or any other interest bearing instrument or an index of such instruments or interest rates at a specified future date, at a price determined at the time of the contract.

The underlying security for IRF could be either Government Securities or Treasury Bills.

Currently, exchange traded Interest Rate Futures traded on exchange are standardized contracts based on 10-Year Government of India Security and 91 day Treasury bill. IRF contracts are cash settled.

IRFs give an opportunity in the fixed income market to hedge interest rate risk or rebalance the portfolio by using them. By locking into a price, the IRF contract can help to eliminate the interest rate risk. Thus, in order to protect against a fall in the value of the portfolio due to falling bond prices, one can take short position in IRF contracts.

Example:

Date: March 01, 2017

Spot price of the Government Security: ` 108.83

Price of IRF– March contract: ` 108.90

On March 01, 2017, Fund buys 1000 units of the Government security from the spot market at ` 108.83. Subsequently, it is anticipated that the interest rate will rise in the near future. Therefore to hedge the exposure in underlying Government security, Fund sells March 2017 Interest Rate Futures contracts at ` 108.90.

On March 01, 2017 due to increase in interest rate:

Spot price of the Government Security: ` 107.24

Futures Price of IRF Contract: ` 107.30

Loss in underlying market will be $(107.24 - 108.83) * 1000 = (\text{` } 1,590)$

Profit in the Futures market will be $(107.30 - 108.90) * 1000 = \text{` } 1,600$

ii) Index Futures:

Benefits

a) Investment in Stock Index Futures can give exposure to the index without directly buying the individual stocks. Appreciation in Index stocks can be effectively captured through investment in Stock Index Futures.

b) The Fund can sell futures to hedge against market movements effectively without actually selling the stocks it holds.

The Stock Index futures are instruments designed to give exposure to the equity market indices. The Stock Exchange, Mumbai and The National Stock Exchange have started trading in index futures of 1, 2 and 3-month maturities. The pricing of an index future is the function of the underlying index and interest rates.

Illustration

Spot Index: 1070

1 month Nifty Future Price on day 1: 1075

Fund buys 100 lots

Each lot has a nominal value equivalent to 200 units of the underlying index

Let us say that on the date of settlement, the future price = Closing spot price = 1085

Profits for the Fund = $(1085-1075) * 100 \text{ lots} * 200 = \text{Rs } 200,000$

Please note that the above example is given for illustration purposes only.

The net impact for the Fund will be in terms of the difference between the closing price of the index and cost price (ignoring margins for the sake of simplicity). Thus, it is clear from the example that the profit or loss for the Fund will be the difference of the closing price (which can be higher or lower than the purchase price) and the purchase price. The risks associated with index futures are similar to the one with equity investments. Additional risks could be on account of illiquidity and hence mispricing of the future at the time of purchase.

iii) Buying Options:

Benefits of buying a call option:

Buying a call option on a stock or index gives the owner the right, but not the obligation, to buy the underlying stock / index at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option.

Illustration

For example, if the fund buys a one month call option on ABC Limited at a strike of Rs. 150, the current market price being say Rs.151. The fund will have to pay a premium of say Rs. 15 to buy this call. If the stock price goes below Rs. 150 during the tenure of the call, the fund avoids the loss it would have incurred had it straightaway bought the stock instead of the call option. The fund gives up the premium of Rs. 15 that has to be paid in order to protect the fund from this probable downside. If the stock goes above Rs. 150, it can exercise its right and own ABC Limited at a cost price of Rs. 150, thereby participating in the upside of the stock.

Benefits of buying a put option

Buying a put option on a stock originally held by the buyer gives him/her the right, but not the obligation, to sell the underlying stock at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option.

Illustration

For example, if the fund owns ABC Limited and also buys a three month put option on ABC Limited at a strike of Rs. 150, the current market price being say Rs.151. The fund will have to pay a premium of say Rs. 12 to buy this put. If the stock price goes below Rs. 150 during the tenure of the put, the fund can still exercise the put and sell the stock at Rs. 150, avoiding therefore any downside on the stock below Rs. 150. The fund gives up the fixed premium of Rs. 12 that has to be paid in order to protect the fund from this probable downside. If the stock goes above Rs. 150, say to Rs. 170, it will not exercise its option. The fund will participate in the upside of the stock, since it can now sell the stock at the prevailing market price of Rs. 170.

(v) Risks attached with the use of derivatives: As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives that Investors should understand. Derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis pricing or improper valuation of

derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Also, the market for derivative instruments is nascent in India.

Derivatives products are leveraged instruments and provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify to execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:

- Lack of opportunity available in the market.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

(vi) Valuation of Derivative Products:

- i. The traded derivatives shall be valued at market price in conformity with the stipulations of sub clauses (i) to (v) of clause 1 of the Eighth Schedule to the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996, as amended from time to time and as per the valuation policy provided in the SAI.
- ii The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 as amended from time to time.

