I. INTRODUCTION

A. RISK FACTORS

1. Standard Risk Factors

- a. Mutual funds and securities investments are subject to market risks and there is no assurance or guarantee that the Scheme's objective will be achieved.
- b. As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of investment in the scheme may go up or down.
- c. Past performance of the Sponsor / AMC / Mutual Fund or its affiliates does not indicate the future performance of the scheme(s) of the Mutual Fund.
- d. State Bank of India, the sponsor, is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution made by it of an amount of Rs. 5 lakhs towards setting up of the mutual fund.
- e. SBI Dual Advantage Fund - Series XIII is only the name of the scheme and does not, in any manner, indicate either the quality of the scheme or its future prospects and returns.
- f. The NAV of the Schemes' Units may be affected by change in the general market conditions, factors and forces affecting capital markets in particular, level of interest rates, various market related factors and trading volumes.
- g. The present scheme is not a guaranteed or assured return scheme.
- h. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.

2. Scheme-specific Risk Factors

- i) SBI Dual Advantage Fund - Series XIII will be investing in debt instruments, Government Securities and money market instruments (such as term/notice money market and reverse repos) & Equity and equity related instruments including derivatives. Trading volumes and settlement periods inherently restrict the liquidity of the scheme's investments. In the event of a restructuring of the scheme's investment portfolio, these periods may become significant.
- ii) Debt & money market securities investments under the scheme may also be subject to the following risks:
 - a) Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuers' ability to meet the obligations.
 - b) Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
 - c) Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The value of investments will appreciate/depreciate if the interest rates fall/rise. However if the investments are held on till maturity of the investments, the value of the investments will not be subjected to this risk.
 - d) Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
 - e) Risk associated with unrated debt instruments - Investments in unrated instruments are subject to the risk associated with investments in any other fixed income securities such as credit risk, interest rate risk etc. However, investments in unrated instruments are considered to be subject to greater risk of loss of principal and interest than rated instruments.
- iii) Securitized debt investments under the scheme may also be subject to the following risks:
 - a) Liquidity risk: There is no assurance that a deep secondary market will develop for the instrument. This could limit the ability of the investor to resell them.

- b) Limited Recourse: The instruments represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the buyer of the security against the Investors' Representative.
- c) Delinquency and Credit Risk: Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Monthly Investor Payouts to the Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of an Obligor to repay his obligation, the Servicer may repossess and sell the Vehicle/ Asset. However many factors may affect, delay or prevent the repossession of such Vehicle/Asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such Vehicle/Asset may be sold may be lower than the amount due from that Obligor.
- d) Risks due to possible prepayments: Full prepayment of a contract may lead to an event in which investors may be exposed to changes in tenor and yield.
- e) Bankruptcy of the Originator or Seller: If the service provider becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that either the sale from each Originator was not a sale then an Investor could experience losses or delays in the payments due under the instrument.

iv) Investment in equity & equity related investments may be subject to the following risks:

1. Equity and Equity related instruments are volatile in nature and are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro economic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.
2. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the scheme's portfolio may result, at times, in potential losses to the scheme, should there be a subsequent decline in the value of the securities held in the scheme's portfolio.
3. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.
4. The AMC may invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

v) Risk associated with Stock Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. If the Scheme undertakes stock lending under the regulations, it may be exposed to the risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary

vi) Risks associated with Investing in Derivatives

The Scheme would primarily use various derivative products in an attempt to protect the value of portfolio and enhance the unit holder interest. As and when the scheme trades in derivative market, there are risk factors and issues concerning the use of derivatives that the investors should understand. Derivative products are specialized instrument that require investment technique and risk analysis different from those associated with stocks. The use of derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivative requires the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "Counter party") to comply with the terms of the derivative contract. Other risks in using derivative include the risk of mispricing or improper valuation of derivative and the inability of derivative to correlate perfectly with underlying assets, rates and indices. Thus, derivatives are highly leveraged instruments. The risk of loss associated with futures contracts is potentially unlimited due to the low margin deposits required and the extremely high degree of leverage involved in futures pricing. As a result, a relatively small price movement in a futures contract may result in

an immediate and substantial loss or gain. There may be a cost attached to selling or buying futures or other derivative instrument. Further there could be an element of settlement risk, which could be different from the risk in settling physical shares. The possible lack of a liquid secondary market for a futures contract or listed option may result in inability to close futures or listed option positions prior to their maturity date. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involve uncertainty and decision of the Fund Manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risk associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.

