II. INTRODUCTION

A. Risk Factors

Std Obs 2

Standard Risk Factors:

- Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- As the price/value/interest rates of the securities in which the Schemes invest fluctuates, the value of your investment in the Schemes may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Schemes.
- The names of the Schemes do not in any manner indicate either the quality of the Schemes or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Schemes beyond the initial contribution of Rs. 50,000/- made by it towards setting up the Mutual Fund. The Associates of the Sponsor are not responsible or liable for any loss or shortfall resulting from the operation of the Scheme.
- The present Schemes are not guaranteed or assured return Schemes.

Scheme Specific Risk Factors

- **Liquidity Risk on account of unquoted and unlisted securities:** Some securities, which are not quoted on the stock exchanges, may be illiquid in nature and may carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the Regulatory limits, the AMC may choose to invest in unlisted securities that offer returns commensurate with risks. Liquidity risk may also arise due to high impact costs for liquidation of securities held in the portfolio. However, in closed ended schemes, liquidity risk on account of underlying securities' market liquidity is mitigated as intermediate liquidity is not required. Liquidity access is done through contractual maturity of the security, which is in line with the term of the schemes.
- **Credit Risk and Market Risk:** Money market and debt securities are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations (credit risk).The Investment Manager will endeavor to create a portfolio with high credit quality in the required investment horizon. These securities may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of the creditworthiness of the issuer, among others (market risk). The Investment Manager will endeavor to manage credit risk for rated and unrated debt securities through in-house credit analysis. Unrated debt securities may be perceived to carry a higher credit risk since they are not rated by an independent rating agency. An independent RQA team within the AMC is responsible for managing the credit risk through in-house credit analysis.
- **Reinvestment Risk:** Investments made by the Schemes are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the securities in the Schemes are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- **Term Structure of Interest Rates (TSIR) Risk:** The NAV of the Schemes' Units, to the extent that the Scheme is invested in fixed income securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.
- **Rating Migration Risk:** Fixed income securities are exposed to rating migration risk, which could impact the price on account of change in the credit rating. For example: One notch downgrade of a AAA rated issuer to AA+ will have an adverse impact on the price of the security and vice-versa for an upgrade of a AA+ issuer.
- **Concentration Risk:** Concentration risk arises due to concentrated investment in single security or single issuer.
- **Event Risk:** Price risk due to company or sector specific event.

- Investments in the Schemes made in foreign currency by a Unit Holder are subject to the risk of fluctuation in the value of Indian Rupee.

Risk Factor associated with Listing of Units

- Trading in the Units of the Schemes on the Exchange may be halted because of market conditions or for reasons in view of the Exchange Authorities or SEBI, rendering trading in the Units of the Schemes inadvisable. In addition, trading of the Units of the Schemes is subject to trading halts caused by extraordinary market volatility and pursuant to the Stock Exchange's/market regulator's 'circuit filter' rules. There can be no assurance that the requirements of the concerned Stock Exchange necessary to maintain the listing of the units of the Schemes will remain unchanged.
- Unit holders may find it difficult or uneconomical to liquidate their investments at any particular time. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. As a result, a Unit holder must be prepared to hold the units until the maturity of the Schemes.
- Although the Units of the Schemes will be listed on the Stock Exchange, there can be no assurance that an active secondary market will develop or be maintained.
- The Units of the Schemes may trade at a significant discount or premium on the Stock Exchange. The NAV of the Schemes will fluctuate in accordance with market supply and demand for the units of the Schemes as well as be affected by changes in NAV.
- **Regulatory Risk:** Any changes in trading regulations by the Stock Exchange or SEBI among other things may also result in a wider premium/ discount to the NAV of the Schemes. The AMC and the Trustees will not be liable for any loss suffered by investors due to connectivity problems with the depositories due to the occurrence of any event beyond their control.
- In case of investments by NRIs during NFO, at the time of redemption of units, TDS will be deducted at the applicable rate. However, in respect of those Unit Holders who have acquired the Units on the Stock Exchange, the Unit Holders would need to provide a certificate from a Chartered Accountant certifying the details of acquisition of Units to the Fund within two days before the maturity of the Scheme, so as to enable the Fund to deduct TDS at the applicable rates. In the event of such details not being provided, the Fund would deduct TDS on the redemption proceeds at the highest rate of TDS applicable.
- The Trustee reserves the right to list the Units of the Schemes on any other recognized Stock Exchange in India, as may be deemed fit, in which case the investors may face risks related to an undeveloped market, delay in settlements etc.
- There may be acts/omissions on the part of the Stock Exchange resulting in the cancellation of Unit Holder's orders or the execution of orders on erroneous terms.

Risk Factor associated with Close-ended Schemes

Investing in close-ended Schemes is more appropriate for seasoned investors. A close-ended Scheme endeavors to achieve the desired returns only at the scheduled maturity of the Scheme. Investors who wish to exit/redeem before the scheduled maturity date may do so through the stock exchange mode, if they have opted to hold Units in a demat form, by mentioning their demat details on the NFO application form. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. Hence, Unit Holders who sell their Units in a Scheme prior to maturity may not get the desired returns.

