I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 22.2 lacs made by it towards setting up the Fund.
- The present Scheme is not a guaranteed or assured return Scheme.
- ICICI Prudential Fixed Maturity Plan - Series 78 – 1212 Days Plan A is the name of the Scheme and does not in any manner indicate either the quality of the Scheme or their future prospects and returns.
- The NAVs of the Scheme may be affected by changes in the general market conditions, factors and forces affecting capital market in particular, level of interest rates, various market related factors and trading volumes, settlement periods and transfer procedures.
- The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.
- Changes in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to Investors in the Scheme.
- Investors in the Scheme are not being offered any guaranteed/indicated returns.
- From time to time and subject to the Regulations, the Sponsors, the Mutual Funds and investment companies managed by them, their affiliates, their associate companies, subsidiaries of the Sponsors, and the AMC may invest either directly or indirectly in the Scheme. The funds managed by these affiliates, associates, the Sponsors, subsidiaries of the Sponsors and /or the AMC may acquire a substantial portion of the Scheme's Units and collectively constitute a major investor in the Scheme. Further, as per SEBI (Mutual Funds) Regulations, 1996, in case the AMC invests in any of the schemes managed by it, it shall not be entitled to charge any fees on such investments.
- The Scheme may invest in other schemes managed by the AMC or in the Schemes of any other Mutual Funds, provided it is in conformity to the investment objectives of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments.
- From time to time and subject to the regulations, the AMC may invest in this Scheme. Further, as per the Regulation, in case the AMC invests in the Scheme, it shall not be entitled to charge any fees on such investments.
- Mutual funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Schemes. The various factors which impact the value of the Scheme's investments include, but are not limited to, fluctuations in the bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws in various countries, liquidity of the underlying instruments, settlement periods, trading volumes overseas etc.

- Different types of securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

Scheme Specific Risk Factors and Risk management strategies

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in debt and have designed risk management strategies, which are embedded in the investment process to manage such risks.

Risk associated with close ended Schemes:

A close ended Scheme endeavors to achieve the desired returns only at the scheduled maturity of the Scheme. Investors who wish to exit/redeem before the scheduled maturity date may do so through the stock exchange mode, if they have opted to hold Units in a demat form, by mentioning their demat details on the NFO application form. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. Hence, Unit Holders who sell their Units in a Scheme prior to maturity may not get the desired returns.

Risk & Description specific to Debt	Risk mitigants / management strategy
<p><u>Market Risk</u> As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.</p>	<p>The Scheme will invest in a basket of debt and money market securities maturing on or before maturity of the Scheme with a view to hold them till the maturity of the Scheme. While the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more stable. To that extent the interest rate risk will be mitigated at the maturity of the scheme.</p>
<p><u>Liquidity or Marketability Risk</u> This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM).</p>	<p>The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds.</p> <p>Liquidity risk is today characteristic of the Indian fixed income market. The Scheme will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.</p>
<p><u>Credit Risk</u> Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).</p>	<p>Management analysis will be used for identifying company specific risks. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower.</p>
<p><u>Reinvestment Risk</u> This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.</p>	<p>Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.</p>

Risks associated with Investing in Securitised Debt

The Scheme will not invest in Securitised Debt.

Risks associated with 'Short Selling' and 'Securities Lending'

The Scheme will not do any 'Short Selling' and 'Securities Lending' activity.

Risks associated with investment in Foreign securities

The Scheme will not have any exposure in Foreign securities.

Risks associated with investment in Derivatives

The Scheme will not have any exposure to derivatives.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. These conditions will be complied with immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfillment with the condition of minimum 20 investors, the Plan shall be wound up in accordance with Regulation 39(2)(c) of SEBI (Mutual Funds) Regulations, 1996 automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25% holding by a single investor on the date of allotment, the application to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within 5 business days of the date of closure of the New Fund Offer.

C. SPECIAL CONSIDERATIONS, if any

Investors are urged to study the terms of the SID carefully before investing in this Scheme, and to retain this SID for future reference.