vii) Risk associated with Close Ended Scheme

In a close ended scheme, redemption / repurchase shall not be allowed prior to maturity of the Scheme. Redemption will be allowed only on maturity of the Scheme. Scheme will mature at the end of the close ended period. For liquidity purpose units of the scheme are to be listed on Stock Exchange. Investors who wish to trade on the exchange and Investors wishing to exit / redeem before the scheduled maturity may do so through stock exchange mode where the scheme will be listed. For the units listed on the exchange it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units and investor may not get the desired return. Also there may not be sufficient liquidity on the stock exchange for the investors to exit from the stock exchange mode.

viii) Risk factors associated with repo transactions in corporate debt securities:

Corporate Bond Repo transactions are currently done on OTC basis and settled on non guaranteed basis. Credit risks could arise if the counterparty does not return the security as contracted on due date. The liquidation of underlying bonds in case of counterparty default would depend on the liquidity of the bond and market conditions at that time. This risk is largely mitigated, as the choice of counterparties is largely restricted and also haircuts are applicable on the underlying bonds depending on credit ratings. Also operational risks are lower as such trades are settled on a DVP basis.

In the event of the scheme being unable to pay back the money to the counterparty as contracted in case of transactions as a borrower, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Mutual Fund. Thus, the scheme may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.

B. OTHER SCHEME SPECIFIC RISK FACTORS

1. The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the scheme is wound up for the reasons and in the manner provided under the Scheme Information Document & Statement of Additional Information.
2. Redemption by the unit holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund their directors or their employees shall not be liable for any tax consequences that may arise.
3. The tax benefits described in the SAI & SID are as available under the present taxation laws and are available subject to relevant condition. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors and Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unit holder is advised to consult his/her/its own professional tax advisor.
4. The Mutual Fund is not assuring any dividend nor is it assuring that it will make any dividend distributions. All dividend distributions are subject to the availability of distributable surplus and would depend on the performance of the scheme.
5. Investors should study this Scheme Information Document and the Statement of Additional Information carefully in its entirety and should not construe the contents hereof as advise relating to legal, taxation, investment or any other matters. Investors are advised to consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming units, before making a decision to invest / redeem Units.

6. Mutual funds and securities investments are subject to market risks and there can be no assurance or guarantee that the Scheme objectives will be achieved. Investors should study this Scheme Information Document and the Statement of Additional Information carefully in its entirety before investing.
7. There will be no prior intimation or prior indication given to the Unit holders when the composition/ asset allocation pattern under the scheme changes within the broad range defined in this Scheme Information Document.
8. Although, the objective of the Scheme is to generate optimal returns, the objective may or may not be achieved. The investors may note that if the AMC/Investment Manager is not able to make right decision regarding the timing of increasing exposure in debt securities in times of falling equity market, it may result in negative returns.
9. Investment decisions made by the AMC may not always be profitable, even though it is intended to generate capital appreciation and maximize the returns by actively investing in equity and equity related securities.

C. RISK CONTROL STRATEGIES:

Investments in debt, money market, equity and equity related securities including derivatives carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For risk control, the following may be noted:

Liquidity risks:

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.

Interest Rate Risk:

Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk. Additionally, the Scheme will invest in securities maturing on or before the maturity of the Scheme. Hence, while the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more stable. To that extent the interest rate risk will be mitigated at the maturity of the scheme.

Credit Risks

Credit risk shall be mitigated by investing in rated papers of the companies having the sound back ground, strong fundamentals, and quality of management and financial strength of the Company.