Risk Management Strategies

AMC is committed to a strong control and compliance environment and ensuring that the management structure is appropriate to the scale of the business. AMC's fiduciary business is managed according to the rules and regulations stipulated for Asset Management Companies by the Securities & Exchange Board of India (SEBI) and also incorporate AMC's internal policies. The AMC has systems and processes to monitor all the investment restrictions specified by SEBI and in this document on a regular basis.

- i. **Interest Rate Risk:** Fall in the value of the portfolio due to upward movement of interest rates - Although this risk exists in a fixed income portfolio, the closed ended nature of the Scheme mitigates the risk as portfolio construction at the time of inception leads to creation of a portfolio with securities whose maturity date is in line with the maturity date of the Scheme.
- ii. **Credit Risk:** Issuer's inability to meet interest and principal payments on its debt obligations - Credit risk management is an independent function performed by the Risk team. The team establishes and continuously monitors credit limits for each issuer based on inputs from issuer financial statements, rating agencies etc. Issuer Risk Limits are imposed on a single issuer as well as an industrial group, for all the schemes. Issuer risk limits cover the quantum of exposure, maximum tenor and in some instances the type of instruments that can be purchased. Risk limits for issuers are assigned after discussion at an internal Credit Committee meeting. The endeavour is to construct a portfolio with high credit quality. The Fund Manager is generally guided by, but not restrained by, the ratings announced by various rating agencies on the assets in the portfolio. In case of both rated and unrated debt securities, the independent credit appraisal process carried out by the RQA team is the same. For investment in unrated debt securities, prior approval of the Board of Trustees and the Board of asset management company is mandatory.
- iii. **Rating Migration Risk:** As the endeavour is to invest in high grade/quality securities, the probability of rating downgrade is low. The due diligence performed by the Risk and Quantitative Analysis (RQA) team before assigning credit limits should mitigate company-specific issues. The RQA team also monitors these limits after they have been assigned, on an ongoing basis
- iv. **Liquidity Risk:** High impact costs for liquidation of securities held in the portfolio - In a closed ended product, liquidity risk on account of underlying securities' market liquidity is mitigated as intermediate liquidity is not required. Liquidity access is done through contractual maturity of the security, which is in line with the term of the closed ended Scheme.
- v. **Concentration Risk:** Concentrated investment in a single security or a single issuer - we follow SEBI prescribed norms on maximum concentration to single issuers.
- vi. **Event Risk:** Price risk due to company or sector specific event - The endeavour is to invest in securities of issuers, which have high balance sheet strength in the investment horizon to eliminate single company risk.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

Std Obs 3

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

- Redemption due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any such tax consequences that may arise due to such Redemptions.
- The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any of the tax consequences that may arise, in the event that the Scheme is wound up for the reasons and in the manner provided in Statement of Additional Information.

The Fund may also disclose such details to regulatory and statutory authorities/bodies as may be required or necessary.
- In case the AMC or its Sponsor or its Shareholders or their affiliates/associates or group companies make substantial investment, either directly or indirectly in the Scheme. Redemption of Units by these entities may have an adverse impact on the performance of the Scheme. This may also affect the ability of the other Unit holders to redeem their units.
- As the liquidity of the Scheme investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Fund for Redemption of Unit may be significant in the event of an inordinately

large number of Redemption Requests or of a restructuring of the Scheme portfolio. In view of this, the Trustee has the right, in its sole discretion, to limit redemptions under certain circumstances - please refer to the paragraph “Right to Limit Redemptions in SAI”.

- **Foreign Account Tax Compliance Act (FATCA)**

FATCA is a United States (US) Federal Law, aimed at prevention of tax evasion by US Citizens and Residents (US Persons) through use of offshore accounts. FATCA provisions were included in the Hiring Incentives to Restore Employment (HIRE) Act, enacted by US Legislature. Under FATCA, withholding tax may be levied on certain US source income/receipt of the Schemes of the Mutual Fund, unless they are FATCA compliant.

SEBI vide its circular no. CIR/MIRSD/2/2014 dated June 30, 2014, has advised that Government of India and US Government have reached an agreement in substance on the terms of an Inter-Governmental Agreement (IGA) to implement FATCA and India is now treated as having an IGA in effect from April 11, 2014. - Detailed credit research is undertaken for each investment in the portfolio which includes qualitative and quantitative assessment of various issuers.
- Qualitative assessment involves analyzing the business profile of the issuer on several parameters including market share, competitive positioning, management quality, business diversification, regulatory environment, rating agency views and event risk if any.
- Quantitative assessment involves analyzing the financial profile of the issuer on parameters like balance sheet size, cash flow adequacy, debt servicing capability, working capital requirements, funding flexibility and capital adequacy.
- Typical ratios used in credit analysis are debt to equity (leverage), short term debt to total debt, interest coverage ratio, total debt to EBITDA, current ratio, EBITDA margin and net profit margin.
- To ascertain exposure limits on the issuer, we consider the total debt outstanding for the entity and apply a certain percentage based on our internal grading criteria. Overview of Debt Market in India