POSITION OF EQUITY MARKET IN INDIA

The Indian stock market is the world's third largest stock market on the basis of investor base and has a collective pool of about 20 million investors.

There are two leading stock exchanges in India, i.e. BSE Limited (BSE) and National Stock Exchange of India Limited (NSE). BSE was established in 1875 and is the oldest stock exchange in Asia. NSE, a more recent establishment which came into existence in 1992, is the largest and most advanced stock market in India and is also the third biggest stock exchange in Asia in terms of transactions. It is among the 5 biggest stock exchanges in the world in terms of transactions volume. NSE's flagship index, NIFTY 50, is used extensively by investors in India and around the world to take exposure to the Indian equities market.

BSE has the largest number of scrips which are listed. The Indian stock market scene really picked up after the opening up of the economy in the early nineties. NSE changed the way the Indian markets function, in the early nineties, by replacing floor based trading with nationwide screen based electronic trading, which took trading to the doorstep of the investor. NSE was mainly set up to bring in transparency in the markets. Instead of trading membership being confined to a group of brokers, NSE ensured that anyone who was qualified, experienced and met minimum financial requirements was allowed to trade. The price information which could earlier be accessed only by a handful of people could now be seen by a client in a remote location with the same ease. The paper based settlement was replaced by electronic depository based accounts and settlement of trades was always done on time. One of the most critical changes was that a robust risk management system was set in place, so that settlement guarantees could protect investors against broker defaults. The corporate governance rules

were gradually put in place which initiated the process of bringing the listed companies at a uniform level.

Since inception, NSE and BSE have launched many indices, tracking various sectors and market capitalisation.

POSITION OF DEBT MARKET IN INDIA

Indian debt markets, in the early nineties, were characterised by controls on pricing of assets, segmentation of markets and barriers to entry, low levels of liquidity, limited number of players, near lack of transparency, and high transactions cost. Financial reforms have significantly changed the Indian debt markets for the better. Most debt instruments are now priced freely on the markets; trading mechanisms have been altered to provide for higher levels of transparency, higher liquidity, and lower transactions costs; new participants have entered the markets, broad basing the types of players in the markets; methods of security issuance, and innovation in the structure of instruments have taken place; and there has been a significant improvement in the dissemination of market information. There are three main segments in the debt markets in India, viz., Government Securities, Public Sector Units (PSU) bonds, and corporate securities. A bulk of the debt market consists of Government Securities. Other instruments available currently include Corporate Debentures, Bonds issued by Financial Institutions, Commercial Paper, Certificates of Deposits and Securitized Debt. Securities in the Debt market typically vary based on their tenure and rating. Government Securities have tenures from one year to thirty years whereas the maturity period of the Corporate Debt now goes upto sixty years and more (perpetual). Perpetual bonds are now issued by banks as well. Securities may be both listed and unlisted and there is increasing trend of securities of maturities of over one year being listed by issuers. While in the corporate bond market, deals are conducted over telephone and are entered on principal-to-principal basis, due to the introduction of the Reserve Bank of India's NDS- Order Matching system a significant proportion of the government securities market is trading on the new system.

The yields and liquidity on various securities as on May 31, 2017 are as under:

Issuer	Instrument	Maturity	Yields (%)	Liquidity
GOI	Treasury Bill	91 days	6.28%	High
GOI	Treasury Bill	364 days	6.44%	High
GOI	Short Dated	1-3 Yrs	6.53%-6.62%	High

G. HOW WILL THE SCHEME BENCHMARK THEIR PERFORMANCE?

The corpus of ICICI Prudential Nifty Low Vol 30 iWIN ETF (LOWV30IWIN) will be invested predominantly in stocks constituting Nifty100 Low Volatility 30 Index, subject to tracking errors. Nifty100 Low Volatility 30 Index aims to measure the performance of the low volatile securities in the large market capitalisation segment. The selection of securities and its weights in Nifty100 Low Volatility 30 are based on volatility. The least volatile stocks receive the highest

weight in the index. In order to ensure replication of index, weight of stocks with liquidity below the minimum threshold is capped at 3%.

Thus, the performance of the Scheme will be benchmarked against Nifty 100 Low Volatility 30 Index.

Suspension of acceptance of subscription:

In the interest of the investors and in order to protect the portfolio from market volatility, the Trustees reserve the right to discontinue subscriptions under the Scheme for a specified period of time or till further notice.

Suspension of Sale and Redemption of Units

Suspension or restriction of repurchase/ redemption facility under any scheme of the mutual fund shall be made applicable only after obtaining the approval from the Boards of Directors of the AMC and the Trustees. After obtaining the approval from the AMC Board and the Trustees.