Volatility risks:

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification. Further, the Scheme will invest in a basket of debt and money market securities maturing on or before maturity of the Scheme with a view to hold them till the maturity of the Scheme. To that extent the Volatility risk will be mitigated in the scheme.

D. CREDIT EVALUATION POLICY & DUE DILIGENCE FOR CREDIT RISK

a) CREDIT EVALUATION POLICY

Credit Analysis is a bottom up approach starting with looking at each individual issuer, industry, terms and covenants of a particular issue, etc. Individual issuer level exposures are taken only after approval from

investment committee, i.e. issuer becoming part of "Accepted Credit Universe". A team of credit analyst will do a detailed analysis and prepare an initiation note to introduce an issuer to the universe.

For every issuer we focus on 4 Cs of credit

- Capacity
- Character
- Collateral
- Covenants

Key focus areas are

- Management Quality
- Financial Analysis
- Business Analysis
- Industry Analysis
- Regulatory Environment
- Feedback from Creditors
- Other Issues; auditor report and qualifications, etc

Regular management interaction at various levels, supported by plant visits, interaction with rating agencies is part of the process.

Once a credit limit is set, it is regularly monitored based on internal Tier classification.

b) DUE DILIGENCE FOR CREDIT RISK

While carrying out due diligence for credit risk, following parameters/attributes are analysed:

- Management Quality** - It includes assessment of management quality, reviewing promoter background and track record, performance of group companies and possibility of group support, internal control systems, succession plans & repayment track record including that of other companies in the group.
- Financial Analysis** - It includes analysis of Balance sheet, Profit and Loss account, and cash flow statement. Ratio analysis for the past years including quarterly/half yearly results analysis wherever available. Different set of ratios are analysed for corporates, banks, NBFCs etc.
- Business Analysis** - It includes understanding of competitive position and competitor analysis on key parameters, strategies for growth, technical and marketing skill set, manufacturing process, productivity details and future expansion plans.
- Industry Analysis** - It includes assessment of current and estimated demand and supply scenario, Industry structure (fragmentation), End-user analysis of demand, Industry cycles & seasonal factors affecting the business, Entry barriers, threat of import and prospects of exports, Competition from global players, Outlook for key inputs and sensitivity.
- Regulatory Environment** - It is tracked separately for different industries in terms of Government policies, Impact of changes in taxation policies, other regulatory provisions and impact of them.

E. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. These conditions will be complied with immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfillment with the condition of minimum 20 investors, the Scheme(s) shall be wound up in accordance with Regulation 39 (2) (c) of SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25% holding by a single investor on the date of allotment, the application to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within five business days of the date of closure of the New Fund Offer.

F. SPECIAL CONSIDERATIONS, if any

(i) Termination of the scheme

The Trustees reserve the right to terminate the scheme at any time. Regulation 39(2) of the SEBI Regulations provides that any scheme of a mutual fund may be wound up after repaying the amount due to the Unit holders:

- (a) on the happening of any event which, in the opinion of the Trustees, requires the scheme to be wound up; or
- (b) if 75% of the Unit holders of a scheme pass a resolution that the scheme be wound up; or
- (c) if SEBI so directs in the interest of the unit holders.

Where a scheme is wound up under the above Regulation, the trustees shall give a notice disclosing the circumstances leading to the winding up of the scheme:

- (a) to SEBI; and
- (b) in two daily newspapers having circulation all over India & a vernacular newspaper circulating at the place where the mutual fund is formed.

In case of termination of the scheme, regulation 41 of the SEBI (mutual Funds) Regulations, 1996 shall apply.

- (ii) Investors should study the Scheme Information Document carefully in its entirety and should not construe the contents thereof as advice relating to legal, taxation, investment or any other matters. The Scheme shall maintain separate records for holding the cash and cash equivalents / securities for this purpose. The securities held shall be marked to market by the AMC to ensure full coverage of investments made in derivative products at all times.

SEBI has also vide circular DNPDP/Cir-29/2005 dated 14th September 2005 permitted Mutual Funds to participate in the derivatives market at par with Foreign Institutional Investors (FII). Accordingly, Mutual Funds shall be treated at par with a registered FII in respect of position limits in index futures, index options, stock options and stock futures contracts.