Any tax liability arising post maturity on account of change in the tax treatment with respect to dividend distribution tax, by the tax authorities, shall be solely borne by the investor and not by the AMC, the Trustees or the Mutual Fund.

Credit Evaluation Policy for investment in debt securities

The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks so the investment process is firmly research oriented. It comprises qualitative as well as quantitative measures. Qualitative factors like management track record, group companies, resource-raising ability, extent of availability of banking lines, internal control systems, etc are evaluated in addition to the business model and industry within which the issuer operates as regards industry/model-specific risks working capital requirements, cash generation, seasonality, regulatory environment, competition, bargaining power, etc. Quantitative factors like debt to equity ratio, profit and loss statement analysis, balance sheet analysis are taken into further consideration.

Macroeconomic call is taken on interest rate direction by careful analysis of various influencing factors like Inflation, Money supply, Private sector borrowing, Government borrowing, currency market movement, Central Bank policy, local fiscal and monetary policy, global interest rate scenario and Market sentiment. Interest rate direction call is supplemented by technical analysis of market and short term influencing factors like trader position, auction/issuance of securities, release of economic numbers, offshore market position, etc. Interest rate direction call and anticipation of yield curve movement forms the basis of portfolio positioning in duration and spread terms. Credit research is done on a regular basis for corporate having high investment grade rating. Credit research includes internal analysis of rating rationale, and financial statements (annual reports and quarterly earnings statements) of the issuer, for the last 1-3 years evaluating

amongst other metrics, relevant ratios of profitability, capital adequacy, gearing, turnover and other inputs from external agencies. On an ongoing basis, the credit analyst keeps track of credit profile of the issuer, possible credit risks reflected in change in outlook of rating agencies, external developments affecting the issuer etc. Internal credit call is a pre-requisite for all investments since the investment universe is primarily high-grade credit instruments. Credit research is also used to minimize credit migration risk and for generating relative value trade ideas. Stable to higher rating on maturity vis-à-vis issuance is the guiding factor for investment decisions from credit point of view.

POSITION OF DEBT MARKET IN INDIA

Indian debt markets, in the early nineties, were characterised by controls on pricing of assets, segmentation of markets and barriers to entry, low levels of liquidity, limited number of players, near lack of transparency, and high transactions cost. Financial reforms have significantly changed the Indian debt markets for the better. Most debt instruments are now priced freely on the markets; trading mechanisms have been altered to provide for higher levels of transparency, higher liquidity, and lower transactions costs; new participants have entered the markets, broad basing the types of players in the markets; methods of security issuance, and innovation in the structure of instruments have taken place; and there has been a significant improvement in the dissemination of market information. There are three main segments in the debt markets in India, viz., Government Securities, Public Sector Units (PSU) bonds, and corporate securities. A bulk of the debt market consists of Government Securities. Other instruments available currently include Corporate Debentures, Bonds issued by Financial Institutions, Commercial Paper, Certificates of Deposits and Securitised Debt. Securities in the Debt market typically vary based on their tenure and rating. Government Securities have tenures from one year to thirty years whereas the maturity period of the Corporate Debt now goes upto sixty years and more (perpetual). Perpetual bonds are now issued by banks as well. Securities may be both listed and unlisted and there is increasing trend of securities of maturities of over one year being listed by issuers. While in the corporate bond market, deals are conducted over telephone and are entered on principal-to-principal basis, due to the introduction of the Reserve Bank of India's NDS- Order Matching system a significant proportion of the government securities market is trading on the new system.