The Indian bond market comprises mainly of Government securities; bonds issued by Public Sector Undertakings (PSU), Development Financial Institutions (DFI) and Infrastructure-related agencies; debentures and money market instruments issued by corporate sectors and banks. The Government of India routinely issues Government securities and Treasury bills for liquidity and fiscal management. While the Government issues Treasury bills for 91 days, 182 days and 364 days in a discounted form, coupon-bearing Government securities are issued for maturity ranging from 1 year to as high as 30 years. Both Treasury bills and coupon-bearing securities are auctioned by the RBI on behalf of the Government of India. The Indian bond market has also witnessed increased issuance of bonds from Government-sponsored institutions, DFIs, and infrastructure-related agencies since 1995. These bonds are rated by credit rating agencies like CRISIL, ICRA, CARE and India Ratings. They are widely held by market participants because of their liquidity and reduced risk perception due to the government stake in some of them. The Indian corporate sector has also been frequently raising capital through issuance of non-convertible debentures and commercial papers. Most of the money is raised through the "Private placement" route. These debentures are mostly rated by rating agencies. While some of them trade very actively, most of them are not very liquid. Because of this, they normally trade at a marginally higher yield than bonds issued by PSU and other government-sponsored agencies. As the schemes are close ended scheme with fixed maturity dates, they will not use fixed income derivatives.

Overview of Money Market in India

Money market assets comprise Treasury Bills, Cash Management Bills, Call Money, Collateralized Borrowing and Lending Obligations (CBLO), Repo, Clearcorp Repo Order Matching System (CROMS), fixed deposits, commercial Papers, Certificate of Deposits, BRDS and any other assets approved by the Reserve Bank of India from time to time. Money market assets are liquid and actively traded segment of fixed income markets.

- Treasury bills and cash management bills are issued by the Government of India through regular weekly auctions. They are mostly subscribed by banks, state governments and other entities. As on 4 December 2015, total outstanding treasury bills are Rs. 4,78,010 crore*.
- Certificate of Deposits are issued by scheduled banks for their short-term funding needs. They are normally available for up to 364 days tenor. Certificate of deposits issued by public sector banks are normally rated A1+ (highest short-term rating) by various rating agencies. As on 13 November 2015, outstanding Certificate of Deposits are Rs. 1,81,420 crore*. Certificate of deposits currently trade at a spread of around 50 basis points** over comparable treasury bills as on 11 December 2015, for a one year tenor.

- Commercial Papers are issued by corporate entities for their short-term cash requirements. Commercial Papers are normally rated A1+ (highest short-term rating) or A1 by various rating agencies. As on 30 November 2015, total outstanding Commercial Papers are Rs. 3,27,380 crore*. Commercial papers trade at around 100 basis points** over comparable treasury bills as on 11 December 2015, for a one year tenor.
- Call Money, Repo, CBLO and CROMS are mainly used by the borrowers to borrow a large sum of money on an over-night basis. While Call Money is an unsecured mode of borrowing, CBLO, Repo and CROMS are secured borrowing backed by collaterals approved by the Clearing Corporation of India.

E. WHAT ARE THE INVESTMENT STRATEGIES?

Std Obs 7

The Investment Manager will invest in those debt securities that are rated investment grade by a domestic credit rating agency authorised to carry out such activity, such as CRISIL, ICRA, CARE etc. Where investment in unrated debt securities is sought to be made, specific approval of the Board of Directors of the AMC and Trustee shall be obtained prior to the investment. In-house research by the Investment Manager will emphasize on credit analysis, in order to determine credit risk. The Scheme will invest only in such securities which mature on or before the scheduled maturity date.

Risk Control Measures for investment strategy

Std Obs 5

Investments made from the scheme would be in accordance with the investment objective of the Scheme and the provisions of the SEBI (MF) Regulations / circulars. The AMC will strive to achieve the investment objective by way of a judicious portfolio mix comprising of debt, and money market instruments, within the asset allocation pattern indicated in the SID. Every investment opportunity would be assessed with regard to credit risk, interest rate risk and liquidity risk.

The internal systems have all the SEBI limits incorporated. This ensures that all limits are tracked at the entry stage itself. The system has the capability to alert certain deals that require special attention in case they are beyond certain prescribed parameters. The deals then cannot proceed further without the approval of the appropriate authority. Thus checks are in place to ensure no breach of limit occurs.

Borrowing & Lending by the Fund

The Scheme may borrow monies to meet temporary liquidity requirements for the purpose of repurchase or redemption of Units or the payment of interest or dividend to the Unit holders. However, such borrowing shall be restricted to 20% of the net assets of the Scheme and for a maximum period of six months. The limit of 20% may be revised by the Fund and to the extent the Regulations may permit.

The Fund may raise such borrowings, secured or unsecured, from any person or entity as it may deem fit, including Sponsor or Shareholders of any of their associate / group / affiliate entities or banks, after approval by the Trustee, at market related rates.

Investment by AMC, Sponsor etc.