I. Position Limit

The position limits for the Mutual Fund and its schemes, for transaction in derivatives segment are in compliance to the SEBI Circular no. SEBI/DNPDP/Cir-31/2006 dated September 22, 2006, and to all such amendments as applicable from time to time. The position limits are given as under:

i. Position limit for the Mutual Fund in index options contracts

The Mutual Fund position limits in index option contracts on a particular underlying index shall be higher of:

- a. Rs. 500 Crore; or
- b. 15% of the total open interest in the market in index options contracts.

This limit would be applicable on open positions in all options contracts on a particular underlying index.

ii. Position limit for the Mutual Fund in index futures contracts:

The Mutual Fund position limits in index futures contracts on a particular underlying index shall be higher of:

- a. Rs. 500 Crore; or
- b. 15% of the total open interest in the market in index futures contracts.

This limit would be applicable on open positions in all futures contracts on a particular underlying index.

iii. Additional position limit for hedging

In addition to the position limits at point (i) and (ii) above, the Mutual Fund may take exposure in index Derivatives subject to the following limits:

- 1. Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.
- 2. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.

iv. Position limit for Mutual Funds for stock based derivative contracts

- 1. For stocks having applicable market-wise position limit (MWPL) of Rs. 500 crores or more, the combined futures and options position limit shall be 20% of applicable MWPL or Rs. 300 crores, whichever is lower and within which stock futures position cannot exceed 10% of applicable MWPL or Rs. 150 crores, whichever is lower.
- 2. For stocks having applicable market-wise position limit (MWPL) less than Rs. 500 crores, the combined futures and options position limit would be 20% of applicable MWPL and futures position cannot exceed 20% of applicable MWPL or Rs. 50 crore which ever is lower.

v. Position limit for each scheme of a Mutual Fund

The scheme-wise position limit / disclosure requirements shall be -

- 1. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of:

1% of the free float market capitalization (in terms of number of shares).

Or

5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts).

- 2. This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.

Illustrations

i. Arbitrage:

Buy 1000 stocks of Company A at Rs 100 and sell the equivalent of stocks future of the Company A at Rs 101.

- 1. Market goes up and the stock end at Rs 150.

At the end of the month the future expires automatically:

At the settlement date we assume that future price = closing spot price = Rs 150

- a. Gain on stock is $1000 \times (150 - 100) = \text{Rs } 50000$

- b. Loss on future is $1000 \times (101 - 150) = \text{Rs} - 49000$
 - c. Then gain realized is $50\,000 - 49\,000 = \text{Rs} 1000$
2. Market goes down and the stock end at Rs 50.

At the end of the month the future expires automatically:

At the settlement date we assume that future price = closing spot price = Rs 50

- a. Loss on stock is $1000 \times (50 - 100) = \text{Rs} - 50000$
- b. Gain on future is $1000 \times (101 - 50) = \text{Rs} 51000$

Then gain realized is $51000 - 50000 = \text{Rs} 1000$

ii. Unwinding an arbitrage position:

Buy 1000 stocks of Company A at Rs 100 and sell the equivalent of stocks future of the Company A at Rs 101.

The market goes up and at some point of time during the month the stock trades at Rs 150 and the future trades at Rs 149 then we unwind the position:

1. Buy back the future at Rs 149 : loss incurred is $(101 - 149) \times 1000 = \text{Rs} - 48\,000$
2. Sell the stock at Rs 150 : gain realized : $(150 - 100) \times 1000 = \text{Rs} 50\,000$
3. Net gain is $50\,000 - 48\,000 = \text{Rs} 2\,000$

iii. Roll over the futures:

In this case we keep the underlying stock position intact and roll over the futures position into next month. For example, if the underlying stock is trading around Rs 150 on or closer to the expiry date, the stock future is also generally likely to trade closer to similar levels. In such a case, if the next month futures are trading at levels higher than the current month futures, we roll over the future position to the next month (i.e. instead of letting the current month future expire (on expiry day), we buyback the current month future and sell the next month future in its place, keeping the underlying stock position unchanged):

- a. Stock future next month is at Rs 151
- b. Stock future actual month is at Rs 150
- c. Then sell future next month at Rs 151 and buy back actual future at Rs 150 => gain of $1000 \times (151 - 150) = \text{Rs} 1000$ and the arbitrage is continuing.