Additionally, the following requirements shall need to be observed before imposing restriction on redemptions:

- a) Restriction may be imposed when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets such as:
 - i. Liquidity issues - when market at large becomes illiquid affecting almost all securities rather than any issuer specific security. Market failures, exchange closures - when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies.
 - ii. Operational issues – when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out). Such cases can only be considered if they are reasonably unpredictable and occur in spite of appropriate diligence of third parties, adequate and effective disaster recovery procedures and systems.
- b) Restriction on redemption may be imposed for a specified period of time not exceeding 10 working days in any 90 days period.
- c) Any imposition of restriction would require specific approval of Board of AMC and Trustees and the same should be informed to SEBI immediately.
- d) When restriction on redemption is imposed, the following procedure shall be applied:

1. No redemption requests up to INR 2 lakh shall be subject to such restriction.
2. Where redemption requests are above INR 2 lakh, AMC's shall redeem the first INR 2 lakh without such restriction and remaining part over and above INR 2 lakh shall be subject to such restriction.

Right to Limit Redemptions

Any Units, which by virtue of these limitations are not redeemed on a particular Business Day, will be carried forward for Redemption to the next Business Day, in order of receipt. Under such circumstances, to the extent multiple Redemption requests are received at the same time on a single Business Day, Redemptions will be made on pro-rata basis, based on the size of each Redemption request, the balance amount being carried forward for Redemption to the next Business Day(s).

Suspension or restriction of repurchase/ redemption facility under any scheme of the mutual fund shall be made applicable only after obtaining the approval from the Boards of Directors of the AMC and the Trustees. After obtaining the approval from the AMC Board and the Trustees, intimation would be sent to SEBI in advance providing details of circumstances and justification for the proposed action shall also be informed.

Payment of Proceeds

All redemption requests received prior to the cut-off time on any Business Day at the Official Points of Acceptance of Transactions will be considered accepted on that Business Day, subject to the redemption requests being complete in all respects, and will be priced on the basis of Redemption Price for that day. Requests received after the cut-off time will be treated as though they were accepted on the next Business Day.

As per the Regulations, the Fund shall dispatch redemption proceeds within 10 Business Days (working days) of receiving the redemption request.

Trustees reserve the right to alter or modify the number of days taken for redemption of Units under the Fund after taking into consideration the actual settlement cycle, when announced, as also the changes in the settlement cycles that may be announced by the Principal Stock Exchanges from time to time.

As per the guidelines issued by SEBI, in the event of failure to dispatch the redemption or repurchase proceeds within 10 working days, the AMC is liable to pay interest to the Unit holders @ 15% p.a. SEBI has further advised the mutual funds that in the event of payment of interest to the Unit holders, such Unit holders should be informed about the rate and the amount of interest paid to them.

The mode of payment may be direct credit/ECS/cheque or any other mode as may be decided by AMC in the interest

	of investors.
<p>Cut off timing for subscriptions/ redemptions/ switch-in</p> <p>This is the time before which your application (complete in all respects) should reach the official points of acceptance.</p>	<p>As the Scheme is an Exchange Traded Fund (ETFs) and the units of the Scheme will be listed on the stock exchanges, in the interest of the investors/ unitholders, the operational processes of the Schemes with respect to all the provisions of "Uniform cut-off timings for applicability of Net Asset Value (NAV)" issued by SEBI from time to time shall stand modified.</p> <p>The Fund may allow subscription/ redemption/ switches in 'Creation Unit' Size and in multiples thereof by investor(s)/ authorised participant(s) based on the Portfolio Deposit/ equivalent amount of cash and Cash Component as defined by the Fund for that respective Business Day.</p> <p>The Cut-off time for receipt of valid application for subscriptions/ redemptions/ switches is 3.00 p.m. on any business day.</p> <p>Investors / Unit Holder to note that the above mentioned cut off time is not applicable to transaction undertaken on stock exchanges where units of the scheme are listed & only applicable to transaction undertaken at designated investor service centers.</p>
<p>Where can the applications for purchase/redemption be submitted?</p>	<p>The details of official points of acceptance, collecting banker etc. are provided on back cover page.</p> <p>An investor can buy/ sell units on a continuous basis in the normal market segment of National Stock Exchange of India Limited / BSE, or any other stock exchange where the Scheme will be listed, during the trading hours like any other publicly traded stock at prices which are quoted on the stock exchanges. These prices may be close to the actual NAV of the Scheme. There is no minimum investment, although units are to be purchased in lots of 1 (one) unit.</p>
<p>Account Statement</p>	<p>As the units of the Scheme will be issued, traded and settled in dematerialized (electronic) form, the statement of holding of the beneficiary account holder will be sent by the respective Depository Participant periodically.</p>
<p>Dividend</p>	<p>The dividend warrants shall be dispatched to the unitholders within 30 days of the date of declaration of the dividend.</p> <p>In the event of failure to dispatch dividend within 30 days, the AMC shall be liable to pay interest at 15% per annum to the unit holders. The treatment of unclaimed redemption and dividend amounts will be as per SEBI circular dated February 25, 2016.</p>
<p>Plans/options under the Scheme</p>	<p>Currently, there are no plans/ options under the Scheme. However, the Trustees reserve the right to introduce/ alter/ extinguish any of the option at a later date.</p>
<p>Listing</p>	<p>Units of the Scheme may also be listed on such other stock exchange(s) as may be decided from time to time. The trading will be as per the normal settlement cycle.</p>
<p>Settlement of Purchase / Sale on stock exchange(s)</p>	<p>Buying / Selling units of the Scheme on the stock exchange is similar to buying / selling any other listed securities. If an investor has bought units, the investor has to pay the purchase amount to the broker / sub-broker such that the amount paid is realized before funds pay-in day of the</p>