The yields and liquidity on various securities as on October 31, 2015 are as under:

Issuer	Instrument	Maturity	Yields (%)	Liquidity
GOI	Treasury Bill	91 days	7.08%-7.10%	High
GOI	Treasury Bill	364 days	7.18%-7.18%	High
GOI	Short Dated	1-3 Yrs	7.20%-7.47%	High
GOI	Medium Dated	3-5 Yrs	7.47%-7.82%	High
GOI	Long Dated	5-10 Yrs	7.82%-7.64%	High
Corporates	Taxable Bonds (AAA)	1-3 Yrs	7.75%-8.03%	Medium
Corporates	Taxable Bonds (AAA)	3-5 Yrs	8.03%-8.14%	Low to medium
Corporates	CPs (A1+)	3 months	7.40%-7.43%	Medium to High

E.WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme will invest in a basket of permissible securities maturing on or before maturity of the Scheme. The Scheme will invest in securities with a view to hold them till the maturity. To that effect the Scheme will follow a buy and hold strategy to investment. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks.

With the aim of controlling risks, rigorous in-depth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC. The credit evaluation includes a study of the operating environment of the company, the past track record as well as the future prospects of the issuer, the short as well as longer-term financial health of the issuer. Rated debt instruments in which the Scheme invests will be of investment grade as rated by a credit rating agency. The AMC will be guided by the ratings of such Rating Agencies as approved by SEBI to carry out the functioning of Rating Agencies.

In addition, the investment team of the AMC will study the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The AMC would use this analysis to attempt to predict the likely direction of interest rates and position the portfolio appropriately to take advantage of the same.

The Scheme could invest in Fixed Income Securities issued by government, quasi government entities, corporate issuers, structured notes and multilateral agencies in line with the investment objectives of the Scheme and as permitted by SEBI from time to time.

Further, only top 10 monetary penalties during the last three years shall be disclosed.**

- In March 2013, Prudential plc and its wholly-owned subsidiary The Prudential Assurance Company Limited settled with the UK's former financial services regulator, the Financial Services Authority (FSA) over issues relating to Prudential's unsuccessful bid to acquire AIA, the Asian subsidiary of AIG, in early 2010.

These Prudential companies agreed to pay fines totalling £30 million, in respect of a decision by the FSA that it and the United Kingdom Listing Authority (UKLA) should have been informed earlier about Prudential's contemplation of the potential transaction. The Group Chief Executive, Tidjane Thiam, also agreed to be censured in respect of a decision by the FSA that it should have been informed earlier. The Final Notices published by the FSA on 27 March 2013 concerning these decisions accordingly represent the final resolution of the matter.

In a public statement accompanying the Final Notices dated 27 March 2013, the FSA stated that the investigation was into past events and did not concern the current conduct of the management of the Prudential Group. The FSA accepted that Prudential did consider their obligations in forming their assessment in respect of informing the regulator. Therefore, although the FSA considered that the circumstances of the breaches were serious, the FSA did not consider the breaches were reckless or intentional.

In a public statement regarding the FSA's findings dated 27 March 2013, the Board of Prudential confirmed that the Group Chief Executive acted at all times in the interests of the Company and with the full knowledge and authority of the Board. Prudential works diligently to maintain close and positive relationships with its regulators, and the Group's relationship with its UK regulators continues to be good.

Note:

1. Prudential plc was found to have breached Listing Principle 6 of the UKLA, requiring that "A listed company must deal with the FSA in an open and co-operative manner";
 2. The Prudential Assurance Company Limited was found to have breached Principle 11 of the FSA's Principles for Businesses, requiring that "A firm must deal with its regulators in an open and cooperative way, and must disclose to the FSA appropriately anything relating to the firm of which the FSA would reasonably expect notice"; and
 3. Tidjane Thiam was found to have been "knowingly concerned" in The Prudential Assurance Company Limited's breach of Principle 11. The FSA accepted that the breach by Mr Thiam (and Prudential) was neither reckless nor intentional
- A Group holding by MAGIM in Storebrand ASA was not reported by the Disclosures team before the deadline as required under the Norwegian Securities Trading Act Rules. The disclosure, which related to an "above 5% holding", was made to the company and regulator on Friday 30th January 2015 at 17.31. As this was post close of business in Norway it was deemed to be received on Monday 2nd February, resulting in a breach of two days. The Norwegian regulator has now issued a "violation charge" of 100,000 Norwegian Kroner (approximately £8,400) against Prudential plc.