In case, the future price trades at discount to spot price (any time during the period till the expiry date) then the original position will be squared by buying the future and selling the spot market position.

Debt Derivatives

The Scheme may use derivatives instruments like Interest Rate Swaps, Forward Rate Agreements or such other derivative instruments as may be introduced from time to time for the purpose of hedging and portfolio balancing and as may be permitted under the Regulations and guidelines.

Interest Rate Swaps

Interest rate swap is a strategy in which one party exchanges a stream of interest for another party's stream. Interest rate swaps are normally 'fixed against floating', but can also be 'fixed against fixed' or 'floating against floating' rate swaps. Interest rate swaps will be used to take advantage of interest-rate fluctuations, by swapping fixed-rate obligations for floating rate obligations, or swapping floating rate obligations to fixed-rate obligations.

A floating-to-fixed swap increases the certainty of an issuer's future obligations. Swapping from fixed-to-floating rate may save the issuer money if interest rates decline. Swapping allows issuers to revise their debt profile to take advantage of current or expected future market conditions..

Forward Rate Agreement (FRA)

A FRA is basically a forward starting IRS. It is an agreement between two parties to pay or receive the difference between an agreed fixed rate (the FRA rate) and the interest rate (reference rate) prevailing on a stipulated future date, based on a notional principal amount for an agreed period. The only cash flow is the difference between the FRA rate and the reference rate. As is the case with IRS, the notional amounts are not exchanged in FRAs.

i) Advantages of Derivatives

The volatility in Indian debt markets has increased over last few months. Derivatives provide unique flexibility to the Scheme to hedge part of their portfolio. Some of the advantages of specific derivatives are as under:

ii) Interest Rate Swaps and Forward rate Agreements

Bond markets in India are not very liquid. Investors run the risk of illiquidity in such markets. Investing for short-term periods for liquidity purposes has its own risks. Investors can benefit if the Scheme remains in call market for the liquidity and at the same time take advantage of fixed rates by entering into a swap. It adds certainty to the returns without sacrificing liquidity.

v. Illustration: Interest Rate Swap (IRS)

Assume that a Mutual Fund has INR 10 crore, which is to be deployed in overnight products for 7 days. This money will be exposed to interest rate risk on daily basis. The Scheme can buy an Interest Rate Swap receiving fixed interest rate and paying NSE MIBOR.

The deal will be as under:

The cash flows on a notional principal amount of Rs. 10 crores would be-

(R. in Crore)

	Principal	NSE MIBOR	Interest	Amount	
Day 1		10.0000	8.10%	.0022192	10.00221918
Day 2		10.00222	8.20%	.0022466	10.00446575
Day 3		10.00447	8.30%	.002274	10.00673973
Day 4 (for 2 days)	Saturday	10.00674	8.15%	.0044658	10.01120548
Day 5	Sunday		Holiday		
Day 6		10.01121	8.40%	.0023014	10.01350685
Day 7		10.01351	8.50%	.0023288	10.01583562
Floating Interest Payable					.0158356164
Fixed Interest Receivable					.0167808219
Net Receivable for Mutual Fund receiving fixed					.0009452055

In this example Mutual Fund stands to gain by receiving fixed rates. As the NSE MIBOR floating rate is decided daily, in adverse scenario, the Mutual Fund may have to pay the difference.

The counter-party providing Swap, Options, Forward Rate Agreements (FRAs) will do the same at a cost.

Risk factors Interest rate swaps strategy:

Risk Factor: The risk arising out of uses of the above derivative strategy as under:

- Lack of opportunities available in the market.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Interest rate swaps require the maintenance of adequate controls to monitor the transactions entered into, the ability to forecast failure of another party (usually referred to as the 'counter party') to comply with the terms of the derivatives contract.