	<p>settlement cycle on the exchange. If an investor has sold units, the investor has to deliver the units to the broker/ sub-broker before the securities pay-in day of the settlement cycle on the exchange. The units (in case of units bought) and the funds (in the case of units sold) are paid out to the broker on the payout day of the settlement cycle on the exchange. The trading member would pay the money or units to the investor in accordance with the time prescribed by the stock exchange regulation. If an investor has bought units, he/she should give standing instructions for 'Delivery-In' to his/her DP for accepting units in his/her beneficiary account. An investor should give the details of his/her beneficiary account and the DP-ID of his/her DP to his/her trading member. The trading member will transfer the units directly to his/her beneficiary account on receipt of the same from exchange's clearing corporation.</p> <p>An investor who has sold units should instruct his/her Depository Participant (DP) to give 'Delivery Out' instructions to transfer the units from his/her beneficiary account to the Pool Account of his/her trading member through whom he/she has sold the units. The details of the Pool Account of investor's trading member to which the units are to be transferred, unit quantity, etc. should be mentioned in the delivery out instructions given by him/her to the DP. The instructions should be given well before the prescribed securities pay-in day. The exchange regulations stipulate that the trading member should pay the money or units to the investor within 24 hours of the payout.</p> <p>All investors including Authorized Participants, may sell their units in the stock exchange(s) on which these units are listed on all the Trading Days of the stock exchange. The Mutual Fund will repurchase units from Authorised Participant(s)/Investor(s) on any Business Day provided the units offered for repurchase is not less than the Creation Unit Size and multiples thereafter.</p>						
<p>Rolling Settlement</p>	<p>The Fund intends to follow the settlement pattern and practices of National Stock Exchange and BSE Limited as per the trade/s executed on the respective exchange.</p> <p>Rolling Settlement As per the SEBI's circular dated March 4, 2003, the rolling settlement on T+2 basis for all trades has commenced from April 1, 2003 onwards. The Pay-in and Pay-out of funds and the units will take place 2 working days after the trading date.</p> <p>The pay-in and pay-out days for funds and securities are prescribed as per the Settlement Cycle. <p>Creation/Redemption of Units directly from the Fund</p>	<p>The Authorised Participant(s)/Investor(s) can directly buy/sell with the funds in Creation Unit Size as follows:-</p> <p>The Fund creates/ redeems units of the Scheme in large blocks known as "Creation Unit". The value of the "Creation Unit" is the basket of the Underlying Index securities called as the "Portfolio Deposit" and a "Cash Component" which will be exchanged for a fixed number of units of the Scheme. The Portfolio Deposit and the Cash Component, which defines the Creation Unit are defined separately. The Portfolio Deposit and Cash Component may change from time to time and will be announced by AMC/Fund through its website and other data providers.</p> <p>Note: Units of the Scheme if less than Creation Unit cannot be purchased/ redeemed directly with the Fund except for certain circumstances as listed in this document. In case of redemptions by NRIs, requisite TDS will be deducted from the respective redemption proceeds</p>						
<p>Procedure for Purchasing in Creation Unit Size</p>	<p>Creation of Units</p> <p>The requisite securities constituting the Portfolio Deposit have to be transferred to the DP account of the respective Scheme on the day of receipt of the application, while the Cash Component, as applicable on that business day; has to be paid to the Fund. On confirmation of the receipt of Portfolio Deposit/ equivalent amount of cash by the Custodian/ AMC, the AMC will credit the equivalent number of units of the Scheme into the investor's DP account.</p> <p>In case of cash subscription of units of the Schemes in 'Creation Unit' Size, the purchase request for creation of units shall be made by such investor to the Fund/AMC where upon the Fund/AMC will arrange to buy the underlying portfolio of securities on behalf of the investor. The cost of purchase of securities including brokerage charges, transaction handling charges and all other incidental costs/ profits/ losses arising out of market movement during the purchase of securities shall be borne by the investor.</p> <p>The Portfolio Deposit and Cash Component for units of the Scheme may change from time to time due to changes in the Underlying Index on account of corporate actions and changes to the index constituents.</p> <p>The creation request can be made to the AMC/ Fund in a duly filled application form. Application Forms for Creation of units can be obtained from the office of AMC.</p>						