Illustration for Forward Rate Agreement

Further the exposure limits for trading in derivatives by Mutual Funds specified by SEBI vide its Circular No. Cir/IMD/DF/11/2010 dated August 18, 2010 are as follows:

1. The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.
2. Mutual Funds shall not write options or purchase instruments with embedded written options.
3. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
4. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
5. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:
 - a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 3.
 - c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
6. Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
7. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 3.
8. Definition of Exposure in case of Derivative Positions
9. Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts

Option bought	Option Premium Paid * Lot Size * Number of Contracts
---------------	--

II. The risks involved in derivatives are:

1. The cost of hedge can be higher than adverse impact of market movements
2. The derivatives will entail a counter-party risk to the extent of amount that can become due from the party.
3. An exposure to derivatives in excess of the hedging requirements can lead to losses.
4. An exposure to derivatives can also limit the profits from a genuine investment transaction.
5. Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities and also on the suitable and acceptable benchmarks.
6. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

III. Methods to tackle these risks:

1. Hedging will not be done on a carpet basis but based on a view about interest rates, economy and expected adverse impact.
2. Limits of appropriate nature will be developed for counter parties
3. Such an exposure will be backed by assets in the form of cash or securities adequate to meet cost of derivative trading and loss, if any, due to unfavorable movements in the market.

IV. The losses that may be suffered by the investors as a consequence of such investments:

1. As the use of derivatives is based on the judgment of the Fund Manager, the view on market taken may prove wrong resulting in losses.
2. The upside potential of investments may be limited on account of hedging which may cause opportunity losses.

V. The use of derivatives for hedging will give benefit of:

1. Curtailing the losses due to adverse movement in interest rates
2. Securing upside gains at cost

VI. VALUATION OF DERIVATIVES

- i. The traded derivatives shall be valued at market price in conformity with the stipulations of sub clauses (i) to (v) of clause 1 of the Eighth Schedule to the SEBI Regulations.
- ii. The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the SEBI Regulations.

VII. REPORTING OF DERIVATIVES

The AMC shall cover the following aspects in their reports to trustees periodically, as provided for in the Regulations:

- i. Transactions in derivatives, both in volume and value terms.
- ii. Market value of cash or cash equivalents / securities held to cover the exposure.
- iii. Any breach of the exposure limit laid down in the scheme Information document.

iv. Shortfall, if any, in the assets covering investment in derivative products and the manner of bridging it.

The Trustees shall offer their comments on the above aspects in the report filed with SEBI under sub regulation (23) (a) of regulation 18 of SEBI Regulations.

L. DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Institutional Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks), Treasury Bills (issued by RBI) and the CBLO (collateralized lending and borrowing facility).

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and CBLO are guaranteed and done by a central counterparty, the Clearing corporation of India (CCIL). Money market deals involving CD's and CP's are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE (ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments as on December 22, 2015:

Instruments	Indicative yield range
Overnight rates	6.85%-7.00%
90 day Commercial Paper	7.70%-7.85%
91-day T-bill	7.15%-7.19%
1 year G-Sec.	7.20%-7.25%
5 year G - Sec	7.74%-7.78%
10 year G-Sec.	7.77%-7.779%
1 year AAA Bond	8.15%-8.25%
5 year AAA Bond	8.38%-8.45%

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP's and CD's which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments.

M. PAST PERFORMANCE OF THE SCHEME

This scheme is a new scheme and does not have any performance track record.

N. INVESTMENTS OF AMC IN THE SCHEME

The AMC may invest in the scheme, such amount, as they deem appropriate. But the AMC shall not be entitled to charge any management fees on this investment in the scheme. Investments by the AMC will be in accordance with Regulation 24(3) of the SEBI (MF) Regulations, 1996 which states that:

"The asset management company shall not invest in any of its schemes unless full disclosure of its intention to invest has been made in the Scheme Information Document (SID), provided that the asset management company shall not be entitled to charge any fees on its investment in the scheme."