	<p>The AMC will not extend credit facility to the Authorized Participants/ investors. Authorized participants or investors will get the NAV as and when they bring the Portfolio Deposit/ equivalent amount of cash and Cash Component .</p>
Procedure for Redeeming in Creation Unit Size	<p><u>Redemption of Units :</u></p> <p>The requisite number of units of the Scheme equivalent to the Creation Unit lot size has to be transferred to the DP account of the respective Scheme, while the Cash Component, as applicable on that business day to be paid to the Scheme. On confirmation of the receipt of unit of the Schemes by the Custodian/ AMC, the AMC shall extinguish the units and credit the Portfolio Deposit to the investor's DP account and pay the Cash Component, as applicable.</p> <p>The Fund may allow cash redemption of the units of the Scheme in Creation Unit Size. Redemption request shall be made by such investor to the Fund before the stipulated cut-off time whereupon the Fund shall arrange to sell the underlying portfolio of securities on behalf of the investor. Accordingly, the cost of sale of securities including brokerage charges, transaction handling charges and any other incidental costs/ profits/ losses arising out of market movement during the sale of securities shall be borne by investor. Payment will then be made to the Investor net of all the above mentioned charges.</p> <p>The Portfolio Deposit and Cash Component for the units of the Scheme may change from time to time due to changes in the Underlying Index on account of corporate actions and changes to the index constituents</p>
Dividend Policy	<p>The Trustee may declare Dividend to the Unit holders under the Scheme subject to the availability of distributable surplus and the actual distribution of Dividends and the frequency of distribution will be entirely at the discretion of the Trustee. Such Dividend will be payable to the Unit holders whose names appear on the register of Unit holders on the record date as fixed for the respective Schemes. The Dividend declared will be paid net of tax deducted at source, wherever applicable, to the Unit holders within 30 days from the declaration of the Dividend. There is no assurance or guarantee to the Unit holders as to the rate of Dividend distribution nor that will the Dividend be paid regularly. If the Fund declares Dividend, the NAV of the respective Schemes will stand reduced by the amount of Dividend and Dividend distribution tax (if applicable) paid. All the Dividend payments shall be in accordance and compliance with SEBI & NSE Regulations, as applicable from time to time.</p>
Dematerialization	<ol style="list-style-type: none"> 1. Units of the Scheme will be available only in the Dematerialized form. 2. The applicant under the Scheme will be required to have a beneficiary account with a Depository Participant of NSDL/CDSL and will be required to indicate in the application the DP's name, DP ID Number and its beneficiary account number with DP. 3. The units of the Scheme are to be issued/ repurchased and traded compulsorily in dematerialized form, no request for rematerialisation of units of the Scheme will

	be accepted. 4. Applications without relevant details of their depository account are liable to be rejected.

Consolidated Accounts Statements (CAS)

1. The Consolidated Account Statement (CAS) for each calendar month will be issued on or before tenth day of succeeding month to the investors who have provided valid Permanent Account Number (PAN). Due to this regulatory change, AMC shall now cease to send physical account statement to the investors after every financial transaction** including systematic transactions. Further, CAS will be sent via email where any of the folios consolidated has an email id or to the email id of the first unit holder as per KYC records.

**The word 'financial transaction' shall include purchase, redemption, switch, dividend payout, dividend reinvestment, systematic investment plan, systematic withdrawal plan and systematic transfer plan.

2. For folios not included in the Consolidated Account Statement (CAS), the AMC shall henceforth issue account statement to the investors on a monthly basis, pursuant to any financial transaction in such folios on or before tenth day of succeeding month.

In case of a New Fund Offer Period (NFO), the AMC shall send confirmation specifying the number of units allotted to the applicant by way of a physical account statement or an email and/or SMS's to the investor's registered address and/or mobile number not later than five business days from the date of closure of the NFO.

3. In case of a specific request received from the unit holder, the AMC shall provide the account statement to the investors within 5 business days from the receipt of such request.

4. In the case of joint holding in a folio, the first named Unit holder shall receive the CAS/account statement. The holding pattern has to be same in all folios across Mutual Funds for CAS.

Further, in case if no transaction has taken place in a folio during the period of six months ended September 30 and March 31, the CAS detailing the holdings across all Schemes of all mutual funds, shall be emailed at the registered email address of the unitholders on half yearly basis, on or before tenth day of succeeding month, unless a specific request is made to receive the same in physical form.

5. Each CAS issued to the investors shall also provide the total purchase value / cost of investment in each scheme.

Further, CAS issued for the half-year (September/ March) shall also provide:

- a. The amount of actual commission paid by AMCs/Mutual Funds (MFs) to distributors (in absolute terms) during the half-year period against the concerned investor's total investments in each MF scheme. The term 'commission' here refers to all direct monetary payments and other payments made in the form of gifts / rewards, trips, event sponsorships etc.

	<p>by AMCs/MFs to distributors. Further, a mention may be made in such CAS indicating that the commission disclosed is gross commission and does not exclude costs incurred by distributors such as service tax (wherever applicable, as per existing rates), operating expenses, etc.</p> <p>b. D. COMPUTATION OF NAV:

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date. The Fund shall value its investments according to the valuation norms, as specified in Schedule VIII of the Regulations, or such norms as may be prescribed by SEBI from time to time and as stipulated in the Valuation Policy and Procedures of the Fund, provided in SAI.

The NAV of the Scheme shall be rounded off upto two decimals.

NAV of units under the Scheme shall be calculated as shown below:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provision}}{\text{No. of Units outstanding under Scheme}}$$

IV. FEES AND EXPENSES

This section outlines the expenses that will be charged to the scheme.

A. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like marketing and advertising, registrar expenses, printing and stationary, bank charges etc.

#The Scheme shall not incur any distribution expenses/ commission.

The purpose of the above table is to assist the investor in understanding the various costs and expenses that an investor in the Scheme will bear. The above expenses may increase/decrease

as per actual and/or any change in the Regulations.

These estimates have been made in good faith as per information available to the Investment Manager based on past experience. Types of expenses charged shall be as per the SEBI (MF) Regulations.

The aforesaid expenses are fungible within the overall maximum limit prescribed under SEBI (Mutual Funds) Regulations. This means that mutual fund can charge expenses within overall limits, without any internal cap on the aforesaid expenses head.

As per the Regulations, the maximum recurring expenses that can be charged to the Scheme shall not exceed one and one half percent (1.5%) of daily net assets.

Pursuant to SEBI circular no. CIR/IMD/DF/21/2012 dated September 13, 2012 and SEBI (Mutual Funds) Second Amendment Regulations, 2012, following additional costs or expenses may be charged to the scheme, namely:

- (i) The AMC may charge service tax on investment and advisory fees to the scheme of the Fund in addition to the maximum limit of total expenses ratio as prescribed in Regulation 52 of the Regulations, whereas service tax on other than investment and advisory fees, if any, shall be borne by the scheme within the maximum limit as per regulation 52 of the Regulations.
- (ii) expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from such cities as specified by the Securities and Exchange Board of India, from time to time are at least –

- 30 per cent of the gross new inflows into the scheme, or;
- 15 per cent of the average assets under management (year to date) of the scheme,

whichever is higher;

Provided that if inflows from such cities are less than the higher of the above, such expenses on daily net assets of the scheme shall be charged on proportionate basis;

Provided further that expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities;

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.

Additionally at least 2 basis points on daily net assets within the maximum limit of overall expense Ratio shall be annually set apart for investor education and awareness initiatives.

Further, the brokerage and transaction cost incurred for the purpose of execution of trade may be capitalized to the extent of 12 bps and 5bps for cash market transactions and derivatives transactions respectively. Any payment towards brokerage and transaction cost, over and above the said 12 bps and 5bps for cash market transactions and derivatives transactions respectively may be charged to the Scheme within the maximum limit of Total Expense Ratio as prescribed under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996. Service tax on brokerage and transaction cost paid for execution of trade, if any, shall be within the limit prescribed under regulation 52 of the Regulations.

Subject to Regulations, expenses over and above the prescribed limit shall be borne by the Asset Management Company.

C. LOAD STRUCTURE

Load is an amount, which is paid by the investor to redeem the units from the scheme. This amount is used by the AMC to pay trail commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.icicipruamc.com) or may call your distributor.

Entry Load:

Not Applicable. In terms of SEBI circular no. SEBI/IMD/CIR No. 4/168230/09 dated June 30, 2009 has notified that, w.e.f. August 01, 2009, there will be no entry load charged to the schemes of the Mutual Fund and the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load:

There will be no exit load for units sold through the secondary market on the NSE/BSE. Investors shall note that the brokerage on sales of the units of the scheme on the stock exchanges shall be borne by the investors.

The Authorised Participant(s)/Investor(s) can redeem units directly with the fund. Currently there is no exit load applicable for the said transactions.

However, during the process of creation/redemption there may be transaction costs and/or other incidental expenses (forming part of the Cash Component), which are liable to be borne by the investors/Authorized Participants.