O. INVESTMENTS IN OTHER SCHEMES

According to the Clause 4 of Schedule 7 read with Regulation 44(1), of the SEBI (MF) Regulations, 1996:

"A scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investments made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund."

P. STOCK LENDING

The scheme may engage in stock lending. Stock lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation. The securities lent will be returned by the borrower on expiry of the stipulated period. The Fund may in future carry out stock-lending activity under the scheme, in order to augment its income. Stock lending may involve risk of default on part of the borrower. However, this risk will be substantially reduced as the Fund has opted for the "Principal Lender Scheme of Stock Lending", where entire risk of borrower's default rests with approved intermediary and not with the Fund. There may also be risks associated with Stock Lending such as liquidity and other market risks. The AMC will apply the following limits, if it desire to engage in Stock Lending:

- (a) Not more than 20% of the net assets will be deployed in Stock Lending
- (b) Not more than 5% of the net assets will be deployed in Stock Lending to any single counter party.

Q. DISCLOSURES PERTAINING TO SECURITIZED DEBT

Risk profile of securitized debt vis-a-vis risk appetite of the scheme

The risk of investing in securitized debt is similar to investing in debt securities. However it differs from other debt securities in two ways:

- **Liquidity:** Typically the liquidity of securitized debt is less than similar debt securities.
- **Pre-payment:** For certain types of securitized debt (backed by mortgages, personal loans, credit card debt, etc.), there is an additional pre-payment risk. Pre-payment risk refers to the possibility that loans are repaid before they are due, which may reduce returns if the re-investment rates are lower than initially envisaged.

Policy relating to originators:

A securitization transaction involves sale of receivables by the originator (a bank, non-banking finance company, housing finance company, or a manufacturing/service company) to a Special Purpose Vehicle (SPV), typically set up in the form of a trust. Investors are issued rated Pass Through Certificates (PTCs), the proceeds of which are paid as consideration to the originator. In this manner, the originator, by selling his loan receivables to an SPV, receives consideration from investors much before the maturity of the underlying loans. Investors are paid from the collections of the underlying loans from borrowers. Typically, the transaction is provided with a limited amount of credit enhancement (as stipulated by the rating agency for a target rating), which provides protection to investors against defaults by the underlying borrowers.

The scheme will invest in instruments of the originator only if the originator has an investment grade rating. Over and above the credit rating assigned by credit rating agencies to the originator, SBI MF will conduct an additional evaluation on

- Previous track record on origination, servicing and performance of existing pools

- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:
 - Outlook for the economy (domestic and global)
 - Outlook for the industry
 - Originator/Pool specific factors

For single loan PTC, credit evaluation of the underlying corporate will be carried out as with any other debt instruments

Risk mitigation strategies:

Risk mitigation strategies will depend on each asset class, whether they are unsecured loans or secured, seasoning, collection history, past recovery rates, originator's financial profile, servicing performance, etc for each asset class. SBI MF will invest in pools with investment grade rating by SEBI recognised rating agencies. In addition some specific risk mitigation measures will include

Risk	Mitigants
Credit Risk	Analysis of originator with respect to past track record, systems and processes, performance of pools, collateral adequacy and disclosure frequency; Analysis of specific pool with respect to nature of underlying asset, seasoning, loan sizes, loan to vale ratio, geographical diversity, etc
Counterparty Risk	Past track record of handling securitized transactions, disclosure adequacy and frequency
Legal Risk	Check with rating agency that investors' interest is not compromised, specific protection measures like bankruptcy remoteness, etc are built in Separate in-house legal opinion on transactions,
Market Risk	Liquidity, Prepayment and Interest Rate Risk Analysis and level of their mitigation through transaction structure and credit enhancements provided

The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments:

Framework that will be applied while evaluating investment decision relating to a pool securitization transaction:

Characteristics/Type of Pool	Mortgage Loan	Commercial Vehicle and Construction Equipment	CAR	2 wheelers	Micro Finance Pools	Personal Loans	Single Sell Downs	Others
Approximate Average maturity (in Months)	60-120 months	12-48 months	12-48 months	12-24 months	12 months	12-36 months	NA	NA
Collateral margin (including cash ,guarantees, excess interest spread , subordinate tranche)	5-20%	5-20%	5-20%	5-20%	10-30%	10-30%	NA	NA
Average Loan to Value Ratio	Less than 90%	Less than 90%	Less than 90%	Less than 90%	NA	NA	NA	NA
Average seasoning of the Pool	6-12 months	3-6 months	3-6 months	3-6 months	3-12 weeks	1-3 months	0-3 months	NA
Maximum single exposure range	3-4%	3-4%	Retail	Retail	Retail	Retail	NA	NA
Average single exposure range %	1-1.5%	1.5-2%	Retail	Retail	Retail	Retail	NA	NA

Information illustrated in the Table above, is based on the current scenario relating to Securitized Debt market and is subject to change depending upon the change in the related factors. The investment committee will review the above guidelines considering the extant RBI guidelines pertaining to securitization.

We endeavor to consider some of the important risk mitigating factors for securitized pool i.e.

⇒ Average original maturity of the pool: based on different asset classes and current market practices

- ⇒ Collateral margin including cash collateral and other credit enhancements
- ⇒ Loan to Value Ratio
- ⇒ Average seasoning of the pool, which is a key indicator of past pool performance
- ⇒ Default rate distribution
- ⇒ Geographical Distribution
- ⇒ Maximum single exposure: Retail pools (passenger cars, 2-wheelers, Micro finance, personal loans, etc) are generally well diversified with maximum and average single exposure limits within 1%.

As illustrated above, these factors vary for different asset classes and would be based on interactions with each originator as well as the credit rating agency

Minimum retention period of the debt by originator prior to securitization:

The AMC will invest in securitized debt as per final RBI guidelines issued on May 7, 2012 and as amended till date.

Minimum retention percentage by originator of debts to be securitized

The AMC will invest in securitized debt as per final RBI guidelines issued on May 7, 2012 and as amended till date.

The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund

Investments made by the Scheme in any asset are done based on the requirements of the Scheme and is in accordance with the investment policy. All Investments are made entirely at an arm's length basis with no consideration of any existing / consequent investments by any party related to the transaction (originator, issuer, borrower etc.). Investments made in Securitized debt are made as per the Investment pattern of the Scheme and are done after detailed analysis of the underlying asset. There might be instances of Originator investing in the same scheme but both the transactions are at arm's length and avoid any conflict of interest.

The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt

As with any other debt instruments, investment in securitized debt instruments will be closely monitored by a dedicated team of credit analysts, ratings of any such instruments will be continuously tracked and periodic performance report from Trustee and MIS from Originators, if any would be scrutinized closely

R. INVESTMENT IN REPO IN CORPORATE DEBT SECURITIES

In accordance with the SEBI Circular no. CIR / IMD / DF / 19 / 2011 dated November 11, 2011 read with SEBI Circular no. 3. **Tenor of collateral - The tenor of** the repo would be capped at 3 months. This would apply to transactions where the scheme are either a lender or a borrower. The tenor of the collateral would be capped at 10 years. Prior approval of the investment committee of SBI Mutual Fund would be taken for any extension of the term of the repo or increase in the tenor of the collateral in compliance with the applicable SEBI guidelines.
4. **Applicable haircuts** - The applicable minimum haircut would be as per the extant RBI and SEBI guidelines. As per RBI circular RBI/2012-13/365 IDMD.PCD. 09/14.03.02/2012-13 dated 07/01/2013, all corporate bond repo transactions will be subject to a minimum haircut given as below. The minimum haircut will be applicable on the market value of the corporate debt securities prevailing on the day of trade of the 1st leg. The schememay ask for a higher haircut (while lending) or give a higher haircut (while borrowing) depending on the prevailing market situation.

Rating	AAA	AA+	AA
Minimum Haircut	7.50%	8.50%	10%