Investors, other than Authorised Participants, can sell units in less than Creation Unit Size of the Scheme directly to the Mutual Fund without any exit load in the following cases:

- if the traded price of the ETF units is at a discount of more than 3% to the NAV for continuous 30 days;
- if discount of bid price to applicable NAV is more than 3% over a period of 7 consecutive trading days;
- if no quotes are available on exchange for 3 consecutive trading days;
- when the total bid size on the exchange(s) is less than half creation unit size daily, averaged over a period of 7 consecutive trading days.

Under these circumstances, investors, as specified above, can redeem units of the Scheme directly with the fund house without any exit load. The aforesaid criteria for the direct redemption with the fund house are also available at the website of the AMC at '<http://www.icicipruamc.com/Acceptance-of-Direct-Redemption-for-ETFs.aspx>'. The mutual

fund will track the aforesaid liquidity criteria and display it on its website viz., www.icicipruamc.com if the same is triggered, no exit load would be applicable in such cases.

Any imposition or enhancement in the load shall be applicable on prospective investments only.

The investor is requested to check the prevailing load structure of the scheme before investing. For any change in load structure AMC will issue an addendum and display it on the website/Investor Service Centres. An advertisement to this effect will be given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the AMC is situated.

Subject to the Regulations, the Trustee reserves the right to modify/alter the load structure for redemption by Authorised Participants/ Investors directly with the Fund. Such changes will be applicable for prospective investments. The Trustee shall arrange to display a notice in the Customer Service Centers of the AMC before the change of the then prevalent load structure. The SIDs will be updated in respect of changes in the load structure as per the addendum issued. The addendum detailing the changes in the load structure will be published by AMC in 2 daily newspapers- one in regional language and the other in English language newspaper. Changes in the fundamental attributes may be stamped in the acknowledgement slip issued by the Fund after the changes in load structure.

D. WAIVER OF LOAD FOR DIRECT APPLICATIONS

Not applicable

V. RIGHTS OF UNITHOLDERS

Please refer to SAI for details.

VI. PENALTIES, PENDING LITIGATION OR PROCEEDINGS, FINDINGS OF INSPECTIONS OR INVESTIGATIONS FOR WHICH ACTION MAY HAVE BEEN TAKEN OR IS IN THE PROCESS OF BEING TAKEN BY ANY REGULATORY AUTHORITY

- 1) **All disclosures regarding penalties and action(s) taken against foreign Sponsor(s) may be limited to the jurisdiction of the country where the principal activities (in terms of income / revenue) of the Sponsor(s) are carried out or where the headquarters of the Sponsor(s) is situated. Further, only top 10 monetary penalties during the last three years shall be disclosed.**
- In March 2013, Prudential plc and its wholly-owned subsidiary The Prudential Assurance Company Limited settled with the UK's former financial services regulator, the Financial Services Authority (FSA) over issues relating to Prudential's unsuccessful bid to acquire AIA, the Asian subsidiary of AIG, in early 2010.

These Prudential companies agreed to pay fines totalling £30 million, in respect of a decision by the FSA that it and the United Kingdom Listing Authority (UKLA) should have been informed earlier about Prudential's contemplation of the potential transaction. The Group Chief Executive, Tidjane Thiam, also agreed to be censured in respect of a decision by the FSA that it should have been informed earlier. The Final Notices published by the FSA on 27 March 2013 concerning these decisions accordingly represent the final resolution of the matter.

In a public statement accompanying the Final Notices dated 27 March 2013, the FSA stated that the investigation was into past events and did not concern the current conduct of the management of the Prudential Group. The FSA accepted that Prudential did consider their obligations in forming their assessment in respect of informing the regulator. Therefore, although the FSA considered that the circumstances of the breaches were serious, the FSA did not consider the breaches were reckless or intentional.

In a public statement regarding the FSA's findings dated 27 March 2013, the Board of Prudential confirmed that the Group Chief Executive acted at all times in the interests of the Company and with the full knowledge and authority of the Board. Prudential works diligently to maintain close and positive relationships with its regulators, and the Group's relationship with its UK regulators continues to be good.

Note:

1. Prudential plc was found to have breached Listing Principle 6 of the UKLA, requiring that "A listed company must deal with the FSA in an open and co-operative manner";
 2. The Prudential Assurance Company Limited was found to have breached Principle 11 of the FSA's Principles for Businesses, requiring that "A firm must deal with its regulators in an open and cooperative way, and must disclose to the FSA appropriately anything relating to the firm of which the FSA would reasonably expect notice"; and
 3. Tidjane Thiam was found to have been "knowingly concerned" in The Prudential Assurance Company Limited's breach of Principle 11. The FSA accepted that the breach by Mr Thiam (and Prudential) was neither reckless nor intentional
- A Group holding by MAGIM in Storebrand ASA was not reported by the Disclosures team before the deadline as required under the Norwegian Securities Trading Act Rules. The disclosure, which related to an "above 5% holding", was made to the company and regulator on Friday 30th January 2015 at 17.31. As this was post close of business in Norway it was deemed to be received on Monday 2nd February, resulting in a breach of two days. The Norwegian regulator has now issued a "violation charge" of 100,000 Norwegian Kroner (approximately £8,400) against Prudential plc.
- 2) **In case of Indian Sponsor(s), details of all monetary penalties imposed and/ or action taken during the last three years or pending with any financial regulatory body or governmental authority, against Sponsor(s) and/ or the AMC and/ or the Board of Trustees /Trustee Company; for irregularities or for violations in the financial services sector, or for defaults with respect to share holders or debenture holders and depositors, or for economic offences, or for violation of securities law. Details of settlement, if any, arrived at with the aforesaid authorities during the last three years shall also be disclosed.**

Cases pertaining to ICICI Bank Ltd. (the Bank):

- Reserve Bank of India (RBI) has imposed penalty on the Bank in respect of the following:
 - In 2012, a penalty of Rs. 10,000/- for delayed filing of FC-GPR return for an FDI transaction of a customer. The Bank has paid the penalty of Rs. 10,000/- to RBI vide letter dated March 9, 2012.
 - Violation in opening and conduct of account of M/s SpeakAsia Online Pte Ltd resulting in penalty of Rs. 3.0 mn being imposed by RBI which was paid in October 2012.
 - Penalty imposed of Rs. 66,000/- for bouncing of 2 SGL deals which was paid in May 2012.
 - On June 10, 2013, RBI imposed a penalty of Rs. 10.01 million on ICICI Bank, in exercise of the powers vested with it under the provisions of Section 47(A)(1)(c) read with Section 46(4)(i) of the Banking Regulation Act, 1949 and subsection (3) of section 11 of FEMA on operating matters pertaining to KYC. The Bank has paid the penalty to RBI.
 - On July 25, 2014, RBI imposed a penalty of Rs. 4.0 million on the Bank, in exercise of powers vested with it under the provisions of Section 47A(1) of the Banking Regulation Act, 1949 with respect to facilities extended to a corporate borrower by the Bank. The Bank vide letter dated August 7, 2014 has paid the penalty to RBI.
 - On December 17, 2014, RBI imposed a penalty of Rs. 5.0 million on the Bank in exercise of powers vested with it under the provisions Section 47A(1)(c) read with Section 46(4)(i) of the Banking Regulation Act, 1949 for charges of

non-compliance with the directions/guidelines issued by Reserve Bank of India in connection with Know Your Customer (KYC)/Anti Money Laundering (AML). The Bank has paid the penalty to RBI on December 30, 2014.

- A penalty of Rs. 1.4 million was imposed on the Bank in February 2015 by the Financial Intelligence Unit, India (FIU-IND). The Bank has filed an appeal against the penalty, which was imposed for failure in reporting of the attempted suspicious transactions pertaining to media sting incidents.

- 3) **Details of all enforcement actions taken by SEBI in the last three years and/ or pending with SEBI for the violation of SEBI Act, 1992 and Rules and Regulations framed there under including debarment and/ or suspension and/ or cancellation and/ or imposition of monetary penalty/adjudication/enquiry proceedings, if any, to which the Sponsor(s) and/ or the AMC and/ or the Board of Trustees /Trustee Company and/ or any of the directors and/ or key personnel (especially the fund managers) of the AMC and Trustee Company were/ are a party. The details of the violation shall also be disclosed.**

The Securities and Exchange Board of India (SEBI) had issued a show cause notice to the Bank under SEBI (Procedure for Holding Inquiry and imposing Penalties by Adjudicating Officer) Rules, 1995 for delay of 81 days in filing disclosures under the SEBI (Prohibition of Insider Trading) Regulations 1992, for change in shareholding exceeding 2% in a listed Company, when prior shareholding exceeded 5%. This was in respect of Bank's holding in Jord Engineers India Ltd which was largely unlisted, and trading in the scrip was suspended, though the Company was listed. The bank filed consent terms and paid Rs. 1 lac to SEBI pursuant to the consent order passed in May 2012.

- 4) **Any pending material civil or criminal litigation incidental to the business of the Mutual Fund to which the Sponsor(s) and/ or the AMC and/ or the Board of Trustees /Trustee Company and/ or any of the directors and/ or key personnel are a party should also be disclosed separately.**

Nil.

- 5) **Any deficiency in the systems and operations of the Sponsor(s) and/ or the AMC and/ or the Board of Trustees/Trustee Company which SEBI has specifically advised to be disclosed in the SID, or which has been notified by any other regulatory agency, shall be disclosed. –**

Nil
